**DEPARTMENT OF COMMERCE**

**National Oceanic and Atmospheric Administration**

RIN 0648-XH17

**Atlantic Highly Migratory Species (HMS); Atlantic Shark Management Measures; Research Fishery**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of intent; request for applications.

**SUMMARY:** NMFS announces its request for applications for the 2009 shark research fishery from commercial shark fishermen with a directed or incidental permit. The shark research fishery allows for the collection of fishery-dependent data for future stock assessments while also allowing NMFS and commercial fishermen to conduct cooperative research to meet the shark research objectives for the Agency. The only commercial vessels authorized to land sandbar sharks are those participating in the shark research fishery. Shark research fishery permittees may also land non-sandbar large coastal sharks (LCS), small coastal sharks (SCS), and pelagic sharks. Commercial vessels not participating in the shark research fishery may only land non-sandbar LCS, SCS, and pelagic sharks. Commercial shark fishermen who are interested in participating in the shark research fishery need to submit a completed Shark Research

Fishery Permit Application in order to be considered. Generally, these permits will be valid through December 31, 2009, unless otherwise specified, subject to the terms and conditions of individual permits.

**DATES:** Shark Research Fishery Applications must be received no later than 5 p.m., local time, on December 3, 2008.

**ADDRESSES:** Please submit completed applications to the HMS Management Division at:

- Mail: Attn: Jess Beck, HMS Management Division (F/SF1), NMFS, 1315 East-West Highway, Silver Spring, MD 20910.

- Fax: (301) 713-1917

For copies of the Shark Research Fishery Permit Application, please write to the HMS Management Division at the address listed above, or call (301) 713-2347 (phone), or (301) 713-1917 (fax). Copies of the Shark Research Fishery Application are also available at the HMS website at <http://www.nmfs.noaa.gov/sfa/hms/index.htm>.

**FOR FURTHER INFORMATION CONTACT:**

Karyl Brewster-Geisz or Jess Beck, at (301) 713-2347 (phone) or (301) 713-1917 (fax).

**SUPPLEMENTARY INFORMATION:** The Atlantic shark fisheries are managed under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). The Consolidated HMS Fishery Management Plan (FMP) is implemented by regulations at 50 CFR part 635.

The final rule for Amendment 2 to the Consolidated HMS FMP (73 FR 35778, June 24, 2008, corrected at 73 FR 40658, July 15, 2008) established, among other things, a shark research fishery to maintain time series data for stock assessments and to meet NMFS' 2009 research objectives. The shark research fishery also allows selected commercial fishermen the opportunity to earn revenue from selling more sharks, including sandbar sharks, than allowed in the rest of the commercial shark fishery. Only the commercial shark fishermen selected to participate in the shark research fishery are authorized to land/harvest sandbars subject to the sandbar quota available each year. The base quota is 87.9 mt dw/year through December 31, 2012, although this number may be reduced in the event of overharvests, if any, and 116.6 mt dw/year starting on January 1, 2013. The selected shark research fishery permittees will also have access to the non-sandbar LCS, SCS, and pelagic shark quotas. Commercial fishermen not participating in the shark research

fishery may land non-sandbar LCS, SCS, and pelagic sharks subject to retention limits and quotas per 50 CFR 635.24 and 635.27, respectively.

In 2008, selected vessels were allowed a trip limit of 2,750 lbs dw, of which no more than 2,000 lbs dw were allowed to be sandbar sharks. As of October 2008, vessels participating in the shark research fishery fished an average of 2 trips per month. The 2009 trip limits and number of trips per month will depend on the number of selected vessels, available quota, and objectives of the research fishery. Vessels selected for 2009 may not all have the same retention limit.

In order to participate in the shark research fishery, commercial shark fishermen need to submit a completed Shark Research Fishery Application showing the vessel and owner(s) meet the specific criteria outlined below.

**Research Objectives**

Each year, NMFS will determine the research objectives for the upcoming shark research fishery. The research objectives are developed by a shark board, which is comprised of representatives within NMFS including representatives from the Southeast Fisheries Science Center (SEFSC) Panama City Laboratory, Northeast Fisheries Science Center (NEFSC) Narragansett Laboratory, the Southeast Regional Office, Protected Species Division (SERO\PSD), and the HMS Management Division. The research objectives for 2009 are the same as the research objectives for 2008, and the shark board based them on the Southeast Data, Assessment and Review (SEDAR) 11, 2005/2006 LCS stock assessment. These research objectives include:

- collect reproductive and age data from sandbar sharks throughout the calendar year;
- collect reproductive and age data for Gulf of Mexico blacktip sharks for determination of the reproductive cycle (i.e., annual or biennial frequency);
- collect reproductive and age data from all species of sharks for additional species-specific assessments;
- monitor the size distribution of sandbar sharks and other species captured in the fishery;
- continue on-going tagging programs for identification of migration corridors and stock structure;
- maintain time-series of abundance from previously derived indices for the shark BLL observer program;
- acquire fin-clip samples of all species for genetic analysis;
- attach satellite archival tags to endangered smalltooth sawfish to

provide information on critical habitat and preferred depth, consistent with ESA requirements for such tagging under the SEFSC observer program take permit obtained through the 2008 Section 7 Consultation for the Continued Authorization of Shark Fisheries (Commercial Shark Bottom Longline, Commercial Shark Gillnet and Recreational Shark Handgear Fisheries) as Managed under the Consolidated Fishery Management Plan for Atlantic Tunas, Swordfish, and Sharks (Consolidated HMS FMP), including Amendment 2 to the Consolidated HMS FMP (F/SER/2007/05044);

- attach satellite archival tags to prohibited dusky sharks to provide information on daily and seasonal movement patterns, and preferred depth; and,
- evaluate the effects of controlled gear experiments in order to determine the effects of potential hook changes to prohibited species interactions and fishery yields.

Additionally, some objectives were derived from the need for tagging studies, collection of genetic material, and controlled bottom longline (BLL) experiments to assess the impact of hook changes. The shark board decided to use the same objectives given the short time for research in 2008 (August to December) and the lack of a new stock assessment.

#### Selection Criteria

Shark Research Fishery Permit Applications will only be accepted from commercial shark fishermen that hold a current directed or incidental limited access permit. While incidental permit holders are welcome to submit an application, to ensure that an appropriate number of sharks are taken to meet the research objectives for this year, NMFS will be giving priority to directed permit holders. As such, qualified incidental permit holders will only be selected if there are not enough qualified directed permit holders to meet research objectives.

The Shark Research Fishery Permit Application includes, but is not limited to, a request for the following information: type of commercial shark permit possessed; past participation in the commercial shark fishery (not including sharks caught for display); past involvement and compliance with HMS observer programs per 50 CFR 635.7; past compliance with HMS regulations at 50 CFR part 635; availability to participate in the shark research fishery; ability to fish in the regions and season requested; ability to attend necessary meetings regarding the objectives and research protocols of the

shark research fishery; and ability to carry out the research objectives of the Agency. An applicant that has been charged criminally or civilly (i.e., issued a Notice of Violation and Assessment (NOVA) or Notice of Permit Sanction) for any HMS-related violation will not be considered for participation in the shark research fishery. In addition, applicants who were selected to carry an observer in the previous two years for any HMS fishery, but failed to communicate with NMFS observer programs in order to arrange the placement of an observer before commencing any fishing trip that would have resulted in the incidental catch or harvest of any Atlantic HMS, per 50 CFR 635.7, will not be considered for participation in the 2009 shark research fishery. Applicants who were selected to carry an observer in the previous two years for any HMS fishery and failed to comply with all the observer regulations per 50 CFR 635.7, including failure to provide adequate sleeping accommodations per 50 CFR 635.7(e)(1), a sufficiently sized survival craft per 50 CFR 600.746(f)(6), or failure to pass a USCG safety examination per 50 CFR 600.746(c)(2) will also not be considered. Exceptions will be made for applicants that were selected for HMS observer coverage but did not fish in the quarter when selected. Applicants that do not possess a valid United States Coast Guard (USCG) safety inspection decal when the application is submitted will not be considered. Applicants that have been non-compliant with any of the HMS observer program regulations in the previous two years, as described above, may be eligible for future participation in shark research fishery activities by demonstrating two subsequent years of compliance with observer regulations at 50 CFR 635.7.

#### Selection Process

The HMS Management Division will review all submitted applications that are deemed complete and develop a list of qualified applicants. A qualified applicant is an applicant that has submitted a complete application and has met the selection criteria. Qualified applicants are eligible to be selected to participate in the shark research fishery for 2009. The HMS Management Division will provide the list of qualified applicants to the SEFSC. The SEFSC will then evaluate the list of qualified applicants and, based on the temporal and spatial needs of the research objectives, the availability of qualified applicants, and the available quota for a given year, will select approximately 10 qualified applicants to conduct the prescribed research. Where

there are multiple qualified applicants that meet the criteria, permittees will be randomly selected. If a public meeting is deemed necessary, NMFS will announce details of a public selection meeting in a subsequent **Federal Register** notice.

Once the selection process is complete, NMFS will notify the selected applicants and issue the shark research fishery permits. If needed, NMFS will communicate with the shark research fishery permit holders to arrange a captain's meeting to discuss the research objectives and protocols. The shark research fishery permit holders must contact the NMFS observer coordinator to arrange the placement of a NMFS-approved observer for each shark research trip.

A shark research fishery permit will only be valid for the vessel and owner(s) and terms and conditions listed on the permit, and thus, cannot be transferred to another vessel or owner(s). Issuance of a shark research permit does not guarantee that the permit holder will be assigned a NMFS-approved observer on any particular trip. Rather, issuance indicates that a vessel may be issued a NMFS-approved observer for a particular trip, and on such trips, may be allowed to harvest Atlantic sharks, including sandbar sharks, in excess of the retention limits described in 50 CFR 635.24(a). These retention limits will be based on available quota, number of vessels participating in the 2009 shark research fishery, the research objectives set forth by the shark board, and may vary by vessel and/or location. When not operating under the auspices of the shark research fishery, the vessel would still be able to land non-sandbar, SCS, and pelagic sharks subject to existing retention limits on trips without a NMFS-approved observer. The shark research permit may be revoked or modified at any time and does not confer the right to engage in activities beyond those listed on the shark research fishery permit.

Commercial shark permit holders (directed and incidental) are invited to submit an application to participate in the shark research fishery on an annual basis. Permit applications can be found on the HMS Management Division's website at: <http://www.nmfs.noaa.gov/sfa/hms/index.htm> or by calling (301) 713-2347. Final decisions on the issuance of a shark research fishery permit will depend on the submission of all required information, and NMFS' review of applicant information as outlined above. The 2009 shark research fishery will start after the opening of the shark fishery and under available quotas

as published in a separate **Federal Register** final rule.

Dated: October 28, 2008.

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

**RIN 0648-AX35**

#### Notification of U.S. Fish Quotas and an Effort Allocation in the Northwest Atlantic Fisheries Organization (NAFO) Regulatory Area

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notification of U.S. fish quotas and an effort allocation.

**SUMMARY:** NMFS announces that fish quotas and an effort allocation are available for harvest by U.S. fishermen in the Northwest Atlantic Fisheries Organization (NAFO) Regulatory Area. This action is necessary to make available to U.S. fishermen a fishing privilege on an equitable basis.

**DATES:** Effective January 1, 2009, through December 31, 2009. Expressions of interest regarding U.S. fish quota allocations for all species except 3L shrimp will be accepted throughout 2009. Expressions of interest regarding the U.S. 3L shrimp quota allocation, the 3M shrimp effort allocation, and the 3LNO yellowtail flounder to be transferred by Canada will be accepted through November 18, 2008.

**ADDRESSES:** Expressions of interest regarding the U.S. effort allocation and quota allocations should be made in writing to Lekelia Jenkins in the NMFS Office of International Affairs, at 1315 East-West Highway, Silver Spring, MD 20910 (phone: 301-713-2276, fax: 301-713-2313, e-mail: [Kiki.Jenkins@noaa.gov](mailto:Kiki.Jenkins@noaa.gov)).

Information relating to NAFO fish quotas, NAFO Conservation and Enforcement Measures, and the High Seas Fishing Compliance Act (HSFC) Permit is available from Allison McHale, at the NMFS Northeast Regional Office at One Blackburn Drive, Gloucester, MA 01930 (phone: 978-281-9103, fax: 978-281-9135, e-mail: [allison.mchale@noaa.gov](mailto:allison.mchale@noaa.gov)) and from NAFO on the World Wide Web at <http://www.nafo.int>.

#### FOR FURTHER INFORMATION CONTACT:

Lekelia Jenkins, 301-713-2276.

#### SUPPLEMENTARY INFORMATION:

##### Background

NAFO has established and maintains conservation measures in its Regulatory Area that include one effort limitation fishery as well as fisheries with total allowable catches (TACs) and member nation quota allocations. The principal species managed are cod, flounder, redfish, American plaice, halibut, capelin, shrimp, and squid. At the 2008 NAFO Annual Meeting, the United States received fish quota allocations for three NAFO stocks and an effort allocation for one NAFO stock to be fished during 2009. The species, location, and allocation (in metric tons or effort) of these U.S. fishing opportunities, as found in Annexes I.A, I.B, and I.C of the 2009 NAFO Conservation and Enforcement Measures, are as follows:

(1) Redfish	NAFO Division 3M	69 mt
(2) Squid ( <i>Illex</i> )	NAFO Sub-areas 3 & 4	453 mt
(3) Shrimp	NAFO Division 3L	334 mt
(4) Shrimp	NAFO Division 3M	1 vessel/100 days

Additionally, the United States may be transferred up to 1,000 mt of 3LNO yellowtail flounder from Canada's quota allocation for express use by U.S. vessels if the United States requests a transfer before January 1 of 2009 or any succeeding year through 2017. If such a request is made, an additional 500 mt of 3LNO yellowtail flounder would be made available on the condition that the United States transfers its shrimp allocation to Canada. Participants in this fishery will be restricted to an overall bycatch harvest limit for American plaice equal to 13% of the total yellowtail fishery.

Further, U.S. vessels may be authorized to fish any available portion of the 385 mt allocation of oceanic redfish in NAFO Subarea 2 and Divisions 1F and 3K available to NAFO members that are not also members of the Northeast Atlantic Fisheries Commission. Fishing opportunities may also be authorized for U.S. fishermen in the "Others" category for: Division 3LNO yellowtail flounder (85 mt); Division 3NO white hake (500 mt); Division 3LNO skates (500 mt); and Division 3O redfish (100 mt. Procedures for obtaining NMFS authorization are specified below.

#### U.S. Fish Quota Allocations

Expressions of interest to fish for any or all of the U.S. fish quota allocations, including the up to 1,500 mt of yellowtail flounder to be transferred by Canada under the circumstances described above, and "Others" category allocations in NAFO will be considered from U.S. vessels in possession of, or eligible for, a valid HSFC permit, which is available from the NMFS Northeast Regional Office (see **ADDRESSES**). All expressions of interest should be directed in writing to Lekelia Jenkins (see **ADDRESSES**). Letters of interest from U.S. vessel owners should include the name, registration, and home port of the applicant vessel as required by NAFO in advance of fishing operations. In addition, any available information on intended target species and dates of fishing operations should be included. To ensure equitable access by U.S. vessel owners, NMFS may promulgate regulations designed to choose one or more U.S. applicants from among expressions of interest.

Note that vessels issued valid HSFC permits under 50 CFR part 300 are exempt from multispecies permit, mesh size, effort-control, and possession limit restrictions, specified in 50 CFR 648.4, 648.80, 648.82 and 648.86, respectively, while transiting the U.S. exclusive economic zone (EEZ) with multispecies on board the vessel, or landing multispecies in U.S. ports that were caught while fishing in the NAFO Regulatory Area, provided:

(1) The vessel operator has a letter of authorization issued by the Regional Administrator on board the vessel;

(2) For the duration of the trip, the vessel fishes, except for transiting purposes, exclusively in the NAFO Regulatory Area and does not harvest fish in, or possess fish harvested in, or from, the U.S. EEZ;

(3) When transiting the U.S. EEZ, all gear is properly stowed in accordance with one of the applicable methods specified in 50 CFR 648.23(b); and

(4) The vessel operator complies with the HSFC permit and all NAFO conservation and enforcement measures while fishing in the NAFO Regulatory Area.

#### U.S. 3M Effort Allocation

Expressions of interest in harvesting the U.S. portion of the 2009 NAFO 3M shrimp effort allocation (1 vessel/100 days) will be considered from owners of U.S. vessels in possession of a valid HSFC permit. All expressions of interest should be directed in writing to Lekelia Jenkins (see **ADDRESSES**).

Letters of interest from U.S. vessel owners should include the name,
