# PART 2

# Performance Data and Analysis

(Unaudited, See Accompanying Auditors' Report)

# Department of the Interior Performance

he FY 2008 Performance and Data Analysis section documents the performance of the Department of the Interior against the FY 2007-2012 Government Performance and Results Act Strategic Plan (GPRA Plan). The Performance and Data Analysis section is organized according to Interior's four areas of mission responsibility and their accompanying end outcome and intermediate outcome goals. These goals provide a framework for the strategic plans of Interior's bureaus. The mission areas are as follows:

**Resource Protection** – Protect the Nation's natural, cultural and heritage resources

**Resource Use** – Improve resource management to assure responsible use and sustain a dynamic economy

**Recreation** – Improve recreational opportunities for America

**Serving Communities** – Improve protection of lives, property and assets, advance the use of scientific knowledge, and improve the quality of life for communities we serve

A fifth area, **Management Excellence**, provides the enabling framework within which we carry out these mission responsibilities to manage the Department to be highly skilled, accountable, modern, functionally integrated, citizen-centered, and results-oriented.

These goals and their measures provide the basis for assessments of the Department's effectiveness in this section.

# What Counts, and How We Count It

ur GPRA Plan provides a high-level overview of performance, setting large mission goals and broad program objectives. Its greatest value, day-by-day, comes from our ability to connect that larger view with each day's ground-level activities, whether that work is focused on rehabilitating a wetland clogged with the invasive purple loosestrife, improving a visitor center at a national park, monitoring the rehabilitation of a played out mine, helping an American Indian child become a better reader, or adding real-time capability to a flood warning system.

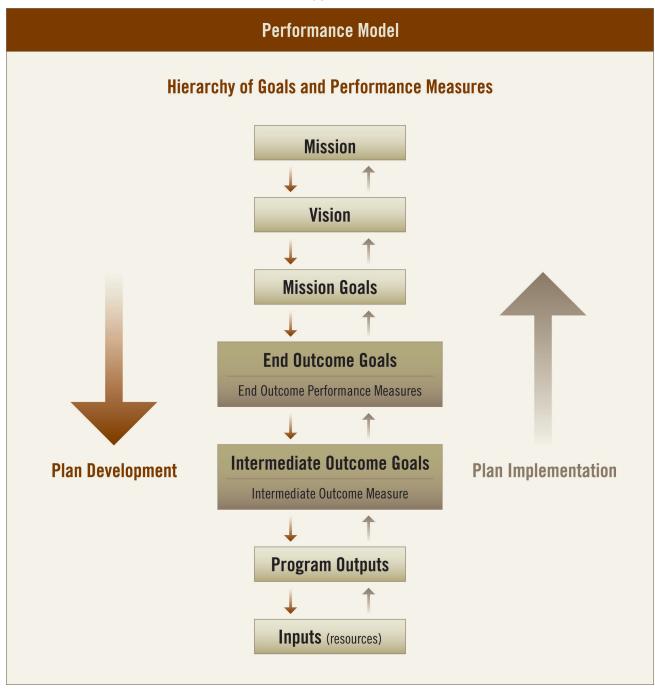

Because the plan identifies a clear hierarchy of goals and measures, we can see exactly how our work contributes to Interior's end results. And because it sets targets at every level, it gives us numerical measures by which we can judge what we have accomplished.

The plan structure focuses on end outcomes, selected high-priority intermediate outcomes, and on measures that will verify progress toward outcome achievement. Each mission area has its own end outcome goals and performance measures. Supporting those, in turn, are intermediate outcomes and measures and, ancillary to the plan, program outputs and inputs (see Figure 2-1 on the next page – Hierarchy of Goals and Performance Measures).

The outcome goals and their performance measures maintain our focus on the bottom line – specific results we must achieve to successfully accomplish our mission. To progress toward these goals, we identify a series of intermediate outcome goals that support, promote, and serve as a vehicle for achieving results. Performance measures are also applied to intermediate outcome goals to help assess their effectiveness.

Engaging these actions, in turn, requires an array of program level activities and their associated outputs. Outputs are typically quantifiable units of accomplishment that are a consequence of work conducted to execute our GPRA Plan (such outputs might be acres treated for hazardous fuels or park safety programs implemented). Activity-based costing lets us connect outputs to costs, creating a powerful management tool that helps us recognize superior performance, focus attention

FIGURE 2-1

on achievement and innovation, and move more quickly to spread best practices throughout the organization.

In our GPRA Plan, the outcome goals are cast in a long-term context – typically covering the duration of the GPRA Plan, currently FY 2007- FY 2012. These goals and measures are annualized to demonstrate

incremental progress toward achieving long-term targets. There are instances in which we may adopt outcome measures that appear output-like because they use units of measurement, such as acres restored or permits issued, that have output connotations. However, the context in which the measure is applied remains outcome focused. In some cases, a true outcome measure may be too

### What Counts and How We Count It

far beyond the control of our programs to provide a useful gauge of the agency's effectiveness in meeting its program responsibilities. In such cases, Interior uses the best indicator it can develop to assess its contribution and progress toward that goal. Selected high-priority intermediate outcome goals and measures appear in both the GPRA Plan and bureau or departmental office operating plans. The balance of the intermediate goals and specific work outputs will appear only in bureau or office operating plans. This category of goals is used to link budgets to performance. Although departmental planning now centers on high-level outcomeoriented goals and performance measures. performance information will be tracked and evaluated at various levels within the organization.

Linking key programs and outcomes of individual efforts, programs and bureaus reinforce the Department's combined stewardship of our critical resources. This is especially important in light of increasing developmental pressures, growing public demand, and accelerating changes in science and

technology. Doing this gives us a set of consistent goals and a common agenda. It gives us the means to increase our focus on performance results, helps make our managers more accountable, and creates a springboard for communication, collaboration, and coordination in the service of conservation with interested citizens, organizations, and communities.

We believe the adoption of our integrated GPRA Plan marked a significant step forward in the Department's ongoing efforts to improve its reporting performance under the Government Performance and Results Act. Our system and measures in the plan make our reporting more transparent, more exact, and easier to evaluate. When employed and examined as a whole, our plan tells the story of the Department's work and provides support to various budgetary and programmatic initiatives which are key to achieving the goals of the program. It establishes performance measures that act like stepping stones, keeping the programs on track, on time, and on budget.

# Reading the Numbers for Yourself

he Department's GPRA measures give readers a clear picture of our expectations and ambitions for the future. They are meant to be transparent and easy to understand. By following the hierarchy from mission goals through end outcome goals to intermediate outcome goals, the reader can see our results, the reasons for them, and planned actions to improve our performance.

### **Data Validation and Verification**

To credibly report progress toward intended results and to enable performance informed decision-making, Interior needs to ensure that its performance information is accurate, reliable, and sound. The GPRA requires agencies to describe the means used to verify and validate measured performance as part of annual performance reports. Verification includes assessing data completeness, accuracy, and consistency and related quality control practices. Validation is the assessment of whether the data are appropriate to measure performance.

The Department requires the full implementation of data verification and validation (V&V) criteria to ensure that information is properly collected. recorded, processed, and aggregated for reporting and use by decision makers. Since 2003, the Department has required bureaus and offices collecting and reporting performance data to develop and use an effective data V&V process. A data V&V assessment matrix, developed in cooperation with departmental bureaus and offices, including the Office of Inspector General, was issued in January 2003 to serve as a minimum standard for data V&V. The matrix has been used successfully as a tool to elevate data V&V procedures to an acceptable functional level and to detect potential problem areas in well established bureau or office data V&V systems. The June 2008 update to OMB Circular A-11 identified the matrix as a sample best practice and reference that Interior used to improve our performance measurement process.

Interior uses four categories of performance data throughout its performance verification and validation process:

- Final. All data are available, verified, and validated for the measure. Actual numbers are reported. Performance analysis can be completed. This includes the characterization of data as goal "Met or exceeded," "Improved over prior year, but not met," "Not met target", or "Data not yet available". (Note: these are the new definitions for performance goals specified in OMB Circular A-11, June 2008.)
- 2. **Estimated**. Some data are unavailable, unverified, or not validated for the measure. A reasonable methodology has been applied to estimate the annual performance. The estimation methodology is documented and is proven repeatable and valid. Estimated data can be factored into the performance analysis.
- 3. **Preliminary.** All data are available but are not verified and validated for the measure. No analysis should be conducted (i.e. these data reports are considered similar to a "no report" in that the data are not verifiable either directly or through a valid, documented, repeatable estimation methodology, and therefore cannot be factored as either goal "Met or exceeded," "Improved over prior year, but not met", or "Not met target"); these data are reported as preliminary.
- No Data. Data are unavailable and there are insufficient sources to develop a reasonable estimate. No report on the measure can be made.

Estimated, preliminary, and unavailable data will be finalized by the publication of the following year's Performance and Accountability Report.

### **Data Sources**

A key element in reporting valid, accurate, and reliable performance data is ensuring that sources of data are documented and available. Interior bureaus and offices are continuing to improve their data management processes by developing better sources of data and by linking with current data sources that already have reporting, verification, and validation procedures in place. Data sources for each of Interior's measures are shown in the following tables as an additional row.

### Performance and Data Analysis Charts and Tables

The charts and tables that follow provide detail on our performance for FY2008. The charts and tables are divided into five sections corresponding to Interior's four Mission Areas and Management Excellence. Each section begins with an aggregate comparison of performance relative to targets for FY2007 and FY2008. This information is followed by a detailed table of performance measures sorted by Intermediate Outcome within an End Outcome Goal. The tables include the following information:

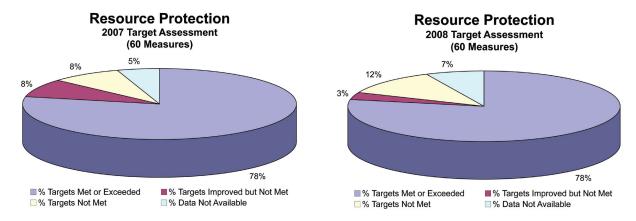

- Measure ID: This ID will help the reader compare information from this table to the information in the Management Discussion & Analysis section of this document.
- 2. **Measure Description:** A brief definition of the performance measure
- FY2005, FY2006, and FY2007 Actual:
   Contains the actual performance data for the measure in the given fiscal year. This information can be used to see performance trends over time.
- 4. **FY2008 Plan:** Contains the performance target for the measure for FY2008. This target was established within the first quarter of FY2008.

- FY2008 Actual: Contains the actual, estimated, or preliminary performance data for the measure for FY2008. Actual and estimated information can be compared to the FY2008 Plan and be used to determine performance trends for the measure since FY2005.
- Goal Met?: Contains a symbol to depict one of four conditions as specified in OMB Circular A-11, dated June 2008.
  - a. The actual performance met or exceeded the target
  - b. The actual performance improved over prior year, but did not meet the target
  - c. The actual performance did not meet the target
  - d. ? : The actual data is not yet available
- 7. **Performance Explanation:** Contains an explanation of why the actual performance exceeded or fell short of the target.
- 8. **Steps to Improve:** Where the FY2008 Actual does not meet the FY2008 target, a description is provided of planned actions to improve performance during the next fiscal year.
- Data Source: Documents the source of the performance data as part of Interior's data verification & validation procedures and internal audit procedures.

### **RESOURCE PROTECTION**

Resource Protection responsibilities are divided into four elements: lands and waters, fish and wildlife, culture and heritage, and applying science information to resource protection. There are 60 GPRA Plan performance measures that assess the performance of the four End Outcome Goals and seven Intermediate Outcomes for this mission area.

Target Assessment Comparison for Resource Protection

Overall, the Department has greatly improved its ability to establish meaningful and challenging performance targets and has worked hard to meet or exceed those targets.

- The Department's performance for Resource Protection decreased slightly. It met or exceeded the same number of its Resource Protection performance goals in FY 2008 as it did in FY 2007.
- The percentage of Resource Protection performance goals not met but improved was five percent lower in FY 2008 than in FY 2007.
- ◆ The percentage of Resource Protection performance goals that were both unmet and unimproved was four percent higher in FY 2008 than in FY 2007.
- ♦ In FY 2008, as in FY 2007, the levels of performance among the four major components of the Resource Protection mission area (i.e., Lands and Waters; Biological Communities; Cultural and Heritage; Scientific Understanding) has been balanced in terms of the proportions of goals met.

The table on the next page details the performance for each of the 60 performance measures within the Resource Protection mission area.

### **RESOURCE USE**

Managing resources has become increasingly more complex. Today, we are often called upon to determine where, when, and to what extent renewable and non-renewable economic resources on public lands should be made available. That task demands that we balance the economy's call for energy, minerals, forage, and forest resources with our resource protection and recreation responsibilities. Interior conducts research on and assessments of undiscovered non-fuel mineral and energy resources which assist the Department's land management agencies in their goal of providing responsible management of resources on Federal lands. There are 52 GPRA Plan performance measures that assess the performance of the four End Outcome Goals and 16 Intermediate Outcomes for this mission area.

FIGURE 2-4
Target Assessment Comparison for Resource Use

Overall, the Department has significantly improved its ability to establish meaningful and challenging performance targets and has worked continuously to meet or exceed those targets. As a result, 73% of targets were met in 2008 compared with 67% in 2007, a 9% increase. The increase in targets not met was mainly due to the more stringent performance standards recently implemented. Performance should improve as programs adjust to the new standards. As a corollary to the performance improvement effort, the Department has substantially enhanced its ability to collect and report performance data on a timely basis, resulting in no unreported measures for this mission area. The table below details the performance for each of the 52 performance measures within the Resource Use Mission Area.

FY2005 Actual FY2006 Actual FY2007 Actual FY2008 Plan FY2008 Actual Goal Mc Totals:  30 1 2 (E) 5 5 (5 E)  Goal Mct or Exceeded. Estimated Data. Results include 182 barrels of seepage from Hurricane Ivan, Katrina and Rita damaged structures (incl. chronic spillage less than one bbl) and the largest spill reported to date (i.e., 200 bbl) from Hurricane Ike. Without hurricane-related spills, the estimated number of barrels of oil spilled per million produced in FY2008 was extremely tow at 0.1. To date, there are no reports of environmental consequences from OCS spills attributable to Hurricanes Gustav and Ike because spills were thoroughly dispersed offshore by hostile sea conditions. Loss of hydrocarbons from wells on the Federal Outer Continental Sheff (OCS) during Hurricanes Gustav and Ike was minimized by the successful operation of the required safety valves that automatically activate when pipelines are breached, limiting losses to the volumes within the damaged sections. All OCS facilities in areas threatened by approaching storms were shut in prior to the hurricanes of the oil oil losses were limited mainly to oil stored on damaged platforms and rigs or contained in damaged pipeline sections between the check valves.  MMS expects to have additional oil spill estimates by the end of December 2008. Final results are pending completion of ongoing industry assessments and Departmental investigations and verification procedures relating to incidents from the hurricanes. Due to the magnitude of these storms, actual data may exceed the annual target for barrels of oil spilled once final assessments have been reported.  Dil spill data comes from the operator reports to MMS; MMS Pollution, Accident Investigation and Panel Reports reports to the National Response Center; other U.S. Coast Guard reports; and any outside data that is available crude oil and condensate production data is provided by MMS's Minerals Revenue Management. ### **RECREATION**

Americans come to their national parks, refuges, and public lands for many reasons: to renew their sense of self, to experience adventure or relaxation, and to sample the rich diversity of our landscape and culture on water and land, at sea level or thousands of feet above, in scuba gear, on mountain bikes, or with a camera, while hunting, fishing, camping, hiking, boating, driving, or birding. There are 13 GPRA Plan performance measures that assess the performance of the two End Outcome Goals and five Intermediate Outcomes for this mission area.

Target Assessment Comparison for Recreation

Overall, the Department has greatly improved its ability to establish meaningful and challenging performance targets and has worked hard to meet or exceed 12 percent more of its targets in FY2008 compared to FY2007. The Department has also significantly improved its ability to collect and report performance data on a timely basis. The table below details the performance for each of the 13 performance measures within the Recreation mission area.

FIGURE 2-7 MISSION GOAL: RECREATION Improve recreation opportunities for America End Outcome: Improve the quality and diversity of recreation experiences and visitor enjoyment on DOI lands **DESCRIPTION:** Percent of visitors satisfied with the quality of experience FY2008 Actual FY2005 Actual FY2006 Actual FY2007 Actual FY2008 Plan Goal Met? 5 93% 91% Totals: 94% 91% 91% (E) 5 Performance Explanation Goal Met or Exceeded. ### SERVING COMMUNITIES

The Department is responsible for protecting lives, resources, and property; providing scientific information to reduce risks from earthquakes, landslides, and volcanic eruptions; and fulfilling the Nation's trust and other special responsibilities to American Indians, Native Alaskans, and residents of Island Communities. There are 47 GPRA Plan performance measures that assess the performance of the five End Outcome Goals and 13 Intermediate Outcomes for this mission area.

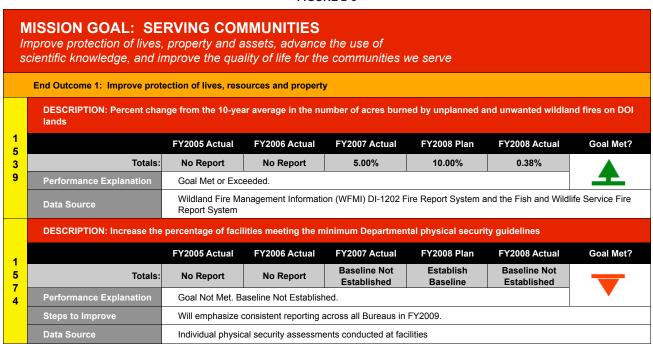

FIGURE 2-8

Target Assessment Comparison for Serving Communities

In FY 2007, in the Serving Communities mission area, there were a high percentage of measures (21%) that were unreported. In FY 2008, unreported data was completely eliminated. With significantly increased reporting, the percentage of targets that were achieved or not met, both increased by 17% and 13%, respectively. In addition, two-thirds of the FY 2007 results that fell into the "not met but improved" category upgraded to "met or exceeded". These changes resulted in an increase in targets that were achieved or exceeded in this mission area from a modest 51% in FY 2007 to 68% this past year. The table below details the performance for each of the 47 performance measures within the Serving Communities mission area.

#### MANAGEMENT EXCELLENCE

Successful management is imperative if we are to meet our four strategic mission goals. Interior personnel will need to reconcile the public's increasing demand for services and products within constrained budget resources. Only a steady stream of innovation will produce the required increases in our efficiency and effectiveness. To succeed, we will need increased accountability for results, and the continuous introduction and evaluation of process, structural, and technology improvements. There are 33 GPRA Plan performance measures that assess the performance of the two End Outcome Goals and six Intermediate Outcomes for this enabling framework.

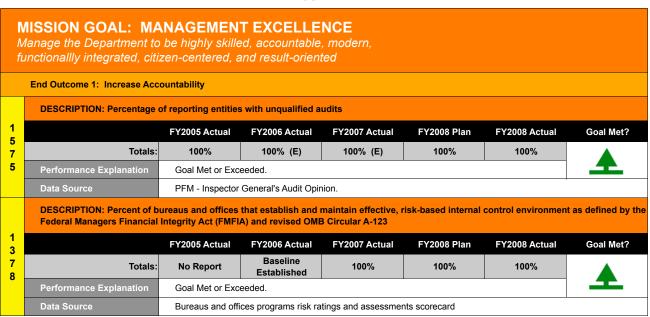

FIGURE 2-10

Target Assessment Comparison for Management Excellence

Overall, several Department offices have struggled with their ability to establish meaningful and challenging performance targets, to perform at or above those targets, and to report performance information on a timely basis. This will be an area of focus during the next fiscal year. The table below details the performance for each of the 33 performance measures within the Management Excellence area.

# Program Evaluations

rogram evaluations are an important tool in analyzing the effectiveness and efficiency of Interior's programs, and in evaluating whether the programs are meeting their intended objectives. Interior's programs are evaluated through a variety of means, including performance audits, the Program Assessment Rating Tool (PART), financial audits, management control reviews, and external reviews from Congress, the Office of Management and Budget (OMB), the General Accountability Office (GAO), the Office of the Inspector General (OIG), and other organizations, such as the National Academy of Public Administration (NAPA) and the National Academy of Sciences (NAS). Interior uses self-assessments to verify that performance information and measurement systems are accurate and support the Department's strategic direction and goals. Data collection and reporting processes are further reviewed and improved through the use of customer and internal surveys.

Examples of some of the program evaluations conducted for each Interior bureau during FY 2008 follow in Figure 2-12. Figure 2-13 lists all PARTS conducted from 2002 through 2008.

### FIGURE 2-12

# **Program Evaluations**

Bureau	Title of Program	Strategic Plan Mission Area	Purpose of Program Evaluation	Actions Taken/Planned in Response to Evaluation	For Copy Contact
BIA	Indian Services Road Maintenance RePART	Serving Communities	Re-assessment was conducted to review the program's effectiveness and efficiency; specifically whether progress had been made since the program was PART'd in 2004 and received a rating of "Results Not Demonstrated." The re-assessment resulted in an improved rating of "Adequate."	Improvement actions include: establishing clear responsibilities within the Indian Reservation Roads (IRR) system; improving coordination with partners to avoid redundancy of effort; reassess the law regarding funding for maintenance of the IRR system; and preparing an annual report on the collection and use of relevant data.	www.ExpectMore.gov
BIE	Evaluation Of Controls To Prevent Violence At Bureau Of Indian Education Operated Education Facilities (OIG Report: NM-EV- BIE-0001-2008)	Serving Communities	To ensure that BIE was taking necessary precautions to protect Indian children at BIE operated education facilities.	The report contained three recommendations to improve controls to prevent schools violence, including preparing and implementing action plans to evaluate the safety, security and emergency preparedness at each education facility, and correct identified weaknesses. The Department's response was pending.	www.doioig.gov
BIE	Bureau of Indian Education Background Investigations (OIG Report: Q IN-BIA-0005- 2007)	Serving Communities	To determine if required background checks were conducted for employees/other individuals who have regular contact with children at Indian education facilities.	The Department concurred with all five recommendations and took immediate actions. While three recommendations have not been fully implemented, the OIG considers all five recommendations resolved.	www.doioig.gov
BIE	BIE Schools: Improving Interior's Assistance Would Help Some Tribal Groups Implement Academic Accountability Systems (GAO Report: GAO-08-679)	Serving Communities	To determine the extent of: BIE schools' adoption of BIE's AYP definition; tribal groups' pursuit of alternatives and their reasons as well as reasons other tribal groups have not done so; and federal assistance to tribal groups developing alternatives.	The report contained several recommendations aimed at increasing assistance, guidance, training, and communication for tribal groups in their implementation of the provision for developing alternatives. The Department agreed with GAO's recommendations and is working to implement them.	www.gao.gov
BOR	Human Resources Programs (Accountability Reviews Reclamation- wide)	Management Excellence	The purpose of this evaluation is to analyze the efficiency, effectiveness, and results of each Human Resources Office's (HRO) programs and procedures. During FY 2008, two regional accountability reviews were conducted.	Corrective action plans are currently being developed to address recommendations to improve internal control processes and to use best practices identified during the reviews. Based on the findings in the FY 2007/FY 2008 Accountability Reviews, training was offered to assist HR professionals in utilizing the automated hiring management system. For both reviews, corrective actions are also planned to ensure official college transcripts are filed in the Employee's Official Personnel Files (OPFs) and to have the HROs review all OPFs to determine compliance with the Personnel Recordkeeping Guidance. Corrective action is also planned to ensure proper supporting documentation is on file for the Student programs.	Debbie Clark, 303-445-2785

Bureau	Title of Program	Strategic Plan Mission Area	Purpose of Program Evaluation	Actions Taken/Planned in Response to Evaluation	For Copy Contact
BOR	Property Management Compliance Assessment	Management Excellence	The objective of Property Performance Management Survey (PPMS) evaluation is to use random sampling techniques to verify the accuracy of the data reported quarter's management, real and personal property inventories.  The were 13 findings with 16 recommendations from the revier Recommendations included revision inventory process to ensure accurate of information; training new receive official; establishing a Board of S and developing and implementing quarter's policy. The MP Region Corrective Action Plan was provion April 4, 2008. At this time all Corrective Actions have been completed.		Elizabeth Harrison, 303-445-2783
BOR	Acquisition and Assistance Management Program	Management Excellence	The purpose of the evaluation is to conduct 1) comprehensive reviews of Acquisition and Assistance Management Program in the Regional Offices to ensure that acquisition, financial assistance, and the purchase business line are in compliance with the applicable laws and regulations and 2) determine if the program can improve management areas relating to organizational alignment and leadership, policies and procedures, human capital and knowledge and information management. During FY 2008, Reviews were completed at the Pacific Northwest (PN), and Upper Colorado (UC) regions.	Each AAMR addresses elements unique to the regional office. Regional offices are in the process of preparing corrective actions to address management issued identified. In addition, Reclamation is using the observations made to identify systemic issues throughout Reclamation that require review and/or revision to existing processes and/or policies.	Elizabeth Harrison, 303-445-2783
BOR	Water Management Program-Dam Safety Program	Resource Use	The purpose of the Dam Safety Program evaluations are to assess the overall effectiveness of the basic components of the Dam Safety Program (monitoring and surveillance; periodic reviews; and actions to reduce risk) and technical and administrative practices.	The Annual Dam Safety Assessment Report was signed by the Commissioner on July 22, 2008. The report states that decision documents are prepared annually to formally respond to Dam Safety recommendations. The report also disclosed that in FY 2007, 68 decision documents to respond to recommendations were prepared. This resulted in a 13 percent decrease in the number of incomplete Safety Of Dams recommendations (from 341 to 298), even though 53 new recommendations were added. Four correction action plans for improving program performance were also developed. Three of corrective action plans have been fully implemented. These three corrective action plans specifically identified opportunities to further enhance project beneficiary involvement, to integrate performance results into budget requests; and to do a better job tracking performance target accomplishments. The other corrective action plan was prepared to address recommendations in the National Research Council's SOD Program report. The corrective actions to implement the recommendations from the National Research Council's report are still being implemented.	Brian Becker, 303-445-2776
BOR	Federal Real Property Profile (FRPP) Asset Management Verification and Validation Plan	Management Excellence	The purpose of the evaluation is to ensure that Reclamation have efficient and effective processes and controls in-place to verify and validate the integrity (accuracy, completeness, and consistency) of the FRPP data as required by the Executive Order 13327, and Real Property and Financial Management Policy, dated April 30, 2003.	Reclamation identified four short term corrective action items and five long term corrective action items in response to the evaluation. One of these actions included developing an improved sampling process.	Kenneth Maxey, 303-445-2727

Bureau	Title of Program	Strategic Plan Mission Area	Purpose of Program Evaluation	Actions Taken/Planned in Response to Evaluation	For Copy Contact
BOR	Hydropower	Resource Use	The purpose of the evaluation is to assess the effectiveness of Power O&M Program (PRO&M) and practices to determine Reclamation's Powerplants are operating effectively and efficiently per requirements of the PRO&M D&S FAC 04-01.	In 2007, three Comprehensive Facility Reviews (CFRs) and five Periodic Facility Reviews (PFRs) were performed. This resulted in 2 Category 1, 52 Category 2, and 56 Category 3 recommendations. The number of recommendations listed is expected to increase when all the PFR's are published by the respective regions. In FY 2008, CFRs were conducted for Flaming Gorge/Fontenelle Powerplants; Mt. Elbert Powerplant; Hoover Powerplant; and Big Horn Basin. PFR's for Elephant Butte, Green Springs and Hungry Horse were also conducted. The review reports (with recommendations on deficiencies, if any) are scheduled to be published in FY 2009.	303-445-3635
BOR	Water Management Program-Value Engineering/Value Study	Resource Use	Value Engineering studies are conducted to ensure Reclamation's design and construction activities contain realistic budgets, identify cost savings and cost avoidance opportunities; identify and remove non essential capital and operating costs, and improves and maintain optimum quality of program and acquisition functions as required by OMB Circular A-131; Departmental Manual Part 369 (369 DM 1); and P.L 104-106.	In FY 2007, the Value Engineering Program identified cost savings (\$8M) and cost avoidance (\$2M) actions associated with 46 contracts. This resulted in return on investment of \$9.51 for every \$1 invested in Value Program.	Norman Hyndman, 303-445-3251
FWS	Division of the National Fish Hatchery System	Resource Protection, Resource Use	FY2008 Assurance Statement on Internal Control over Fish Health of Coldwater Fishes Distributed by the National Fish Hatchery System	Review was completed on August 21, 2008. Program provides reasonable assurance that internal controls over NFHS-reared and distributed coldwater fish were effective as of August 2008.	Dr. Stuart C. Leon, Chief, DNFHS, Stuart_Leon@fws.gov, 703-358-2189
FWS	Division of Engineering	Resource Protection, Recreation, Serving Communities	Independent Evaluation by Director-appointed Team to recommend a most efficient method for delivery of engineering and construction services within the FWS and to manage the dam, bridge and seismic safety programs and the environmental compliance programs.	Recommendations were finalized in September 2008 and will be presented to senior management in early FY09. Recommendations will be implemented upon receipt of the Director's approval.	Paul Rauch, Chief, Division of Engineering, paul_rauch@fws.gov, 703-358-1912.
FWS	National Wildlife Refuge System	Resource Protection, Recreation, Serving Communities, Management Excellence	Independent Evaluation by Management Systems International	A final report with recommendations was released in June 2008. A variety of recommendations will be implemented by NWRS divisions over the coming year.	Jim Kurth, Acting Assistant Director, National Wildlife Refuge System, jim_kurth@fws.gov, 202-208-5333
FWS	National Wildlife Refuge System	Resource Protection, Recreation, Serving Communities, Management Excellence	GAO Report on Refuge Funding Trends	A draft GAO report on funding trends is currently under review. Recommendations will be analyzed when report is final.	Jim Kurth, Acting Assistant Director, National Wildlife Refuge System, jim_kurth@fws.gov, 202-208-5333
FWS	National Wildlife Refuge System	Resource Protection, Recreation, Serving Communities, Management Excellence	FY08 Internal Control Review of Law Enforcement Branch	Review was completed in July 2008. Action taken include, modifying database and implementing new inventory controls.	Jim Kurth, Acting Assistant Director, National Wildlife Refuge System, jim_kurth@fws.gov, 202-208-5333
FWS	National Wildlife Refuge System	Resource Protection, Recreation, Serving Communities, Management Excellence	FY08 Alternative Internal Control Review of Fire Branch	Final report was issued in August 2008. No weaknesses were found in the design or operation of internal controls.	Jim Kurth, Acting Assistant Director, National Wildlife Refuge System, jim_kurth@fws.gov, 202-208-5333

# **Program Evaluations**

Bureau	Title of Program	Strategic Plan Mission Area	Purpose of Program Evaluation	Actions Taken/Planned in Response to Evaluation	For Copy Contact
FWS	International Affairs, Division of Management Authority	Resource Protection, Resource Use	FY 2008 Annual Assurance Statement on Internal Control	Review was completed August 21, 2008. No significant deficiencies or material weaknesses were identified.	Holly Robinson, holly_robinson@fws. gov, 703-358-2261
FWS	International Affairs	Resource Protection, Resource Use	FY2008 Annual Assurance Statement on Internal Control over Financial Reporting	Review was completed by July 16, 2008. Program provides reasonable assurance that internal controls over financial reporting were operating effectively as of June 30, 2008.	Holly Robinson, holly_robinson@fws. gov, 703-358-2261
FWS	Endangered Species	Resource Protection, Resource Use	Program Assessment Rating Tool, Program Evaluation	DOI/OIG report was issued in June 2008. The Service is addressing the 15 suggestions.	Bryan Arroyo, Assistant Director, Endangered Species, Bryan_Arroyo@fws. gov, 202-208-4646
FWS	Coastal Program	Resource Protection	FY 2008 Department of Interior Internal Control Review (ICR) as required under OMB Circular A-123	Completed August 21, 2008, concluding that the program has adequate controls in place to minimize program risks associated with program business processes.	Tamara McCandless, Tamara_McCandless @FWS.gov 1-703-358-2011
FWS	Partners for Fish and Wildlife Program	Resource Protection	FY 2008 Department of Interior Internal Control Review (ICR) as required under OMB Circular A-123	Completed August 21, 2008, concluding that the program has adequate controls in place to minimize program risks associated with program business processes.	Tamara McCandless, Tamara_McCandless @FWS.gov 1-703-358-2011
FWS	Division of Fish and Wildlife Management and Habitat Restoration – Branch of Invasive Species	Resource Protection	FY 2008 Department of Interior Internal Control Review (ICR) as required under OMB Circular A-123	iew (ICR) as required under OMB assurance that internal controls over	
FWS	Division of Fish and Wildlife Management and Habitat Restoration – Management Assistance	Resource Protection	FY 2008 Department of Interior Internal Control Review (ICR) as required under OMB Circular A-123	Review was completed on August 21, 2008. Program provides reasonable assurance that internal controls over Management Assistance were effective as of August 2008.	Hannibal Bolton, Chief, DFWMHR, Hannibal_Bolton@ fws.gov, 703-358-2027
FWS	Migratory Birds	Resource Protection, Recreation, Serving Communities, Management Excellence	PART Re-assessment 2008	Re-assessment was completed in June 2008. MB score improved from "Results Not Demonstrated" to "Moderately effective." New performance measures and improvement plan were developed for next PART re-assessment.	Paul Schmidt, Assistant Director, Migratory Bird Program, paul_r_schmidt@ fws.gov, 202-208-1050
FWS	Migratory Birds	Resource Protection, Recreation, Serving Communities, Management Excellence	Independent Program Evaluation by Wildlife Management Institute  We are currently reviewing and plan to provide comments by end of October, with expected final report by end of calendar year.		Jerome E. Ford, Deputy Assistant Director, Migratory Bird Program, jerome_ford@fws.gov, 703-358-2583
ммѕ	Royalty-In-Kind Contracting and Related Processes	Resource Use	The objective of this review was not to duplicate the work performed by other ongoing external reviews, but to internally assess the effectiveness and efficiency of the royalty-in-kind contracting and related processes, and assist the royalty-in-kind management in establishing thorough procedures and sound management controls.	duplicate the work performed by other ongoing external reviews, but to internally assess the effectiveness and efficiency of the royalty-in-kind management in establishing thorough procedures and sound	

Bureau	Title of Program	Strategic Plan Mission Area	Purpose of Program Evaluation	Actions Taken/Planned in Response to Evaluation	For Copy Contact
ммѕ	Policies and Procedures for Environmental Mitigation on Outer Continental Shelf Permitted Activities	Resource Use	The goal of this review was to assess internal procedures and processes to determine if guidance, processes, and procedures are sufficiently documented, applied, and evaluated to ensure that the appropriately conditioned activities are conducted in a manner that does not cause undue or serious harm or damage to the human, marine, or coastal environments.	procedures and processes to determine if guidance, processes, and procedures are sufficiently documented, applied, and evaluated to ensure that the appropriately conditioned activities are conducted in a manner that does not cause undue or serious harm or damage to the human, marine, or	
MMS	Policies and Procedures for Ensuring	Resource Use	The goal of this review was to assess whether the MMS is appropriately applying policies, processes, procedures, and internal controls to ensure that lease revenues are collected, allocated, and disbursed timely and accurately.	This review identified six control weaknesses with eight required corrective actions. No material weaknesses were identified. The MMS plans to take corrective actions during FY 2009 to resolve the identified control weaknesses.	Charles Norfleet, 202-208-3973, charles.norfleet2@ mms.gov
MMS	Mineral Revenues: Data Management Problems and Reliance on Self- Reported Data for Compliance Efforts Put MMS Royalty Collections at Risk (GAO-08-893R)		The objectives were to determine: whether Interior has adequate assurances that federal oil and gas are measured accurately; whether MMS's royalty information technology system and royalty collection and verification processes provide sufficient assurance that all royalties are being collected; and the extent to which MMS's compliance efforts provide an adequate check on industry's self-reported data.	ne objectives were to determine: whether terior has adequate assurances that federal and gas are measured accurately, whether MS's royalty information technology system droyalty collection and verification ocesses provide sufficient assurance that all yalties are being collected; and the extent to hich MMS's compliance efforts provide an dequate check on industry's self-reported	
ммѕ	Minerals Management Service Royalty-In- Kind Oil Sales Process (C-EV- MMS-0001-2008)	Resource Use	The objectives were to evaluate controls to ensure the effectiveness and fairness of the royalty-in-kind oil sales process.	The OIG made six recommendations. MMS will implement the recommendations in FY2009.	Charles Norfleet, 202-208-3973, charles.norfleet2@ mms.gov
MMS	Oil and Gas Royalties: The Federal System for Collecting Oil and Gas Revenues Needs Comprehensive Reassessment (GAO-08-691)	Resource Use	The objectives were to: evaluate government take on federal oil and gas leases; evaluate how the absence of flexibility has led to forgone revenues; and assess what Interior has done to monitor federal oil and gas fiscal system.	The GAO made two recommendations with which DOI did not fully concur. However, MMS has work underway that will provide the outside review recommended by GAO and continues to evaluate oil and gas fiscal systems.	Charles Norfleet, 202-208-3973, charles.norfleet2@ mms.gov
NPS	Cultural Resource Stewardship	Resource Protection	To assess the adequacy of cultural resource management planning and the monitoring and protection of cultural resources.	No significant deficiencies were noted. Cultural resource plans are being prepared/updated where they are absent/out of date.	Jack Blickley 703-487-9071 Jack_Blickley@nps. gov
NPS	Emergency Services	Serving Communities	To evaluate if emergency operations plans are current, mutual aid agreements with local agencies are in place, and emergency operations personnel are properly trained.	No significant deficiencies were noted. Training shortfalls are being addressed.	Jack Blickley 703-487-9071 Jack_Blickley@nps. gov
NPS	Protection	Serving Communities	mutual aid agreements will be mutual aid agreements will be mutual aid agreements will be updated. Law enforcement staffing enforcement agencies are in place, and shortages will be considered a funding.		Jack Blickley 703-487-9071 Jack_Blickley@nps. gov
NPS	Facility Maintenance	Management Excellence	The Program Assessment Rating Tool (PART) was developed to assess and improve program performance reviewing the program purpose and design; performance measurement, evaluations, and strategic planning; program management; and program results.	Program was rated Moderately Effective. Actions to improve the program include 1) Develop a system to monitor obligation balances 2) Develop procedures to alignment funding with the project formulation process and 3) Conduct an independent program evaluation for the National Park Service Life Cycle Asset Management Program	Joel Lynch 202-273-3656 Joel_Lynch@nps.gov

Bureau	Title of Program	Strategic Plan Mission Area	Purpose of Program Evaluation	Actions Taken/Planned in Response to Evaluation	For Copy Contact
OSM	Fee Compliance	Resource Protection	This AICR was conducted to determine if OSM has adequate management controls on the reclamation fee account management process to include the controls surrounding the addition No Material weaknesses identified. of new accounts (permits), the management of current account status, and the closing accounts.		Sean Spillance, Chief, Fee Accounting and Collection, spillance@osmre.gov, 303-236-0330 x278
OSM	Indian Lands Program	Resource Use	This ICR was conducted to determine whether the Indian land regulatory program has in place adequate management controls to prevent fraud, waste and misuse of resources.	No material weaknesses identified.	Richard Holbrook, Chief, Program Support Division, rholbrook@osmre.gov, 303-293-5030
OSM	Technical Innovation and Professional Services	Resource Protection and Resource Use	This ICR was conducted to determine whether the TIPS program has in place adequate management controls to prevent fraud, waste, and misuse of resources, and to confirm that a strong management control system is in place.	No material weaknesses identified. Improvements were recommended and are being implemented.	Louis Hamm, Chief, TIPS Training and Technology Transfer, Ihamm@osmre.gov, 303-293-5061
OSM	Records Management	Management Excellence	This AICR was conducted to examine the controls in place to ensure compliance with the Federal Records Act, as amended, which requires all Federal agencies to make and preserve records containing adequate and proper documents of the organization, functions, policies, decisions, procedures, and essential transactions of the agency.	No material weaknesses identified. Improvements were recommended and are being implemented.	Roy Morrison, Chief Information Officer, rmorrison@osmre.gov, 202-208-2810
оѕт	Records Management Assessments	Serving Indian Communities	Conduct site assessments and evaluate record management programs to ensure that OST offices have effective records management programs which comply with federal laws and regulations.	Respond to recommendations in the reports by reviewing, updating, and taking follow-up action on corrective action plans	Elizabeth Wells, Office of Trust Review and Audit, (505) 816-1286
OST	FISMA	Serving Indian Communities	In order to ensure that the information technology systems are Certified and Accredited using the NIST guidance set forth by the Department, systems should be be C & A'd on a three year cycle as long as no major changes have taken place	OST System accreditation was maintained throughout 2008. FDCC settings were deployed and procedures implemented to continuously monitor the compliance state.     2.  TFAS accreditation expired on May 30, 2008. An IATO was issued on May 31, 2008 to bridge the gap between the time the system contract expired and the new contract was awarded. TFAS is anticipated to have a full ATO by September 30, 2008.	Mr. J Lente, BITSM, (505) 816-1153
OST	Risk Management	Serving Communities	A-123 Appendix testing	Tested internal controls	Margaret Williams, (505) 816-1052
оѕт	Risk Management	Serving Communities	Federal Managers Financial Integrity Act	Corrective action plans were developed as necessary	John Constable, (505) 816-1088
OST	Deputy Special Trustee	Serving Communities	Conduct site assessments at program offices to assist with trust related issues. Issues vary from encoding documents into the Trust Asset and Accounting Management System, researching trust land ownership, analyzing trust fund distributions, and analyzing processes for effectiveness.	During FY2008, assessments were conducted and assistance provided at various BIA Land Titles and Records Offices, Agency offices and the Farmington Indian Minerals Office.	John White, (505) 816-1328
OST	Reengineering	Serving Communities	Review Trust Beneficiary Call Center operations.	Reviewed and assessed call center operations to determine if process reengineering was necessary.	Joel Smith, (505) 816-1368
OST	Trust Services	Serving Communities	Processes were reviewed for risk levels and proper controls relating to FMFIA and OMB Circular A-123 requirements for programs and financial reporting, respectively.	No material weaknesses identified. All other findings are being addressed.	Rob Winter, OTRR, (505) 816-1142
оѕт	Updates to the OST Investment Policy	Serving Communities	The current OST Investment Policy (effective: 4/1/05) should be updated to reflect management of accounts by investment objective and to incorporate the charter of the Portfolio Review Committee.	Revised draft OST Investment Policy and Portfolio Review Committee charter were completed in FY08 and submitted to SOL for comment; implementation planned for FY09.	Chuck Evans, OTFM, (505) 816-1100

Bureau	Title of Program	Strategic Plan Mission Area	Purpose of Program Evaluation	Actions Taken/Planned in Response to Evaluation	For Copy Contact
OST	Improved Control Log Software for DTFA	Serving Communities	During FY07 a program was initiated to develop specifications for improved Control Log software for DTFA for improved management information and metrics on flow rates, error rates and batch status for Field Ops and DTFA. Improved error tracking was seen as critical to provide timely feedback to reduce errors going forward.	During FY07 and FY08 system specifications were developed for improved software to control the flow of batch processing at OST; a contract was let during FY07 and testing of the new software was underway at the end of FY08. During FY09 the new software is expected to be completed and implemented.	Joseph Gosline, DTFA, (505) 816-1181
OST	Lockbox Receipting	Serving Communities	An evaluation of certain intensely manual reactive controls regarding the receipt and forwarding of payments from an agency to the trust lockbox has determined that risk levels without these controls are at an acceptable level.	Procedures have been revised, with potential savings of hundreds of thousands of dollars across IA and OST	Rob Winter, OTRR, (505) 816-1142
USGS	Volcano Hazard	Serving Communities	Review response of the Volcano Hazards Program (VHP), to the 2000 National Research Council (NRC) review (Fink et al., 2000).  Review degree to which VHP met the goals of its previous 5-year plan.  Evaluate the soundness of the current 5-year plan.  Provide input on the National Volcano Early Warning System (NVEWS) (Ewert et al., 2005).	The American Association for the Advancement of Science panel found that the VHP did an adequate job of responding to the previous review and meeting its previous five-year-plan goals. The panel strongly praised NVEWS, and had approximately 15 recommendations toward improving the initiative and other aspects of the VHP, including suggestions for the next five-year plan. The VHP has begun action on these recommendations, including better and more real-time web-based information dissemination, requests for projects with more of an international component, and development of agreements with more state and academic partners.	William Burton, (703) 648- 6904
USGS	Mineral Resources	Resource Use	To determine the importance to the U.S. economy of information on production and consumption of nonfuel mineral commodities.	The National Research Council (NRC) report, Minerals, Critical Minerals, and the U.S. Economy released in October 2007, concludes that minerals are indeed critical to the U.S. economy and suggested a new methodology for determining the extent to which any particular mineral is critical at any time, called a criticality matrix. USGS is working with members of the NRC panel to improve understanding of their proposed method and seek advice on specifics of application of their findings to the revision of the National Mineral Resource assessment, scheduled to begin in 2012. The primary use of this tool is expected to be in identifying priority commodities for both minerals information and research and assessment studies. This prioritization process will maximize the likelihood that the updated National Mineral Resource assessment is an unbiased, efficient, and cost-effective source for information required by decision-makers to ensure supply of critical mineral materials to meet the Nation's civilian and defense needs.	Kate Johnson, (703) 648-6110

Wildland Fire Management	RND			(RND)						
Central Utah Project				Adequate						

Programs are rated:

Results Not Demonstrated (RND)
Moderatelly Effective (Mod. Eff.)

Ineffective Effective Adequate

Interior program managers have developed action plans in response to OMB's recommendations regarding the PARTed programs. These action plans were first implemented early in FY 2003 for programs assessed in FY 2002. Although periodic progress reports have been provided to OMB, Interior program managers and executives are actively tracking progress toward implementing recommendations to improve their programs. Interior used its own web based management

system until June 2008 to track and monitor its

progress. We then worked with OMB to transfer this functionality to OMB's PARTWeb system, thereby providing this important tracking and monitoring function to every Agency across the Federal Government. In addition, Interior conducted formal progress reviews with each Bureau on a quarterly basis. These combined efforts demonstrate a commitment to excellence and will drive continuous improvement of Interior's programs to deliver transparent and accountable results to the American people.
