Web 2.0 and Records Managers: Are We Ready?

Robin Riat, CRM
NARA Central Plains Region

What is Web 2.0?

- “Web 2.0 is a term describing the trend in the use of World Wide Web technology and web design that aims to enhance creativity, information sharing, and, most notably, collaboration among users”

- Wikipedia

Web 2.0 is all about:

Sharing

Need a Vacation? Consider a Cruise
By: Jim | April 09, 2008 | Category: Travel
I caught the cruise bug a few years ago. And no, I don't mean the norovirus. Some friends talked me into joining them on an all-inclusive Caribbean cruise. It didn't take much arm-twisting since the idea of seeing a nearly-new cruise ship capable of holding nearly 5,000 passengers and crew sounded interesting. So did the chance to take a vacation where the hardest decision of the day was whether to wear SPF 30 or 45.

Checkpoint Evolution: Passenger Engagement
Passenger engagement... what is it? Is it the new romantic comedy about two passengers who meet at an airport and decide to get married? Not quite.
Passenger engagement is all about the way we are moving to an entirely different environment at our checkpoints. Checkpoints are noisy, confusing places that often leave passengers feeling as if they just ran through a gauntlet.
While we are adopting process and technology upgrades, we are also enhancing the training of our officers to include a heavy focus on better communication at the checkpoint between officers and passengers.
We'd like to change the environment for two reasons. First off, passengers deserve to travel through our checkpoints without feeling stressed. We all have enough stress in our day to day lives don't we?
Secondly, the more relaxed passengers are, the easier it will be for our

The Puget Sound Information Challenge is now over... thanks to your participation, we received over 175 contributions of ideas, data and applications, and over 18,000 pages were viewed on the site during the challenge.

What is the Challenge?

Former EPA Administrator Bill Ruckelshaus (now Chair of the Puget Sound Partnership Leadership Council) challenged the National Environmental Information Symposium participants to identify and share the best information resources, tools, ideas, and contacts in their arsenal to inform the protection of the Puget Sound. This is the challenge! The catch is that it must be done in the next 48 hours!

How Will the Challenge Work?

Participate and find out! EPA's Assistant Administrator for Environmental Information, Molly O'Neill has invited all symposium participants, and their networks of knowledgeable people, to participate in an accelerated collaboration. We will use this wiki, to pool our collective knowledge and build something together. And don't worry, you do not have to know how to use a wiki to participate; but you may want to learn!. This is an opportunity to test collaborative technologies, and ourselves. Together, we can explore what works and doesn't work in ***accessing environmental information.*** We've established a "mash up room" staffed by a team of content and technology experts who will manage content and ideas as information is submitted. Molly and Linda Travers, Deputy Assistant Administrator, will update us all on our progress during the symposium. A final summary and demonstration will be featured at the closing session of the National Environmental Information Symposium.

What kind of information are we looking for?

The wiki outlines the wide range of information we think will be of value to the Partnership. In

How Can You Participate—NOW?

Click Bill's picture to the left to hear what he needs. Then check out the "About Puget Sound" section to get up to speed on Puget Sound and see the "Help" section for tips on how to add and format content, or jump right in to contribute your ideas, resources or applications by:

- Selecting Contribute Now! from the navigation menu on any page.
- Creating an account, login and beginning to add or edit content on the wiki.
- Sending us an email with your contribution to contribute@epageo.org.
- Tagging your content on other websites including Flickr, YouTube and Technorati.
- Calling 314-485-4641 to provide your input
- Connect to General Comments and
