This report provides statistics for land enrolled in the Conservation Reserve Program (CRP) as of the end of fiscal year 2005 (September 30, 2005). The report also includes a summary of FY 2005 CRP related activities, FY 2005 CRP outlays by payment type, enrollment changes since FY 2004, continuous CRP enrollment activity, outlay and sign-up history, CRP practice and payment provisions, and environmental benefits index (EBI) history.

The enrollment tables are based on contract data developed and maintained in CRP data files by Farm Service Agency (FSA) county offices and are based on the physical location of the CRP contracted land. Some adjustments have been made to correct mis-coded data in active contract files.

The report was prepared by Alex Barbarika, Natural Resources Analysis Group, Economic and Policy Analysis Staff (EPAS), Farm Service Agency (FSA), U.S. Department of Agriculture. Assistance from FSA's Conservation and Environmental Programs Division, Budget Division, and EPAS are greatly appreciated.

April 2006

As we mark the Conservation Reserve Program's (CRP) 20<sup>th</sup> anniversary, I am pleased to present this fiscal year 2005 edition of CRP's Summary and Enrollment Statistics. CRP is our nation's largest private-lands conservation program both in acres enrolled and dollars spent. The 2002 Farm Security and Rural Investment Act provides for enrolling up to 39.2 million acres. Through fiscal year 2005, over 34.9 million acres were enrolled, providing \$1.6 billion in annual rental payments to land owners and operators.

Through this voluntary program, USDA's Farm Service Agency (FSA) establishes contracts with agricultural producers to retire highly erodible and other environmentally sensitive cropland and pastureland. During the 10- to 15-year CRP contract period, participants convert enrolled land to grass, trees, wildlife cover, and other conservation uses.

CRP plantings and practices offer our nation vast environmental benefits, including improving surface and ground water quality, creating wildlife habitat, restoring wetlands, preserving soil productivity, and reducing wind erosion damages. CRP also provides farmers with a dependable source of income and helps farmers meet conservation compliance requirements.

President Bush, a top CRP supporter, has this to say about CRP: "You're giving back to nature. You're giving back something to the soil so it doesn't get depleted. All around it's a good practice." Congress has also demonstrated its backing for the program by renewing enrollment authority during each of the 1990, 1996, and 2002 farm bills.

CRP is an integral part of USDA's conservation portfolio that has reduced soil erosion by over 40 percent on U.S. cropland since 1982. Some of CRP's substantial accomplishments include:

- Restoring and protecting over 2 million acres of wetlands and adjacent buffers.
- Reducing soil erosion by 450 million tons per year.
- Establishing 1.7 million acres of grass and forested buffers to protect water quality.
- Improving wildlife populations and habitat: over 2 million additional ducks produced.
- Sequestering 48 million metric tons of carbon dioxide annually.
- Reducing sediment and nutrient enrichment of water bodies.

A challenge now facing us are the 26 million acres under contracts expiring between 2007 and 2010, including 16 million acres in 2007. President Bush addressed the matter in August 2004, announcing that FSA would offer CRP participants the chance to extend or re-enroll expiring contracts. The

contracts are being divided into five categories based on environmental benefits, and in 2006, FSA is offering the quintile with the highest Environmental Benefits Index (EBI) scores new 10- or 15-year contracts. Additionally, FSA is offering 5-year contract extensions on the 2<sup>nd</sup> highest EBI quintile, 4-year extensions on the 3<sup>rd</sup> highest, and so forth. This action will preserve farmers' ability to protect America's most sensitive farmlands. It will help make our water even cleaner and provide better habitat for hundreds of wildlife species.

In its first 20 years, CRP's societal contributions have been substantial for all Americans. Think what we can achieve together during the next 20 years.

## **General Signup**

Producers with eligible lands compete nationally for acceptance based on an environmental benefits index (EBI) during specified enrollment periods. Producers may submit offers below soil-specific maximum rental rates to increase EBI ranking. Currently, 31.5 million acres are enrolled, including 1.6 million acres of wetland restoration practice (CP23). The wetland restoration practice was moved to continuous sign-up in 2003.

## **Continuous Sgn-up**

**Non-CREP.** Producers with eligible lands may enroll certain high priority conservation practices, such as filter strips and riparian buffers, at any time during the year without competition. In addition to annual soil rental and cost-share payments, many practices are eligible for additional annual and one-time up-front financial incentives. Continuous sign-up began in 1997 and currently, 2.4 million acres are enrolled.

**Conservation Reserve Enhancement Program (CREP).** Under CREP agreements, Federal/State partnerships implement projects designed to address specific environmental objectives through targeted CRP enrollments. Sign-up is held on a continuous basis, general sign-up practices may be included, and additional financial incentives are generally provided. The first CREP agreement with Maryland, was signed in 1997. There are currently 676,000 acres enrolled under 34 agreements in effect in 27 States.

**Farmable Wetland Program (FWP).** Producers enroll small non-flood plain wetlands (10 acres or less) under modified continuous sign-up provisions. Implemented in 2001, 130,000 acres have been enrolled.

Overall, while continuous sign-up categories account for only 9% of CRP acres, they account for 43% of CRP contracts and 20% of CRP outlays. Additional descriptions of CRP sign-up types and practices are provided in the Appendix (A-21).

## **CRP Activities, FY 2005**

---

- ◆ General sign-up 29 (September 2004)
  - Received offers on 1.7 million acres.
  - Contracts begin October 1, 2005 (FY 2006) on 1.05 million acres, and on 70,000 acres on October 1, 2006 (FY 2007). Acceptance rate was 66%.
- ◆ Continuous sign-up, including farmable wetland program, increased 297,000 acres, reaching 3.17 million acres
- ◆ New and expanded CREP agreements
  - New agreements signed with Nebraska (100,000 acres), Minnesota (increases to 120,000 acres), Louisiana (50,000 acres), and Indiana (7,000 acres). Total acres under CREP agreements increased 288,000 acres to 2,087,000 acres.
  - CREP enrollment increased 80,000 acres to a cumulative total 676,000 acres.
- ◆ SIP's and PIP's (signing incentive and practice incentive payments)
  - Incentives adopted in 2000 to increase continuous CRP enrollment were continued.
  - Total SIP and PIP outlays through 2005: \$460 million.
- ◆ Awarded grants totaling \$367,000 to the United States Fish and Wildlife Service, University of Montana, Mississippi State University, and West, Inc. Funds will be used to estimate CRP impacts on duck, Northern bobwhite quail, pheasant, and songbird populations.
- ◆ Early re-enrollment and extension of expiring CRP contracts. Over 28 million acres are under contracts scheduled to expire between 2007 and 2010.
  - USDA received over 5,000 comments in response to a Federal Register request for public comments on re-enrollment and extension strategies.
  - USDA held a public meeting in June, 2005 to receive advice on how best to re-enroll and extend CRP contracts that will begin expiring in 2007.
  - Secretary Johanns announced early CRP contract re-enrollment and extension procedures:
    - Expiring contracts divided into 5 categories based on environmental benefits as indicated by environmental benefits index (EBI) scores.
    - The quintile with the highest EBI scores will be offered new 10- or 15-year contracts, then next highest offered 5-year contract extensions, and so forth.
- ◆ No general sign-up was held in FY 2005. Instead, 1-year extensions were offered for contracts expiring September 30, 2005.

1/ Practices enrolled under CREP may be eligible for additional incentives.

2/ General sign-up practices may be enrolled under certain CREP agreements and may be eligible for additional financial incentives.

3/ Soil rental rates (SRR) are soil-specific maximum rental payment rates for predominant soils (up to 3) for the land offered. Beginning with general sign-up 16, producers offering land for general sign-up enrollment requesting rental payments below the maximum receive higher EBI scores. Participants in continuous sign-up receive the maximum allowable rate. Annual incentives of 20% and 10% of annual rental rate are provided as indicated. Practices enrolled under CREP may be eligible for additional incentives.

4/ For general sign-up practices, up to \$5/acre are allowed. For continuous practices, grass plantings are allowed up to \$5/acre, tree plantings are allowed up to \$7/acre. For CP21 and CP22, if livestock exclusion practices (alternative water sources or fencing) are implemented, up to \$9/acre is allowed, and if livestock exclusion is accompanied by tree plantings, up to \$10/acre is allowed.

5/ Signing incentive payments (SIP) implemented in June 2000 are up-front bonus payments of \$100 to \$150 per acre (\$10 per acre times contract length in years).

6/ Practice incentive payments (PIP) implemented in June 2000 equal 40-percent of practice installation cost.

7/ For marginal pasture, a county-specific flat rate is used.

8/ Acreage within EPA-designated wellhead protection area. Various practices may be used.
