# Survey Content for the National Ambulatory Medical Care Survey and National Hospital Ambulatory Medical Care Survey

Survey Content for the National Ambulatory Medical Care Survey and National Hospital Ambulatory Medical Care Survey

U.S. DEPARTMENT OF HEALTH AND HUMAN SERVICES Centers for Disease Control and Prevention National Center for Health Statistics

## Preface

Interested in analyzing data from the National Ambulatory Medical Care Survey (NAMCS) or National Hospital Ambulatory Medical Care Survey (NHAMCS)? This brochure contains a list of all of the publicly available data items arranged by ambulatory care setting and year. It will enable identification of which variables were used in each year and how they have changed (or remained the same) over time.

Both surveys are conducted by the Centers for Disease Control and Prevention's National Center for Health Statistics (NCHS). The NAMCS, which began in 1973, was inaugurated to gather, analyze, and disseminate information about the health care provided by office-based physicians. Ambulatory medical care is the predominant method of providing health care services in the United States and occurs in a wide range of settings. The largest proportion of ambulatory care services occurs in physician offices. The NAMCS is complemented by the NHAMCS, which was inaugurated in 1992 to expand the scope of data collection to the medical services provided by hospital outpatient departments (OPD) and emergency departments (ED). Together, NAMCS and NHAMCS data provide an important tool for tracking ambulatory health care utilization in the United States. The NAMCS and NHAMCS are conducted within the Division of Health Care Statistics and components of the National Health Care Survey (NHCS), a family of surveys that measure health care utilization across various types of providers (e.g., nursing homes, hospitals, and ambulatory surgery centers).

This brochure is organized with survey content in mind. The first section of the brochure presents items from the NAMCS and NHAMCS-OPD data collection instruments (Patient Record forms). The NAMCS and NHAMCS-OPD Patient Record forms are nearly identical. Exceptions include the use of different categories for the "Providers Seen" item and the omission of the item, "Time spent with the physician" on the OPD form. It should also be kept in mind that the NAMCS began in 1973, and the NHAMCS began in 1992. Therefore, any data item prior to 1992 was only collected in the NAMCS. The ED component of the NHAMCS comprises the second section of the brochure.

The success of the NAMCS and NHAMCS is due in part to NCHS' extensive efforts to protect respondent confidentiality. For this reason, there are a number of variables each year that are not available on the public-use files, but which have great analytic potential. Researchers may be able to obtain access to many of these variables through the NCHS Research Data Center (RDC). Research proposals are reviewed and approved by NCHS staff and fees apply. A list of such variables can be found on the NAMCS and NHAMCS website listed below under the section "Additional NAMCS and NHAMCS Data Available at the Research Data Center."

Corrections and updates to this document will be made when needed with the most recent version on the NAMCS and NHAMCS website listed below.

Please visit: www.cdc.gov/nchs/nhcs/htm for more about the NHCS; www.cdc.gov/nchs/namcs.htm for more about the NAMCS or NHAMCS; and www.cdc.gov/nchs/r&d/rdc.htm for more about the RDC.

More information on the NAMCS and NHAMCS can also be obtained by calling 301-458-4600.

# Survey Content of the NAMCS and NHAMCS-OPD

								Survey ye	ar(s)							
	1973-76	1977-78	1979	1980-81	1985	1989-90	1991-92	1993-94 <sup>2</sup>		1997-98	1999-2000	2001 <sup>3</sup>	2002	2003-04	2005-06	Notes
Patient date of visit	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	From 1973-81 only the month and year are giv- en. In 1985, the 2-digit day is also provided. Starting in 1999, day of week is given instead of specific date.
Patient ZIP code <sup>₄</sup>						Х			X		Х	Х	X	Х	Х

In the past 12 months, has your practice experienced difficulty in referring patients with private insurance?														x	x	
In the past 12 months, has your practice experienced difficulty in referring patients that are uninsured?														x	x	

<sup>1</sup>The Outpatient Department (OPD) component of the National Hospital Ambulatory Medical Care Survey (NHAMCS) is combined with the National Ambulatory Medical Care Survey (NAMCS) due to the fact that the survey content is almost identical in each year. NHAMCS was initiated in 1992.

<sup>2</sup>In 1993-94, only six tests or therapies were listed as check boxes, but space to write-in eight tests, therapies, ambulatory procedures, or surgeries were provided. A separate item for counseling or education and medication or injections was provided.

<sup>3</sup>In 2001, two different versions of the survey instrument were used (long and short Patient Record forms). Only those variables available on the public use file are shown, additional variables may be available using NCHS' Research Data Center (RDC).

<sup>4</sup>Patient's ZIP code is not available on public use file; must access via NCHS' Research Data Center.

<sup>5</sup>HMO is health maintenance organization.

<sup>6</sup>PPO is paid provider organization.

<sup>7</sup>SCHIP is State Children's Health Insurance Program.

<sup>8</sup>CHF is congestive heart failure.

<sup>9</sup>COPD is chronic obstructive pulmonary disease.

- <sup>10</sup>HIV is human immunodeficiency virus.
- <sup>11</sup>AIDS is acquired immune deficiency.
- <sup>12</sup>ADD is attention deficit disorder.
- <sup>13</sup>CAT is computed axial tomography.
- <sup>14</sup>MRI is magnetic resonance imaging.
- <sup>15</sup>CT is computed tomography.
- <sup>17</sup>EKG is electrocardiogram.
- <sup>18</sup>ECG is electrocardiogram.
- <sup>19</sup>PSA is prostate-specific antigen.
- <sup>20</sup>TB is tuberculosis.
- <sup>21</sup>PAP is Papanicolaou test.
- <sup>22</sup>HPV is human papilloma virus.
- <sup>23</sup>DNA is deoxyribonucleic acid.
- <sup>24</sup>From 1980-91, a separate drug file was created. Each medication on each Patient Record form was equal to a row on this file.
- <sup>25</sup>This represents the number of medications recorded on the Patient Record form by the respondent.
- <sup>26</sup>The number in this cell is equal to the maximum number of medications that could have been reported on the Patient Record form.
- <sup>27</sup>The listed categories of "providers seen" can differ on the OPD survey as compared to the NAMCS.
- <sup>28</sup>LPN is licensed practical nurse.
- <sup>29</sup>RN is registered nurse.
- <sup>30</sup>"Duration of this visit" or "time spent with physician/provider" is not collected on the OPD survey.
- <sup>31</sup>Refer to the ED section for the hospital characteristics as it related to the OPD survey.
- <sup>32</sup>IPA is individual practice association.

<sup>1</sup>The Emergency Department (ED) is a component of the National Hospital Ambulatory Medical Care Survey (NHAMCS). NHAMCS was initiated in 1992.

<sup>2</sup>Patient's ZIP code is not available on Public Use File; must access via NCHS' Research Data Center.

<sup>3</sup>HMO is health maintance organization.

<sup>4</sup>SCHIP is State Children's Health Insurance Program.

<sup>5</sup>HIV is human immunodeficiency virus.

<sup>6</sup>AIDS is acquired immune deficiency syndrome.

<sup>7</sup>BUN is blood urea nitrogen.

<sup>8</sup>STD is sexually transmitted disease.

<sup>9</sup>CT is computed tomography.

<sup>10</sup>CAT is computed axial tomography.

<sup>11</sup>MRI is magnetic resonance imaging.

<sup>12</sup>EKG is electrocardiogram.

<sup>13</sup>ECG is electrocardiogram.

<sup>14</sup>ENT is ears, nose and throat.

<sup>15</sup>CPR is cardiopulmonary resuscitation.

<sup>16</sup>IV is intravenous.

<sup>17</sup>NG is nasogastric.

<sup>18</sup>OB/GYN is obsetrics and gynecology.
<sup>19</sup>This represents the number of medications recorded on the Patient Record form by the respondent.
<sup>20</sup>The number in this cell is equal to the maximum number of medications that could have been reported on the Patient Record form.
<sup>21</sup>RN is registered nurse.
<sup>22</sup>LPN is licensed practical nurse.
<sup>23</sup>EMT is emergency medical technician.
<sup>24</sup>PRN is "if needed."
<sup>25</sup>AMA is against medical advice.
<sup>26</sup>DOA is dead on arrival.
<sup>27</sup>ICU is intensive care unit.
<sup>28</sup>CCU is critical care unit.
<sup>29</sup>OR is operating room.
<sup>30</sup>CATH is catheterization.
