APPENDIX B – FOREST PLAN MANAGEMENT DIRECTION IN ROADLESS AREAS

INTRODUCTION

The management direction in forest plans guides the development, planning, and implementation of proposed actions on national forest system (NFS) land. Forest plans contain forestwide direction as well as direction specific to each allocated management area. Management area direction typically defines management practices and land uses to be emphasized on NFS lands within that management area, as well as the activities that are limited or prohibited within the area. Management direction may be expressed in the form of desired conditions or goals, as well as standards and guidelines.

Standards are defined as courses of action or levels of attainment required to achieve the desired conditions, and are mandatory. Guidelines are defined as preferred or advisable courses of action or levels of attainment designed to meet the desired conditions. If deviation from a guideline or desired condition is determined to be necessary, the rationale must be documented during the project-level environmental analysis. The inventoried roadless areas (IRAs) and Colorado roadless areas (CRAs) overlap many different management areas, and management area allocations are variable among the forest plans.

Alternatives 1 and 2 (the 2001 Roadless Rule and Colorado Roadless Rule) generally prohibit road construction and reconstruction (road building), as well as tree cutting, sale, or removal in roadless areas other than under specific exceptional circumstances. Under these alternatives, where forest plan direction regarding road-building or tree-cutting activities in a roadless area is more restrictive than the applicable roadless rule, the forest plan direction would apply. Refer to chapter 2 – Alternatives for details about these alternatives.

Alternative 3 does not involve any roadless rule-related prohibitions on road-building or tree-cutting activities in the IRAs. Under this alternative, the forest plan direction governs those land use activities in IRAs. Refer to chapter 2 – Alternatives, for details about this alternative. Forest plan direction is subject to change through amendment or revision processes, as described in chapter 2 of this EIS.

For EIS analysis purposes, each roadless area was compared with the overlapping forest plan direction to identify whether the forest plan direction was more or less restrictive than the roadless rule provisions of alternatives 1 or 2. As a first step in this analysis, management area direction from each forest plan was categorized in terms of its restrictions or permissions on road-building and tree-cutting activities. These management categories are used throughout this appendix.

Road building categories are defined by the letters A through D:

- A – Roads prohibited (except reserved and outstanding rights)
- B – Roads generally restricted by desired conditions or guidelines

C - Roads generally not restricted except under some specific circumstances (limited by specific language or road density requirements)

D - Roads not restricted

Tree-cutting categories are defined by numbers 1 through 4:

- 1 - Tree-cutting prohibited (except incidental)
- 2 - Tree-cutting generally restricted by desired conditions or guidelines
- 3 - Tree-cutting generally not restricted except for regulated commercial timber purposes
- 4 - Tree-cutting not restricted

Categories A through D for road building and 1 through 4 for tree-cutting were combined into 10 management categories of forest plan direction described in table B-1. The specific language from each forest plan management area regarding road building and tree-cutting is in a document in the EIS record. The alternative 3 map in the map packet displays this information as it applies to the IRAs.

Table B-1. Management category descriptions

Management category	Road construction/reconstruction	Tree-cutting
A1	Prohibited	Prohibited
A2	Prohibited	Generally restricted by desired conditions or guidelines
A3	Prohibited	Generally not restricted except for regulated commercial timber purposes
B1	Generally restricted by desired conditions or guidelines	Prohibited
B2	Generally restricted by desired conditions or guidelines	Generally restricted by desired conditions or guidelines
B3	Generally restricted by desired conditions or guidelines	Generally not restricted except for regulated commercial timber purposes
C3	Generally not restricted except under some specific circumstances	Generally not restricted except for regulated commercial timber purposes
C4	Generally not restricted except under some specific circumstances	Not restricted
D3	Not restricted	Generally not restricted except for regulated commercial timber purposes
D4	Not restricted	Not restricted

Table B-2 lists forest plan management area names and numbers, from each of the eight forest plans for national forests in Colorado. It also shows the management category for road-building and tree-cutting associated with that forest plan management area. The table includes all forest plan management areas, although they are not all represented within IRAs or CRAs. The same

management area name may be common to several forest plans even though the associated management category for road building and tree-cutting may differ in each forest plan.

Table B-2. Management area direction for road building and tree-cutting

Management area name and number, and applicable national forest	Management category									
	A1	A2	A3	B1	B2	B3	C3	C4	D3	D4

Utility corridors and electronic sites 8.3, 8.31, 8.32 – Arapaho and Roosevelt, Routt, White River									✓	
Utility corridors and electronic sites 1D – GMUG, Pike and San Isabel, San Juan									✓	

¹For management code 1.32 on the Routt, vegetation management is allowed for specific reasons in the Troublesome and Middle Yampa Geographic Areas (category C3); it is discouraged in the remainder of the Forest (category B2).

²GMUG: Grand Mesa, Uncompahgre, and Gunnison

³MIS: management indicator species

Table B-3 lists the acres in each management category for road-building and tree-cutting activities (categories A1 to D4) associated with each IRA on each national forest. Acres are rounded to the nearest 100 acres. There are approximately the 4.25 million acres in IRAs, common to alternatives 1 and 3 (refer to appendix A for details on acres included in IRAs).

Table B-3. Inventoried roadless area acres by management category

Table B-4 lists the acres in each management category for road-building and tree-cutting activities (categories A1 to D4) associated with each CRA on each national forest. Acres are rounded to the nearest 100 acres. There are approximately the 4.03 million acres in CRAs under alternative 2 (refer to appendix A for details on acres included in CRAs).

Table B-4. Summary of IRA acres per management category by forest

National forest	A1 acres	A2 acres	A3 acres	B1 acres	B2 acres	B3 acres	C3 acres	C4 acres	D3 acres	D4 acres	Total IRA acres

Rulemaking for Colorado Roadless Areas DEIS

Table B-5 lists the acres in each CRA by national forest and the associated management category for road building and tree-cutting activities (categories A1 to D4). Acres are rounded to the nearest 100 acres. The acres total to the 4.03 million acres in CRAs analyzed in this EIS for alternative 2 (refer to appendix A for details on acres included in CRAs). Some CRAs differ in acres and roadless area names from IRA acres and roadless area names. Refer to appendix A for a cross-walk of IRA and CRA acres and names.

Within these CRA acres, road building and tree-cutting would be allowed where alternative 2 (Colorado Roadless Rule) is more restrictive than the management area direction, (for example, CRAs where management area categories C4, D3, or D4 apply). On CRA acres where the management area direction is more restrictive than alternative 2, the management area direction would apply (for example, CRAs where management categories A1-A3 and B1-B3 apply).

Table B-5. Colorado roadless area acres by management category

Table B-7 shows the differences between IRA acres (for alternatives 1 and 3) and CRA acres (for alternative 2) by forest plan management area name, number, and associated management category for road-building and tree-cutting activities. These differences are displayed separately for each forest. For each management area listed, the last three columns show the associated IRA acres not in CRAs, CRA acres not in IRAs, and the net difference (change). The table includes IRA acres, excluding congressionally designated areas and private land acres.

This table can be used to understand the IRA and CRA acres where the management direction would differ by alternative in terms of road- building or tree-cutting activities. In the IRA acres that are not included in CRAs, direction from alternative 1 (2001 Roadless Rule) would apply to those acres where it is more restrictive than the forest plan direction indicated by the management category (A1 to D4). In the CRA acres not included in IRAs, direction from alternative 2 (Colorado Roadless Rule) would apply to those acres where it is more restrictive than the forest plan direction indicated by the associated management category (A1 to D4).

Table B-7. Net change in acres from inventoried roadless area to Colorado roadless area by management area for each forest

Management area number	Management area name	Management category	Acres in IRAs not included in CRAs	Acres in CRAs that were not in IRAs	Net change
Arapaho and Roosevelt National Forests					
1.1	Wilderness	A1	440	0	-440
1.2	Recommended for wilderness	A2	40	20	-20
1.3	Backcountry recreation	A2	210	870	660
3.1	Special interest area	B2	10	60	50
3.3	Backcountry motorized recreation	C3	10	10	0
3.5	Forested flora and fauna habitats	B3	170	30	-140
4.2	Scenic areas	D3	0.0	10	10
4.3	Dispersed recreation	D3	40	70	30
4.4	Recreation rivers	D3	0.0	20	20
5.11	General forest and rangelands – forest vegetation	D4	160	80	-80
5.5	Forest products and dispersed recreation	D4	800	20	-780
8.22	Ski-based resorts	D3	3,000	0	-3,000
PVT	Private land		10	0	-10
Total			4,890	1,190	-3,700.0
Grand Mesa, Uncompahgre, and Gunnison National Forests					
1B	Downhill skiing and winter sports	D3	900	0	-900
2A	Semi-primitive motorized recreation opportunities	C4	56,680	12,330	-44,350
2B	Roaded-natural and rural recreation opportunities	C4	7,920	2,880	-5,040
3A	Semi-primitive non-motorized recreation	C4	2,810	8,790	5,980
