Subject: 103 - Endicott Project Comments

God Bless our leaders for getting this far!....I am ecstatic that someone is going to look at all this...I lost my
whom worked for IBM for years.. died of Adult Acute Leukemia. convinced myself and my sister
that got this from being exposed to Benzene in the Endicott plant. Myself I worked there years and always
in the back of my mind I wonder, when.....My comment to you is: A whole bunch of ex-employees in the area
have recently received from IBM a letter stating that they have lost our records and have set us up with some ID
theft protection service. Probably all our chemical records are also "lost"....this was either a convenient mishap or
an effort to hide something. Just wanted to let someone know...
