

LOOKOUT/EDISON (WITHIN THE LAKES LANDSCAPE AREA)

Consensus Recommendation

The group supports considering the areas within the polygons identified as A, B, C, D, and E in the “Lookout Mountain/Edison” portion of the Lakes landscape area under the following conditions:

- Many criteria to be applied (TES, cultural)
- Consideration of experimental forest and wildlife issues. Consider realignment of experimental forest boundary.
- Protection of Fall River
- Address bats and access
- Number of trail miles needs to be defined (miles/acre, miles/square mile) – Density.
