**Noninsured Crop Disaster Assistance
Program for 2001 and Subsequent Years
1-NAP (Revision 1)**

Amendment 45

Approved by: Deputy Administrator, Farm Programs

Amendment Transmittal

A Reasons for Amendment

Subparagraph 194 F has been amended to clarify acceptable records of forage production.

Subparagraph 195 H has been amended to correct the calculations in the examples for determining assigned AUD's.

Subparagraph 196 E has been amended to clarify the example for small grain final planting dates.

Paragraph 197 has been added to provide policy for administering NAP forage provisions in those areas where RMA Pasture, Rangeland, and Forage (PRF) Pilot Insurance Program coverage is offered.

Subparagraph 503 C has been amended to add the 2009 AUD value.

Part 1 Basic Information

1	Overview	1-1
2	Units of Measure	1-3
3	DAFP Responsibilities	1-6
4	STC Responsibilities	1-7
5	SED Responsibilities	1-9
6	COC Responsibilities	1-10
7	CED Responsibilities	1-13
8	Producer Responsibilities	1-14
9	Deadlines for NAP	1-15
10	PECD Addresses and FAX Number	1-16
11	CCC-770 NAP	1-17
12-20	(Reserved)	

Part 2 NAP Provisions

21	Cause of Loss For 2006 and Prior Years	2-1
21.5	Cause of Loss For 2007 and Subsequent Years.....	2-4
22	Coverage Period	2-4.6
23	CCC-471, Application for Coverage	2-8
24	Service Fee	2-14.5
24.5	Transfer of NAP Coverage	2-14.11
25	Prevented Planting for 2006 and Previous Years	2-15
25.4	Prevented Planting for 2007 and Future Years	2-16.4
25.5	Late Planting	2-16.6
26	Amount of Assistance	2-17
27	Quality Losses	2-18
28	Units	2-20
29	Eligible Producer	2-21
30	Highly Erodible Land and Wetland Conservation Compliance	2-22
31	FCIC Disqualification of Persons for NAP	2-23
32	CAT Insurance Linkage	2-24
33	Qualifying Gross Revenues	2-25
34	Payment Limitations	2-31
35	Multiple Benefits	2-33
36	Unacceptable, Incorrect, or False Records and Certifications	2-34
37	Misrepresentation, Scheme, or Device	2-35
38	Liquidated Damages	2-37
39	Tolerance	2-38
40-105	(Reserved)	

Table of Contents (Continued)

Page No.

Part 3 Crop Data Information

106	Crop Documentation	3-1
107	Expected Yield	3-1
107.5	Carrying Capacity	3-6.5
108	Average Market Prices	3-6.7
109	Unharvested and Prevented Planting Payment Factors	3-10
110	Minutes	3-12
111-150	(Reserved)	

Part 4 Acres and Crops

Section 1 Acreage

151	Unit Acreage and Production Certifications	4-1
152	Prohibiting Assigned Yields in Certain County Offices	4-3
153	Acreage Measurement Service	4-4
154	Reported and Determined Crop Acreage	4-4
155	Reported Crop Acreage	4-5
156	(Withdrawn--Amend. 17)	
157-169	(Reserved)	

Section 2 Crops

170	National Crop Definition	4-31
171	Eligible Crops	4-34.5
172	Ineligible Crops	4-35
173	Types or Varieties of Crops	4-37
174	Handling Crops Produced for Different Intended Uses	4-38
175	Double-Cropped Acreage	4-45
176	Repeat Crops	4-46
177	Multiple-Planted Crops	4-46
178	Defining Planting Periods for Repeat and Multiple-Planted Crops	4-47
179	Multiple-Harvested Crops	4-50
180	Determining Crop Loss for Yield-Based Crops	4-50
181	Value Loss Crops	4-52
182	Aquaculture	4-53
183	Ornamental Nursery	4-61
184	Christmas Trees	4-67

Part 1 Basic Information**1 Overview**

A**Purpose**

This handbook provides policy and procedures to State and County Offices for administering NAP.

B**NAP Purpose and Eligibility**

[7 CFR 1437.4] NAP was designed to reduce financial losses that occur when natural disasters cause a catastrophic loss of production or prevented planting of an eligible crop by providing coverage equivalent to CAT insurance. Statute limits NAP to each commercial crop or agricultural commodity, except livestock, for which CAT is not available and is produced for food or fiber. Statute provides that the term "eligible crop" specifically include the following:

- floricultural
 - ornamental nursery
 - Christmas tree crops
 - turfgrass sod
 - industrial crops
 - seed crops
 - aquaculture, including ornamental fish.
-

C**Sources of Authority**

Authority for NAP is the Federal Agriculture Improvement and Reform Act of 1996 (Pub. L. 104-127) as amended by the Agricultural Risk Protection Act, 2000. Regulations governing NAP are in **7 CFR Part 1437**.

D**Related Handbooks**

Handbooks related to NAP include the following:

- 1-APP for appeals
 - 1-CM for signatures, powers of attorney, name and address files, and handling controlled substance cases
 - 3-CM for farm, tract, and crop data
 - 2-CP for acreage reports, acreage determinations, and spot checks
-

1 Overview (Continued)

D

Related Handbooks (Continued)

- 4-CP for tolerance and misrepresentation, scheme, or device
- 5-CP for appraisals
- 6-CP for conservation compliance
- 7-CP for the finality rule and misaction/misinformation
- 1-FI for issuing payments
- 3-FI for depositing remittances
- 6-FI for accounting interface
- 58-FI for refunds of overpayments, withholding payments, and setoffs
- 61-FI for prompt payment interest penalties
- 63-FI for assignments and joint payments
- 67-FI for the Common Receivable System
- 5-LP for measurement of farm-stored production
- 2-NAP for loss adjuster and crop appraisal
- 1-PL for "person" determinations
- 2-PL for control counties
- 1-PN for peanuts
- 3-RM for LA's and loss claims
- RMA manuals for loss adjustment and yield calculations include, but are not limited to, the following:
 - CIH
 - Loss Adjustment Manuals
 - Individual Crop Handbooks.

Continued on the next page

1 Overview (Continued)

E

Administration

[7 CFR 1437.2] NAP is administered under the general supervision of the Executive Vice President, CCC. NAP shall be carried out by STC's and COC's according to program policy and instructions issued by DAFP.

STC, COC, and their employees or representatives do **not** have authority to modify or waive any provision of regulations or procedure applicable to NAP.

* * *

No provision or delegation to STC or COC shall preclude either the Executive Vice President, CCC, or DAFP from either of the following:

- determining any question arising under NAP
 - reversing or modifying any determination made by STC or COC.
-

2 Units of Measure

A

Application

Use the same unit of measure for all NAP data for each crop, such as, but not limited to:

- determining crop production
 - establishing a crop yield and market price.
-

Continued on the next page

2 Units of Measure (Continued)

B

Production and Yields

The smallest unit of measure that lends itself to the greatest level of accuracy with minimal use of fractions shall be selected. See subparagraph D for rules of rounding fractions.

Units of measure and how that unit is expressed for production and yields are listed in this table.

Unit of Measure	Expressed
Pounds, ounces, bushels, or inches	Whole number
Tons	Hundredths
Hundredweight (cwt.)	
Flowering tree or shrub	Whole number (1 each)
Field- or container-grown plants or bushes	Whole number (1 each)
Flats	Whole number
Square yard	Whole number
Containers, bunches, stems, pieces, and lugs	<p>Whole number</p> <p>Note: All containers, bunches, stems, pieces, lugs, etc. shall include the weight or number, as applicable, and be consistent across the entire State.</p> <p>*--Example: Yield = 100 containers 1 container = 25 pounds--*</p> <p>STC shall ensure that both the yield and average market price are based on the same weight or number. If the weight or number is the same as a self-defined unit of expression, such as pound, ton, etc., use the self-defined unit of expression.</p>

Note: Use the FCIC-established units of measure on all crops for which there is an insurance policy offered in the State. If insurance is not available in the State, STC may consider, but is not required to use, FCIC-established units of measure.

* * *

Continued on the next page

2 Units of Measure (Continued)

C

Market Prices and Payment Shares

Establish market prices for the same unit of measure used to determine production and yields.

Express market prices and payment shares using 4 decimal places.

D

Basic Rule of Fractions

[7 CFR 718.10] Rounding of fractions shall be done after completing the entire computation that is being made. In making mathematical determinations, all computations shall be carried to 2 decimal places beyond the required number of decimal places specified in subparagraph B. In rounding, fractional digits of 49 or less beyond the required number of decimal places shall be dropped. If fractional digits beyond the required number of decimal places are 50 or more, the figure at the last required decimal place shall be increased by 1 as follows.

Required Decimal	Computation	Result
Whole Numbers	6.49 or less	6
	6.50 or more	7
Tenths	7.649 or less	7.6
	7.650 or more	7.7
Hundredths	8.8449 or less	8.84
	8.8450 or more	8.85
Thousandths	9.63449 or less	9.634
	9.63450 or more	9.635
Ten Thousandths	10.993149 or less	10.9931
	10.993150 or more	10.9932

3 DAFP Responsibilities

A

Responsibilities

DAFP shall:

- develop all NAP regulations and policy
 - ensure that NAP is administered according to program regulations
 - approve the following:
 - county-expected yields
 - average market prices
 - payment factors
 - final planting dates and periods
 - normal harvest dates.
-

4 STC Responsibilities

A

Administering Provisions

STC shall:

- determine Statewide policy according to this handbook
 - administer all phases of NAP in the State through SED
 - take any action required by either regulation or procedure that COC has not taken
 - correct, or require COC to correct, any action that is not according to NAP regulations or procedure
 - require COC to withhold taking any action that is not according to NAP regulations or procedure
 - thoroughly document in the STC minutes all program recommendations, such as crop data, program and eligibility determinations, appeals, etc.
 - ensure that County Offices accept from interested producers CCC-471 according to paragraph 23.
-

B

County-Expected Yields

STC shall:

- establish and recommend NAP county-expected yields according to paragraph 107
 - establish acres per animal unit and normal grazing days for forage according to paragraph 195
 - *--identify COC with authority to adjust AUD according to subparagraph 195 C--*
 - forward recommended county-expected yields and established acres per animal unit and normal grazing days to DAFP according to paragraph 10.
-

Continued on the next page

4 STC Responsibilities (Continued)

C

Average Market Price and Payment Factors

STC shall:

- establish and recommend average market prices according to paragraph 108
 - recommend payment factors according to paragraph 109
 - forward recommended average market prices and payment factors to DAFP according to paragraph 10.
-

D

Establishing Reporting Deadlines and Other Applicable Dates

STC shall establish the following dates for all crops for which CCC-471 may be submitted in the State:

- final planting dates
 - planting periods for multiple-planted crops according to paragraph 178
 - normal harvest date
 - application closing date according to paragraph 23
 - acreage reporting date according to 2-CP.
-

E

Publicizing Applicable Reporting Dates and Other Deadlines

STC shall ensure widespread publication of program provisions, including deadlines for submitting:

- CCC-471
 - notice of loss
 - application for payment
 - change of ownership, operation, or share
 - report of production
 - certification of actual production history and approved yield
 - acreage reporting date.
-

F

Appeals

STC shall ensure that all appeals are handled according to 1-APP.

5 SED Responsibilities

A

Responsibilities

SED shall ensure that State and County Office employees:

- administer the program according to regulations and procedures
 - are thoroughly trained
 - understand the intent of NAP
 - are alert to possible abuses of NAP.
-

B

**Publicizing
Program
Information**

SED shall instruct and ensure that County Offices:

- publicize all significant information about NAP
 - maintain an accurate record of all publicity efforts.
-

C

Training

SED shall provide adequate training to County Office employees to ensure that policy and procedures are administered:

- uniformly within the State
 - according to NAP guidelines.
-

D

**Loss Adjustment
Agreements and
Training**

SED shall follow 2-NAP to obtain the services of certified LA's.

6 COC Responsibilities

A

Responsibilities

COC shall ensure that:

- CCC-471's are taken from all interested producers
 - *--if it has been determined that CCC-471 has been timely filed, then accept from interested producers:
 - notice of loss (CCC-576, Part B) according to paragraph 401
 - application for payment (CCC-576, Parts D through F, as applicable) according to paragraph 502--*
 - determinations are thoroughly documented
 - determinations, yield assignments, loss adjustment appraisals, production assignments, and measurements are made in a timely manner
 - COC minutes contain a complete record of determinations
 - payments are made in a timely manner
 - second-party reviews are conducted on all payment calculations on each NAP application for payment before COC approval
- Note:** The employee performing the second-party review shall initial and date applicable documents.
- NAP payments are approved only after COC is satisfied that the payment is properly calculated and due each producer, including COC satisfaction that:
 - the producer's unit is established correctly
 - the acreage claimed is accurate, was planted timely, and is cared for using good farming practices

Continued on the next page

6 COC Responsibilities (Continued)

A Responsibilities (Continued)

- prevented planting claim is reasonable and justified
- production records presented for the year in which the natural disaster occurred are verified and represent a true and complete record of the production for the unit
- the certified production for approved yield purposes is reasonable
- *--the claimed share reflects the participant's share ownership interest in the crop at the time of loss

Note: If the participant claiming a share of the payment has entered into any agreement or contract to grow or produce the crop for another and without retaining any ownership share interest in the crop, the participant cannot be considered to have a valid claim to a share of NAP payments.--*

- the "person" requesting a payment has certified they have not exceeded the \$2 million gross revenue limitation
- conservation compliance requirements have been met
- total payments issued for claimed losses do not cause a "person" to receive more than \$100,000 under NAP for the crop year.

COC approval of CCC-576:

- Part C, signifies that:
 - applicant provided an acceptable notice of loss according to paragraph 401
 - natural disaster caused damage or loss as claimed
- Part H, signifies that applicant has provided all requisite forms, evidence, and information according to paragraph 502.

Note: The fact that a producer did not suffer a qualifying 50 percent loss to receive a NAP payment will not affect whether COC approves CCC-576, Part H. Applications for payment that will result in zero payment, but meet the above criteria should be approved and processed through the automated system.

6 COC Responsibilities (Continued)

B Publicizing Information

COC shall:

- ensure that NAP provisions are well publicized through the use of newsletters, print media, radio, television, meetings, and any other appropriate means
- maintain an accurate record of all publicity efforts.

COC shall publicize all significant information about the program, including, but not limited to, the following:

- producer and crop eligibility
- conservation compliance requirements
- acreage reporting requirements
- notice of loss requirements
- loss adjustment (appraisal) requirements
- production record requirements
- applicable dates and deadlines
- payment limitations
- gross income limitations.

C Appeals

COC shall ensure that all appeals are handled according to 1-APP.

7 CED Responsibilities

A

Responsibilities

CED shall ensure that:

- all program provisions in this handbook are administered uniformly throughout the county
 - COC and STC policies are implemented
 - applicable handbooks and manuals are followed
 - County Offices accept from interested producers CCC-471 according to paragraph 23
 - if it has been determined that CCC-471 has been timely filed, then accept from producers:
 - notice of loss (CCC-576, Part B) according to paragraph 401
 - *--application for payment (CCC-576, Parts D through F, as applicable)--* according to paragraph 502
 - adequate training is provided to program technicians and field assistants
 - delegations of authority are followed.
-

8 Producer Responsibilities

A

Responsibilities

To be eligible for NAP payments, producers shall timely:

- file CCC-471 according to paragraph 23
 - and accurately report the acreage and shares for all crops for which CCC-471 is filed
 - certify crop production history for approved yield calculation
 - complete CCC-502 and supporting forms
 - provide a certification for the \$2 million gross revenue limitation for each “person” in an operation
 - certify conservation compliance on AD-1026
 - request measurement service, if needed
 - file a notice of loss and application for payment
 - request a crop appraisal, as applicable.
-

9 Deadlines for NAP

A Deadlines

Many of the deadlines applicable for NAP are in this table.

Issue	Due Date	Late-Filed?	Reference
CCC-471	By the applicable application closing date.	No	Paragraph 23
PRD	No later than the immediately subsequent crop year acreage reporting date for the crop.	Yes	Subparagraph 323 A
*--Acreage reporting date on CCC-576	For low yield acreage, before filing CCC-576, Part B. Note: For prevented planting acreage see 2-CP.	Yes	Paragraph 401
CCC-576, Part B	For: <ul style="list-style-type: none"> • low yield, within 15 calendar days after the disaster occurrence or date damage to the crop became apparent • 2006 and prior years prevented planting, within 15 calendar days after the final planting date. Note: For 2007 and subsequent years prevented planting, see 2-CP.	Yes	Paragraph 401
Final FSA-578 Date	For NAP acreage not on CCC-576, Part B, no later than the date specified in 2-CP, Exhibit 6.--*	Yes	2-CP, Exhibit 6
CCC-576, Part G	No later than the immediately subsequent crop year acreage reporting date for the crop.	No	Paragraph 502
Payments	See subparagraph 1276 I.	N/A	Subparagraph 1276 I

- for FAX, 202-690-3646.

--11 CCC-770 NAP*A Introduction**

The Improper Payments Information Act of 2002 requires Federal agencies to evaluate programs to determine if internal controls are sufficient to prevent improper payments. CCC-770 NAP was developed to address areas of concern to ensure that NAP payments are issued properly.

B Program Checklist

CCC-770 NAP:

- is applicable to administering NAP
- shall be used when an application for payment is filed
- requires that County Offices complete CCC-770 NAP before issuing NAP payments
- does not negate STC, SED, State Office, DD, COC, CED, and County Office responsibility for administering all provisions applicable to NAP.

Note: CCC-770 NAP was developed by the National Office and is the only authorized checklist for NAP. County Offices shall **not** use State- or locally-generated checklists for administering NAP.

C Maintaining CCC-770 NAP

CCC-770 NAP is applicable for each producer, by crop year, unit, and pay group.

CCC-770 NAP has been designed to enable County Offices to update CCC-770 NAP throughout the crop year as actions are taken and shall be filed in the producer's NAP folder.

D Retention Period

All CCC-770 NAP's shall be retained in the producer's NAP folder with CCC-471 according to 25-AS, Exhibit 50.5. If a new CCC-770 NAP is initiated because of an addition of a unit, pay group, or loss, then the original CCC-770 NAP shall be retained, along with the additional CCC-770 NAP.

CCC-770 NAP shall be destroyed when CCC-471 is destroyed.--*

--11 CCC-770 NAP (Continued)*E County Office Action**

The County Office shall complete CCC-770 NAP for each producer that files an application for payment. If all documents are reviewed for all pay groups in the unit as a result of the same cause of loss, then only one CCC-770 NAP is necessary. For those situations, ENTER "All" on CCC-770 NAP, item 6B. If documentation is not being reviewed for all pay groups at 1 time because either a "Yes" answer could not be certified to for a specific pay group or there were different causes of loss between pay groups, only then list the applicable pay group(s) on CCC-770 NAP, item 6B for which a "Yes" can be certified to. For those pay groups that cannot be certified with a "Yes", a separate CCC-770 NAP must be completed.

The County Office employee that completes each item on CCC-770 NAP:

- is certifying that the applicable program provisions have, or have not, been met
- shall place their initials in the "Initials" column
- shall enter the date the item was reviewed in the "Date Completed" column.

Note: As an alternative, County Offices may choose to review all items after COC approval if applicable; however, each item must still be initialed and dated verifying that each item has been reviewed.

Once all questions on CCC-770 NAP have been answered in a manner that supports approving the applicable form(s), the County Office employee shall sign CCC-770 NAP, item 23 as the preparer.

Note: By signing as the preparer, the employee is **not** certifying that they have reviewed all items in the applicable part of CCC-770 NAP. Rather, their signature certifies that the item with their initials was reviewed and that the applicable program provisions have or have not been met.

Additionally, County Offices shall refer to the applicable handbook provision(s) as specified for additional information.

Reminder: County Offices cannot rely solely on using CCC-770 NAP for administering NAP. All program provisions must be met, not just the items included on CCC-770 NAP. CCC-770 NAP is tool to assist with program administration and includes the major areas where deficiencies have been identified, but it is not, nor is it intended to be, inclusive of all NAP provisions.--*

--11 CCC-770 NAP (Continued)*F CED Action**

CED or their designated representative shall:

- spot check, **at a minimum**, the following every FY quarter:
 - five CCC-770 NAP's if 10 or less applications for payment have been filed for NAP
 - ten CCC-770 NAP's if 11 through 1,000 applications for payment have been filed for NAP
 - twenty CCC-770 NAP's if more than 1,000 applications for payment have been filed for NAP

Note: The National Office will explore developing software to generate a spot check report. Until that time, CED shall randomly select a sample for review as specified.

- when spot checking information certified on CCC-770 NAP:
 - review each part of CCC-770 NAP that has been completed
 - indicate whether or not they concur with the certification of items 7 through 22, as applicable
 - sign and date items 24 A and 24 B
 - report to COC and the STC representative any CCC-770 NAP that CED does **not** concur with the preparer's determination
- spot check every STC's, COC's, and/or employee's CCC-770 NAP.--*

11 CCC-770 NAP (Continued)

G State Office Spot Check Selections

STC or their designated representative shall:

- select the following for spot check, **at a minimum**, every FY quarter:
 - three CCC-770 NAP's if 10 or less applications have been filed for NAP
 - five CCC-770 NAP's if 11 through 1,000 applications have been filed for NAP
 - ten CCC-770 NAP's if more than 1,000 applications have been filed for NAP.

Note: The National Office will explore developing software to generate a spot check report. Until that time, STC or their designated representative shall randomly select a sample for review as specified.

H STC or Designee Spot Checks

STC or their designated representative shall:

- spot check, **at a minimum**, 50 percent of the CED's spot checks in subparagraph F, which must include the required STC, COC, and employee spot check
- submit the results of the spot checks to SED
- when spot checking information certified on CCC-770 NAP:
 - review each part of CCC-770 NAP that has been completed
 - indicate whether or not they concur with the certification of items 7 through 22, as applicable
 - sign and date items 25A and 25B.

I National Report

SED's shall report the following to the National Office as of September 30 of each FY by county:

- the number of CCC-770 NAP's spot-checked by CED
- the number of CCC-770 NAP's spot-checked by DD
- the number of "Do Not Concur" signed by CED
- the number of "Do Not Concur" signed by DD.

*--SED shall e-mail the report to **kay.niner@wdc.usda.gov**. Reports are due to the National--* Office by the second Monday of the new FY.

*--11 CCC-770 NAP (Continued)

J Example of CCC-770 NAP

The following is an example of CCC-770 NAP.

This form is available electronically.

CCC-770 NAP (12-21-06) NONINSURED CROP DISASTER ASSISTANCE PROGRAM CHECKLIST	USDA CCC	1. Producer Name		2. ID Number (Last 4 Digits)			
	3. State Name		4. County Office Name				
	5. Crop Year		6A. Unit(s)		6B. Pay Group(s)		
Office Staff Actions:		Handbook or Other References	YES	NO	Initials	Date Completed	
Application for Coverage							
7. Has the CCC-770 Eligibility Checklist been completed?		3-PL, paragraph 3					
8. Was the fee timely paid, or waived because of limited resource producer rules?		1-NAP, paragraph 23					
9. Has proper signature authority been obtained and the application been signed by the producer (unless continuous coverage) and a CCC Representative?		1-CM, Part 25					
10. Has documentation been filed demonstrating control of land (Deeds, Leases, Grazing Permits, etc.)?		1-NAP, paragraph 29					
11. Has the CCC-257 Schedule of Deposit number been entered on the CCC-471 NAP Application for Coverage (if applicable)?		1-NAP, paragraphs 23 and 24					
Notice of Loss							
12. Has automated FSA-578 Crop Report been timely filed and signed by producer for the unit including acreage of the eligible crop?		1-NAP, paragraph 151, 2-CP, Section 7					
13. Does the CCC-576 Notice of Loss, Part B, contain sufficient information relating to the loss, and has it been timely filed including date stamp?		1-NAP, paragraph 401					
14. Has the COC action been recorded on CCC-576 Notice of Loss, Part C, and in the automated system and COC minutes?		1-NAP, paragraph 401					
Production							
15. Have appropriate production records been timely submitted, signed by producer AND date stamped by the County Office?		1-NAP, paragraphs 322, 425, and 426, Exhibit 42					
16. Has a CCC-576-1 Appraisal/Production Report for NAP been completed for unharvested crops?							
17. Has an appraisal been completed if the producer hand harvested crops (if applicable)?							
18. Have inventory records been supplied for value loss crops (if applicable)?							
Application for Payment							
19. Has the automated CCC-576 Part G Certification and Application for Payment been signed by the producer with proper signature authority?		1-NAP, paragraph 502, Exhibit 43					
20. Is CCC-576 Part G Certification and Application for payment signed by Loss Adjuster or FSA Representative?		1-NAP, paragraph 502, Exhibit 43					
21. Has COC action been recorded on CCC-576 Part H of the Application for Payment, entered in system, and recorded in COC minutes?		1-NAP, paragraphs 6 and 401, Exhibit 43					
22. Has the correct payment data been entered in to the automated system and reviewed by second party before payment is issued?		1-NAP, paragraph 6, Exhibit 43					

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

Part 2 NAP Provisions

--21 Cause of Loss For 2006 and Prior Years--

A Eligible Causes of Loss

[7 CFR 1437.9] To qualify for assistance under NAP, production losses or prevented planting must have occurred as a result of an eligible cause of loss. Not all causes of loss are eligible causes of loss for all crops.

Example: Crops using an irrigation practice such as row crops or crops that are required to have irrigation or adequate water to meet the definition of “controlled environment”, that is, aquaculture, ornamental nursery, floriculture, etc. will not be compensated for losses because of drought.

An eligible cause of loss is:

- damaging weather, including, but not limited to:
 - drought
 - hail
 - excessive moisture
 - freeze
 - tornado
 - hurricane
 - excessive wind
 - any combination thereof
- adverse natural occurrence, including, but not limited to:
 - earthquake
 - flood
 - volcanic eruption
- a condition related to damaging weather or adverse natural occurrence, including, but not limited to:
 - heat
 - insect infestation
 - disease
 - any combination thereof.

The damaging weather, adverse natural occurrence, or related condition must occur before or during harvest and **directly** cause, accelerate, or exacerbate destruction or deterioration of the eligible crop as determined by COC.

--21 Cause of Loss For 2006 and Prior Years (Continued)--**A Eligible Causes of Loss (Continued)**

Crop acreage must have either of the following:

- failed, suffered from damage, or for annual crops, be prevented from planting or replanting, if failed initially, before the final planting date
- failed or suffered from damage after the final planting date for the crop.

B Ineligible Causes of Loss

[7 CFR 1437.9] NAP assistance will not be provided for losses or prevented planting because of the following:

- factors or circumstances that are not the result of an eligible cause of loss affecting specific crop acreage
- failure of the producer to reseed or replant to the same crop if it is practicable to reseed or replant
- failure of the producer to follow good farming practices for the crop
- water contained or released by any governmental, public, or private dam or reservoir project, if an easement exists on the acreage affected for the containment or release of the water
- inadequate supply of irrigation water at the beginning of the planting period, except for tree and perennial crops
- failure or breakdown of irrigation equipment or facilities
- neglect or malfeasance of the producer
- quarantine that is imposed by a county, State, or Federal government agency
- drifting herbicide
- prevented planting caused by chemical and herbicide residue
- wildlife damage

--21 Cause of Loss For 2006 and Prior Years (Continued)--

B Ineligible Causes of Loss (Continued)

- inability of the producer to obtain a market for the crop
- inability of the crop to mature in time to meet a specific market
- prevented planting of the following:
 - value loss crops, including, but not limited to, Christmas trees, aquaculture, or ornamental nursery, for which NAP assistance is provided under value loss procedure
 - tree crops and other perennial, unless:
 - the producer can prove resources were available to plant, grow, and harvest the crop, as applicable
 - DAFP has approved the recommended planting period for this crop according to paragraph 25
 - land on which the planting history or conservation plans indicated would remain fallow for crop rotation purposes
 - land used for conservation purposes
 - land intended to be, required to be, or considered to have been left unplanted under any USDA program.

*--21.5 Cause of Loss For 2007 and Subsequent Years

A Eligible Causes of Loss

[7 CFR 1437.9] To qualify for assistance under NAP, production losses must have occurred as a result of an eligible cause of loss. See 2-CP for prevented planting. Not all causes of loss are eligible causes of loss for all crops.

Example: Crops using an irrigation practice such as row crops or crops that are required to have irrigation or adequate water to meet the definition of “controlled environment”, that is, aquaculture, ornamental nursery, floriculture, etc. will not be compensated for losses because of drought.

An eligible cause of loss is:

- damaging weather, including, but not limited to:
 - drought
 - hail
 - excessive moisture
 - freeze
 - tornado
 - hurricane
 - excessive wind
 - any combination thereof
- adverse natural occurrence, including, but not limited to:
 - earthquake
 - flood
 - volcanic eruption
- a condition related to damaging weather or adverse natural occurrence, including, but not limited to:
 - heat
 - insect infestation
 - disease
 - any combination thereof.

The damaging weather, adverse natural occurrence, or related condition must occur before or during harvest and **directly** cause, accelerate, or exacerbate destruction or deterioration of the eligible crop as determined by COC.--*

--21.5 Cause of Loss For 2007 and Subsequent Years (Continued)*A Eligible Causes of Loss (Continued)**

Crop acreage must have failed or suffered from damage after the final planting date for the crop.

B Ineligible Causes of Loss

[7 CFR 1437.9] NAP assistance will not be provided for losses because of the following:

- factors or circumstances that are not the result of an eligible cause of loss affecting specific crop acreage
- failure of the producer to reseed or replant to the same crop if it is practicable to reseed or replant
- failure of the producer to follow good farming practices for the crop
- water contained or released by any governmental, public, or private dam or reservoir project, if an easement exists on the acreage affected for the containment or release of the water
- inadequate supply of irrigation water at the beginning of the planting period, except for tree and perennial crops
- failure or breakdown of irrigation equipment or facilities
- neglect or malfeasance of the producer
- quarantine that is imposed by a county, State, or Federal government agency
- drifting herbicide
- prevented planting caused by chemical and herbicide residue
- wildlife damage
- inability of the producer to obtain a market for the crop
- inability of the crop to mature in time to meet a specific market

Note: See 2-CP for prevented planting.--*

22 Coverage Period

A Definition of Coverage Period

--[7 CFR 1437.5] The coverage period is the time during which coverage is available-- against loss of production of the eligible crop as a result of natural disaster.

Note: State Offices shall establish coverage periods and application closing dates similar to the State, if applicable, or closest adjoining State whereby the sales closing dates and insurance periods are established for crop insurance purposes.

See paragraph 25 for prevented planting provisions.

For those crops not having crop insurance coverage the coverage period:

- for annual crops:
 - begins the later of either of the following:
 - 30 calendar days after the date CCC-471 is filed
 - the date the crop is planted, not to exceed the final planting date
 - ends the earlier of 1 of the following:
 - the date harvest is complete
 - the normal harvest date in the area
 - abandonment of the crop
 - total destruction of the crop

22 Coverage Period (Continued)

A

Definition of Coverage Period (Continued)

- *--for multiple planted crops:
 - begins the later of the following:
 - 30 calendar days after CCC-471 is filed
 - the date the crop is planted within the specific planting period
 - the coverage period ends for the specific planting period, the earlier of the following:
 - the date harvest is complete
 - the latest normal harvest date
- Note:** The normal harvest date shall correlate with the number of days necessary for the crop to mature.
- abandonment of the crop
 - destruction of the crop--*
- for perennial crops (other than those intended for forage):
 - begins 30 calendar days after the application closing date
 - ends the earlier of 1 of the following:
 - 10 months from the application closing date

Exceptions: There may be cases where the established insurance period for the crop as specified in the insurance crop policy exceeds a 9-month period. Only in those cases may the State allow the coverage period for the perennial crop to exceed a 9-month period to maintain consistency with crop insurance.

--Portions of States located in Hardiness Zone 9 or higher may request longer coverage periods if-- approved by DAFP.

- the date harvest is complete
- the normal harvest date
- abandonment of the crop
- total destruction of the crop

Continued on the next page

22 Coverage Period (Continued)

A

Definition of Coverage Period (Continued)

- for value loss crops or controlled environment crops, which includes ornamental nursery, aquaculture, Christmas trees, ginseng, floriculture, mushrooms, turfgrass sod:

•*--begins October 1

Note: The application closing date must be established at least 30 calendar days before coverage.--*

Example: The application closing date of September 1 is established to ensure that the coverage period begins on October 1. The crop year for all value loss and controlled environment crops is October 1 through September 30.

- ends the last day of the crop year September 30
- for honey:

•*--begins January 1

Note: The application closing date must be established at least 30 calendar days before coverage.--*

Example: The crop year for honey is January 1 through December 31. The application closing date shall be established no later than December 1.

- ends the end of the calendar year
- for maple sap:
 - begins the later of either of the following:
 - 30 calendar days after the application closing date
 - the date the crop comes out of dormancy
 - ends on the earlier of either of the following:
 - the date harvest is complete
 - normal harvest date

Continued on the next page

22 Coverage Period (Continued)

A Definition of Coverage Period (Continued)

- for biennial and perennial forage crops:
 - begins the later of either of the following:
 - 30 calendar days after the application closing date
 - the date following the normal harvest date of the previous crop year

***--Notes:** For first year seedings, no coverage will be provided. In the event, after the first year, seeding does not have an adequate stand which represents a majority of the seed planted, then coverage shall only be offered for either a mixed forage or native grass in subsequent years. Coverage shall only be offered for the crop after the stand has developed and consists of a majority of the intended crop seeded.

Forage stands that have aged that no longer represent a majority of the intended crop seeded shall have coverage offered as either mixed forage or native grass.--*

For grazed forage designated as warm and cool season, the coverage period begins the later of 30 calendar days after the application closing date or the beginning of the designated grazing period established according to paragraph 107.5.

- ends the earlier of either of the following:
 - on the normal harvest date
 - the date the crop is abandoned or destroyed.

Note: For grazed forage designated as warm and cool season, the coverage period ends the earlier of the following:

- end of the designated grazing period established according to paragraph 107.5
- date the crop is abandoned or destroyed.

23 CCC-471, Application for Coverage

A Filing CCC-471

--[7 CFR 1437.5] Eligible producers must file CCC-471 in the FSA administrative office-- serving the county or counties where their acreage is located, no later than the application closing date established by the State.

Notes: If a producer requests CCC-471 after the application closing date, CCC-471 must be taken manually and disapproved by COC, and appeal rights must be given.

All CCC-471's must be accompanied by the applicable service fee.

When the application closing date falls on a weekend or public holiday, applications for coverage filed on the next business day will be considered timely filed.

CCC-471 shall be prepared for all interested producers. County Offices will accept all CCC-471's when properly completed, signed by the producer, and fee submitted.

* * *

23 CCC-471, Application for Coverage (Continued)

B County Office Review of CCC-471's

County Office shall review and determine the acceptability of each CCC-471.

The review shall ensure the following:

- CCC-471 is filed by the application closing date
 - the completeness of CCC-471 (all items on CCC-471 and the applicable service fee has been paid)
 - the eligibility of the producer
- *--Note:** CCC-471 may be accepted even though the producer may not be eligible for payment. The producer shall be informed that fees are not refundable if the producer is not eligible.
- an accurate description and the eligibility of the crop according to subparagraph 170 A--*
 - the proper determination of service fees

Note: CCC-471's are incomplete unless accompanied by the applicable service fee. An incomplete CCC-471 remaining incomplete on the application closing date will be ineligible for coverage.

- *--CCC-471 lists all the crops for which the producer is requesting NAP coverage.

Note: All crops within the pay group and planting period, as defined in paragraph 170, that the producer has selected coverage for will be eligible for NAP.--*

Only those CCC-471's thoroughly reviewed according to this subparagraph shall be accepted and signed by a CCC representative. CCC representative is CED or any permanent County Office employee.

23 CCC-471, Application for Coverage (Continued)

C Establishing Application Closing Dates

STC shall establish an application closing date for all eligible crops taking into consideration the pay crop and pay type groupings.

Application closing dates must:

- *--for annual crops, be at least 30 calendar days before the earliest final planting date of all planting periods established for all types within the pay crop pay type grouping to--* ensure that producers are eligible for prevented planting coverage

Examples: The final planting date for butternut squash is June 5 and the final planting date for acorn squash is June 30. Both types of squash are in the same pay crop pay type grouping. To ensure that prevented planting is eligible for the butternut squash (the earliest final planting date) the application closing date must be established at least 30 calendar days before June 5.

*--Lettuce has multiple planting periods with the following final planting dates:

- December 31
- April 3
- August 31.

The application closing date for all planting periods must be established at least 30 calendar days before December 31.--*

- correspond to FCIC sales closing dates for like crops

Example: Apples are insurable in 13 of the 36 Oregon counties, cranberries are insurable only in 2 counties, and pears are insurable in 6 counties. RMA has established the sales closing date for all 3 crops as November 20.

The Oregon STC shall establish the application closing date for apples, cranberries, and pears in the rest of the State as November 20. Also STC shall consider establishing the same application closing date for any other fruit crops, unless a different RMA sales closing date for a crop is established.

Notes: STC's do not have the authority to arbitrarily change application closing dates for the specific reason of allowing additional producers to sign up for NAP coverage after the original dates had been publicized.

STC's shall not change application closing dates established for the current year *--after the date has been publicized. STC may change application closing dates--* for subsequent years.

23 CCC-471, Application for Coverage (Continued)

***--C Establishing Application Closing Dates (Continued)**

- be limited to the same number of sales closing dates as established by crop insurance, if reasonable

Example: Arizona has the following FCIC sales closing dates:

- October 31 for small grains
- November 20 for all citrus
- November 30 for potatoes
- January 31 for table grapes
- January 28 for coarse grains and cotton.

The Arizona STC will establish 5 application closing dates based on the FCIC sales closing dates already established. STC should also review other noninsurable crops and the FCIC sales closing dates that best accommodate the pay crop pay type grouping.

Note: State Offices shall review FCIC sales closing dates annually to ensure consistency between programs.

- correspond to the beginning of the crop year for crops without final planting dates

Note: For value loss crops, the date must be established no later than September 1.

STC shall ensure that the application closing date is established early enough to include all the eligible crops, types, and intended uses grouped as the same pay crop and pay type.

Example: The crop year for ginseng root starts October 1, 2001, and the coverage period for ginseng seed begins May 1, 2002. Ginseng with an intended use of root and seed has the same pay crop and pay type.

Because ginseng with the intended use of root has the earliest beginning date for coverage within the pay crop pay type grouping, STC shall ensure that the application closing date for that pay crop pay type is established no later than September 1, 2001.--*

23 CCC-471, Application for Coverage (Continued)

D Publicizing Application Closing Dates

SED's shall ensure that all application closing dates are publicized after STC approval. Publication sources shall include:

- local media - newspaper, farm magazines, radio, etc.
- Town Hall meetings
- newsletters.

E Continuous Coverage

Coverage may be continued for each subsequent year for the same crop or crops, if the producer pays the applicable service fee by the subsequent year's application closing date. Producers are not required to sign a new CCC-471 when applying for continuous coverage of the same crop or crops.

--The purpose of this provision is to reduce County Office workload and eliminate the producer's requirement to come into the County Office and initiate another application for coverage when the crops are the same as prior years.--

However, producers interested in adding new crops, deleting crops from previous year's coverage, or changing crop shares must file a new CCC-471 with signatures and pay the applicable service fee.

To apply for continuous coverage, producers must timely pay the applicable service fee before the application closing date. Upon receiving payment of the applicable service fee for continuous coverage, County Offices shall:

- update and annotate the current year's CCC-471 as "continuous coverage"
- provide a copy of the annotated CCC-471 to the producer within 5 workdays.

COC shall ensure that County Offices, no less than 60 calendar days before the first application closing date for the crop year:

- notify producers of the applicable service fee due determined on the basis of the previous crop year coverage
- remind producers of the deadline for payment of the applicable service fee for continuous coverage.

--The requirement for notifying producers that have prior year NAP coverage of the same crop is not to ensure they are aware of NAP deadlines. The failure to send a continuous coverage notification or a producer who claims the notification was not received shall not be used as a justification for a late-filed NAP application or relief of program requirements.--

Note: See example of the continuous coverage reminder notification letter in Exhibit 8.

23 CCC-471, Application for Coverage (Continued)

--F Completing Manual CCC-471--

CCC-471, Items 1 through 11 and 13 are completed by the County Office. The producer is asked to provide information to complete items:

- 1, Crop Year
- 5, Taxpayer ID Number
- 7, Limited Resource Producer election
- 8, Crop/Type
- 9, Intended Use
- 10, Planting Period
- 11, Required Service Fee Received.

Note: The producer reviews the information and then signs and dates item 12.

--Complete manual CCC-471 according to this table.--

Item	Instructions
1	Enter crop year.
2	Enter County Office name, address (including Zip Code), and telephone number (including area code),
Part A – Producer Information To be completed by the County Office.	
3	Enter the producer’s name, address (including Zip Code), and telephone number (including area code).
4A	Enter the State name where farm records are located for FSA administrative purposes.
4B	Enter the county name where the farm is located.
5	Enter the last 4-digits of producer’s tax ID or Social Security number.
6	Enter CCC-257 number according to 3-FI.
Part B – Waiver of Service Fee for Limited Resource Producer To be completed by the County Office.	
7	Check: <ul style="list-style-type: none"> • “Yes”, if producer is a limited resource producer according to 7 CFR Part 1437. • “No”, if producer is not a limited resource producer according to 7 CFR Part 1437. <p>Note: Limited resource producers do not pay the service fee.</p>

23 CCC-471, Application for Coverage (Continued)

--F Completing Manual CCC-471 (Continued)--

Item	Instructions
Part C – Crop/Type Identification To be completed by the County Office.	
8	Enter crop name and crop type. *--Note: See Exhibit 7.X or the NAP Crop Table Report for applicable crop names and crop types.--*
9	Enter intended use of the crop/type. *--Note: See Exhibit 7.X or the NAP Crop Table Report for applicable intended uses for the crop type.--*
10	Enter the planting period of the crop. *--Note: See the NAP Crop Table Report for applicable planting period.--*
11	Enter the total required service fee received. Note: The service fee is non-refundable and due at the time the producer files CCC-471. If the producer qualifies as a limited resource producer according to item 7, then the service fee is waived.
Part D – Producer and CCC Representative’s Certification Item 12 to be completed by producer. Item 13 to be completed by CCC representative.	
12 A and B	Producer shall sign and date (MM-DD-YYYY).
13 A and B	CCC representative shall only sign and date (MM-DD-YYYY) acknowledging receipt of CCC-471, if CCC-471 is timely filed and payment of the service fee, if applicable, has been received.

--Note: Exhibit 7.X numbers are year specific. See the applicable Exhibit 7 for the specific year for eligible crops.--

23 CCC-471, Application for Coverage (Continued)

*--G Example Manual CCC-471

The following is an example manual CCC-471.

<p>This form is available electronically.</p>		<p>Form Approved - OMB No. 0560-0175</p>	
<p>CCC-471 (07-07-08)</p> <p>U.S. DEPARTMENT OF AGRICULTURE Commodity Credit Corporation</p> <p>NON-INSURED CROP DISASTER ASSISTANCE PROGRAM (NAP) Application for Coverage</p>	<p>1. Crop Year</p> <p>2009</p>	<p>2. County FSA Office Name and Address (Including Zip Code): Tulare County FSA Office 3530 W. Orchard Ct. Visalia, CA 93277-0000</p> <p>Telephone No. (Including Area Code): (200) 734-8732</p>	
<p>NOTE: The following statement is made in accordance with the Privacy Act of 1974 (5 USC 552a) and the Paperwork Reduction Act of 1995, as amended. The authority for requesting the following information is 7 USC 7333 and 7 CFR Part 1437. The information will be used to determine program eligibility. Furnishing the requested information is voluntary. Failure to furnish the requested information will result in denial of program benefits. This information may be provided to other agencies, IRS, Department of Justice, or other State and Federal Law enforcement agencies and in response to a court magistrate or administrative tribunal. The provisions of criminal and civil fraud statutes, including 18 USC 286, 287, 371, 641, 651, 1001; 15 USC 714m; and 31 USC 3729, may be applicable to the information provided.</p> <p>According to the Paperwork Reduction Act of 1995 an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0560-0175. The time required to complete this information collection is estimated to average 15 minutes per response, including the time for reviewing instructions, searching existing data sources gathering and maintaining the data needed, and completing and reviewing the collection of information. RETURN THIS COMPLETE FORM ALONG WITH YOUR APPLICABLE SERVICE FEE TO YOUR COUNTY FSA OFFICE.</p>			
<p>PART A - PRODUCER INFORMATION</p>			
<p>3. Name and Address of Producer (Including Zip Code):</p> <p>John P. Farmer RR1 Box 63 Henry, IL 61537</p> <p>Telephone No. (Including Area Code): (999) 123-4567</p>		<p>Administrative State and County Office</p> <p>4A. State California</p> <p>4B. <p>The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.</p>			

--*

23 CCC-471, Application for Coverage (Continued)

*--H Accepting Manual CCC-471's

Manual CCC-471's shall be taken **only** if:

- subparagraph A applies
- the automated system is **not** available
- the crop or crop type is **not** on the county crop table and fewer than 3 pay groups are available to be selected for the producer.

Notes: County Offices shall maintain **all** manual CCC-471's in a pending file and review the file periodically to determine which CCC-471's can be loaded in the automated system.

Manual CCC-471's shall be loaded **immediately** when the automated system or crop data is available.

If applicable, service fees shall be collected according to subparagraph 24 J and a manual CCC-257 shall be completed according to 3-FI.--*

24 Service Fee***--A Service Fee Rates Schedule for Fees Paid Before May 22, 2008**

[7 CFR 1437.6] To be eligible to receive assistance for an eligible crop for a crop year or planting period, a producer shall pay a nonrefundable **service fee** in an amount that is equal to the lesser of **\$100** per crop per administrative county; or **\$300** per producer per administrative county, not to exceed a total of **\$900** per producer per multi-county.

B Service Fee Rates Schedule for Fees Paid on or After May 22, 2008

The Food, Conservation, and Energy Act of 2008, Pub. L. 110-246, effective May 22, 2008, increased the administrative service fees for NAP from \$100 to **\$250** per crop, from \$300 to **\$750** per county, and from \$900 to **\$1,875** per producer for all counties.

Note: Until NAP Application for Coverage software is modified to recognize the new fee rate schedule, County Offices shall take a manual CCC-471 according to paragraph 23, service fees shall be collected according to subparagraph 24 J, and a manual CCC-257 shall be completed according to 3-FI.

C Determining Service Fee

Payment of the service fee is due at the time the producer files CCC-471 for eligible crops in the FSA administrative office. For continuous coverage applications, according to subparagraph 23 E, producers must pay the applicable service fee before the application closing date.

The service fee shall be based on:

- FSA administrative county
- each tax ID number
- crop definition according to pay crop/pay type (subparagraph 170 A)
- planting periods
- seed crops as separate crops according to subparagraph 174 F.--*

24 Service Fee (Continued)

***--D Service Fee Exceptions for 2008 and 2009 Crop Years**

Eligible producers who had already paid the applicable service fee amounts for NAP coverage, or continuous NAP coverage, before May 22, 2008, will retain their 2009 NAP coverage and shall **not** be assessed the new service fee amounts for the crops already covered. However, eligible producers requesting to file for NAP coverage, continuous coverage, change crops, or add new crops on or after May 22, 2008, shall be required to pay the applicable service fee amounts by the applicable application closing date.

E 2008 and 2009 Crop Year Exceptions Examples

Example #1: Jim paid the maximum **\$300** for 5 crops on March 15, 2008, and requested to add 1 additional crop to his 2008 NAP coverage on June 28, 2008.

Because Jim requested to add 1 crop on or after May 22, 2008, the added crop has a service fee of \$250 per crop, **not** to exceed \$750 per producer per county. He would be required to pay **\$250** to add a crop to his 2008 NAP coverage.

Example #2: Jane paid **\$100** to obtain coverage for 1 crop on May 20, 2008. Jane requested coverage for an additional 4 crops on June 2, 2008.

Because the additional crops are requested on or after May 22, 2008, the added crops have a service fee of \$250 per crop, **not** to exceed \$750 per producer per county. Because she had already paid \$100 for 1 crop on May 22, 2008, she would be required to pay **\$650** to add the new 4 crops to her NAP coverage.

Example #3: Bill paid **\$200** for NAP coverage for 2 crops before May 22, 2008. Bill decided to add 1 more crop on August 27, 2008, and cancel coverage for 1 of the initial crops.

Because the additional crop was added on or after May 22, 2008, the added crop has a service fee of \$250 per crop, **not** to exceed \$750 per producer per county. The cancelled crop fee is nonrefundable and **cannot** be used to offset part of the \$250 fee for the additional crop. Bill would be required to pay **\$250** to add 1 crop to his NAP coverage.--*

24 Service Fee (Continued)***--F 2009 Service Fees Paid on or After May 22, 2008**

Producers who paid 2009 service fees on or after May 22, 2008, using the previous NAP service fee rate schedule, **must** pay the appropriate additional amount due to maintain NAP coverage.

Note: Until NAP Application for Coverage software is modified to recognize the new fee rate schedule, County Offices shall take a manual CCC-471 according to paragraph 23, service fees shall be collected according to subparagraph 24 J, and a manual CCC-257 shall be completed according to 3-FI. The previously printed automated CCC-471, showing fees in item 11, shall be annotated documenting the additional fees received and date of receipt with producer's initials, if received in person. If received by mail, County Office employees shall initial and date CCC-471, item 11.

Example: Mary paid her 2009 continuous coverage fee of \$200 for 2 crops on June 9, 2008. The calculated fee amount as outlined in subparagraph B is \$250 per crop for a total of \$500. Mary owes an additional \$300 for her NAP coverage.

G Examples of Service Fees for Single County Producers

Producers who own or operate land in a single administrative county shall pay a nonrefundable service fee of \$250 per crop not to exceed a total of \$750 for the county.

Example #1: Jeannette has land interests in both Charles and St. Mary's Counties. St. Mary's County is the administrative county for all land Jeannette has an interest. Jeannette filed CCC-471 in St. Mary's County for sweet corn and tomatoes being grown on land in Charles County and onions and purple hull peas are being grown on land in St. Mary's County. Even though 2 counties are involved, Jeannette would only pay \$750 because St. Mary's County is the administrative county for Charles and St. Mary's Counties.--*

24 Service Fee (Continued)

--G Examples of Service Fees for Single County Producers (Continued)--

Example #2: John has individual farming interests, plus interest in T J joint venture, and a 50/50 share with Jeff. All land John has an interest in is physically located and administered out of Lincoln County. John files CCC-471 on his individual operation for onions and blueberries and also includes raspberries, onions, and tomatoes in which he has a 50/50 share with Jeff. John would be

*--required to pay a service fee of \$750.

Note: Even though John has 2 separate units only one CCC-471 would be required for John's interests.

T J joint venture in which John has an interest files CCC-471 on sweet corn. T J joint venture would pay a \$250 service fee for the joint venture regardless that John as member had previously paid a service fee for his own interest.

Example #3: Husband and wife have a 50/50 share in a joint farming operation with no tax identification number for the operation. They apply for coverage on banana and papaya.

Result: The husband and wife each pay a service fee of \$500 for a total of \$1,000.

H Examples of Service Fees for Multi-County Producers

Producers who own or operate land in multiple counties shall pay a nonrefundable service fee of \$250 per crop up to \$750 per producer per administrative county, not to exceed a total of \$1,875.--*

Example #1: Jim operates land in 4 separate administrative counties that includes Lincoln, Hayes, Washington, and Jefferson. Jim applies for coverage in:

- Lincoln County for hot peppers, summer squash, green beans, cherry tomatoes, and plantain

24 Service Fee (Continued)

--H Examples of Service Fees for Multi-County Producers (Continued)--

- Hayes County for summer cantaloupes, watermelon, field peas, and winter squash
- Washington County for spinach, okra, and green peanuts
- Jefferson County for papaya, banana, and cassava.

Jim would pay service fees as follows:

- *--\$750 in Lincoln County
- \$750 in Hayes County
- \$375 in Washington County
- \$0.00 in Jefferson County.

Notes: Jim has already paid a total of **\$1,875** for coverage of eligible crops in Lincoln, Hayes, and Washington Counties. Therefore, Jim does not pay any service fee for coverage of the eligible crops in Jefferson County.

Jim was limited to \$375 in Washington County because of meeting the maximum \$1,875 (\$750 in Lincoln County + \$750 in Hayes County + \$375 in Washington County = \$,1875.

I Service Fee Waiver for Limited Resource Producers for 2004 Crop Year and Beyond--*

[7 CFR 1437.6] The administrative service fee requirement is waived for limited resource producers. A limited resource producer is a producer with both of the following:

- direct or indirect gross farm sales not more than \$100,000 in both of the previous 2 years (to be increased starting in FY 2004 to adjust for inflation using Prices Paid by Farmer Index as compiled by NASS)
- a total household income at or below the national poverty level for a family of 4, or less than 50 percent of county median household income in both of the previous 2 years (to be determined annually using Commerce Department Data).

To qualify for an administrative service fee waiver, a limited resource producer must meet both of the following criteria:

- earn no more than the gross income as determined by this subparagraph (first bullet) from farm sales in each of previous 2 years
- have a total household income at or below the national poverty level for a family of 4, or less than 50 percent of county median household in both of previous 2 years.

24 Service Fee (Continued)

--I Service Fee Waiver for Limited Resource Producers for 2004 Crop Year and Beyond (Continued)--

Limited Resource Producer status can be determined in an automated system using the web site for USDA Limited Resource Farmer and Rancher Online Self Determination Tool at <http://www.lrftool.sc.egov.usda.gov/tool.asp>. The automated system calculates and displays the adjusted gross farm sales per year and the higher of the national poverty level or county median household income.

J Collecting Service Fees

County Office shall:

- ask each producer applying for coverage, if other service fees have been paid in other County Offices

***--Note:** Copies of CCC-471's initiated in other counties **must** be provided as documentation that fees have been paid. The County Office **must** date stamp and photocopy the CCC-471 provided and retain the copy for record keeping purposes.

- ensure that a producer does not pay more than the \$1,875 maximum service fee for--* NAP coverage
- manually complete CCC-257 according to 3-FI only if:
 - the automated software application according to Part 10, Section 4 is unavailable
 - the crop does not exist in the crop table

Note: See subparagraph 170 E for instructions for submitting the crop.

- if completed manually, use NAP program code "XX NAPFEE".

Notes: Replace "XX" with last 2 digits of crop year.

--Do not use any other program code to load manual CCC-257's in the system.--

24.5 Transfer of NAP Coverage

A Overview

Producers having NAP coverage for a crop may transfer all of their NAP coverage for the crop to another producer before a disaster. A transfer of NAP coverage may be used when there is a:

- sale of land
- transfer of lease
- new entity formed
- change in entity type
- change in operator between husband and wife.

Note: Transfer of partial coverage for a crop is not allowed.

B Eligibility

When a transfer of NAP coverage is initiated, the buyer, new lessee, or new entity becomes responsible for meeting all program requirements including eligible producer requirements in paragraph 29.

Note: COC shall deny the request for transfer if the seller, original lessee, or original entity failed to meet any program requirement.

Because the original owner or lessor obtained coverage for the crop, no additional service fees will be required of the buyer, new lessee, or new entity. This also applies to limited resource farmer situations where no fee was applicable for the initial producer but would normally be applicable for the subsequent producer.

C When to Transfer

Transfers can be initiated either before or after the acreage reporting date, however, if the transfer occurs after the acreage reporting date it will be necessary to revise the acreage reports according to 2-CP.

A transfer of NAP coverage shall **not** be used:

- after a disaster has occurred
- before the application closing date for the crop
- when estates are closed or entities are dissolved
- when partial share transfers occur between two parties
- involving divorce between husband and wife unless the transfer is 100 percent
- when land is transferred to another administrative county
- when coverage for the crop already exists by the buyer (added land provisions apply)
- *--if the coverage period has **not** begun.--*

24.5 Transfer of NAP Coverage (Continued)

C When to Transfer (Continued)

For 2004 and subsequent crop years, transfers must be initiated after the application closing date and before the earlier of either the disaster event or end of the coverage period. The end of the coverage period is determined as:

- the date harvest is complete
- the normal harvest date
- abandonment of the crop
- destruction of the crop.

D Deceased Producer

If a producer dies and all rights of survivorship are transferred to the legal heir, a transfer of NAP coverage may be allowed, if all real property is transferred to the legal heir following State law requirements and a copy of documentation transferring the real property is attached to CCC-577.

Note: CCC-577's Transferee's Signature block should be left blank. The State law documentation transferring the real property to the legal heir takes the place of the transferee's signature.

State Offices shall consult with Regional OGC's office for questionable cases.

In instances where there is no right of survivorship to a legal heir, and an estate is created either with its own tax ID or using the deceased's Social Security number, FSA-325 shall be used and processed according to 1-CM.

E Production and Yields

If a loss occurs in the year of transfer, production must be kept separate and the loss is calculated only on the transferred acreage and production. To establish an approved yield for the transferred crop, follow Part 5 to establish an approved yield using the transferee's actual production history.

If land is purchased or leased by a producer and the transferee has an application for coverage filed for the unit that includes the crop, added land procedure according to ~~paragraph 287~~ is applicable. There is no adjustment to the approved yield database. Added land and adjustments are used for payment purposes **only**.

24.5 Transfer of NAP Coverage (Continued)

F Initiating a Transfer

To initiate a transfer of NAP coverage between producers, CCC-577 shall be filed for each *--transferee for **all** crops being transferred.--*

Note: For succeeding crop years, to continue coverage, a new application for coverage must be filed by the new owner or shareholder before the application closing date for the applicable crop.

See Exhibit 9 for:

- example of CCC-577
- instructions for completing CCC-577.

G Processing a Transfer

When a transfer of NAP coverage is approved by COC, County Offices shall submit, through the State Office:

- *--a written explanation about the nature and circumstances of the transfer--*
- signed copy of the original CCC-471
- diagnostic report for the transferor according to subparagraph 890 B
- signed copy of the manual CCC-577.

National Office will cancel the initial application for coverage and process the transfer. The fee associated to the original application for coverage will be used to initiate an application for coverage for the transferee. No additional fees will be collected if the original application for coverage was filed as a limited resource application.

* * *

--If a transfer of NAP coverage is approved after the software is locked out for that year,--
County Offices shall follow paragraph 1315 to process NAP payments. * * * In addition to the documentation required in paragraph 1315, each request submitted must include CCC-577 with a written explanation regarding the nature and circumstances of the transfer.

24.5 Transfer of NAP Coverage (Continued)

H Examples

The following are examples of situations when a transfer of NAP coverage can be used:

- land purchased or leased by a producer who does not have current NAP coverage for the crop when transfer is requested before a disaster

Example: Producer A owns and operates FSN 100 and has NAP coverage for green beans. Producer B has planted green beans but has no NAP coverage for green beans. Producer B buys FSN 100 from Producer A. CCC-577 can be used to transfer the coverage on FSN 100 for green beans from Producer A to Producer B but is limited to the land acquired through the sale or lease and must be initiated before a disaster.

Note: Production for the transferred acreage must be kept separate from other green beans harvested by Producer B. The loss is calculated only on the transferred acreage. To establish an approved yield for the transferred crop, follow Part 5 using the transferee's actual production history.

- changes in operator between husband and wife

Example: Ron conducts a farming operation as an individual. The application for coverage is in Ron's name. Ron retires from farming and transfers 100 percent interest in his farming operation to Mary, his wife, during the coverage period and before a disaster. Mary requests a transfer of NAP coverage. CCC-577 could be approved in Mary's name.

- changes in entity type or changes from an individual to an entity

Example 1: Joe is operating FSN 400 as an individual. The application for coverage is in Joe's name. Joe forms a corporation and no longer conducts a farming operation as an individual. CCC-577 could be approved for FSN 400 in the name of the new corporation.

Example 2: The farming operation of Bill and his wife Joan consists of FSN 200 that they operate as a joint venture. The application for coverage is in the joint venture's name. Bill and Joan form a trust and no longer conduct a farming operation as a joint venture. CCC-577 could be approved for FSN 200 in the name of the new trust.

Example 3: Tom's farming operation consists of FSN 300 that he operates as an individual. The application for coverage is in Tom's name. Tom and his wife Laurie form a trust that will take over Tom's farming operation. CCC-577 could be approved for FSN 300 in the name of the new trust.

24.5 Transfer of NAP Coverage (Continued)

H Examples (Continued)

- land is purchased or leased by a producer and the transferee has an application for coverage filed for his unit that includes the crop.

Example: Producer A has NAP coverage on FSN 300 for pumpkins. Producer B has NAP coverage on FSN 400 for pumpkins. Producer B buys FSN 300 from Producer A. CCC-577 is required even though both producers have coverage for pumpkins. A transfer of coverage NAP coverage must be initiated before a disaster.

Note: Added land procedure, according to paragraph 287, is applicable.

I Examples Not Applicable

A transfer of NAP coverage shall **not** be used when:

- a transfer of land or a change in entity type occurs after a disaster

Note: The transferee or the new entity would not have had a risk in producing the crop according to subparagraph 29 B.

- land is purchased or leased by a producer before the application closing date for the crop

Example: Producer A has NAP coverage on FSN 100 for green beans. Producer B has green beans on FSN 200 but has **no** NAP coverage. Producer B buys FSN 100 from Producer A before the application closing date. A transfer of NAP ~~service fee~~ **cannot** be done to transfer the coverage on FSN 100 for green ~~beans~~ from Producer A to Producer B. Producer B must purchase coverage for all green beans for the unit in which he has an interest before the application closing date.

- estates are not closed or entities are dissolved

Notes: An FSA-325 shall be used when estates are not closed and a payment is earned.

State Offices shall consult with the Regional OGC office for questionable cases.

24.5 Transfer of NAP Coverage (Continued)**I Examples Not Applicable (Continued)**

- partial share transfers occur between 2 parties

Example: Producer A has coverage for green chile on FSN 2. Producer A sells 50 percent share of the crop to Producer B who has no coverage. Producer B will **not** be covered under NAP for that crop for the remainder of the coverage period. Producer A's coverage level is limited to the current 50 percent share.

- divorce between husband and wife unless it is a 100 percent transfer of coverage

Example: Bob has coverage for green chile on FSN 2. Bob and Gladys, his wife, are divorced and Bob gives a 50 percent share of the crop to Gladys who has no coverage. Gladys will **not** be covered under NAP for that crop for the remainder of the coverage period. Bob's coverage level is limited to his current 50 percent share.

Note: State Offices shall consult with the Regional OGC office for questionable cases.

- *--land is transferred to another administrative county with no change in producer.--*

--25 Prevented Planting for 2006 and Previous Years--**A Definition of Prevented Planting**

[7 CFR 1437.201] Prevented planting is the inability to plant the intended crop acreage with proper equipment during the established planting period for the crop type.

Note: For purposes of determining eligible prevented planting acreage and calculating the NAP payment, crop acreage shall include all intended and planted acres of all types of the crop in the pay group, as defined in Exhibits 7, 7.5, 7.6, and 7.7.

COC shall, before approving a notice of loss for prevented planting, be satisfied that:

- the producer intended to plant the crop acreage
- the crop acreage could not be planted because of natural disaster
- for a crop type with a single planting in a crop year, the eligible cause of loss occurred:
 - after the final planting date for the same crop type in the previous crop year
 - before the final planting date for the same crop type in the crop year the notice of loss for prevented planting is filed
- for a crop type with multiple plantings in a single crop year, the eligible cause of loss occurred:
 - after the final planting date of the final planting period for the same crop type in the previous crop year
 - before the final planting date of the same crop type for the planting period the notice of loss for prevented planting is filed.

--25 Prevented Planting for 2006 and Previous Years (Continued)--**A Definition of Prevented Planting (Continued)**

Acreage of a specific crop type prevented from being planted and subsequently planted to a crop type in the same pay group is not eligible prevented planted acreage.

Example: The producer identifies 75 acres intended for beans. Twenty-five acres each to red, white, and blue beans. Fifty acres of red and white were prevented planted; however, the producer plants 30 acres of blue beans (5 acres of the prevented planted acres as well as the 25 acres originally intended for blue beans). As a result, eligible prevented planted acreage shall be adjusted to 45 acres.

Note: The producer must choose, for multiple planted crops, which acres will be adjusted, such as 5 acres of red or white beans, etc.

For any crop type eligible for prevented planting assistance, a final planting date and *--prevented planting payment factor must be approved by STC.--*

A prevented planting payment will be made if the producer is prevented from planting more than 35 percent of the total eligible acreage intended for planting.

Prevented planting payments are calculated without regard to a unit's low yield or production.

Paragraph 1280 contains instructions for calculating prevented planting payments.

B Prevented Planting of Value Loss Crops

NAP payments for value loss crops are based on the loss of value at the time of natural disaster. Because a crop not planted has no value, value loss crops, including, but not limited to, Christmas trees, aquaculture, or ornamental nursery, are ineligible for prevented planting payments.

See paragraph 181 for value loss crops.

--25 Prevented Planting for 2006 and Previous Years (Continued)--**C Prevented Planting of Tree Crops and Other Perennials**

Prevented planting of tree crops and other perennials applies only if:

- the producer can prove resources were available to plant, grow, and harvest the crop, as applicable
- ***--STC approves the defined planting period for the crop.--***

D Establishing Intent

A crop not intended for planting cannot be eligible for prevented planting assistance. Sufficient information shall be available to show that:

- all cropland feasible to plant and prevented from being planted was affected by a natural disaster
- preliminary efforts made by the producer to plant the crop are evident, such as disking the land or orders for purchase or delivery of seed and fertilizer
- the acreage was prevented from being planted because of a natural disaster rather than a management decision.

Note: The unavailability of equipment, seed, or fertilizer, even if this unavailability is due or related to the natural disaster, is not an eligible cause of prevented planting.

If COC is not satisfied that the crop was intended, but not planted because of natural disaster, the claim for prevented planting shall be denied.

--25.4 Prevented Planting for 2007 and Future Years*A Definition of Prevented Planting**

See 2-CP, subparagraph 24 A for the definition of prevented planting.

B Establishing Intent

A producer must meet all requirements in 2-CP, subparagraph 24 G to establish intent to plant.

C Determining Eligible Prevented Planted Acres

See 2-CP, subparagraph 24 K for determining approved prevented planting acres.

A prevented planting payment applies only if the producer is prevented from planting more than 35 percent of the total eligible acreage intended for planting. In addition, for any crop type eligible for prevented planting assistance, a prevented planting payment factor must be approved by STC and a final planting date established according to 2-CP, subparagraph 16 A.

D Minimum Percent of Loss Requirement for Prevented Planting

When determining prevented planting losses, producers must be prevented from planting more than 35 percent of the total eligible acreage intended for planting to the eligible crop and in the case of multiple planting, more than 35 percent of the total eligible acres intended to be planted within the applicable planting period.

Use the approved prevented planted acres recorded according to 2-CP, subparagraph 24 K when calculating total eligible acreage intended for planting. See Exhibit 9.5.

Prevented planting acreage will be considered separately from low yield losses of planted acreage of the same crop.

E Prevented Planting of Tree Crops and Other Perennials

Prevented planting of tree crops and other perennials applies only if:

- the producer can prove resources were available to plant, grow, and harvest the crop, as applicable
- STC approves the defined planting period for the crop.--*

25.4 Prevented Planting for 2007 and Future Years (Continued)

F Ineligible Acreage for Prevented Planting

Acreage ineligible for NAP prevented planting includes, but is not limited to:

- acreage for which the provisions of 2-CP, subparagraph 24 D are not met
- value loss crops, including, but not limited to, Christmas trees, aquaculture, and ornamental nurseries
- uninsured crop acreage that is unrated for insurance purposes
- acreage planted during the late-planting period.

G Calculating Prevented Planting Payments

Subject to limitations, availability of funds, and specific provisions dealing with specific crops, a payment for prevented planting is determined according to the following.

Step	Action
1	Add the total planted and approved prevented planted acres.
2	Multiply the result of step 1 by “.35”.
3	Subtract the result of step 2 from the approved prevented planted acres.
4	Multiply the producer’s share by the approved yield by the positive result of step 3.
5	Multiply the producer’s share by the assigned production, if any.
6	Subtract the result of step 5 from the result of step 4.
7	Multiply the result of step 6 by the final payment price (market price times “.55” times prevented planting factor).

Notes: Yields for purposes of prevented planting payments shall be calculated in the same manner as for low-yield claims.

--Additional calculations are required when there are multiple crop types within a pay group. See paragraph 1283.5 for additional calculations.--

25.5 Late Planting

A Background

Loss of production for a crop may be attributed to both a natural disaster and/or a management decision to plant the crop late. Late planting provisions provide reduced coverage for eligible crop acreage planted during the applicable late planting period. For previous crop years, NAP has not provided coverage for those crops that were planted after the final planting dates. Beginning with the 2002 crop year, NAP will cover crops planted after the final planting date according to subparagraph B.

Notes: Crops not planted by the final planting date because of a natural disaster but planted during the late planting period will not be eligible for prevented planting payments.

Producers unable to plant the crop by the final planting date, because of a natural disaster, must provide a notice of loss within 15 calendar days of the final planting date to maintain eligibility for prevented planting benefits in the event the crop is not planted during the late planting period.

*--B Definition of Considered Planted for 2009 and Future Years

For determining late planting for 2009 and future years, crops will be considered planted at the time the seed comes into contact with the soil upon which growth can begin. Therefore, transplants will be considered planted when placed into soil rather than when they are planted in the field.

Example: The final planting date for tomatoes is March 31, 2009. Tomato seeds are planted into soil on February 5, 2009. The tomato plants are transplanted to the field on April 5, 2009. The tomato acreage would be considered planted timely for late planting purposes.--*

25.5 Late Planting (Continued)

C Reducing Coverage for Late Planting

COC must assign production according to paragraph 329 for certain crop acreage planted during the applicable late-planting periods. Production to assign will be determined according to the date the crop acreage was planted and the following table.

Late-planting provisions do **not** apply to the following:

- crops with multiple planting periods
- crops with a growing season of 60 calendar days or less
- value loss crops
- fall-planted small grain crops only intended for grain.

IF the crop's days to maturity are...	AND IF the crop is planted after the final planting date by...	THEN assigned production is equal to...
61 to 120 days	1 to 5 calendar days	5 percent of expected production of the applicable late-planted crop acreage regardless of the day planted.
	6 to 20 calendar days	5 percent of expected production of the applicable late-planted crop acreage plus an additional 1 percent of the expected production of the applicable late-planted crop acreage for each day 6 through 20.
	21 or more calendar days	50 percent of the expected production of the applicable late-planted crop acreage.
121 days and up	1 to 5 calendar days	5 percent of expected production of the applicable late-planted crop acreage regardless of the day planted.
	6 to 25 calendar days	5 percent expected production of the applicable late-planted crop acreage plus an additional 1 percent of the expected production of the applicable late-planted crop acreage for each day 6 through 25.
	26 or more calendar days	50 percent of the expected production of the applicable late-planted crop acreage.

25.5 Late Planting (Continued)

D Example

Producer intended to plant 35 acres of green beans. Ten acres were planted timely, 10 acres were planted 4 calendar days after the final planting date, and 15 acres were planted 17 calendar days after the final planting date. The approved yield has been calculated at 46 hundredweight (cwt) per acre. Calculate the assigned production as follows:

- 10 acres timely planted = 0 cwt
- 10 acres planted 4 days after the final planting date -
 $.05 \times 46 \text{ cwt/acre} \times 10 \text{ acres} = 23 \text{ cwt}$
- 15 acres planted 17 days after the final planting date -
 $(.05 \times 46 \text{ cwt/acre} \times 15 \text{ acres}) + (.12 \times 46 \text{ cwt/acre} \times 15 \text{ acres})$
 $(34.5 \text{ cwt}) \quad + \quad (82.8 \text{ cwt}) \quad = 117.3 \text{ cwt.}$

Note: Includes the date the crop is planted.

The total production to be assigned for this crop is 140.3 cwt.

26 Amount of Assistance

A

Payments

[7 CFR 1437.103] Once all other eligibility requirements have been satisfied:

•*--a payment will be made to a producer for any of the following:

- the loss of production in excess of 50 percent of the producer's expected production
- for crop acreage intended to be grazed, the loss of AUD in excess of 50 percent of the producer's expected AUD determined on the basis of acreage, carrying capacity, and grazing period--*
- for value loss crops, the loss of value in excess of 50 percent of the total value

Notes: The crop's loss must be because of natural disaster. Production, AUD, or value for value loss crops, from the entire unit shall be used to determine whether the producer qualifies for a payment.

See paragraph 27 for quality losses.

- [7 CFR 1437.201] a prevented planting payment shall be made for the acreage the producer is prevented from planting because of natural disaster. The eligible prevented planting acreage is that acreage in excess of 35 percent of the total eligible acreage intended for planting to the eligible crop.

COC must be able to determine from documentary or credible evidence that the crop's loss or prevented planting was in some way the result of the natural disaster.

See Part 11 for determining payments.

B

Payment Rate

NAP payments will be payable to eligible producers at 55 percent of the established average market price.

C

Payment Factors

[7 CFR 1437.11] NAP payment rates shall be adjusted for crops that are produced with significant and variable expenses that are not incurred because crop acreage was prevented from being planted or planted but not harvested. See Part 11 for determining payments.

27 Quality Losses

A
NAP Assistance
for Quality
Losses

[7 CFR 1437.9] The quantity of a crop, or value for a value loss crop, will not be reduced for any quality consideration unless a zero value is established.

If a quantity of a type or variety of a crop suffers a loss of quality, the quantity shall be counted as production of the crop unless, because of condition, the quantity has no potential value in any established market for the commodity anywhere.

Note: A grower’s **inability** to find a suitable market for any quantity shall have no bearing on whether the quantity counts as production. The quality of the commodity and the establishment of a market anywhere is all that is relevant. The fact that a particular market does not exist for a **specific** grower or location is not relevant.

Example 1: A grower reports 10 acres of sweet cherries intended for fresh (Total quality market with an approved yield of 4,000 pounds per acre. loss not suffered) 40,000 pounds is the total expected production. Grower produces 11,000 pounds of cherries; however, because of condition, 8,000 of the 11,000 pounds of cherries are of sufficient quality to be marketed as process cherries; 3,000 pounds can be marketed as fresh sweet cherries. The 8,000 pounds of sweet cherries marketable or marketed as processed sweet cherries counts as production of the intended crop acreage the same as if no loss of quality was suffered.

Expected Production	40,000 pounds
Disaster Level/Guarantee	20,000 pounds
Actual Production	11,000 pounds
Qualifying Loss	9,000 pounds

If the county has an approved average market price for processed sweet cherries, the 9,000-pound qualifying loss on the unit must be paid at the approved average market price established for processed cherries because more than 50 percent of the unit’s harvested production was marketed or marketable as processed sweet cherries. If an average market price had not been established for processed sweet cherries, the average market price for fresh cherries would be used. However, COC and STC shall carefully examine whether additional crop data recommendations are necessary and required for the crop.

Continued on the next page

27 Quality Losses (Continued)

A
NAP Assistance
for Quality
Losses
(Continued)

Example 2: A grower reports 10 acres of sweet cherries intended for fresh market with an approved yield of 4,000 pounds per acre. (Total quality loss suffered) 40,000 pounds is the total expected production. The grower produces 12,500 pounds of cherries; however, because of condition:

- 11,000 pounds are of sufficient quality to be marketed as processed sweet cherries
- 1,500 pounds are culls and are not sufficient quality to be marketed in any established sweet cherry market anywhere.

Expected Production	40,000 pounds
Disaster Level/Guarantee	20,000 pounds
Actual Production	11,000 pounds
Qualifying Loss	9,000 pounds
Culls/Potential Salvage	1,500 pounds (part of the 9,000 pound qualifying loss)

If the county has an approved average market price for processed sweet cherries, the 9,000 pounds qualifying loss must be paid at the approved average market price established for processed cherries because more than 50 percent of the units harvested production was marketed or marketable as processed cherries. If an average market price has not been established for processed sweet cherries, the average market price for fresh sweet cherries would be used. Additionally, the 1,500 pounds of culls are not considered cherry production, but could have salvage value according to paragraph 333.

See Part 4 for crops produced for different intended uses.

See Part 6 for determining production and salvage.

28 Units

A

Definition of Unit

[7 CFR 1437.8] Unit is all acreage of the eligible crop, in the administrative county, for the crop year, under either of the following criteria:

- the person has 100 percent crop share
- acreage is owned by 1 person and operated by another person on a share basis.

Note: The basic unit is by producer relationship of operator(s) to owner(s) and is not broken down further by actual crop share percentages.

Example: Bill is the operator, and Bob is the owner. Part of the crop acreage is shared on a 50/50 crop share arrangement and the remaining acreage is shared on a 75/25 share arrangement. Although there are varying shares, there still is only one NAP unit.

Land rented for cash, a fixed commodity payment, or any consideration other than a share in the crop on the land will be considered as a 100 percent crop share.

No other units will be permitted.

Example: If, in addition to the land the person owns, the person rents land from 5 different landlords, 3 on a crop-share basis and 2 on a cash basis, then 4 units will be established; 1 unit for each crop-share lease and 1 unit that includes the 2 cash leases and the land owned by the person.

B

Establishing Units

County Offices shall establish units according to subparagraph A.

29 Eligible Producer

A Definition of Producer

[7 CFR 718.2] A producer is an owner, landlord, tenant, or sharecropper who:

- shares in the risk of producing the crop
- is entitled to share in the crop available for marketing from the farm or would have shared had the crop been produced.

***--Note:** Landowners, landlords, tenants, contract growers, or anyone else not having both a share of the risk and a valid claim of share ownership of a crop are ineligible for NAP.--*

B Verifying Producer Eligibility

COC shall take whatever action is necessary to ensure that payments are proper and are for producers suffering the claimed loss of the crop. The producer must be able to show, with ***--verifiable** evidence, that the producer had a valid ownership share interest in the commodity produced and control of the crop acreage on which the commodity was grown at the time**--*** of the disaster, which is the basis for the application for payment. One of the following shall be obtained as determined by COC:

- copies of signed written leases
- copies of signed rental agreements
- copies of other legal documents showing land ownership or control
- statement signed by landowner that producer had control of the acreage
- statement signed by operator or producer that producer had control of the acreage on a farm.

***--Note:** If a written lease is not available as verifiable evidence that a producer had interest in the commodity produced, or had control of the crop acreage where the commodity was grown at the time of natural disaster requiring a signed statement by the operator or producer, other acceptable alternative documentation in lieu of a signed statement may include CCC-578 or producer print, which have the appropriate information (that is, farm tract, field, crop, share) as certified by the operator. If this document is presented as evidence, COC shall review, verify the validity, and document their determination in the COC minutes. This shall be done on a case-by-case basis only when the verifiable evidence listed in this subparagraph are not available. Neither CCC-509 nor CCC-502 are acceptable as verifiable evidence.--*

29 Eligible Producer (Continued)**B Verifying Producer Eligibility (Continued)**

Exception: For Federal- and State-owned leased forage only copies of signed written leases, rental agreements, or other legal documents may be considered. See subparagraph 192 C for additional information on the eligibility of leased acreage intended for grazing.

Leases, rental agreements, and any other written statements documenting verbal agreements shall be reviewed on a case-by-case basis. The review must determine the amount of interest and risk in the production for the lessor and lessee. Apply the specific case circumstances to the determination of eligible producer.

When reviewing case circumstances, evaluate what lease or rental arrangement existed between parties before the natural disaster. The lease or rental arrangement existing before the date of disaster shall be used to determine eligible producer. Any negotiation, agreement, or performance of parties to a rental or lease arrangement after date of disaster shall have no bearing on the question of eligible producer.

--Applicants certifying to having a valid claim to a share of NAP payment are subject to spot check. If agreements or contracts are discovered that show a grower did not have a valid claim to a share of a crop for which NAP assistance was claimed, the NAP payment must be refunded.--

Payment shall be denied if COC is not satisfied that payments claimed by producers are proper.

C Certification by Producers

Producers signing CCC-576:

- Part B, certify to the accuracy of all information contained in CCC-576, items 8 through 20, and acknowledge receipt of a copy of the notice's filing
- Part G, certify and agree to the statement contained in Part G, information provided on the entire form, and apply for payment according to paragraph 502.

30 Highly Erodible Land and Wetland Conservation Compliance**A Producer Requirements**

[7 CFR 1437.15] Producers must comply with the provisions of conservation compliance, according to 6-CP [7 CFR Part 12], to be eligible for NAP payment.

31 FCIC Disqualification of Persons for NAP

A

FCIC Determines Disqualification

[7 U.S.C. 1506 (n)] A person who FCIC has determined to have willfully and intentionally provided false or inaccurate information to FCIC or any insurer concerning an insurance plan or policy is disqualified from purchasing CAT or receiving NAP for a period of not to exceed 2 years.

The disqualification of the person is by FCIC or RMA and is not the result of an FSA or CCC administrative determination. Accordingly, the disqualification determination is not appealable to FSA or CCC.

B

FCIC- Disqualified Person Ineligible for NAP Assistance

Persons disqualified by FCIC are notified by FCIC or RMA. If a person is disqualified, the person is considered to be aware that the person is ineligible for NAP assistance.

If NAP payments are inadvertently issued to a disqualified person for a disaster occurring in the period of ineligibility, according to subparagraph D, the payment with interest from the date of disbursement, shall be refunded to CCC. Relief under finality or misaction/misinformation shall not apply.

Persons who have been denied NAP assistance because of disqualification, or who are required to refund unearned payments because of FCIC disqualification, can request reconsideration from FSA of only the following:

- whether the disqualification is for the proper person
 - that the period of ineligibility determined according to subparagraph D is correct.
-

Continued on the next page

31 FCIC Disqualification of Persons for NAP (Continued)

C

Effective Date The effective date of the person's disqualification, as specified in the disqualification notice or RMA memorandum, is the beginning date for the period of NAP ineligibility.

D

Period of Ineligibility Persons disqualified by FCIC are ineligible for NAP assistance for any natural disaster occurring within the 2-calendar year period of ineligibility.

Example: On August 14, 2001, RMA notifies FSA that a person was disqualified effective July 11, 2001. Accordingly, the person is ineligible for NAP assistance for any natural disaster occurring from July 11, 2001, through July 10, 2003.

32 CAT Insurance Linkage

A

Producer Requirements Producers are not required to obtain CAT or sign FSA-570, on insurable crops grown by the producer, to be eligible for NAP.

33 Qualifying Gross Revenues

A Definition of Qualifying Gross Revenues

[7 CFR 1437.14] Qualifying gross revenues mean, with respect to a “person” who receives:

- more than 50 percent of this “person’s” gross income from farming, ranching, and forestry operations, the annual gross income for the taxable year from these operations
- 50 percent or less of this “person’s” gross income from farming, ranching, or forestry operations, the “person’s” total gross income for the taxable year from all sources.

B Status of “Person”

*--The qualifying gross revenue provision applies to “person”. Before determining eligibility, ensure that a correct “person” determination is made according to 1-PL. Status dates are shown in 1-PL for the disaster crop year.

Follow 1-PL for determining “person”. Non-farming entities will be included when determining “person” for the purpose of qualifying gross revenues.--*

C Gross Income

Statute and regulation do not permit CCC to consider the cost of sales for basis for income when determining a “person’s” gross income or qualifying gross revenues.

The term “gross income”, as used in determining a “person’s” qualifying gross revenues according to subparagraph A, shall:

- include all income or the total amount coming in, monetary or otherwise, exclusive of deductions
- not be adjusted, amended, discounted, netted, or modified for any reason, including, but not limited to:
 - whether income was for goods or services not belonging to the beneficiary of this income
 - income’s origin.

See Exhibit 10 for examples of determining gross income.

Note: Apply qualifying gross revenues provision to combined State producers according to 1-PL.

33 Qualifying Gross Revenues (Continued)

D Gross Revenues Limitation

[7 CFR 1437.14] NAP payments shall not be made to a “person” who has qualifying gross revenue in excess of \$2 million for the most recent tax year preceding the year for which assistance is requested.

* * *

E CCC-441 Income

Ensure that CCC-441 Income is completed by each “person” who is a producer, or member of a producer, requesting NAP payments.

Exception: For tribal ventures, follow subparagraph D.

See subparagraph E for an example of CCC-441 Income.

Note: Each “person” certifying gross income on CCC-441 Income whose income exceeds \$2 million, shall do the following on CCC-441 Income, Part A:

- mark the applicable box, circle “**was**” (in bold print), line through “**not**” (in bold print), and initial below the change
- sign and date.

F CCC-441 Income for Tribal Ventures

For tribal venture operations, the tribal council or an authorized BIA official may execute CCC-441 Income by doing all of the following:

- completing item 2 for the tribal venture
- checking the second box on CCC-441 Income, Part A
- annotating the following statement immediately above the sentence following the second box on CCC-441 Income, Part A:

“For each person who is a member (including the person’s spouse and minor children) of the tribal venture shown in item 2, ...”

Note: If either the tribal council or authorized BIA official cannot attest on CCC-441 Income that no individual member (including the individual member’s spouse or minor child) will not exceed the qualifying gross revenue limitation, each individual member of the tribe must complete a separate CCC-441 Income before any NAP payments can be issued to the tribal venture.

YOU MUST RETURN THIS FORM BEFORE YOUR APPLICATION FOR BENEFITS CAN BE APPROVED. 			
PART A - CERTIFICATION OF INCOME (Revenue definitions are included on the reverse of this form)			
I certify that for the most recent tax year preceding the crop year for which benefits are requested.			
<input checked="" type="checkbox"/> Fifty percent of my gross annual revenue (receipts) was received from farming; ranching and forestry operations and that my gross annual revenue (receipts) from these operations was not in excess of \$2 million.			
<input type="checkbox"/> Less than fifty percent of my gross annual revenue (receipts) was received from farming, ranching, and forestry operations and that my gross annual revenue (receipts) from all agricultural and nonagricultural sources was not in excess of \$2 million.			
Person Shady Farms, Inc. Sign Here: /s/ Earl E. Floyd, President			Date 03-19-XXXX
PART B - PENALTY FOR FALSE CERTIFICATION			
Evidence that may be required to validate certification may include tax records, accountant's certification, or other documentation that provides the information required. The penalty for false certification is loss of all benefits for the disaster crop year in which the false certification was made.			
<p>NOTE: The following statements are made in accordance with the Privacy Act of 1974 (5 USC 552a), and the Paperwork Reduction Act of 1980, as amended. The Federal Agriculture Improvement and Reform Act of 1996, and the regulations at 7 CFR Part 1437 authorize the collection of the information required by this certification. The information will be used to establish income eligibility in accordance with the requirements of the law for applicants who are requesting Noninsured Crop Disaster Assistance Program assistance. Providing this information is voluntary; however failure to furnish the requested information will result in a determination of ineligibility for Noninsured Crop Disaster Assistance Program assistance. This information may be used by and provided to other agencies, IRS, Department of Justice, other State or Federal law enforcement agencies, and in response to orders of a court, magistrate, or administrative tribunal. The provisions of criminal and civil fraud statutes, including 18 USC 286, 287, 371, 641, 651, 1001; 15 USC 714m; and 31 USC 3729, may be applicable to the information provided.</p> <p>According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0560-0175. The time required to complete this information collection is estimated to average 10 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. RETURN THIS COMPLETED FORM TO YOUR COUNTY FSA OFFICE.</p>			
The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410 or call (202) 720-5954 (voice or TDD). USDA is an equal opportunity provider and employer.			

33 Qualifying Gross Revenues (Continued)

G Example of CCC-441 Income (Continued)

CCC-441 Income (Reverse) (02-24-00)

REVENUE DEFINITIONS

Gross revenue (receipts) from farming, ranching, and forestry, means the gross revenue (receipts) the person received from all agricultural sources. There shall be no adjustments or reductions made in determining gross revenue (receipts) from farming, ranching, and forestry, including nursery operations.

Gross revenue (receipts) from all agricultural and nonagricultural sources means the total revenue received by the person for the tax year from wages, rents, royalties, sales, or any other type of income. This figure must be the gross revenue before ANY adjustments or reductions. For example, if a person buys feeder cattle, fattens them, and sells them, the gross revenue would be the total revenue received when the cattle were sold. There shall be no reduction for such things as the purchase price of the cattle or for feed costs.

EXAMPLES FOR DETERMINING QUALIFYING GROSS REVENUE (RECEIPTS)

Example 1

Situation Farmer or rancher, A. Bravo's, gross annual revenue from the sale of agriculture production was \$50,000. Production expenses for producing these products was \$30,000. A. Bravo's gross revenue from farming, ranching and forestry operations is \$50,000.

A. Bravo also owns 51 percent of A.B. Grain Co., Inc. The grain company purchased grain from producers for \$3,000,000 and sold the grain for \$3,050,000. A. Bravo's gross revenue for A.B. Grain Co., Inc., is \$3,050,000.

Determination Less than a majority of A. Bravo's annual revenue was from farming, ranching, and forestry operations; therefore, A. Bravo's qualifying gross revenue is the gross revenue from all sources.

A. Bravo is ineligible for disaster benefits because the qualifying gross revenues exceed \$2,500,000 (\$50,000 plus \$3,050,000 equals \$3,100,000).

Example 2

Situation When a husband and wife are considered one person, the gross revenue from both must be included. C. Doe's gross revenue from farming is \$1,000,000. His wife sold clothing costing \$600,000 for a total of \$1,600,000. Overhead expenses were \$150,000. The husband and wife had investment revenue (stocks, bonds, and savings accounts) of \$100,000. The qualifying gross revenue is \$2,700,000 (\$1,000,000 plus \$1,600,000 plus \$100,000).

Determination Less than a majority of the producer's gross revenue was from farming, ranching and forestry operations. Therefore, qualifying gross revenue is gross revenue (receipts) from all agricultural and nonagricultural sources. The entity is ineligible to receive disaster benefits.

Example 3

Situation Shady Farms, Inc., had gross revenues of \$1,900,000 from farming. All of this revenue was from the production of grain and livestock. The corporation is owned by Earl E. Floyd and Thelma Floyd, his wife. Earl E. Floyd also had controlling interest in Aerial Application, Inc., an aerial spraying and seeding business. Aerial Applications, Inc., had a gross revenue of \$150,000.

Determination Since a majority of the annual revenue of Shady Farms, Inc., was from farming, ranching, and forestry operations the qualifying gross revenue is \$1,900,000.

Shady Farms, Inc., is eligible to receive disaster benefits.

Example 4

Situation The auction house sold livestock for \$30,000. The \$30,000 was deposited in a special account set up by the auction house and designated a "Custodial Account for Shippers Proceeds." Funds in this account are trust funds. The only checks that may be written on this account are checks to the sellers of the livestock and checks to the general account of the auction house for marketing charges. To offset the \$30,000 deposit, the sellers were paid \$29,400 for their livestock, and the auction house was paid \$600 for commissions.

Determination Include only \$600 from commissions as gross income for the auction house. Because funds in the custodial account are trust funds, they are not considered gross income for the auction house. The custodial account must be set up according to the Packers and Stockyards Administration regulations.

33 Qualifying Gross Revenues (Continued)

H COC Review of Gross Income

COC shall ensure that the provisions of subparagraphs A and B are met before approving the issuance of any NAP payment. To accomplish this, COC shall:

- review County Office records and use personal knowledge of the “person’s” interest to determine whether COC is satisfied that the “person” is **not** likely to have exceeded the \$2 million gross income threshold
- identify those “persons” for which COC has insufficient information to determine whether the qualifying gross revenue limitation has been exceeded

Notes: Notify these “persons” that evidence of eligibility must be provided.

Evidence may be whatever is required for the reviewing authority to establish eligibility.

The reviewing authority may accept statements from a certified public accountant **provided** the statement ensures that the “person’s” gross income, as defined in subparagraph A, does not exceed \$2 million.

- document in COC minutes the cases reviewed, determinations made, and basis for determinations.

Note: COC’s shall not require income tax returns. However, COC must be satisfied that the “person” has not exceeded the \$2 million qualifying gross revenue limitation. The producer may provide whatever documentation is needed to establish eligibility. Payments for the “person,” who may either be a producer or member of a producer, may not be approved until COC is satisfied the “person” meets qualifying gross revenue eligibility requirements. If the producer volunteers to provide tax records or similar information, COC may use the information to determine eligibility.

COC shall ensure that no payment is issued to any “person” who has not satisfactorily established eligibility for payment.

33 Qualifying Gross Revenues (Continued)**I Using IRS Records**

COC's are not authorized to require IRS tax records. However, the "person" may volunteer tax information to COC.

Note: If the "person" voluntarily provides IRS tax records, a copy of these records shall be made, date stamped when received, and placed in the "person's" eligibility file.

If a tax return is submitted, it reflects net amounts from supplemental schedules. Therefore, if a tax return is used, supplemental schedules must be reviewed to determine gross income before deductions.

IRS forms may not contain all necessary information from which to make an appropriate determination of eligibility. Therefore, additional documents may be required to make eligibility determinations.

Note: The definitions of "qualifying gross revenue" and "gross income" are not the same as IRS definitions of "gross income". In many instances, a "person's" taxable gross income is smaller than qualifying gross revenue or gross income. Ensure that all the provisions of this paragraph are applied when determining qualifying gross revenue and gross income for NAP payment eligibility purposes.

34 Payment Limitations

A Payment Limitation

[7 CFR 1437.14] NAP payments shall not be made in excess of \$100,000 per “person” per crop year.

See Exhibit 2 for definition of “crop year”.

B Required Determination

COC shall make “person” determinations and apply payment limitation provisions according to 1-PL.

Note: 1-PL provides the following provisions that do not apply to NAP:

- actively engaged
- permitted entity
- foreign person
- cash-rent tenant.

C Payment Limitation Allocations

--County Offices shall follow procedures in 2-PL and 3-PL for multi-county and combined-- producers.

35 Multiple Benefits

A

Choosing NAP Benefits or Other Program Benefits

[7 CFR 1437.13] If a producer is eligible to receive NAP payments and benefits under any other program administered by the Secretary for the same crop loss, the producer must choose whether to receive NAP payments or benefits from any other program. The producer is not eligible for both.

Note: An election to receive payments other than NAP does not relieve the producer of the requirements of making an acreage and production report.

If benefits for any other program administered by the Secretary for the same crop loss do not become available until after the producer has received a NAP payment, the producer may refund the total amount of the NAP payment and receive the other benefit for which the producer is eligible.

Example: Producer A has a crop loss on tomatoes and corn. NAP assistance is available and will pay Producer A \$3,500 for the tomato loss and \$4,200 for the corn loss. Producer A is also eligible for other USDA benefits of \$21,000. The other USDA benefits amount available is the total amount available for corn, tomato, and other crop losses. The other USDA benefit attributable to the:

- corn loss is \$7,000
- tomato loss is \$5,000.

If Producer A elects to obtain the other USDA benefits of \$21,000, NAP assistance cannot be paid. If Producer A elects to receive NAP assistance for corn and tomato crop losses (a total of \$7,700), the other USDA benefit amount must be reduced by \$12,000 (\$7,000 other USDA benefit amount attributable to corn plus \$5,000 other USDA benefit amount attributable to tomatoes).

Note: The reduction amount is not the amount paid under the program elected.

Continued on the next page

35 Multiple Benefits (Continued)

A

Choosing NAP Benefits or Other Program Benefits (Continued)

In the event that a producer is issued a NAP payment and FSA later learns that the producer had received (before the issuance of the NAP payment) another USDA benefit subject to the multiple benefit exclusion, the producer must be notified that the NAP payment is unearned and must be refunded together with interest from the date of disbursement. This is the case regardless of whether the producer had been asked about other USDA benefits before the issuance of the NAP payment. Finality provisions are not applicable because the provision precluding multiple benefits is both statutory and regulatory and the producer had reason to believe that more than 1 benefit was received.

Notes: If the producer had not been given the opportunity to choose between NAP and the other USDA benefit, the producer could then make an election. However, if NAP is elected, the NAP payment shall be maintained as an unearned payment and a debt owed to CCC by the producer until such time as the producer provides documentation to show that the other USDA benefit has been fully repaid.

Unearned NAP payments are ordinarily required to be refunded with interest according to paragraph 509. However, if it can be determined that the producer had not been given the opportunity to choose between NAP and the other USDA benefit, program interest may be waived.

36 Unacceptable, Incorrect, or False Records and Certifications

A

Reliance on Producer Records and Certifications

NAP assistance requires accurate information from producers. It is imperative that producers understand that a failure to provide complete and accurate information and records could result in any or all of the following:

- an application for NAP assistance being denied
- the producer or producers being determined ineligible for NAP assistance on all units and farms
- the producer or producers becoming liable under any civil or criminal fraud statute or any other statute or provision of law.

Continued on the next page

36 Unacceptable, Incorrect, or False Records and Certifications (Continued)

B

Questionable Records or Certifications

See:

- paragraph 37 for misrepresentation, scheme, or device
 - *--paragraph 39 for tolerance on NAP acreage or production.--*
-

37 Misrepresentation, Scheme, or Device

A

Determining Misrepresentation, Scheme, or Device

[7 CFR 1437.15] Any producer determined by COC to have knowingly misrepresented any fact; adopted, participated in, or benefited from any scheme or device that has the effect of defeating, or is designed to defeat the purpose of NAP. If a producer employed any practice for the purpose of causing or attempting to cause CCC to make a payment that otherwise would not have been made, COC shall impose a sanction according to subparagraph C.

Scheme and device may include, but is not limited to, 1 of the following:

- concealing any information have a bearing on the application of the program provisions
 - submitting false information to CCC or any STC or COC
 - creating fictitious entities for the purpose of concealing the interest of a person in the farming operation.
-

B

Application of Sanctions

--Sanctions will apply to the specific producer and all other interests the producer has and other entities or joint ventures for all crops, all units in all administrative counties, and all States.--

Continued on the next page

37 Misrepresentation, Scheme, or Device (Continued)

C

Sanctions

COC shall, upon determination of a violation according to subparagraph A:

- determine the producer ineligible for a NAP payment for the crop year of the violation plus 2 subsequent crop years
 - demand a refund of all amounts paid by CCC to the producer, applicable to the crop year in which the violation occurred, with applicable interest
 - *--assess liquidated damages according to paragraph 38.--*
-

D

Liability

[7 CFR 1437.15] The liability of any producer for any payment or refund which is determined to be due CCC is in addition to any other liability of this producer under any civil or criminal fraud statute or any other statute or provision of law.

All producers on a unit receiving NAP payments are jointly and severally liable to repay unearned payments.

38 Liquidated Damages

**A
Accessing
Liquidated
Damages**

[7 CFR 1437.15(d)] When a producer is found in violation, according to paragraph 37, COC shall assess liquidated damages in the amount of 25 percent of the payment projected or received for the crop in violation. Liquidated damages are in addition to any refund of program benefits and are not considered a penalty.

Examples: Bill Smith received \$10,000 in NAP benefits on sweet corn (\$7,000) and butter beans (\$3,000) for the 2002 crop year. COC determined Mr. Smith adopted a scheme for receiving benefits for his sweet corn crop. Mr. Smith would be required to refund all amounts paid by CCC (\$10,000) plus pay liquidated damages in the amount of \$1,750 ($\$7,000 \times 25\% = \$1,750$).

Jim Ecker suffered a loss on native pecans and was expecting to receive \$20,000 in NAP benefits. COC determined Mr. Ecker misrepresented production data to increase the loss percentage. Although Mr. Ecker had not received the NAP benefit for native *--pecans, COC shall assess liquidated damages in the amount of--* \$5,000 ($\$20,000 \times 25\% = \$5,000$).

***--39 Tolerance**

A

Definition of Tolerance

Tolerance is the number of acres that the reported acreage may differ from the determined acreage without either of the following:

- the total loss of benefits
- the overall accuracy of the acreage report being questioned.

Rule: Tolerance is the larger of 1 acre or 5 percent of the reported acreage, not to exceed 50 acres.

B

Tolerance

Tolerance for NAP crop acreage and production reports is 5 percent.

Note: If circumstances warrant, and the reviewing authority determines it necessary, an acreage or production error within tolerance may be reviewed to determine whether any violation of NAP policy has occurred.--*

Continued on the next page

***--39 Tolerance (Continued)**

**C
Tolerance
Calculation**

Tolerance will be calculated using all crop types within the pay group. Use this table to calculate tolerance.

Step	Calculation
1	Add total reported irrigated and nonirrigated crop acreage for the pay group together before calculating tolerance.
2	Subtract official and measured acreage from the total reported acreage.
3	Multiply the result of step 2 times 5 percent to determine the acreage of tolerance. See tolerance rule in subparagraph A.

Following is an example of calculating tolerance.

Crop	Reported Acres	Determined Acres
Beans: Green, Pinto, and Wax		
Out of Tolerance		
Green	10	10
Pinto	10	5
Wax	10	4
Total:	30	19
Exceeds 5 percent out of tolerance		
Within Tolerance		
Green	10	10
Pinto	10	10
Wax	10	9
Total:	30	29
Does not exceed 5 percent within tolerance		

**D
Handling
Reported and
Determined
Acreage of
Production**

When a unit has both reported and determined:

- acreage, follow Part 4
- production, follow Part 6.--*

Continued on the next page

*--39 Tolerance (Continued)

E

Discrepancy in Acreage or Production

Use the instructions in this table whenever there is a discrepancy between the reported or determined acreage or production associated with an approved CCC-576. The determined acreage and production shall be used according to subparagraphs D and F.

WHEN the determined acreage or production...	THEN COC...
is within tolerance	may determine eligibility without an explanation from the producer. Note: COC may delegate authority for this determination to CED. This delegation shall be recorded in the COC minutes.
exceeds tolerance, but is within 15 percent of the reported acreage or production	shall determine eligibility or ineligibility after the producer has been notified of the discrepancy and the producer has provided a satisfactory explanation for the inaccuracy or inaccuracies. If satisfactory explanation is not provided, COC shall make the determination after considering and documenting all of the following: <ul style="list-style-type: none"> • everyone directly or indirectly involved • the ramification of the discrepancy if the matter had not been detected • the unique circumstances of the case, including, but not limited to, how the matter was discovered • if the matter was or was not the result of or related to a misrepresentation, scheme, or device. Note: See subparagraph F when ineligibility is determined.
exceeds tolerance, but is not within 15 percent of the reported acreage of production	shall determine ineligibility. See subparagraph F.

--*

Continued on the next page

39 Tolerance (Continued)

F Ineligibility

Follow paragraph 37 if COC suspects that an unacceptable, incorrect, or false certification is related to or the result of a misrepresentation, scheme, or device.

For all other determinations of ineligibility:

- COC shall not approve CCC-576
- if CCC-576 was approved before the determination:
 - do not issue payments
 - if payments have already been made, establish a receivable according to 67-FI.

Note: If the producer immediately refunds the overpayment, process the refund according to 3-FI.

Note: County Offices shall use determined acreage and production for APH purposes according to paragraphs 154 and 325.

G Documentation

All determinations shall be documented in the COC minutes.

***--40 Spot Checks**

A NCT Data

2004 was the first crop year that all States had authority to approve NAP NCT data. Before 2004, most NCT data was required to be submitted to and approved by the National Office before NAP payments could be processed at Service Centers.

Beginning with 2004 NCT, the National Office will conduct spot checks of crop data approved by State Offices. The spot checks are conducted to ensure that State Offices are approving data consistent with documentation. Crops that do not fall within a national rate and yield mean are spot checked.

When NCT crop data is found to be out-of-tolerance, State Office employees specializing in NAP will be contacted to provide the documentation used by the STC to justify the crop data that was found to be out-of-tolerance.--*

41-105 (Reserved)

Part 3 Crop Data Information**106 Crop Documentation****A Crop Data**

County Offices shall provide crop data information identified in CCC-456 in Exhibit 17 to STC for each crop.

*--For each crop year and commercial crop or agricultural commodity for which a report of acreage may be filed in the State, STC shall establish, at least 120 calendar days before the specific crop's application closing date, the following:

- average market price
- county-expected yield
- applicable payment factors.

Notes: For secondary use, follow subparagraph 174 C.--*

Provide both price and yield of seed on the "clean" basis.

107 Expected Yield**A Definition of County-Expected Yield**

[7 CFR 1437.102] The county-expected yield is the eligible crop yield for the administrative county established by STC * * *.

The county-expected yield should reflect the average production potential of the crop in the county by practice and intended use.

107 Expected Yield (Continued)

B Sources of Yield Information

The county-expected yield shall be based on the best available information provided by any of the following sources:

- NASS
- CSREES
- * * *
- Rural Development
- County Agricultural Commissioners Office
- local markets
- COC's knowledge
- yields in similar areas
- average APH by year
- other reliable sources, such as universities, AMS Market News, and buyers.
- * * *

STC's shall:

- *--ensure that established county expected yields are comparable with previously--* approved county expected yields in the State or in surrounding States
- justify deviations from previously approved crop data.

*--**Note:** If NASS has data for the eligible crop, STC's must consider NASS information when establishing the crop data; however, STC's are not required to base the establishment only on NASS data.--*

107 Expected Yield (Continued)

C Establishing County-Expected Yield

If CAT insurance is not available for the crop in the administrative county or a contiguous county, the county-expected yield shall be calculated by using the Olympic average:

- obtaining the yields of the crop for the 5 consecutive crop years immediately preceding the previous crop year
- dropping the crop years with the highest and lowest yields
- averaging the yields for the remaining 3 crop years.

Example: For the 2002 crop year, the base period would be 1996 through 2000.

If 5 crop years of data is not available for establishing the county-expected yield, STC shall:

- use the best data available to obtain as many crop years of data as possible within the 5 consecutive crop years immediately preceding the previous crop year
- establish a county-expected yield for those crops by computing a simple average of the data obtained
- thoroughly document why 5 crop years of data is not available and the sources of the data used.

[7 CFR 1437.7 (a)] For planted annual crops, the county-expected yield must be based on the acreage planted for harvest. If yield information used by STC is for harvested acres only, STC shall convert the harvested acre yield to a planted acre yield.

Notes: County-expected yields for orchards shall be based on mature orchards, if the majority of this orchard crop acreage is mature. T-yield reductions shall be applied for individual producers having less than mature orchards.

The T-yield established for the administrative county will be the T-yield for the unit as defined in paragraph 28.

Example: Unit acreage is located in both County A and County B. County A is the administrative county. The T-yield established for County A will be the T-yield for the unit.

107 Expected Yield (Continued)**C Establishing County-Expected Yield (Continued)**

If CAT insurance is available for the crop in:

- *--the administrative county, STC shall establish the county CAT T-yield as the expected yield
- a contiguous county, STC shall ensure that the established county-expected yield is--* comparable to CAT T-yield in the county.

Note: If there is more than 1 contiguous county, average the T-yields for all contiguous counties.

Exception: CAT T-yields are not required to be used if STC establishes * * * a different county-expected yield for different types or varieties of a crop where CAT makes no such distinction based on type or variety.

--STC shall identify and document how the established county-expected yield was-- determined.

D County-Expected Yields for Different Farming Practices

The county-expected yield may take into consideration different yield variations because of diverse farming practices. Although NASS does not always establish separate yields based *--on practice, STC's shall establish irrigated and nonirrigated county-expected yields, if appropriate.

If a crop, using good farming practices, is being produced using more than 1 farming practice, STC shall establish approval of a county-expected yield based on each farming--* practice.

107 Expected Yield (Continued)**E County-Expected Yields for Different Intended Uses or Type and Variety**

--[7 CFR 1437.7 (b)] STC's must establish different county-expected yields for NAP crops-- when documentation used to establish the county-expected yield shows a substantial difference in the expected yield because:

- the crop is harvested for different intended uses, such as fresh versus processed
- varieties or types of the crop warrant different county-expected yields, such as red kidney bean versus navy bean.

F Documenting County-Expected Yields

STC's shall:

- conduct a second-party review of all manual calculations used to establish county-expected yields
- *--establish county-expected yields that are representative of the normal cultural practices for the county
- document and maintain data used to establish county-expected yields
- document the source of all data used in establishing county-expected yields
- review recommended county expected yields against approved data.--*

G Adjusting County-Expected Yield

The expected yield for a crop shall be adjusted if:

- cultural practices, including the age of the planting or plantings, are different from those used to establish the yield
- the yield established on a State or county level is determined to be incorrect.

107.5 Carrying Capacity

A Carrying Capacity Definition

Carrying capacity consists of a stocking rate and the number of days grazing can normally be sustained without detrimental effects on the land resource **absent any supplemental feedstuff**. Feedstuff is any product, of natural or artificial origin, that has nutritional value in the ration when properly prepared.

B Crops on Which to Establish Carrying Capacity and Grazing Period

STC shall, for each county or area within a county and before the applicable application *-closing date, establish a carrying capacity for each crop according to subparagraph 170 A,--* with an intended use of forage or grazing present in the State.

C Grazing Days

Grazing periods of varying lengths may exist, considering factors as topography, altitude, land mix, etc., in the same county or area within the county for the same forage type, such as mixed forage (IGS).

D Stocking Rate

The stocking rate must reflect the specific number of acres of forage capable of supporting 1 animal unit for the specified grazing days.

Example: STC determines 7 acres of mixed forage (IGS) is required to support 1 animal unit.

107.5 Carrying Capacity * * * (Continued)

***--E Multiple Carrying Capacities**

Multiple carrying capacities may be established, considering factors as topography, altitude, land mix, etc., in the same county or area within the county for the same forage type, such as mixed forage (IGS). For automation purposes, multiple carrying capacities of the same forage type will be identified by a unique planting period number. The planting period numbers reflecting:

- full season forage or cool season forage will be identified as 01, 21, 31, 41, etc. --*
- warm season forage will be identified as 02, 22, 32, 42, etc.

Multiple carrying capacities have no impact on crop definition or the pay crop/pay type.

* * *

108 Average Market Prices

A Definition of Average Market Price

[7 CFR 1437.11] Average market price is the price or dollar equivalent per bushel, ton, etc.,
--for an eligible commodity, established by STC. Average market price is:--

- used to calculate NAP payments
- on a harvested basis without the inclusion of transportation, storage, processing, packing, marketing, or other post-harvest expenses
- based, in part, on historical data.

Note: An individual producer's level of compensation or specific farming practices for a crop are not particularly relevant to the question of average market price. To the extent practicable, an average market price will reflect the average rate of
*--compensation for a particular crop in a region for all producers. STC will determine regions based on information and data provided from all available sources. As such, average market prices approved by STC's are **not** appealable.

Each intended use of a crop type shall have:--*

- only 1 average market price established within a State for a crop year
- an average market price established according to subparagraph C.

Note: See subparagraph D for determining average market price for peanuts.

108 Average Market Prices (Continued)

B Crops on Which to Determine Average Market Price

*--STC shall establish average market prices for crops.

C Sources of Information

STC's shall use **the best available information** when establishing the average market--* price. Sources of information may include, but are not limited to:

- NASS
- CSREES
- * * *
- Rural Development
- County Agricultural Commissioners Office
- local markets
- COC's knowledge
- prices in similar areas
- other reliable sources, such as universities, AMS Market News, and buyers.

*--STC's shall ensure that established average market prices for crops are comparable with established FCIC prices for determining indemnities.

Note: If NASS has data for the eligible crop, STC's must consider NASS information when establishing the crop data; however, STC's are not required to base the establishment only on NASS data.--*

108 Average Market Prices (Continued)

D Average Market Price for Peanuts

For 2001, the average market price of peanuts is 1 of the following:

- the national average quota price established for the type of peanuts, if effective peanut poundage quota is available for the entire peanut marketing year for the unit's entire loss of peanut production
- a blend of the national average quota and additional prices established for the type of peanuts, if effective peanut poundage quota is available for some, but not all of the unit's loss of peanut production for the entire peanut marketing year

Note: See Exhibit 18 for calculating the average market price of peanuts when a unit has insufficient effective peanut poundage quota available to cover all of a unit's loss of peanut production.

- the national average additional price established for the type of peanuts, if no effective peanut poundage quota is available for the unit's entire loss of peanut production for the entire peanut marketing year.

For 2002 and subsequent years, this subparagraph no longer applies.

E Determining Average Market Price

--For each crop, STC shall establish the average market price by:--

- obtaining market prices for each crop for the 5 consecutive crop years immediately preceding the previous crop year
- dropping the crop years with the highest and lowest prices
- averaging the prices for the remaining 3 crop years.

Example: For the 2002 crop year, the base period would be 1996 through 2000.

108 Average Market Prices (Continued)**E Determining Average Market Price (Continued)**

If 5 crop years of data is not available for determining the average market price, STC's shall:

- use the best data available to obtain as many crop years of data as possible within the 5 consecutive crop years immediately preceding the previous crop year
- determine an average market price for those crops by computing a simple average of the data obtained
- thoroughly document why 5 crop years of data is not available and the sources of the data used.

F Different Market Prices

STC's shall ignore small differences in prices for a crop based on different types or varieties or various intended uses. However, if there is a significant amount of production being marketed in a region at significantly different levels of compensation, STC shall determine *--whether to establish different prices.--*

As applicable, if STC determines with credible data that a:

- different type or variety of a crop has historically been valued at a significantly different price when compared to the average market price of other types or varieties of this crop, *--STC shall establish a separate price for the type or variety of the crop--*
- significant amount of a crop has been historically marketed in a county or counties under a specific intended use and at a price that is significantly different than the average price *--received for the crop without regard to intended use, STC shall establish a separate--* price for the crop based on intended use.

108 Average Market Prices (Continued)**G Documentation**

STC's shall:

- *--establish average market prices that are reasonable when compared to local markets
- conduct a second-party review on the calculation of all established average market prices
- document and maintain data used to establish the average market price--*
- review potentially recommended average market prices against approved data * * *.

109 Unharvested and Prevented Planting Payment Factors**A Application of Payment Factors**

[7 CFR 1437.11] Average market prices for crops shall be established on a harvested basis. See subparagraph 108 A.

The average market price shall be adjusted for crops produced with variable expenses that are not incurred because the crop acreage was prevented from being planted or planted but not harvested. The adjustment for this crop acreage shall be made by applying a payment factor established by STC * * *.

Each intended use of a crop type shall have not more than 1 prevented planting and unharvested payment factor established within a State for a crop year.

Note: [7 CFR 780.2 (c) and (d)] The application of payment factors is **not** appealable because it is a statutory and regulatory provision. A producer's appeal right is limited to the question of whether acreage was in fact prevented from being planted, planted but not harvested, or planted and harvested in a good farmer-like manner.

109 Unharvested and Prevented Planting Payment Factors (Continued)

B**Establishing and
Recommending
Factors**

For each crop submitted according to subparagraph 108 B, STC shall:

- acquire the best available information, from reliable sources, to determine the total costs associated with production
- use costs associated with land, taxes, normal rental costs, and land preparation to determine what percentage of the total cost of production would be expended for each crop that could be prevented from being planted

Note: Land preparation may include, but is not limited to, tillage and the application of fertilizer, herbicide, or both.

- determine what percentage of total production cost would be expended if harvesting costs are excluded
 - recommend a prevented planting payment factor of **zero** if the crop:
 - does not have a defined planting period and final planting date
 - is a value loss crop
 - is a tree crop or other perennial not meeting the criteria specified in subparagraph 25 C
 - document sources of information used to establish payment factors in the STC minutes
 - review potentially recommended factors against approved data and provide justification for significantly different recommendations
 - recommend approval of established payment factors.
-

110 Minutes

**A
Submission of
Minutes**

For each CCC-456, STC's shall ensure that a copy of the COC, if applicable, and STC minutes are available upon request from DAFP.

**B
COC**

COC's shall document, in the COC minutes, any actions taken concerning NAP, including, but not limited to, recommending crop data.

COC minutes shall document the items specified in CCC-456 in Exhibit 17.

**C
STC**

STC minutes shall document the following:

- review of each of the items in CCC-456 completed by COC
 - review of COC recommendation of crop data
 - decision of STC about:
 - eligible crops
 - recommended crop data forwarded for DAFP approval.
-

111-150 (Reserved)

Part 4 Acres and Crops

Section 1 Acreage

151 Unit Acreage and Production Certifications

A Requirement for Annual Certifications

[7 CFR 1437.7] The requirement for unit certification of acreage and production is independent of the occurrence of crop loss. Producers failing to timely certify unit acreage and production risk ineligibility for NAP assistance or reduced approved yields.

B Unit Acreage Certifications

A unit acreage certification must include all acreage of the eligible crop and each crop in the event of multiple planting in which during the crop year the producer has an interest in the county according to paragraph 28.

This information will be compiled from information certified on the Farm Acreage Report. Farm acreage reports must:

- be completed and filed according to 2-CP
- contain information specified in subparagraph C.

IF the producer is...	THEN...
able to certify that a single farm acreage report includes all acreage of the crop for which the producer has an interest in the county	the single farm acreage report can be considered the unit crop acreage.
unable to certify that a single farm acreage report includes all acreage of the crop for which the producer has an interest in the county	the producer must complete the unit crop acreage report by signing FSA-578 (by producer) generated according to 2-CP, Section 7.

--Note: Late filed FSA-578's may be accepted only if the late filed acreage report requirements are met according to 2-CP.--

151 Unit Acreage and Production Certifications (Continued)

C Required Information

--Unit acreage certifications must be filed on FSA-578. Certifications must:--

- * * * be for all acreage in the administrative county of the eligible crop (for each planting), including all crops selected on CCC-471

*--**Note:** If crop was not planted, a zero acreage report is required from each producer having CCC-471. Include the crop, type, practice and intended use from the CCC-471.--*

- include all of the following information:
 - the producer's share
 - the names of all producers sharing in the crop
 - the FSA FSN's
- for yield based crops:
 - include the crop, type or variety, practice, and intended use

Notes: "Other", "regular", or other generic references as a type or variety are not used for NAP purposes. County Offices must ensure that producers are identifying specific types of a crop to support the application for coverage and acreage report software.

"Green manure" shall not be used as an intended use for NAP purposes.

Do not use "oil" as an intended use for NAP purposes. Use "processed" to identify the intended use. The intended use of oil shall not be confused with the type and variety of oil, such as sunflowers.

If any acreage reports have been taken for either intended use of "green manure" or "oil" for NAP purposes, the County Office shall correct those acreage reports according to 2-CP.

The intended use of seed shall only be used for propagation purposes. All other intended uses shall be recorded according to 2-CP.

151 Unit Acreage and Production Certifications (Continued)**C Required Information (Continued)**

In 2005, for:

- sunflowers with the intended uses of “fresh” and “sets” shall be identified under sun, crop code 7501; the intended use of “seed” must be identified under sunflowers, crop code 0078
- dual purpose sorghum with the intended use of “grain”, “forage”, and “grazing” must be identified under crop code 0052; the intended use of “seed” must be identified under sorghum forage, crop code 0050 or sorghum, crop code 0051.
- the date the specific crop acreage was planted
- the acreage prevented from being planted
- for value loss crops:
 - for aquaculture, bee hives, mushrooms, and ornamental nursery, the physical location of the acreage on which the facility resides
 - for aquaculture, the name, type, or variety of each aquacultural species.

Note: For NAP purposes, do not use the intended use of processed for aquaculture.

151 Unit Acreage and Production Certifications (Continued)**D Unit Production Certifications**

For each unit acreage certification according to subparagraphs B and C, the producer must certify production of the acreage:

- after harvest of the specific crop acreage is completed
- *--before the subsequent year's acreage reporting date for the crop
- for all crops selected on CCC-471.--*

Note: Accept certifications of production on CCC-452.

Exception: For forage, see subparagraph 194 A.

152 Prohibiting Assigned Yields in Certain County Offices**A Documentation**

[7 CFR 1437.7 (j) (1)] Producers must provide detailed documentation of acres planted and the yield for the crop year for which benefits are being claimed, if either of the following occurs:

- sufficient data are available to demonstrate that the acreage of a crop in a county for the crop year has increased by more than 100 percent over any year in the preceding 7 crop years
- data are not available, but the acreage of the crop in the county has increased significantly from the previous crop years, as determined by COC.

If COC determines that the documentation provided is not sufficient, COC may require documenting proof that the crop, had the crop been harvested, could have been marketed at a reasonable price.

--152 Prohibiting Assigned Yields in Certain County Offices (Continued)*B Exceptions**

Except as provided in this subparagraph, a producer, who produces a crop on a farm located in a county described in subparagraph A, may not obtain an assigned yield.

Exception: A crop or producer shall not be subject to this subparagraph if either of the following occurs:

- the planted acreage of the producer for the crop has been inspected by a third party acceptable to COC
- COC and STC recommend an exemption from the requirement to DAFP, and DAFP approves the recommendation.

Note: Justification must be submitted for any request for waiver of this policy.

See Part 5 for information about yields.--*

153 Acreage Measurement Service**A Fees**

A fee shall be charged according to 2-CP for:

- producer requests for measurement service
- late-filed acreage reports used for NAP purposes.

154 Reported and Determined Crop Acreage**A Using Reported and Determined Crop Acreage**

When a unit has both reported and determined crop acreage, COC shall use:

- the smaller of the reported or determined acreage to determine the unit's:
 - expected level of production
 - total planted and prevented planted acreage
- determined acreage for APH purposes.

See Part 2 for NAP provisions concerning:

- unacceptable, incorrect, or false records and certifications
- tolerance
- misrepresentation, scheme, or device.

155 Reported Crop Acreage

A Disposition of Reported Crop Acreage

[7 CFR 1437.7] Producers who have reported crop acreage for NAP purposes who choose **not** to harvest the specific crop acreage must leave intact all eligible acreage and crop units for which the producer intends to make an application for payment until the units have been appraised or released * * *.

Producers who have reported crop acreage for NAP purposes who harvest the specific crop acreage must be able to provide to COC documentary evidence of crop production. Evidence may include leaving representative samples of the crop acreage for inspection.

Failure to make timely application or to supply required documentary evidence shall result in a denial of NAP payments.

156 (Withdrawn--Amend. 17)

157-169 (Reserved)

Section 2 Crops

170 National Crop Definition

A Introduction

A national crop definition was established based on similar types or varieties of a crop that had an insignificant price difference for the most predominant intended use for the crop.

The acreage and production of the crop group is summarized for service fees and loss calculation purposes.

To identify the crop definition for service fee and payment purposes, 3 variables are included in the NAP crop table for each crop that is downloaded * * *. These variables are described in greater detail in the remainder of this paragraph.

Note: If a crop, type, or practice is insurable in the county within a pay crop pay type grouping, the insurable crop, type, or practice will not be included in determining loss for that pay crop pay type.

Example: Full season (NFAC) soybeans are insurable in Missouri but double-cropped (FAC) soybeans are not in some counties. Even though the national crop definition includes the soybean practices and intended uses under pay crop 0081, pay type 001, only those soybean practices and intended uses not having CAT level coverage FAC will be covered by NAP and looked at for determining loss. NFAC soybean acreage and production will not be included in determining loss.

*--Only crops in Exhibit 7.X can be used for the applicable crop.

Note: The Exhibit 7 numbers are year specific. See the applicable Exhibit 7.X for the specific year for eligible crops.--*

B Planting Period

For those crops that have multiple plantings established according to paragraph 178, the planting period is used to identify these plantings as separate crops.

Example: Lettuce has 4 plantings during the crop year. A separate record is loaded in the NAP crop table for each planting, which will ensure that the production from the different plantings will not be grouped together.

Crops with the same planting period will be grouped together unless they have different pay crop and pay type codes.

Exception: For grazed forage, the planting period will be used to further define warm and cool season grasses as allowed in paragraph 193. A planting period number of:

- “01” shall be designated for cool season grasses
- “02” shall be designated for warm season grasses.

170 National Crop Definition (Continued)

C Payment Crop Code

The payment crop code identifies the “crop” for the specified crop, crop type, and/or intended use. In most cases, the payment crop code is the same as the crop code in 2-CP with few exceptions.

Example: The crop code in 2-CP for 2 or more interseeded small grain mixed forage is “0296.” For NAP payment purposes, 2 or more interseeded small grain mixed forage will actually be paid as grass with a payment crop code of “0102.”

D Payment Type Code

The payment type code identifies how the types and intended uses for a specified crop will be grouped.

Example: Beans have a payment crop code of “0047.” However, the types of beans have a *--significant price difference, justifying that each type of bean be treated as a--* separate crop. The data on the NAP crop table is downloaded as follows.

Crop Type	Planting Number	Payment Crop Code	Payment Type Code
Baby Lima	01	0047	001
Butter	01	0047	002
Soldier	01	0047	003

In this example, each type of bean will be treated as a separate crop for service fee and payment purposes.

Note: For those seed crops meeting the definition according to subparagraph 174 F, crops with an intended use of seed may have a different type code.

Crop Type	Planting Number	Payment Crop Code	Payment Type Code	Intended Use
Carrots	01	0120	*--001	Fresh
Carrots	01	0120	002--*	Seed

170 National Crop Definition (Continued)***--E Crop Types Not Eligible for NAP--***

When producers request crop types currently not eligible for NAP according to subparagraph A, the County Office shall:

- select the crop type that most closely represents the requested type in the lowest pay crop pay type
- record the actual requested type in brackets on CCC-471
- complete CCC-456 and submit it to the State Office recommending the type for inclusion in the subsequent crop year.

When producers request crops not listed according to subparagraph A, County Offices shall complete CCC-456 and submit it to the State Office recommending the crop for inclusion. Instructions for completing CCC-456 are in Exhibit 17.

STC shall prepare 2-CP, Exhibit 9 and supporting documentation to request crop approval from DAFP.

The supporting documentation shall include the following:

- commercial markets, such as farmer's market, grain elevator, gin, etc.
- common name
- scientific name
- basis for NAP crop eligibility, such as commercial food or fiber uses.

State Offices shall mail or FAX request directly to PECDD, DAB according to paragraph 10.

F Crops Not Listed in 2-CP, Exhibit 10.5

When a crop, or specific type or variety is requested by a producer for NAP, and it is not listed in 2-CP, Exhibit 10.5, STC's shall ensure that additions are handled according to procedure in 2-CP.

170 National Crop Definition (Continued)**G Deadline to Change Crop Definition**

The National Crop Definition identifies the pay groupings for accepting CCC-471. Service fees are collected according to pay crop and pay type as identified according to subparagraph A.

To ensure that service fees are applied uniformly across the country, the crop definition is based on a national review of crop data. Because changes to the crop definition must be completed before the release of the application for coverage software, any requests for *--changes in the crop definition must be submitted to DAB with supporting documentation.--* The application for coverage software is released in May of the previous crop year. For crop data to be reviewed and approved before the application for coverage software is released, all requests along with supporting data must be received at the National Office by January 2 of the previous crop year.

Note: Because the crop definition is established Nationwide, States must include not only data for their State, but any other data available Nationwide from commodity associations and other credible sources.

To change the crop definition after software has been released would have an adverse impact on service fees collected.

Note: Because the application closing date from the previous year's NCT is used for the continuous coverage letter, County Offices shall be aware that any changes to the crop definition could have an impact on service fees collected.

171 Eligible Crops

A**Definition of Eligible Crops**

[7 CFR 1437.4] Eligible crops are any commercial agricultural crop (excluding livestock and their by-products), commodity, or acreage of a commodity grown for food or fiber for which CAT is not available.

Notes: Refer to 2-CP, Exhibit 10.5 to determine type, variety, or intended use. Do **not** use “other”, “regular”, or other generic references as a type or variety for NAP purposes.

If the specific crop, type, or variety is not listed, follow subparagraphs 170 E and F to request that the crop, type, or variety be added.

B**Eligible Crops for NAP Assistance**

NAP assistance will be made available for any commercially produced:

- crop grown for food
- crop planted and grown for livestock consumption, including, but not limited to, grain and seeded and native forage crops

Note: NAP assistance for forage crops produced on Federal and State lands is limited to seeded forage crops.

- crop grown for fiber, excluding trees grown for wood, paper, or pulp products
 - aquacultural species, including ornamental fish
 - floriculture crops
 - ornamental nursery
 - Christmas tree crops
 - turfgrass sod
-

Continued on the next page

171 Eligible Crops (Continued)**B Eligible Crops for NAP Assistance (Continued)**

- sea oats and sea grass
- industrial crops
- seed crops where the propagation stock is commercially produced for sale as seed stock for other eligible NAP crop production

Example: Tree seedlings being raised as seed stock for reforestation are **not** eligible.
Tree seedlings being raised as a seed crop for use as propagation stock in a commercial Christmas tree operation are eligible.

- unseeded forage on State or Federal lands beginning with 2002 crop year.

172 Ineligible Crops**A Ineligible Crops for NAP Assistance**

Crop acreage and products ineligible for NAP assistance include, but are not limited to:

- crop acreage for which individual CAT level coverage is available in the county

Notes: NAP may cover eligible losses caused by natural disaster that are not named as an insurable peril under a crop insurance policy.

*--GRP insurance is now available at CAT level. Therefore, if GRP is available, the crop acreage is **not** eligible for NAP assistance.--*

172 Ineligible Crops (Continued)**A Ineligible Crops for NAP Assistance (Continued)**

- crop acreage for which individual CAT level coverage is available as a pilot product
 - *--commodities that cannot be marketed as food or fiber or that are not--*
included as an eligible crop in paragraph 171
 - by-products resulting from processing or harvesting an eligible crop, such as cotton seed, peanut hay, oat straw, etc.
 - crop acreage for which COC determined good farming practices are not being applied
 - nonornamental nursery plants, such as strawberry plants, orange trees, etc., unless the plants can be considered a seed crop under paragraph 171
 - home gardens or crops not being produced for commercial sale
 - experimental crops
 - volunteer stands, except native forage
 - *--unseeded forage on State or Federal lands for 2001 and prior years
- * * *
- livestock and their by-products
 - trees grown for wood, paper, or pulp products.

173 Types or Varieties of Crops

A Definition of Type or Variety of a Crop

A type or variety of a crop is a scientifically recognized subspecies of a crop having a particular characteristic or set of characteristics. Examples are in this table.

Crop	Types or Varieties
Watermelons	Seedless, striped
Beans	Pinto, pole, shelli, small red
Peppers	Jalapeño, pimiento, red chili
Potatoes	White, red
Cherries	Sweet, tart
Squash	Zucchini, acorn, summer
Lettuce	Romaine, leaf

Notes: Type or variety is **not** to be confused with intended use. A producer cannot change, by design or market, the type or variety of a crop.

See 2-CP, Exhibit 10.5 for crop name, codes, abbreviations, etc.

Do **not** use “other”, “regular”, or other generic references as a type or variety for NAP purposes.

B Differentiating Crops by Type or Variety

--Crops shall be grouped according to subparagraph 170 A.--

Producers shall provide acreage and production data for each type or variety of crop produced and without regard to grouping as 1 crop.

Example: A producer has zucchini and acorn squash. The producer reports the acreage and production of each type of squash, without regard to the types being grouped as 1 crop, for example, squash.

174 Handling Crops Produced for Different Intended Uses

A Intended Use

Many crops can be marketed for various intended uses. The manner in which the crop is planted, cared for, managed, harvested, and sold often dictates the intended use of the crop. The value of many crops varies significantly based on the intended use. DAFP may approve different prices or yields of a crop based on different intended uses if data supports such a distinction. However, the acreage and production of all intended uses of a crop must be summarized as 1 crop except for:

- seed intended uses that qualify as a separate crop according to subparagraph F
- small grain forage according to paragraph 196.

Some examples of intended use include, but are not limited to, the following.

Crop	Intended Uses
Alfalfa	Forage, seed
Barley	Grain, forage
Cherries	Fresh, process

Note: Intended use is **not** to be confused with type or variety. Unless an intended use is approved to be viewed as a separate crop without regard to other intended uses according to subparagraph F or paragraph 196, different intended uses of a crop are always combined together as 1 crop for unit loss eligibility purposes. However, do not combine intended uses on the acreage report.

174 Handling Crops Produced for Different Intended Uses (Continued)

B

Designating Intended Use

Producers reporting NAP crop acreage must specify the crop type or variety, practice, and intended use according to subparagraph 151 B.

NAP assistance for crop acreage reported with a specific intended use shall be based on the smaller of the approved average market price established for the:

- specific intended use reported on the acreage report
- actual market or actual use for which more than 50 percent of the acreage's harvested production is marketed.

Exception: See the specific paragraphs about secondary use, peanuts, seed intended uses, and small grain intended for use as forage to determine average market prices used to compute NAP assistance.

Example: A producer reports 50 acres of carrots intended for fresh market. The producer suffers a 70 percent loss of production on the acreage. Additionally, more than 50 percent of the carrots produced from the 50 acres are sold as processed carrots.

Because the established average market price for processed carrots is less than fresh carrots and more than 50 percent of the crop was marketed as processed carrots, the established average market price for processed carrots shall be used to compute the producer's NAP payment.

Note: If an average market price had not been established for processed carrots, the average market price for fresh carrots would be used. However, COC and STC shall carefully examine whether additional crop data recommendations are necessary and required for the crop.

Continued on the next page

174 Handling Crops Produced for Different Intended Uses (Continued)

C

Secondary Use

Secondary use occurs when specific crop acreage reported with a particular intended use is harvested and the harvested production bears little resemblance to, or has a different unit of expression than, the unit of expression for the reported intended use.

In this case, the unit's qualifying loss will be paid at the approved NAP rate for the reported intended use and the value of the actual harvested production of the secondary use shall be deducted from the unit's gross NAP payment. The value of the secondary use shall be equal to the quantity of this use times the NAP-approved price for the use.

Secondary use:

- is **not** salvage (see paragraph 333)
- is not counted as production of the crop for any purpose, including, but not limited to:
 - the determination of whether the unit suffered requisite loss
 - APH and approved yield
- must have a value determined by multiplying the quantity of secondary use times the CCC-established price for this use

Note: Recommended crop data is required for secondary use. See Exhibit 17, *--item 9.--*

- does not apply to fresh or processed harvested production

Note: For fresh and processed production, follow subparagraph B.

- value must be deducted from the NAP payment calculated for the crop acreage of the commodity, which gave rise to the intended and secondary use.

The deduction for value of secondary use shall be applied:

- for the amount of value of secondary use in excess of the value of any appraised production associated with acreage of the crop harvested for secondary use

Continued on the next page

174 Handling Crops Produced for Different Intended Uses (Continued)

C
Secondary Use
(Continued)

- only when the amount of value of secondary use is greater than the value of appraised production associated with acreage of the crop harvested as secondary use.

Notes: If acreage of a crop is harvested as a secondary use, the acreage is considered harvested for the purpose of applying a payment factor.

Values of appraised production or harvested secondary use production shall be obtained by multiplying the approved market price established for the intended or secondary use by the amount of applicable production.

Example: 50 acres reported with an intended use of oat grain. Producer suffers disaster and reports loss.

The appraisal shows 5 bushels per acre of oats. Producer elects to hay the acreage and cuts 100 tons of oat hay.

The deduction for secondary use would be calculated according to this table.

Step	Action	Result
1	Multiply 100 tons oat hay times \$30 per ton (NAP price).	\$3,000.00
2	Multiply 5 bushels oats times 50 acres times \$1.45 per bushel (NAP price).	\$362.50
3	Subtract step 2 from step 1 to get deduction for secondary use. Note: If result of subtracting step 2 from step 1 is: <ul style="list-style-type: none"> zero or negative, enter zero positive, enter result, rounded to 2 decimal places, in CCC-576A, item 24. 	\$2,637.50

Note: Even though the oats were hayed instead of harvested for grain, calculate producer payments using harvested payment factor.

Continued on the next page

174 Handling Crops Produced for Different Intended Uses (Continued)

**D
Determining
Unit Loss for
Crops With
Different
Intended Uses**

The unit loss of a crop with different intended uses, as applicable, must be determined before the crop can be considered to have suffered a qualifying loss. This is accomplished by comparing the expected value of all intended uses of the crop to the actual or estimated value of all intended uses of the crop.

Follow this table to determine whether a crop with multiple intended uses with different units of expression suffered the required unit loss in excess of 50 percent.

Notes: Before using this table, particularly in all cases where fresh and processed intended uses are involved, ensure that quality losses were properly addressed according to paragraph 27.

Units having different intended uses with the same unit of expression (fresh and processed sweet cherries are each expressed in pounds per acre) must suffer more than a 50 percent loss of total expected production to be eligible for payment consideration. If this loss requirement is not met for such a unit, do not use this table.

Step	Action
1	Multiply the total acreage of each specific intended use of the crop in the unit times the approved yield and average market price of the intended use.
2	Multiply the total acreage of each specific intended use of the crop in the unit times the disaster or estimated unit yield and average market price of the intended use.
3	Add the total values determined in step 1 for all intended uses of the crop in the unit.
4	Add the total values determined in step 2 for all intended uses of the crop in the unit.
5	Divide the result of step 4 by the result of step 3.
6	Subtract the result of step 5 from 1.000. This is the unit percent loss for the crop.

Continued on the next page

174 Handling Crops Produced for Different Intended Uses (Continued)

D
Determining
Unit Loss for
Crops With
Different
Intended Uses
(Continued)

If quality loss adjustments are made only according to paragraph 27, once a crop with various intended uses is determined to have met unit value loss requirements described in the table in this subparagraph, a NAP low yield payment may be calculated. Use CCC-576A to calculate the total acreage of each intended use of the crop and without regard to other intended uses of the crop.

E
APH and
Intended Use

APH's are kept separately for each intended use of the crop reported by the producer.

F
Seed Intended
Uses Qualifying
as a Separate
Crop

[7 CFR 1437.12] In the case of an eligible crop intended for use as commercial seed, the seed intended use shall be viewed as a separate crop if all the following apply:

- the specific crop acreage is planted, or is intended to be planted with an intent of producing commercial seed
 - there is no possibility that the specific crop acreage planted or intended to be planted to a seed intended use could produce other commercial intended uses of production
-

Continued on the next page

174 Handling Crops Produced for Different Intended Uses (Continued)

F
Seed Intended
Uses Qualifying
as a Separate
Crop
(Continued)

- the specific crop acreage planted or intended to be planted with an intended use of seed must have a growing period uniquely conducive to the production of commercial seed and not conducive to the production of any other intended use

Note: The unique growing period (or physiological event occurring during such period) necessary for the production of commercial seed, such as vernalization in a biennial crop such as carrots or onions, must render the possibility of production of any other intended use of the crop acreage improbable.

- STC recommends and DAFP approves the specific seed crop intended use to be viewed as a separate and distinct crop.

Commercial seed intended uses not meeting the above mentioned criteria shall be viewed as an intended use and a single crop together with all other intended uses of the crop type or variety.

G
Examples of
Separate and
Nonseparate
Seed Crop
Intended Uses

Separate seed crop intended uses include onion and carrots.

Nonseparate seed crop intended uses include the following:

- small or coarse grain
 - grass
 - alfalfa
 - aquaculture
 - ornamental nursery
 - Christmas tree seedlings.
-

175 Double-Cropped Acreage

A
Eligible
Double-Cropped
Acreage

[7 CFR 1437.12] Double-cropped acreage is a subsequent crop of a different commodity planted on the same acreage as the first crop.

The cropping pattern for initial and subsequent crops in a region determines whether a second different crop is a normal double crop and eligible for NAP assistance.

COC must determine whether the:

- second crop of a different commodity was planted with an intent of harvest
- initial and subsequent planted crop acreage meets all NAP eligibility provisions, including, but not limited to:
 - it being a good farming practice to follow the harvest of an initial crop with the planting and harvest of another crop of a different commodity
 - there being an adequate amount of time in the crop year to produce both crops on the same acreage in a crop year.

Note: Yield adjustments, according to Part 5, may be made for acreage of the second crop if the producer's approved yield for the second crop is based on the crop being planted primarily as initial crop acreage.

Double-cropped acreage is **not**:

- a crop of the same commodity being planted after the prevented planting, failure, or harvest of the first planting
- viewed separately on a unit basis from initially planted crop acreage of the same commodity.

Continued on the next page

175 Double-Cropped Acreage (Continued)

B

Limitation on Double-Cropped Acreage

There is no specific limit to the amount of double-cropped acreage eligible for NAP assistance. Each crop that is the subject of application for payment stands by itself when applying eligibility provisions.

Each crop of a different commodity planted in an approved double-cropped planting pattern is eligible for NAP assistance if all other eligibility requirements are met.

176 Repeat Crops

A

Definition of Repeat Crop

A repeat crop is a subsequent planting of a commodity planted on the same acreage as the previous planting of the same commodity in the same crop year.

See paragraph 177 for multiple plantings of a crop on different acreage.

See paragraph 178 to determine whether a repeat crop can be considered a separate crop for unit loss calculation purposes.

177 Multiple-Planted Crops

A

Definition of Multiple-Planted Crop

A multiple-planted crop is a crop planted or prevented from being planted in more than 1 approved planting period in a crop year on different acreage.

See paragraph 178 to determine whether a multiple-planted crop can be considered a separate crop for unit loss calculation purposes.

178 Defining Planting Periods for Repeat and Multiple-Planted Crops

A

Applicability

COC shall consider the number of plantings of a commodity that can be planted on the same or different acreage, as applicable, with an intent of harvest in a single crop year. Consider the number of days to maturity, or onset of harvest, from date of planting and seasonal characteristics. COC may establish, with STC approval, separate planting periods not to exceed the maximum number of plantings that can be expected to reach harvest within a crop year.

Each planting period must be numbered consecutively. The date a producer plants specific crop acreage determines:

- what approved planting period number with which the specific crop acreage will be associated
- whether the specific planting of the crop acreage will be considered separate and distinct from plantings occurring in other approved and defined periods.

Note: Producers do not have their own planting numbers. They have plantings that will be placed in certain FSA-established growing or planting periods.

Use the instructions and crop chart in subparagraphs B and C to determine:

- the approved planting period for specific crop acreage
 - whether a planting of a repeat crop can be considered a separate and distinct crop.
-

B

Determining Number of Crops

Determine the number of crops as follows:

- chart the final planting date and normal onset of harvest date associated with this final planting date according to the example in subparagraph C
 - each subsequent planting before the normal onset of harvest of the first planting shall be considered the first crop
 - a second separate and distinctive crop begins for plantings occurring after the established normal onset of harvest date of the first planting of the first crop
 - continue the cycle until the crop is charted for potential and probable plantings and harvests within the crop year.
-

Continued on the next page

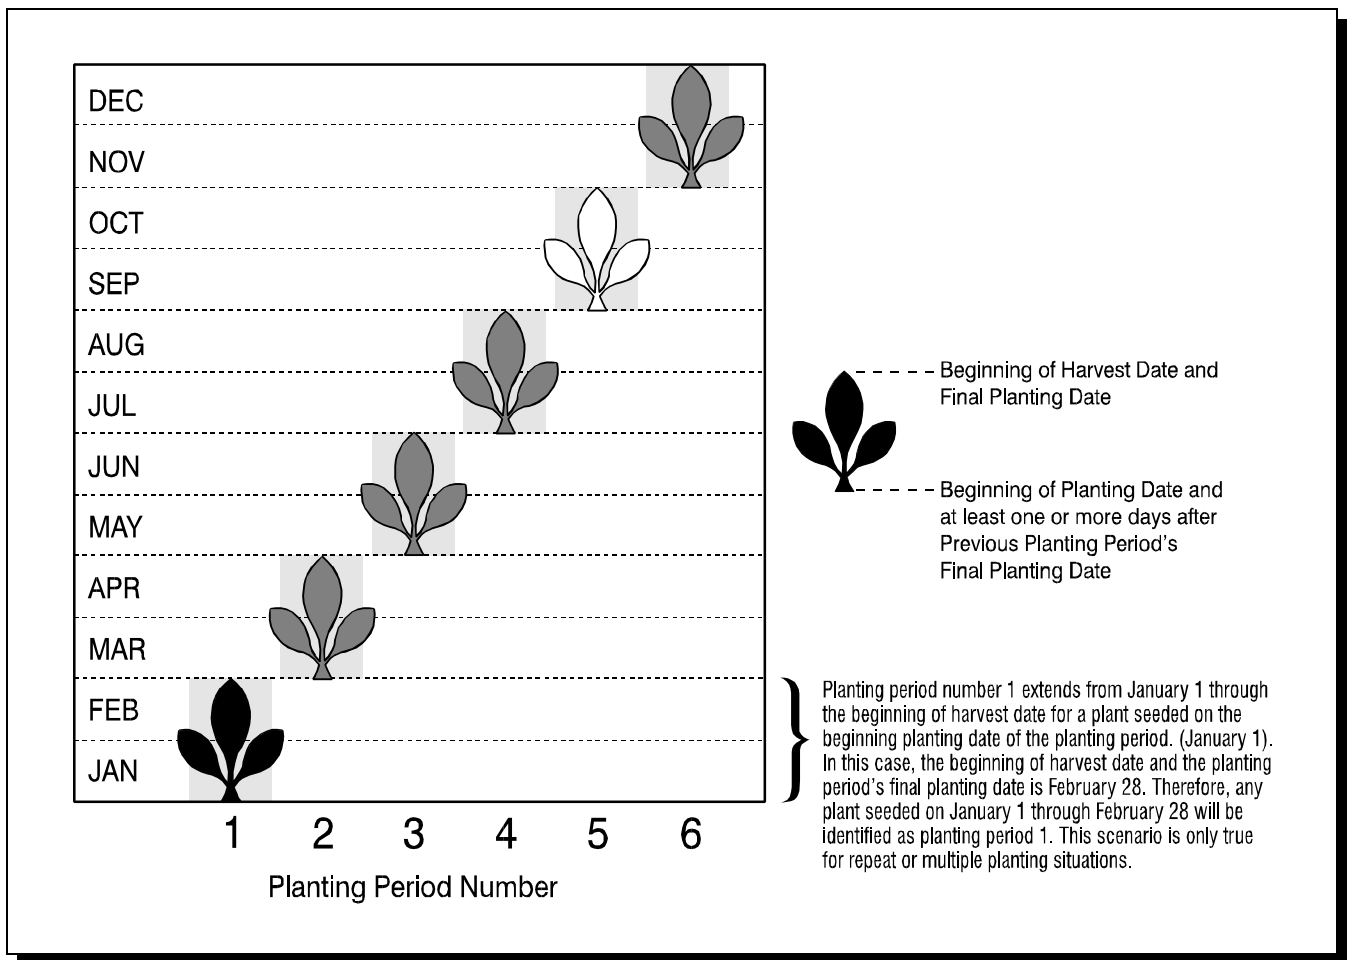

178 Defining Planting Periods for Repeat and Multiple-Planted Crops (Continued)

C

Crop Chart

The following crop chart illustrates the definition of planting periods for repeat and multiple-planted crops.

Planting period 1 extends from January 1, through the harvest date for a plant seeded on January 1. In this case, the harvest date and the planting period's final planting date is February 28. Therefore, all production of the specific crop planted during the period of January 1, through February 28, will be identified as production from planting period 1.

Continued on the next page

178 Defining Planting Periods for Repeat and Multiple-Planted Crops (Continued)

D

Approval

Before any repeat or multiple-planted crop can be recognized as a separate crop for unit loss purposes, COC must establish and recommend to STC:

- final planting dates and expected days to crop maturity for planting periods of the crop
 - a normal onset of harvest date for each final planting date
 - specified planting periods.
-

E

**Expected
Production**

The acreage and production of all plantings of a commodity occurring within a defined growing period shall be summarized as 1 crop.

The expected level of production for a repeat or multiple-planted crop recognized as a separate crop shall reflect the production capability of the commodity on an acreage basis. If production data available for the commodity is for all plantings of the crop and without regard to each planting, the amount of production shall be divided by the number of approved planting periods of the crop.

Acreage of a commodity that is planted and considered a crop for which an approved period is established for the commodity shall be counted as acreage of the crop for the period.

179 Multiple-Harvested Crops

A**Definition of Multiple-Harvested Crop**

[7 CFR 1437.12] A multiple-harvested crop is a crop that is harvested more than once during the same crop year from the same plant.

Example: Alfalfa hay is cut several times during the crop year. The total amount of alfalfa hay harvested from all cuttings must be summarized for the acreage.

B**County-Expected Yield**

Consider all harvests of the crop during a crop year when establishing county-expected yields for multiple-harvested crops.

C**Loss Eligibility**

A loss of production for a multiple-harvested crop cannot be determined until either of the following occurs:

- *--harvest is complete for the crop year
 - an appraisal is completed as close to the normal harvest date as possible to document all potential production for the crop.
-

D**Appraisal Requirements**

Production of multiple-harvested crop acreage must be determined by appraising the crop year production when the crop acreage:

- will be abandoned or destroyed before the normal harvest date
- is intended as mechanically harvested where at least 1 cutting is harvested and the remaining production is grazed.

Appraisals shall include all potential production through the normal harvest date.

Representative sample areas will be used when either of the following occurs:

- producers wish to abandon or destroy crop acreage put to another use
 - the entire crop acreage cannot be maintained to reflect potential production through the normal harvest date.--*
-

Continued on the next page

180 Determining Crop Loss for Yield-Based Crops (Continued)

A Crop Loss Requirement

[7 CFR 1437.9 (a)] To qualify for NAP assistance, the loss or prevented planting of the eligible crop must be because of natural disaster.

Producers are eligible to receive low yield or prevented planting payments on a unit when the types or varieties of a pay crop and pay type code definition * * * have a summary loss of:

- 50 percent for low yield
- 35 percent for prevented planting.

To establish whether a crop meets the unit loss requirement, COC and STC shall:

- consider crops that historically have multiple plantings in the same crop year as separate crops for each approved planting period according to Part 4
- review all acreage and production of each crop without regard to:
 - secondary use according to subparagraph 174 C
 - salvage according to subparagraph 333 A
 - practice, including, but not limited to:
 - irrigated and nonirrigated acreage
 - initial or double-cropped acreage
 - summer fallow or continuous crop rotation
 - intended use.

Note: Review the following without regard to other intended uses:

- seed intended uses qualifying as a separate and distinct crop, according to subparagraph 174 F
- small grain forage qualifying as a separate and distinct crop, according to paragraph 196.

181 Value Loss Crops**A Types of Value Loss Crops**

[7 CFR 1437.301] Because of the unique nature of some crops for which NAP assistance is available, special provisions are required to assess losses and calculate assistance. This is necessary because the crops do not lend themselves to yield calculations or production loss situations. Some of these crops include, but are not limited to, the following:

- ornamental nursery
- Christmas trees
- aquaculture, including ornamental fish
- ginseng root
- turfgrass sod.

Note: Ginseng seed will be handled as a yield-based crop.

Note: Policy and procedure applicable to each kind of value loss crop is located in this part.

B Calculating Losses of Value Loss Crops

[7 CFR 1437.302] NAP does not provide assistance for quality losses unless a zero value results from the loss of quality.

NAP assistance for value loss crops is calculated based on the loss of value at the time of disaster. Determinations concerning the value of the loss for the crop on the unit must be made.

Example: A value loss crop suffers damage because of a hurricane. To determine whether the unit suffered an eligible loss at the time of disaster, determine the total value of the inventory present for the crop on the unit immediately before and after the disaster.

It is important that a loss of value of any portion of the inventory be determined only if that portion of the inventory is not marketable in any market, now and in the future, established for this inventory because of disaster.

181 Value Loss Crops (Continued)

C

Determining the Applicable Crop Year for Value Loss Crops

All value loss crops have the same defined crop year, October 1 through September 30. For payment purposes, the crop year is defined by the date the disaster event occurs.

Example: 2002 nursery crop year starts October 1, 2001, and ends September 30, 2002. If a hurricane occurs on October 8, 2001, the loss for nursery will be paid and considered a 2002 crop.

182 Aquaculture

A

Eligible Aquacultural Species

[7 CFR 1437.3] Eligible aquacultural species are:

- any species of aquatic organisms grown as food for human consumption
- fish raised as feed for fish that are consumed by humans
- ornamental fish propagated and reared in an aquatic medium.

To be eligible for NAP assistance, eligible aquacultural species must be raised:

- by a commercial operator on private property
 - in water in a controlled environment.
-

B

Crop Year

The crop year for all aquacultural species is from October 1 through September 30.

Note: Loss is determined by comparing the value of inventory immediately before disaster to value of inventory immediately after disaster.

Continued on the next page

182 Aquaculture (Continued)

C**Private Property**

For a producer to be considered eligible for NAP assistance on aquaculture, COC must determine the:

- producer owns or has leased property with readily identifiable boundaries
- owner or lessee:
 - has total control of the waterbed, the ground under the specific type of water
 - does not have control over only a column of water.

D**Controlled Environment**

--See Exhibit 2 for the definition of controlled environment--

Eligible aquacultural species must be:

- placed in the aquacultural facility by the producer and must not be growing naturally in the facility

Note: Species indigenous to the facility are not eligible.

- planted or seeded on property described in subparagraph C
- planted or seeded in containers, wire baskets, net pens, or similar device designed for the protection and containment of the seeded aquacultural species.

All portions of the aquatic environment must be under the control of the producer. Control means the operator of the facility implements the following practices.

- **Flood prevention**, including, but not limited to:
 - placing the aquacultural facility in an area not prone to flood
 - in the case of raceways, devices or structures designed for the control of water level.

Continued on the next page

182 Aquaculture (Continued)

**D
Controlled
Environment
(Continued)**

- **Growing media** providing an aquatic medium that:
 - provides nutrients necessary for the production of the aquacultural species
 - protects the aquacultural species from harmful species or chemicals.
- **Fertilization or feeding** to obtain expected production results. Evidence of this practice must be provided by the producer at the request of COC. COC must be satisfied that the producer has an adequate supply of vitamins, minerals, or chemicals designed for the control of water quality and application equipment.
- **Irrigation and water quality.** Drought shall **not** be a major peril as all aquacultural operators shall have systems and practices in place to ensure that the aquacultural species have adequate, quality water or aquatic medium. This includes having equipment designed to control the chemical balance and oxygenation of water. Therefore, COC shall consider the following:
 - whether the source of water is adequate to ensure continued growth and survival of the aquacultural species even in the event of severe drought
 - whether the aquacultural facility sustained losses in previous years because of water shortages or water supply interruption. If so, list corrective actions that have been taken.
- **Predator control.** Losses of aquacultural species because of pressure from other aquatic or nonaquatic species or man should not be a major factor if the following good aquacultural practices are followed:
 - the aquacultural species are not placed in an area prone to suffer loss from predators
 - the aquacultural species are placed in an environment designed to prevent loss from predators

Continued on the next page

182 Aquaculture (Continued)

D**Controlled Environment (Continued)**

- the operator of the aquacultural facility has control over the property on which the aquacultural species are located by way of land ownership or lease
 - the operator of the aquacultural facility is free to conduct aquacultural operations without interference from persons with no interest in the operation.
 - **Disease control.** Disease is not a recognizable cause of loss unless disease in the aquacultural species can be tied to damaging weather or other adverse natural occurrence. The operator of the aquacultural facility should have implemented an effective disease control program.
-

E**Report of Crop Acreage on Which Facility Resides**

In addition to other NAP eligibility requirements, aquacultural producers wanting to be eligible for NAP assistance must file FSA-578 by September 30 for the ensuing aquacultural crop year, October 1 through September 30, according to subparagraph 151 B.

F**Eligible Operation Determination**

In the event CCC-576 is filed, the producer shall provide records COC requires to determine whether the aquacultural species are produced in an eligible facility. Required records include, but are not limited to:

- a report of crop acreage on which facility resides according to subparagraph E
 - feeding and fertilization
 - reproduction
 - hatchery operation
 - production, inventory, or both
 - predator control
 - leases
 - water quality
 - stocking
 - onsite specialized equipment
 - production site preparation.
-

Continued on the next page

182 Aquaculture (Continued)

G

**Ineligible
Disaster
Conditions**

Eligible disaster conditions defined in paragraph 21 apply. The loss of eligible aquacultural species must be a **direct** result of natural disaster. Losses because of managerial decisions or losses of aquacultural species normally incurred in the production cycle of the aquacultural species, that is, normal death losses, are not eligible. NAP does **not** provide protection against:

- brownout (Exhibit 2)
- failure of power supply
- the inability to market aquacultural species as a result of quarantine, boycott, or refusal of a buyer to accept production
- units that are not growing environments completely meeting the requirements of subparagraphs C and D
- collapse or failure of equipment or apparatus used in the aquacultural facility.

Example: Damaging weather interrupts electrical power service causing an aquacultural facility's aeration equipment to fail. The loss of aquacultural species due to the lack of oxygen because of a failure of the aeration equipment is not eligible because natural disaster did not directly impact the aquacultural species.

It is important to note there are certain instances where disaster conditions affect a specific size or growth stage of species, but does not adversely impact all sizes.

Example: It has been determined that excessive heat significantly increases loss of fry and fingerling catfish, but is considered a preferable growing condition for food fish.

In cases such as this, COC has authority to recognize heat (when supported by scientific opinion on data) as a cause of loss for fry and fingerlings and at the same time consider all food fish as having no loss. COC shall assign full value to food fish even though producers may be claiming loss.

Continued on the next page

182 Aquaculture (Continued)

H**Grouping**

Nationally different species or varieties that are insignificant in price are grouped. The 4 aquaculture crops are:

- mollusk, such as clams and oysters
 - crustacean, such as prawns and shrimp
 - fin fish, such as awa and tilapia
 - tropical fin fish, such as shubunkin and guppy.
-

I**Crop Codes**

STC's shall:

- recommend species or varieties not listed on the NAP crop data that can be grouped with like value (25 percent differential, starting with the lowest priced crop type)
- determine species or varieties that cannot be grouped
- request crop codes and approval of average market prices from DAFP for each:
 - grouping
 - species or variety that cannot be grouped
- notify County Offices of approved average market prices and species or varieties contained in each grouping approved by DAFP.

Note: All sizes or values of a type or variety of a aquacultural species shall be summarized as 1 crop for unit loss purposes.

Continued on the next page

182 Aquaculture (Continued)

J

Standard Units

STC shall convert aquacultural species or varieties to a standard unit of measure. Apply the following steps for each species or variety or grouping.

Step	Action	Example 1	Example 2	Example 3
1	Determine the applicable unit of measure and the value of each.	1 gallon of: <ul style="list-style-type: none"> • fingerlings = \$15 • 9-inch fish = \$30 • 12-inch fish = \$45 • 15-inch fish = \$60 	1 pound of: <ul style="list-style-type: none"> • fingerlings = \$5 • 9-inch fish = \$7 • 12-inch fish = \$10 • 15-inch fish = \$12 	1 9-inch fish = \$2.50 1 12-inch fish = \$4 1 15-inch fish = \$5.50
2	Determine the standard unit of measure and notify COC.	STC determined that the standard unit is 1 gallon of fingerlings.	STC determined that the standard unit is 1 pound of fingerlings.	STC determined that the standard unit is inches using the 9-inch fish.
3	Convert each unit of measure to a standard unit by using the ratio of values of each unit of measure.	$\$15 \text{ divided by } \$15 = 1 \text{ unit}$ $\$30 \text{ divided by } \$15 = 2 \text{ units}$ $\$45 \text{ divided by } \$15 = 3 \text{ units}$ $\$60 \text{ divided by } \$15 = 4 \text{ units}$ The producer harvested 100 gallons of fingerlings, 50 gallons of 9-inch fish, 75 gallons of 12-inch fish, and 80 gallons of 15-inch fish. Therefore, the producer has 745 units.	$\$5 \text{ divided by } \$5 = 1 \text{ unit}$ $\$7 \text{ divided by } \$5 = 1.4 \text{ units}$ $\$10 \text{ divided by } \$5 = 2 \text{ units}$ $\$12 \text{ divided by } \$5 = 2.4 \text{ units}$ The producer harvested 2 pounds of fingerlings, 5 pounds of 9-inch fish, 10 pounds of 12-inch fish, and 20 pounds of 15-inch fish. Therefore, the producer has 77 units.	$\$2.50 \text{ divided by } \$2.50 = 1 \text{ unit}$ $\$4.00 \text{ divided by } \$2.50 = 1.6 \text{ units}$ $\$5.50 \text{ divided by } \$2.50 = 2.2 \text{ units}$ The producer harvested 10 9-inch fish, 5 12-inch fish, and 15 15-inch fish. Therefore, the producer has 51 units.

Note: Some common units of measure for aquacultural species include, but are not limited to:

- gallons
- pounds
- inches
- pieces.

Continued on the next page

182 Aquaculture (Continued)

K**Calculating
Eligible Loss**

Aquacultural species are considered value loss crops.

See subparagraph 181 B for calculating losses of value loss crops.

Use CCC-576B for calculating NAP assistance for aquaculture losses.

The total loss of value of each type or variety of aquacultural species in a unit must be in excess of 50 percent because of natural disaster.

L**Application of
Payment Factors**

The approved prevented planting payment factor for all aquacultural species is zero.

Unharvested payment factors for each type or variety of aquacultural species shall be recommended to DAFP for approval.

The approved unharvested payment factor shall be applied to all aquacultural losses computed for payment, unless the producer can prove that the unit was harvested at the time of disaster or immediately after disaster. If the producer cannot show with documentary evidence that harvest of the unit, or portion of the unit, was performed at the time of disaster or immediately after the disaster, which is the basis for the application, any loss calculated for payment shall be paid at the unharvested payment rate. In no case shall COC assume that harvest expenses were incurred at or near the time of disaster.

Note: Although harvest costs or access to a seine may be considered evidence, unless COC is satisfied that the payroll or seine was used for harvest of the crop or commodity, that evidence is not relevant to the question of applying the payment factor. The producer must prove to COC's satisfaction that the unit or specific pond, etc. was harvested at the time of disaster or immediately after the disaster.

183 Ornamental Nursery

A Eligible Ornamental Nursery

[7 CFR 1437.3] Eligible ornamental nursery includes decorative plants grown in a container or controlled environment for commercial sale.

Eligible nursery inventory include, but are not limited to, the following:

- deciduous shrubs, broadleaf evergreens, coniferous evergreens, shade and flowering trees, etc.

***--Note:** For 2006 and future years, flowering kale (crop code 4000, crop type FLW) shall be identified under nursery, crop code 1010.--*

- stock for use as propagation in a commercial ornamental nursery operation.

Note: This includes fruit or nut seedlings grown for sale as seed stock for commercial orchard operations growing the fruit or nut.

Eligible nursery inventory does **not** include the following:

- insurable nursery crops
- edible varieties
- plants produced for reforestation purposes or for the purpose of producing a crop for which NAP does not provide protection.

B Crop Year

The crop year for all ornamental nursery is from October 1 through September 30.

Note: Loss is determined by comparing the value of eligible nursery inventory immediately before disaster to value of eligible nursery inventory immediately after disaster.

C Controlled Environment

See Exhibit 2 for the definition of controlled environment.

The ornamental nursery producer must either own or lease the property upon which the nursery stock is located. Eligible nursery stock must be placed in the ornamental nursery facility by the producer and must not be indigenous to the facility. The facility must be managed and cared for using good nursery growing practices.

183 Ornamental Nursery (Continued)

D Good Nursery Growing Practices

Although definitions of good nursery growing practices may vary from 1 geographical region to another, certain practices are recognized and followed by all nursery operators. These include, but are not limited to, the following.

- **Flood prevention**, including, but not limited to:
 - containerized stock placed in a raised area above expected flood level
 - drainage facilities provided, such as:
 - drainage ditches or tile
 - gravel, cinder, or sand base.

Exception: Does not apply to field-grown nursery stock.

- **Growing media.** Prevention of “root rot” and other media-related problems requires the following practices:
 - well drained media with a minimum 20 percent air pore space
 - PH adjustment for the type of plant produced.

Exception: Does not apply to field-grown nursery stock.

- **Fertilization** to obtain expected production results. Evidence of this practice must be provided by the producer at the request of COC. COC must be satisfied that the producer has incorporated an adequate supply of soluble or dry fertilizer and has the appropriate application equipment.
- **Irrigation.** Drought shall **not** be a major peril as all good nursery operators shall have irrigation systems and practices in place. Therefore, COC shall consider all of the following:
 - whether the source of water is adequate to ensure continuation of nursery stock irrigation practices even in the event of severe drought
 - whether the nursery operation sustained losses in the past because of water shortages or water supply interruption

Note: If so, list corrective actions that have been taken.

- the type of irrigation system the nursery has in use.

183 Ornamental Nursery (Continued)

D**Good Nursery
Growing
Practices
(Continued)**

- **Insect and disease control.** Insects or disease is not a major contributing factor when determining eligible loss of ornamental nursery stock.

Note: Nurseries generally adhere to routine pesticide spraying or dusting schedule whether they perform the application or they contract it out. For those that perform their own application, they should have supportive records indicating an adequate supply of pesticides, appropriate for the type of plants grown, and availability of spraying or dusting equipment.
- **Weed control.** In addition to visual inspection of the ornamental nursery facility for adequate weed control, the nursery should have cultivation and/or herbicide application equipment available.
- **Rodent and wildlife control.** Damage caused by rodents and wildlife is not an eligible cause of loss because this damage should be minimized by using the following:
 - mowing periphery of nursery in autumn
 - treating periphery of nursery with rodenticide
 - placing mouse bait in storage structures and in areas of straw and hay usage
 - fencing nursery periphery if deer or other wildlife are prevalent in the area.
- **Overwinterization storage facilities.** The availability and use of adequate winter protection for containerized nursery stock is a major consideration in assessing the acceptable amount of risk. Recognized good nursery practices will vary depending on the USDA plant hardiness zone for the nursery location and type of nursery stock grown.

Exception: Does not apply to field-grown nursery stock.

Continued on the next page

183 Ornamental Nursery (Continued)

E**Unacceptable Risks**

NAP covers ornamental nursery against losses of value sustained as a result of natural disaster. Before any NAP payment can be approved for ornamental nursery losses, COC must be satisfied that the provisions of subparagraphs C and D are met. Some risks that are unacceptable and for which NAP will not provide assistance include, but are not limited to:

- nursery stock grown in a region, USDA hardiness zone, or environment not conducive to successful production or plants for which mandatory or recommended storage requirements are not met

Note: The FCIC Actuarial Table, which specifies plants eligible for insurance and any mandatory or recommended storage for these plants in each hardiness zone defined by the Department, shall be reviewed.

- nurseries that do not follow recognized good nursery growing practices described in subparagraph D
- lack of:
 - adequate and acceptable winter storage protection for nursery stock plant species in the "MANDATORY" overwinterization category
 - adequate irrigation practice or an insufficient water supply source to ensure continuation of a good irrigation practice
 - loss prevention measures to control probable loss because of insects and disease
- applicants who fail to provide a report of inventory for all nursery stock in a county
- applicants who fail to maintain or refuse to provide production and sales records necessary to determine the amount of value of eligible ornamental nursery stock
- applicants who misrepresent any material facts related to any aspect of the ornamental nursery operation.

Continued on the next page

183 Ornamental Nursery (Continued)

F**Report of Crop
Acreage**

In addition to other NAP eligibility requirements, ornamental nursery producers wanting to be eligible for NAP assistance must file FSA-578 by September 30 for the ensuing ornamental nursery crop year October 1 through September 30, according to subparagraph 151 C.

G**Ineligible
Disaster
Conditions**

In the event CCC-576 is filed, the eligible disaster conditions in paragraph 21 apply. The loss of eligible ornamental nursery stock must be a **direct** result of natural disaster. NAP does **not** provide protection against:

- brownout (Exhibit 2)
 - failure of power supply
 - the inability to market nursery stock as a result of quarantine, boycott, or refusal of a buyer to accept production
 - fire, where weeds and other forms of undergrowth in the vicinity of the nursery stock or building on the property have not been controlled
 - collapse or failure of buildings or structures.
-

H**Crop Definition**

Ornamental nursery shall include all eligible plant species and sizes. It shall **not** include any plant species or sizes for which CAT is available.

Continued on the next page

183 Ornamental Nursery (Continued)

**I
Wholesale
Market Value** Wholesale market value is the total dollar valuation of all eligible stock in the unit at any time. Values are based on the producer's wholesale price list, if properly supported by records, less the maximum discount, which is stated in dollar terms, granted to any buyer.

COC shall examine each ornamental nursery producer's wholesale price list to determine whether prices, for each type, variety, and size of plant, are reasonable. If prices appear unreasonable for any plant within the inventory, STC shall establish the wholesale price for this plant.

**J
Calculating
Eligible Loss** The loss calculation for ornamental nursery shall be based upon the ornamental nursery stock having no dollar value following the disaster. Ornamental nursery stock having any dollar value shall be counted as full value because quality adjustments for NAP are not authorized. Further, damaged plants that are determined able to rejuvenate or plants merely stunted or delayed for harvest shall be counted as full value.

The total loss of value of all eligible ornamental nursery stock present on a unit at the time of disaster must be reduced by more than 50 percent before any payment can be made.

Use CCC-576B for calculating NAP assistance for ornamental nursery losses on a unit.

**K
Application of
Payment Factors** The approved prevented planting payment factor for the prevented planting of all ornamental nursery is zero.

The following are the 2 unharvested payment factors for ornamental nursery:

- 100 percent, for container-grown ornamental nursery
 - 50 percent, for field-grown, or noncontainer-grown, ornamental nursery stock.
-

184 Christmas Trees**A Eligible Loss**

The total value of Christmas trees present on the unit at the time of disaster must be reduced by more than 50 percent because of a natural disaster to be eligible for NAP payment. Consider only trees present on the unit at the time of disaster when determining the unit's predisaster value of Christmas trees. For an individual Christmas tree to be considered a loss, the value of the tree must be reduced to zero. A Christmas tree having any value as a Christmas tree, or a damaged Christmas tree that may rejuvenate and re-establish value as a Christmas tree, shall count as full value based on the age of the tree at the time of disaster.

Use CCC-576B for calculating Christmas tree loss and payment.

B Crop Year

The crop year for Christmas tree crops is from October 1 through September 30.

C Unit of Measure

--The unit of measure for all Christmas trees is piece.--

D Report of Acreage

In addition to providing information required in subparagraph 151 B, the producer must report:

- the dates of planting of all trees
- the number of trees by date of planting
- the removal or loss of any trees after the filing of the acreage report within 15 calendar days of the removal or loss.

In addition to other NAP eligibility requirements, Christmas tree producers who want to be eligible for NAP assistance must file FSA-578 by September 30 for the ensuing Christmas tree crop year October 1 through September 30, according to subparagraph 151 C.

184 Christmas Trees (Continued)

E Average Market Price

STC shall:

- establish the average age of mature Christmas trees
- establish a percent of the average market price for each year the tree has been planted
- *--use graduated price codes according to subparagraph 757 A to identify the established market prices by the age of the tree.--*

* * *

DAFP must approve average market prices.

F Payment Factors

The approved prevented planting payment factor for all Christmas trees shall be zero. Any NAP payment computed for the loss of Christmas trees on a unit shall have the unharvested payment factor applied.

185 Ginseng

A

Eligible Ginseng

[7 CFR 1437.308] Eligible ginseng includes the following:

- *--seed that meets the industry standard for germination--*
- rootlet as transplants
- mature root stocks at least 3 years of age that are grown in a controlled, cultivatable environment on private property for commercial sale as food.

Note: Ginseng root is a value loss crop, and seed is a yield-based crop.

Eligible ginseng crops do **not** include the following:

- varieties grown solely for medicinal purposes
- plants cultivated in a woodland plot or garden for the purpose of producing a crop
- indigenous ginseng
- wild ginseng rootlet that is harvested and transplanted from woodland grown ginseng.

All ginseng producers are:

- *--required to hold a valid registered growers license and/or valid shipment certificate, as required, which is issued by the State Department of--* Agriculture

Note: COC shall verify and document the validity of this license held by each ginseng producer.

- subject to food regulations administered by FDA.

Continued on the next page

185 Ginseng (Continued)

B**Definition of Ginseng**

The crop definition for ginseng includes both mature root, immature rootlet intended for transplant, and seed; therefore, the loss for ginseng must include the value loss for seed, mature root, and rootlet in determining more than a 50 percent loss.

C**Crop Year**

The crop year for all ginseng is from October 1 through September 30.

D**Controlled Environment**

--See Exhibit 2 for the definition of controlled environment.--

The ginseng producer must either own or lease the property whereupon the ginseng is located. Eligible ginseng must be grown on an identifiable plot with all plant needs supplied and under control of the commercial producer, and must not be indigenous. The plot must be managed and cared for using good ginseng growing practices.

E**Good Ginseng Growing Practices**

Although recognized good ginseng practices will vary depending on the USDA plant hardiness zone for the ginseng location and type of ginseng grown, certain practices are recognized and followed by all ginseng operators. These include, but are not limited to, the following.

- **Growing practices.** Prevention of blight, damp-off, root rot, and other problems require the following practices:
 - raised planting beds, whether flat beds or rounded beds, with no contour farming
 - soil type that provides good drainage, such as:
 - slightly acidic loamy soil
 - loose friable soil over a compacted clay soil
 - soil rich in organic matter with a pH level between 5.5 to 6.5
 - 75 to 80 percent shade requirement.
-

Continued on the next page

185 Ginseng (Continued)

E**Good Ginseng Growing Practices (Continued)**

- **Fertilization.** Fertilization is required to obtain expected results. Evidence of fertilizer practices must be provided by the producer at the request of COC.
- **Irrigation.** If irrigation is the standard practice, drought shall **not** be an eligible cause of loss. Therefore, COC shall ensure ginseng producers have systems and practices in place to provide adequate quality water.
- **Pest, weed, and disease control.** Producer must provide evidence of insect, weed, and disease control practices.

F**Inventory List**

Verifiable Inventory and Commercial Sales Records. Producers must maintain an inventory list of ginseng stock throughout the crop year.

A verifiable inventory must be provided to COC, within 15 calendar days after notice of loss is filed, or date damage to crop is apparent to the producer. Records must be acceptable to COC and include verifiable or reliable:

- root inventory, such as contemporaneous measurements, including rootlet or seed spacing, seed or rootlet receipts, and diaries, as necessary, to verify information provided by the producer

Note: Inventory must indicate rootlet, if applicable, by age.

- commercial receipts, settlement sheets, warehouse ledger sheets, scale tickets, and diaries, as necessary, to verify the eligible crop was sold or, otherwise, disposed of through commercial channels
- appraisal information from an FSA-certified loss adjuster or authorized COC representative.

Continued on the next page

185 Ginseng (Continued)

G**Unit of Measure**

The unit of measure for all ginseng roots is the rootlet or piece. For seed, the unit of measure is by the pound.

H**Average Market Price**

STC shall:

- establish the average age of mature ginseng roots
 - establish the average wholesale market value for each year the root has exceeded the established age of mature roots
 - immature roots (less than 3 years of age) will be established with zero value except when reported as transplant on FSA-578
 - establish the average market price of eligible seed and root stock.
-

I**Ineligible Losses**

NAP covers ginseng against losses of value sustained as a result of natural disaster. Before any NAP payment can be approved for ginseng losses, COC must be satisfied that the provisions of subparagraphs D and E are met. The loss of eligible ginseng must be a **direct** result of natural disaster. NAP does **not** provide protection against:

- ginseng grown in a region, USDA hardiness zone, or environment not conducive to successful production, or plants where mandatory or recommended growing requirements are not met
-

Continued on the next page

185 Ginseng (Continued)

I Ineligible Losses (Continued)

- pathogen or disease, unless COC can conclude with verifiable evidence that such was the direct result of natural disaster
- the inability to market ginseng as a result of quarantine, boycott, or refusal of a buyer to accept production
- inadequate weed control
- improper soil pH adjustment
- improper fertilization
- lack of:
 - adequate irrigation practice, where applicable, or an insufficient water supply source to ensure continuation of a good irrigation practice
 - loss prevention measures to control probable loss, because of insects and disease
- applicants who fail to provide a report of inventory for all ginseng on a NAP unit to a CCC representative, if requested
- applicants who fail to maintain or refuse to provide production and sales records necessary to determine the amount of value of eligible ginseng
- applicants who refuse to allow LA * * * to verify loss by physically removing representative samples
- applicants who misrepresent any material facts related to any aspect of the ginseng.

185 Ginseng (Continued)

J Report of Crop Acreage Whereon Facility Resides

In addition to other NAP eligibility requirements, ginseng producers wanting to be eligible for NAP assistance must file FSA-578 by September 30 for the ensuing ginseng crop year of October 1 through September 30, according to subparagraph 151 B.

K Crop Definition

Ginseng shall include all eligible plant species, sizes, and intended uses.

L Determining Unit Loss for Ginseng Seed

Ginseng root, including rootlet, and seed have different units of expression.

--Ginseng seed is a yield-based crop, and loss will be calculated using CCC-576, Part D.--

* * *

185 Ginseng (Continued)

M

Calculating Eligible Loss

To calculate the loss for ginseng roots, COC must complete the following calculations according to this table. The results of these calculations shall be dataloaded on CCC-576.

Step	Calculations
1	<p>Determine Field Market Value A.</p> <ul style="list-style-type: none"> For the roots present immediately before the disaster, add the number of roots of each age of maturity and multiply the number of these roots times the appropriate average market price adjusted for the age of the roots. <p>Example: STC established 3 years from planting as the average number of years to maturity for ginseng root. If the average price of a mature ginseng root is \$5 per root, immature root 2 years old would be valued at \$0 (unless it was a transplant). A 7-year old root would have a market value of \$5/root.</p> <p>* * *</p> <ul style="list-style-type: none"> Total the value of all roots (all ages) * * * present on the unit immediately before the onset of disaster.
2	<p>Determine the dollar value of inventory after disaster. Determine the post disaster inventory from either a loss adjustment report or acceptable or verifiable record, the number of roots having dollar value.</p> <p>Note: Any roots listed in step 1 having any dollar value, or which may rejuvenate or re-establish value, shall be counted as having the assigned value in step 1.</p> <p>* * *</p>

N

Application of Payment Factors

The approved prevented planting payment factor for the prevented planting of all ginseng is zero.

Any payment computed for loss of ginseng roots or seed on a plot shall have the unharvested payment factor applied.

186 Turfgrass Sod

A**Overview**

[7 CFR 1437.501] Turfgrass sod is a unique crop because it does not lend itself to yield calculations or production loss situations. In the production of turfgrass sod producers harvest the plant not a product of the plant. As a result, turfgrass sod is included as a value loss crop for NAP.

B**Eligible Loss**

The total value of mature turfgrass sod present on the unit at the time of disaster must be reduced by more than 50 percent because of a natural disaster to be eligible for NAP payment. Mature turfgrass sod is that which is available for market.

C**Crop Year**

The crop year for turfgrass sod is from October 1 through September 30.

D**Unit of Measure**

The unit of measure for all turfgrass sod shall be a square yard.

E**Report of Acreage**

*--In addition to other NAP eligibility requirements, turfgrass sod producers wanting to be eligible for NAP assistance must file FSA-578 by September 30 for the ensuing of turfgrass sod crop year October 1 through September 30, according to subparagraph 151 C.

In addition to providing information required in paragraph 151, the producer--* must report the following:

- date of each planting of turfgrass sod
- average number of square yards per acre.

Note: An acre of land contains 4,840 square yards. Producers must account for ribbons or unharvested areas.

Continued on the next page

186 Turfgrass Sod (Continued)**F Average Market Price**

STC shall establish:

- the average market price for a square yard of mature harvestable turfgrass sod
- zero value for immature turf grass sod having no marketable value.

G Calculating Eligible Loss

Turfgrass sod crop acreage is a separate crop from other intended uses of the grass in the unit.

Consider only turfgrass sod present in the unit at the time of disaster when determining the unit's predisaster value of turfgrass sod. The loss calculation for turfgrass sod shall be based upon the mature turfgrass sod having no dollar value following the disaster. Because quality adjustments for NAP are not authorized, turfgrass sod stock having any dollar value shall be counted as full value. Further, damaged turfgrass sod that is determined able to rejuvenate or sod merely stunted or delayed for harvest shall be counted as full value.

The total value of mature turfgrass sod (including other intended uses of that species of grass) present on the unit at the time of disaster must be reduced by more than 50 percent because of a natural disaster to be eligible for NAP payment. Mature turfgrass sod is that which is available for market.

Note: When a producer files a notice of loss, LA * * * shall complete an appraisal to verify the inventory of turfgrass sod immediately before and after the disaster to determine loss.

H Payment Factors

The approved prevented planting payment factor for turfgrass sod shall be zero.

Any loss of expected production on turfgrass sod calculated for payment shall have the unharvested payment factor applied.

187 Controlled Environment Crops**A Types of Controlled Environment Crops**

Because of the unique nature of some crops eligible for NAP assistance, special provisions are required to assess losses and calculate assistance. This is necessary because the crops do not lend themselves to yield calculations or production loss situations. Eligible controlled environment crops are:

- mushrooms
- floriculture.

To be eligible for NAP assistance, eligible controlled environment crops must be raised:

- by a commercial operator on private property
- in a controlled environment, except floriculture may be field-grown.

B Calculating Loss

Natural disaster loss for NAP assistance is determined by comparing the value of inventory immediately before disaster to value of inventory immediately after disaster. Determinations concerning the value of the loss for the crop on the unit must be made.

Use CCC-576B for calculating NAP assistance for controlled environment crop losses.

The total loss of value of each type or variety of controlled environment crop, within the grouping, shall be summarized in a unit, as determined by share relationship, and must be in excess of 50 percent because of natural disaster.

188 Mushrooms**A Eligible Mushroom Crops**

[7 CFR 1437.307] Eligible mushrooms are grown for human consumption and must be grown:

- by a commercial operator on private property
- in an enclosed controlled environment.

B Crop Year

The crop year for all mushroom crops is October 1 through September 30.

Note: Loss is determined by comparing the value of inventory immediately before disaster to value of inventory immediately after disaster.

C Private Property

For a producer to be considered eligible for NAP assistance on mushrooms, COC must determine:

- producer owns or has leased property with readily identifiable boundaries
- producer is owner or lessee
- producer has total environmental control of the enclosed mushroom facility.

D Controlled Environment

--See Exhibit 2 for the definition of controlled environment.--

Eligible mushrooms must be:

- placed in the enclosed facility by the producer and must not be growing naturally in the facility

Note: Species indigenous to the facility are not eligible.

- growing on property described in subparagraph C.

188 Mushrooms (Continued)**E Report of Crop Acreage**

In addition to other NAP eligibility requirements, mushroom producers wanting to be eligible for NAP assistance must file FSA-578 by September 30 for the ensuing crop year according to subparagraph 151 C.

Producers are also responsible for maintaining monthly inventory reports and providing this inventory to the County Office at the time of loss. Failure to provide accurate monthly inventories will result in ineligibility for payment.

Producers are responsible for providing updated inventory to the County Office immediately following a natural disaster. This “after” disaster inventory must be verified by LA * * *.

F Eligible Operation Determination

In the event CCC-576 is filed, the producer shall provide records COC requires to determine whether the mushroom species are produced in an eligible facility. Required records include, but are not limited to:

- habitat and nutrient base (substrate must be sterilized by heat treatment)
- insect and disease pest control
- leases
- water quality
- lighting
- onsite specialized equipment (temperature and humidity control)
- positive air pressurization and filtration (serially filtered fresh air, with 1 electrostatic filter)
- footbath for sterile environment
- horticultural production site preparation.

188 Mushrooms (Continued)

G**Ineligible
Disaster
Conditions**

Eligible disaster conditions defined in paragraph 21 apply. The loss of eligible mushrooms must be a **direct** result of natural disaster. Losses because of managerial decisions or losses of mushrooms normally incurred in the production cycle of the mushrooms, that is, normal mortality, are not eligible. NAP does **not** provide protection against:

- brownout (Exhibit 2)
 - failure of power supply
 - the inability to market mushroom species as a result of quarantine, boycott, or refusal of a buyer to accept production
 - units that are not growing in a controlled environment completely meeting the requirements of subparagraphs C and D
 - collapse or failure of equipment or apparatus used in the mushroom facility
 - disease contracted from outside of an enclosed facility by a carrier (pathogen or microorganism transmitted from un-sterilized clothing entering facility).
-

H**Grouping**

Nationally different species or varieties that are insignificant in price have been grouped. All sizes or values of a type or variety of mushroom species shall be summarized as 1 crop for crop and unit loss purposes.

Continued on the next page

188 Mushrooms (Continued)

**I
Calculating
Eligible Loss**

Mushroom species are considered controlled environment crops.

To determine whether a controlled environment crop on the unit has suffered an eligible loss at the time of natural disaster, determine the total value of the inventory present on the unit immediately before and after the disaster.

Use CCC-576B for calculating NAP assistance for mushroom losses.

The loss calculation for mushrooms shall be premised upon the stock possessing no dollar value subsequent to the natural disaster. Mushrooms with any dollar value shall be counted full value, because quality adjustments are not permitted under NAP.

The total loss of value of each type or variety of mushroom, within the grouping, shall be summarized in a unit, as defined by share relationship, and must be in excess of 50 percent because of natural disaster.

**J
Application of
Payment Factors**

The approved prevented planting payment factor for all mushrooms is zero.

Unharvested payment factors for each type or variety of mushroom shall be recommended to DAFP for approval.

The approved unharvested payment factor shall be applied to all mushroom losses computed for payment, unless the producer can prove that the unit was harvested at the time of disaster or immediately after disaster. If the producer cannot show with documentary evidence that harvest of the unit, or portion of the unit, was performed at the time of disaster or immediately after the disaster, which is the basis for the application, any loss calculated for payment shall be paid at the unharvested payment rate. In no case shall COC assume that harvest expenses were incurred at or near the time of disaster.

189 Floriculture

A
Eligible
Floriculture
Crops

*--[7 CFR 1437.304] Eligible floriculture consists of the commercial production of:

- field-grown flowers, including flowers planted in containers or other growing medium, maintained in a field setting, according to industry standards, as determined by COC--*

Note: If crop insurance is available for any field or container-grown floriculture crop, NAP will not be available.

- *--tubers and bulbs for use as propagation stock of eligible floriculture
- seed for propagation of eligible floriculture.

To be eligible for NAP assistance, eligible floriculture crops must be grown:

- on private property according to subparagraph C--*
 - in an environment adaptable to successful production of a particular species of floriculture, as determined by STC, in consideration of available data, such as USDA hardiness zone for each species of floriculture, CSREES, etc.
-

B
Crop Year

The crop year for all floriculture crops is October 1 through September 30.

C
Private Property

For a producer to be considered eligible for NAP assistance on floriculture crops, COC must determine the:

- producer owns or has leased property with readily identifiable boundaries
 - owner or lessee has total control of the floriculture crops, as well as tubers and bulbs being grown as propagation stock for commercial production.
-

Continued on the next page

189 Floriculture (Continued)

**D
Controlled
Environment**

See Exhibit 2 for a definition of controlled environment.

Eligible floriculture crops * * *:

- *--grown in containers or other growing medium, must be placed in a field environment and have appropriate and timely application of nutrient solution conducive to expected plant production.--*

Notes: Species indigenous to the field environment are not eligible.

COC must determine that flowers planted in containers or other growing medium, but maintained in a field environment, is customary for the area, and verified by an industry specialist that the practice is acceptable as a commercial floricultural operation for the area.

* * *

All portions of the floriculture environment must be under the control of the producer. Control means the producer of the floriculture operation implements the following practices.

- **Growing media** providing a floriculture medium that:
 - provides nutrients necessary for the production of the floricultural crops
 - protects the floricultural crops from harmful species or chemicals.
- **Nutrients or feeding** to obtain expected production results. Evidence of this practice must be provided by the producer at the request of COC. COC must be satisfied that the producer has an adequate supply of * * * minerals or other nutrients designed to obtain expected production results from plant-nutrient solution.

Continued on the next page

189 Floriculture (Continued)

D Growing Environment (Continued)

- **Irrigation and water quality.** Drought shall **not** be a major peril as all floriculture operators shall have systems and practices in place to ensure that the floricultural crops have adequate, quality water and substrate medium. This includes having equipment designed to control the nutrient balance, fertilization, and water. Therefore, COC shall consider the following:
 - whether the source of water is adequate to ensure continued growth and survival of the floriculture crops even in the event of severe drought
 - whether the floriculture environment sustained losses in previous years because of water shortages or water supply interruption. If so, list corrective actions that have been taken.
 - **Insect and disease control.** Losses of floriculture crops because of insect invasion would not be a major factor if the following good floricultural practices are followed:
 - the floricultural species are placed in an environment with properly maintained equipment designed to prevent loss from insects
 - the operator of the floricultural environment has control over the property where the floricultural crops are located by way of land ownership or lease
 - the operator of the floricultural environment is free to conduct floricultural operations without interference from persons with no interest in the operation.
- Note:** Disease from pests is not a recognizable cause of loss unless disease in the floricultural species can be tied to damaging weather or other adverse natural occurrence. The operator of the floricultural environment should have implemented an effective disease control program.

189 Floriculture (Continued)**E Report of Crop Acreage**

In addition to other NAP eligibility requirements, floriculture producers wanting to be eligible for NAP assistance must file FSA-578, by September 30, for the ensuing crop year according to subparagraph 151 C.

Producers are also responsible for maintaining monthly inventory reports and providing this inventory to the County Office at the time of loss. Failure to provide accurate monthly inventories will result in ineligibility for payment.

Producers are responsible for providing updated inventory to the County Office immediately following a natural disaster. This “after” disaster inventory must be verified by LA * * *.

F Eligible Operation Determination

In the event CCC-576 is filed, the producer shall provide records COC requires to determine whether the floricultural species are produced in an adequate environment. Required records include, but are not limited to:

- fertilization and nutrient solutions
- propagation stock
- weed, insect, and disease pest control
- rodent and wildlife control
- leases
- irrigation, if applicable
- growing medium for containerized crops
- onsite specialized equipment
- horticultural production site preparation.

189 Floriculture (Continued)

G**Ineligible
Disaster
Conditions**

Eligible disaster conditions defined in paragraph 21 apply. The loss of eligible floricultural crops must be a **direct** result of natural disaster. Losses because of managerial decisions or losses of floricultural crops normally incurred in the production cycle of the floricultural crops, that is, normal mortality, are not eligible. NAP does **not** provide protection against:

- the inability to market floricultural species as a result of quarantine, boycott, or refusal of a buyer to accept production
 - units that are not growing environments completely meeting the requirements of subparagraphs C and D
 - collapse or failure of equipment or apparatus used in the floriculture production.
-

H**Grouping**

Nationally different species or varieties that are insignificant in price have been grouped. All sizes or values of a type or variety of floricultural species shall be summarized as 1 crop for crop and unit loss purposes.

Continued on the next page

189 Floriculture (Continued)

I**Crop Codes**

STC's shall contact NAPB to:

- combine recommended species or varieties into groupings that can be grouped with like value (25 percent differential in price, starting with lowest priced crop type)
- recommend species or varieties that cannot be grouped
- request crop codes and approval of average market prices from DAFP for each:
 - grouping
 - species or variety that cannot be grouped
- notify County Offices of approved average market prices and species or varieties contained in each grouping approved by DAFP.

Note: All sizes or values of a type or variety of floricultural species shall be summarized as 1 crop for crop and unit loss purposes.

J**Calculating Eligible Loss**

Floricultural species are considered controlled environment crops.

To determine whether a controlled environment crop on the unit has suffered an eligible loss at the time of natural disaster, determine the total value of the inventory present on the unit immediately before and after the disaster.

Notes: Harvested production, such as cut flowers removed from the plant, or bulbs or tubers removed from the substratum before the disaster, are not eligible for NAP payment.

--Flower seed is a yield-based crop, and loss will be calculated using CCC-576, Part D.--

Continued on the next page

189 Floriculture (Continued)

J Calculating Eligible Loss (Continued)

Use CCC-576B for calculating NAP assistance for floriculture losses.

The total loss of value of each type or variety of floricultural crops, within the grouping, shall be summarized in a unit, and must be in excess of 50 percent because of natural disaster.

Notes: Disaster inventory will account for all floricultural crops, including annual, biannual, and biennial crops present on the unit at the time of natural disaster, excluding cut flowers and bulbs or tubers dug from the soil. No loss to a perennial plant because of natural disaster will be included in the loss calculation. No loss to a perennial bulb or tuber because of natural disaster will be included in the loss calculation, unless COC determines it is a common practice for the producer to sell this crop.

Although annual plants can be planted in multiple-planting windows throughout the year, separate planting windows will not need to be established by the County Office, because the determination of loss is based on inventory on-hand at the time of the disaster.

* * *

190 Honey

A Eligible Honey

Eligible honey includes table and nontable honey produced commercially for human consumption.

All honey is considered a single crop, regardless of type or variety of floral source or intended use. As a result, the service fee for honey will never exceed \$100.

B Crop Year

The crop year for honey production is the calendar year January 1 through December 31.

--C Recording County Office--

A producer's colonies may be located in various counties at several different times during the crop year. Ordinarily, NAP units do not traverse county lines. However, it would neither be equitable nor practicable to consider colonies of bees located in 2 or more counties as separate units.

An eligible producer having an interest in colonies of bees, or honey produced from these *--colonies, shall use the State and county listed on the subsidiary print as the recording--* County Office for the honey operation.

190 Honey (Continued)

*--C Recording County Office (Continued)

Actions that can only be performed in the recording County Office and that may be performed in any County Office appear in this table.

<p>Actions that can only be performed in the recording County Office include the following:</p> <ul style="list-style-type: none"> • filing CCC-471 • filing a report of colonies (FSA-578) • filing an application for payment (CCC-576, Part G) • reporting total unit production (CCC-452) • request to change a unit's recording County Office. <p>Note: A change of recording County Office in the current crop year is not permitted if CCC-576, Part G has been submitted for the unit and crop year by any producer.</p>	<p>Actions that may be performed in any County Office include the following:</p> <ul style="list-style-type: none"> • selecting a recording County Office if a recording County Office has not previously been selected <p>Note: Any producer sharing in the unit may select the unit's recording County Office.</p> <ul style="list-style-type: none"> • filing a notice of loss (CCC-576, Part B) because of natural disaster impacting the honey operation in such county. <p>Note: County Offices accepting notice of loss (CCC-576, Part B) for honey shall identify the producer's recording County Office on the subsidiary print so a copy of the notice of loss can be sent to the recording County Office for payment disbursement.</p>
---	--

--*

190 Honey (Continued)**D Report of Colonies**

*--A producer sharing in the unit must accurately report, in the recording County Office by January 2 of the same calendar year or crop year ending December 31, the total number of the unit's colonies present in all counties.

Note: Producers must notify the recording County Office within 30 calendar days of--* changes in the:

- total number of colonies
- names of additional counties to which bees are moved.

Producers shall use FSA-578 to report the number of colonies by county.

Manual FSA-578 must include the following:

- in item 1, the FSA FSN where the producer's headquarters are located
- in item 7, the names and shares of all producers sharing in the honey produced from the unit
- in item 12, the number of all colonies of bees belonging to the unit
- in item 13, the names of counties to which colonies of bees are moved.

The producer shall certify the number of colonies from which expected production shall be calculated in the remarks section of FSA-578.

Note: The certification statement on FSA-578 shall read as follows, "I certify the number of colonies reported include all colonies from which production is expected."

COC must be satisfied that the report of the number of colonies is accurate. The certification is binding for all producers sharing in the unit.

190 Honey (Continued)

E**Late-Filed
Report of
Colonies**

A report of colonies submitted beyond the date identified in subparagraph D can be accepted if all of the following conditions are met:

- the report of colonies is accompanied by a copy of the State hive registration(s) where required by State law
- COC is satisfied that the report of colonies for the unit is accurate and is supported by the State hive registration(s) where required by State law.

If a late-filed report of colonies is being submitted in support of CCC-576, COC shall be satisfied that the State hive registrations where required by State law and some additional documentation (moving permits, contracts with growers for pollination, loan documents, beekeeper financial records, etc.) support a conclusion that bees were indeed present in the geographical area at the time of disaster claimed by the producer on CCC-576.

F**Reports of
Production**

[7 CFR 1437.8] The producer shall report the unit's production of honey on CCC-452 by January 2 following the crop year in which a report of colonies was filed.

The total amount of honey production includes all honey harvested in the calendar year.

COC may request storage or sales records to support the producer's reported production.

Continued on the next page

190 Honey (Continued)

G

County-Expected Yields

STC shall establish a county-expected yield for honey. The county-expected yield shall be pounds of honey produced per colony of bees per crop year.

DAFP must approve county-expected yields established for honey.

H

Calculating Eligible Loss

Calculate unit loss of honey by:

- multiplying the producer’s highest number of colonies reported at any time in the crop year times the producer’s approved yield
- subtracting the producer’s total actual and assigned production of honey from all the producer’s colonies.

A producer filing an application for honey loss payment must certify whether bees were present in the geographical area at the time of disaster.

I

Ineligible Causes of Loss

The eligible disaster conditions in paragraph 21 apply. Loss of honey production must be the result of natural disaster. Production losses because of managerial decisions or losses of bees because of circumstances other than natural disaster are not eligible. NAP does **not** provide coverage for:

- the result of some condition other than natural disaster
 - the value loss of colonies or bees
-

Continued on the next page

190 Honey (Continued)

I Ineligible Causes of Loss (Continued)

- the loss of colonies or bees causing lower honey production because of:
 - the application of agricultural or nonagricultural chemicals
 - theft, fire, or vandalism
 - movement of bees by the producer or any other person
 - disease or pest infestation of the colonies
- the inability to extract because of the unavailability of equipment
- collapse or failure of equipment or apparatus used in the honey operation
- losses resulting from improper storage of honey
- loss of honey production because of bee feeding.

J Payment Factors

The prevented planting payment factor for honey is zero.

STC shall establish an unharvested payment factor for honey. DAFP must approve the factor.

--Any loss of expected production for honey calculated for payment shall have the unharvested payment factor applied.--

191 Maple Sap**A Eligible Maple Sap**

[7 CFR 1437.105] Eligibility for NAP assistance for maple sap is limited to maple sap produced on private property in a controlled environment by a commercial operator for sale as sap or syrup.

Eligible maple sap must be produced from trees:

- located on land the producer controls by ownership or lease
- managed for production of maple sap
- that are at least 30 years old and 12 inches in diameter.

An eligible tree, which is 30 years old and 12 inches in diameter, may have additional taps added as the tree increases in diameter, up to a maximum of 4 taps per tree.

B Crop Year

The crop year for maple sap production is the calendar year January 1 through December 31.

C Unit of Measure and Basis for Yield

The unit of measure for maple sap is gallons. The yield for maple sap shall be based on gallons of sap produced per tap.

Note: The maximum county-expected yield for maple sap shall be 10 gallons of sap per tap per tapping season unless STC has documentation to support a higher county-expected yield.

191 Maple Sap (Continued)**D Report of Acreage**

Producing tree acreage shall be reported on FSA-578. STC shall establish a final reporting date for acreage containing trees from which maple sap is produced or is to be produced. The established date shall be at least 30 calendar days before the onset of the crop year's harvest of maple sap.

In addition to providing the information required in subparagraph 151 B, the maple sap producer must report the:

- total number of eligible trees on the unit
- average size and age of producing trees
- total number of taps placed or anticipated for the tapping season.

E Average Market Price

The approved average market price for maple sap must be established for the value of the sap before processing into syrup. NAP does **not** cover maple syrup losses. NAP assistance can only be extended for the eligible loss of maple sap. If price and data is for maple syrup, it must be converted to a maple sap basis and eliminate any value added by processing.

STC shall establish the average market price for a gallon of maple sap based on the best information available. If data is available only for maple syrup, this data must be converted to a maple sap basis. The price for a gallon of maple syrup shall be multiplied by **0.00936** to arrive at the average market price of a gallon of maple sap.

Example: State NASS data shows the average market price for a gallon of maple syrup is \$27.50. \$27.50 multiplied by 0.00936 results in an average market price of \$0.2574 for a gallon of maple sap.

191 Maple Sap (Continued)

F Expected Production

When establishing a unit's expected amount of production of maple sap, COC's shall:

- consider only the number of taps placed in eligible trees in the tapping season
- multiply the number of taps placed in eligible trees times the producer's approved yield, that is, gallons of sap per tap.

G Payment Factors

The prevented planting payment factor for maple sap is zero.

STC shall establish an unharvested payment factor for maple sap. DAFP must approve the factor.

--Any loss of expected production for maple sap calculated for payment shall have the unharvested payment factor applied.--

192 General Forage Provisions

A**Eligible Forage**

Eligible forage is vegetation consisting of annual, biennial, and perennial grasses, legumes, small grains, etc. produced in a commercial operation for animal consumption or for seed for the propagation of forage for animal consumption.

For 2001 and preceding crop years, eligible forage on any Federal- and State-owned lands includes only seeded forage acreage. For the purpose of determining eligibility on Federal- and State-owned lands, seeded forage is that acreage that is mechanically seeded at a regular interval, at least every 7 years, according to good farming practices.

For 2002 and succeeding crop years, eligible forage on Federal- and State-owned land includes both seeded and unseeded forage acreage.

Acreage eligibility for prevented planting shall be determined according to paragraph 25.

B**Acceptable Management Practices**

COC shall ensure that producers are using acceptable farming and pasture and range management and maintenance practices for the location.

Acceptable pasture and range practices must be such to sustain sufficient quality and quantity of the vegetation for grazing livestock. Acceptable farming practices must be such to yield the expected production of vegetation or seed.

C**Eligibility of Leased Private or Federal- and State-Owned Land**

Acreage leases and rental agreements for private or Federal- and State-owned land intended for grazing include many unique arrangements for compensation and provide various degrees of control for use of the acreage. Many leases, particularly those with grazing arrangements, are similar to sales agreements. For example, the lessee pays only for the days actual grazing occurs or according to *--the rate of gain of the grazing animals, etc. These leases do not convey--* control of the acreage nor does the lessee acquire risk in production of the specific crop acreage under these arrangements.

COC shall review all acreage leases to determine whether:

- the lease conveys control, however limited, to the lessee
- the lessee has a risk in production of the crop acreage.

The lessee shall be considered eligible for NAP assistance for eligible losses *--impacting specific acreage, if COC determines that the lease is either of the following:--*

- conveys control of the acreage to the lessee, however limited
 - indicates the lessee has a risk in production of the crop acreage.
-

Continued on the next page

192 General Forage Provisions (Continued)

C
Eligibility of
Leased Private
or Federal- and
State-Owned
Land
(Continued)

***--Note:** If the lease prohibits the land to be subleased, the lessee associated to the sublease will be ineligible for NAP benefits on that acreage.

COC shall use the following questions and others, as locally warranted, to determine if the lessee has a risk in production of the crop acreage or the lease conveys control of the crop acreage to the lessee. Only 1 condition needs to be met to find a producer eligible.--*

- Does the lessee pay local property or similar taxes on the leased acreage or improvements made to the leased acreage?
 - If yes, the lessee shall be considered to have control of the crop acreage.
 - If no, see the next question.
- *--Can the lessee, according to the lease, recoup specific expenses for significant infrastructure or range improvements, that is, fences, water--* well, seed or fertilizer applications, drainage improvements, or brush and weed control?
 - If no, the lessee shall be considered to have control of the crop acreage.
 - If yes, see the next question.
- Is the lessee allowed to sell the lease or the permit?
 - If yes, the lessee shall be considered to have control of the crop acreage.
 - If no, see the next question.
- Can the lease or the permit be inherited?
 - If yes, the lessee shall be considered to have control of the crop acreage.
 - If no, see the next question.
- Does the lessee compensate the lessor for use of the crop acreage?
 - If no, the lessee does not have a risk in production of the crop acreage.
 - If yes, is the payment refundable if grazing use of the crop acreage is lost?
 - If yes, the lessee only has a risk in the portion of the crop acreage used and paid for, if any.
 - If no, does the payment entitle the lessee to a vested interest in production of the commodity versus purchasing the commodity?
 - If no, the lessee does not have a risk in production of the crop acreage.
 - If yes, the lessee shall be considered to have a risk in production of the crop acreage.

Continued on the next page

192 General Forage Provisions (Continued)

D Acreage Eligibility

COC shall, when questions of eligibility exist, consider evidence of:

- the producer's intent to graze or otherwise harvest forage acreage

Note: If a producer reports forage acreage as CRP or intended as fallow, that acreage is not eligible for NAP.

- available livestock, water, fencing, etc. for grazing
- available equipment, storage facilities, etc. necessary for mechanical harvest of forage acreage.

*--193 Defining Forage Crops

A Definitions

In general, NASS defines forage as alfalfa, alfalfa mixtures, and other hay.

The following definitions were developed to better utilize NASS data and shall be used to determine forage types eligible for NAP coverage:

- alfalfa means a stand of either:
 - pure alfalfa
 - a mixture of alfalfa and grasses, legumes, or other forage in which 60 percent or more of the plant population is alfalfa
- alfalfa mixture is alfalfa and grasses, legumes, or other forages in which **less** than 60 percent of the plant population is alfalfa
- other hay is a stand consisting of grasses, legumes, and/or other forages in which **little or no** alfalfa plants exist, including small grain forage, sorghum forage, soybean forage, and perennial peanut forage
- perennial peanut forage is a stand of perennial peanuts soybeans intended for forage for animal consumption
- small grain forage is a stand of pure wheat, barley, oats, triticale, or rye intended for forage for animal consumption
- sorghum forage is a stand of sorghum intended for forage for animal consumption
- soybean forage is a stand of soybeans intended for forage for animal consumption.--*

--193 Defining Forage Crops (Continued)*B Determining Forage Crops--***

Alfalfa, alfalfa mixtures, and other hay:

- must be further defined according to subparagraph 170 A for service fee and production purposes based on the intended method of harvest, either mechanically or grazed

Note: If a producer intends to both mechanically harvest and graze the same acres, for NAP purposes, the producer must designate 1 intended method of harvest for the forage acreage for the crop year.

- acreage intended to be mechanically harvested includes acreage intended for both forage or seed production
- acreage intended to be grazed can be further defined as warm and cool season forage.

*--For service fee and production purposes, the following are defined as a single crop without regard to method of harvest or designation as warm or cool season forage. However, expected and actual production will be determined based on the actual method of harvest, either mechanically or grazed, and summarized at a dollar value to determine the overall percent of loss of the specific crop acreage:

- small grain forages
- sorghum forages
- soybean forages
- perennial peanuts.--*

***--193 Defining Forage Crops (Continued)**

B Determining Forage Crops (Continued)--*

* * * There are generally 8 ways forage can be considered as separate crops. The 8 ways are as follows.

Crop	Crop Code	Crop Type	Planting Period	Intended Use	Pay Crop	Pay Type
Alfalfa	0027	NTS	01	Fg, Sd***	0027	001
*--Alfalfa Mixture	0296	AGM, ASG, GMA	01	Fg, Sd***	0296	001
Other Hay	0102, 0296, 0265, etc.	All types listed (except alf. mix)	01	Fg, Sd***	0102	001
Alfalfa, Alfalfa Mix, Other Hay	0102, 0027, 0296, 0265, etc.	All types listed under the crop codes	01(full)**	Gz***	0102	002
			01(cool)**	Gz***	0102	002
			02(warm)**	Gz***	0102	002
Small Grain Forages--*	Wheat 0011 Barley 0091 Oats 0016 Triticale 0158 Rye 0094	NTS	01	Fg, Gz	0011*, 0091*, 0016*, 0158*, 0094*	001
Sorghum Forage	0050	CAN, ALU, SUD, SWT	01	Fg, Gz	0050	001

* Each is considered a separate crop.

** Based on STC determination to breakdown. All types of forage as either full season or warm and cool season. STC cannot designate both.

*** Crop definition determined based on intended uses.

***--193 Defining Forage Crops (Continued)**

B Determining Forage Crops (Continued)

Example: John Smith produces the following forages for hay:

- alfalfa in which more than 60 percent of the plant population is alfalfa (crop code 0027)
- alfalfa mixture in which plant population is less than 60 percent, but more than 25 percent alfalfa (crop code 0296)
- alfalfa mixture in which less than 25 percent of the plant population is alfalfa (crop code 0296)
- other hay that consists of a mixture of oats and peas (crop code 0296)
- other hay that consists of a stand of pure Bahia grass (crop code 0102)
- other hay that consists of a stand of pure Bermuda grass (crop code 0102).

The following table provides the NAP crop information for John Smith’s forage acreage.

Crop Code	Crop Type	Planting Number	Intended Use	Pay Crop	Pay Type
0296	AGM	01	Fg	0296	01
0102	BCM	01	Fg	0102	01
0102	BHI	01	Fg	0102	01
0296	GMA	01	Fg	0296	01
0027	NTS	01	Fg	0027	01
0296	OTP	01	Fg	0102	01

Crops with the same pay crop and pay types shall be grouped together as 1 crop for NAP purposes. Accordingly, John Smith has the following 3 separate crops for NAP purposes:

- alfalfa
- alfalfa mixture
- other hay.

Notes: NASS does **not** include the mixture of oats and peas as either alfalfa or alfalfa mixture. Therefore, such mixture is considered as other hay for NAP purposes.

John Smith would be assessed a \$300 NAP service fee because there are 3 separate crops.--*

--194 Mechanically Harvested Forage for “Other Than Seed” Provisions*A APH for Mechanically Harvested Forage**

COC shall ensure that:

- an approved yield for forage acreage intended to be mechanically harvested for forage is calculated according to Part 5
- all mechanically harvested forage (actual and appraised) from forage acreage intended to be mechanically harvested is for forage accurately recorded on CCC-452
- production from the mechanical harvesting of forage acreage intended to be grazed is **not** counted as “production to count” in the calculation of APH.

Example: Jim intended to mechanically harvest for hay 100 acres of the total 200 acres he has available for forage. The remaining acreage was intended as grazed forage. Because of the abundance of grazed forage, Jim decided to mechanically harvest 1 cutting of hay from the 100 acres intended to be grazed crop. To determine Jim’s production for his mechanically harvested forage for hay, the production from his grazed crop acreage cut for hay **must** be kept separate and shall not be considered “production to count” for calculating his mechanically harvested approved yield for hay.

Note: If Jim does **not** keep production for his mechanically harvested forage for hay separate from the production from his grazed crop harvested for hay, the total production to count to determine his loss on the 100 acres intended to be mechanically harvested as hay will be the total of the actual harvested production from the 100 acres intended to be mechanically harvested and the 100 acres intended for grazing that was mechanically harvested.--*

--194 Mechanically Harvested Forage for “Other Than Seed” Provisions (Continued)--**B Determining Production of Intended Mechanical Harvest Forage**

COC shall:

- *--determine production of forage acreage intended to be mechanically harvested as forage according to Part 6
- ensure that producers are aware that they must notify their administrative County Office before grazing, abandoning, or destroying forage acreage recorded on FSA-578 as intended to be mechanically harvested as forage
- ensure that producers are aware of representative sample area requirements if an appraisal of forage acreage is required if the forage acreage intended to be mechanically harvested for forage is to be grazed **only**, abandoned, or destroyed--*
- ensure that loss adjustors are available and appraisals are completed timely.

Note: Because forage is unique it is important to remind producers to maintain separate production records on the basis of intended harvest.

C Mechanical Harvesting of Forage Acreage Intended To Be Grazed

COC shall ensure that producers are aware they must:

- keep production records from acreage intended for forage separate from those acres *--intended for grazing but were actually mechanically harvested as forage
- request a measurement service so FSA can identify and measure the quantity of mechanically harvested production from forage acreage reported to FSA as intended to be grazed.

COC shall ensure that all mechanically harvested forage from forage production acreage intended to be grazed is properly and accurately reported on CCC-576. Do not consider forage production from forage acreage intended to be grazed as “production to count” for--* APH purposes.

Note: See subparagraphs 327 C and D about commingled harvested production.

--194 Mechanically Harvested Forage for “Other Than Seed” Provisions (Continued)*D Producer Responsibilities**

Producers are responsible for **all** of the following:

- notifying County Office **before** grazing or abandoning forage acreage reported on FSA-578 as intended to be mechanically harvested
- establishing representative sample areas, according to subparagraph 427 B, when an appraisal of the acreage is required
- informing County Office of location of sample areas within 15 calendar days of placement
- requesting appraisal of sample areas at end of harvest period, but **before** first freeze
- maintaining separate production records for **each** of the following, according to subparagraph 194 D:
 - acreage intended to be mechanically harvested
 - acreage intended to be grazed, but were actually mechanically harvested
- requesting a measurement service to identify and measure the quantity of mechanically harvested production from forage acreage reported as intended to be grazed, according to subparagraph 194 D
- requesting an AUD adjustment, if applicable, according to subparagraph 195 F, G, or H
- timely filing CCC-576, according to paragraph 401.--*

***--194 Mechanically Harvested Forage for “Other Than Seed” Provisions (Continued)**

D Determining Loss on Forage Intended for Forage

Alfalfa, alfalfa mixture, and other hay forage acreage certified on FSA-578 as intended to be mechanically harvested for forage shall always be considered mechanically harvested acreage for crop definition purposes regardless of actual method of harvest.

The following table provides how a loss shall be determined for acreage reported as intended to be mechanically harvested for forage, provided all eligibility requirements are met.

Important: COC shall ensure that the producer is aware of their responsibilities in subparagraph C and as outlined in this table.

IF acreage reported as intended to be mechanically harvested for forage is...	AND the producer...	THEN the loss shall be determined based on...
completely mechanically harvested for forage (all acreage is mechanically harvested for forage, with no grazing)	<ul style="list-style-type: none"> • timely files CCC-576, according to paragraph 401 • provides verifiable or reliable production records, according to paragraph 322 	difference between: <ul style="list-style-type: none"> • expected production for forage (calculated using producer’s approved yield) • actual harvested production of forage.

--*

*--194 Mechanically Harvested Forage for “Other Than Seed” Provisions (Continued)

D Determining Loss on Forage Intended for Forage (Continued)

IF acreage reported as intended to be mechanically harvested for forage is...	AND the producer...	THEN the loss shall be determined based on...
<p>both mechanically harvested for forage and grazed (all acreage is mechanically harvested for forage at least once, and grazed)</p>	<ul style="list-style-type: none"> • timely files CCC-576, according to paragraph 401 • provides verifiable or reliable production records according to paragraph 322 • before grazing, establishes representative sample areas according to subparagraph 427 B • within 15 calendar days of placement, informs County Office of the location of the sample areas for appraisal and spot check purposes • at the end of the normal harvest date, and before the first freeze, requests an appraisal of the sample areas be completed for forage <p>Note: See subparagraph C for COC responsibilities.</p>	<p>difference between the expected production for forage (calculated using producer’s approved yield) and the total of both:</p> <ul style="list-style-type: none"> • actual harvested production of forage • total appraised production for forage. <p>Note: The appraisal of forage must include the establishment of a secure area to determine potential forage production.</p>

--*

*--194 Mechanically Harvested Forage for “Other Than Seed” Provisions (Continued)

D Determining Loss on Forage Intended for Forage (Continued)

IF acreage reported as intended to be mechanically harvested for forage is...	AND the producer...	THEN the loss shall be determined based on...
abandoned or destroyed (acreage is not mechanically harvested for forage or grazed)	<ul style="list-style-type: none"> • timely files CCC-576, according to paragraph 401 • before abandoning or destroying the acreage, establishes representative sample areas according to subparagraph 427 B • within 15 calendar days of placement, informs County Office of the location of the sample areas for appraisal and spot check purposes • at the end of the normal harvest date, and before the first freeze, requests an appraisal of the sample areas be completed <p>Note: See subparagraph C for COC responsibilities.</p>	difference between: <ul style="list-style-type: none"> • expected production (calculated using producer’s approved yield) • total appraised production. <p>Note: The appraisal of forage must include the establishment of a secure area to determine potential forage production</p>
grazed only (acreage is not mechanically harvested in any manner)	<ul style="list-style-type: none"> • timely files CCC-576, according to paragraph 401 • notifies the administrative County Office of the actual use of the forage when an application for payment is filed 	provisions in subparagraph E. <p>Note: Losses determined on AUD value will not be used for APH purposes.</p>

--*

***--194 Mechanically Harvested Forage for “Other Than Seed” Provisions (Continued)**

E Determining Loss on Forage Acreage Intended for Forage That is Grazed Only

Alfalfa, alfalfa mixture, and other hay forage acreage certified on FSA-578 as intended to be mechanically harvested for forage shall always be considered mechanically harvested acreage for crop definition purposes regardless of actual method of harvest.

Producers **shall not revise** the certified intended use of acreage reported on FSA-578. However, the actual use of the acreage, such as grazing, abandoned, or destroyed, will impact how a loss is determined on the acreage. See 2-CP for reporting acreage and “intended uses”.

Losses on forage acreage that were intended to be mechanically harvested for forage, but were grazed only, shall be determined according to the following table.

IF the producer...	THEN the loss shall be determined based on...
<p>provides County Office with acceptable and verifiable records for both of the following:</p> <ul style="list-style-type: none"> • the acreage for which CCC-576 is filed was planted to the same forage type and intended use for which a loss is being claimed for at least 3 out of 5 years before the year in which a loss is being claimed • evidence of forage production from the forage acreage being claimed for at least 3 of the 5 years before the year in which a loss is being claimed <p>Note: See subparagraph F for acceptable and verifiable evidence of acreage and forage production.</p>	<p>an appraisal of the specific acreage, provided the producer:</p> <ul style="list-style-type: none"> • timely files CCC-576, according to paragraph 401 • before grazing occurs: <ul style="list-style-type: none"> • establishes representative sample areas according to subparagraph 427 B • informs County Office within 15 calendar days of placement and location of the sample areas for appraisal and spot check purposes • a field visit is conducted by LA or County Office representative to determine if the representative sample areas have been established according to FCIC-25150; available at www.rma.usda.gov/FTP/Publications/directives/25000/PDF/06_25150.pdf <p>Notes: Failure to establish representative sample areas according to FCIC-25150 before grazing occurs will result in the percent of loss being determined on an AUD value according to subparagraph 195 I for grazed forage.</p> <ul style="list-style-type: none"> • at the end of the normal harvest date, and before the first freeze, requests that an appraisal of the sample areas be completed.

--*

194 Mechanically Harvested Forage for “Other Than Seed” Provisions (Continued)

E Determining Loss on Forage Acreage Intended for Forage That is Grazed Only (Continued)

IF the producer...	THEN the loss shall be determined based on...
<p>does not provide County Office with acceptable and verifiable records for both of the following:</p> <ul style="list-style-type: none"> • acreage for which CCC-576 is filed was planted to the same forage type and intended use for which a loss is being claimed for at least 3 out of 5 years before the year in which a loss is claimed • evidence of forage production from the forage acreage being claimed for at least 3 of the 5 years before the year in which a loss is being claimed <p>Note: See subparagraph F for acceptable and verifiable evidence of acreage and forage production.</p>	<p>AUD value by determining the percent of loss using 1 of the methods provided in subparagraph 195 I for grazed forage.</p> <p>Note: Losses determined on AUD shall not be used for APH purposes.</p>

--F Acceptable Evidence of Acreage and Forage Production--

Acceptable evidence of forage production from the forage acreage for which CCC-576 is filed includes, but is **not** limited to:

- *--production records determined acceptable for NAP APH purposes which includes verifiable or reliable production records according to paragraph 322--*
- sales receipts
- weight tickets
- custom harvest documents that clearly identify the amount of forage produced from the applicable acreage.

COC shall **not** accept any documentation that does **not** clearly identify acreage from which the production was obtained or the total forage produced from that acreage.

194 Mechanically Harvested Forage for “Other Than Seed” Provisions (Continued)

--F Acceptable Evidence of Acreage and Forage Production (Continued)--

Acceptable evidence that acreage for which CCC-576 is filed was planted to the same forage type and intended use for which a loss is being claimed includes 1 of the following:

- timely filed and certified FSA-578 for the applicable years
- late-filed and certified FSA-578 for the applicable years, provided all the requirements for a late-filed FSA-578, according to 2-CP, are met
- certified reports of acreage from crop insurance.

Important: COC shall contact crop insurance agent to verify accuracy and authenticity of insurance document **before** accepting documents for NAP purposes.

--194.5 Mechanically Harvested Forage for Seed Provisions*A APH for Mechanically Harvested Forage for Seed**

COC shall ensure that:

- an approved yield for forage acreage intended to be mechanically harvested for seed is calculated according to Part 5
- **all** mechanically harvested forage (actual and appraised) from forage acreage intended to be mechanically harvested for seed is accurately recorded on CCC-452
- seed production from the mechanical harvesting of forage acreage intended to be hayed or grazed is **not** counted as “production to count” in the calculation of the seed APH.

Example: John intended to mechanically harvest for seed 100 acres of the total 200 acres he had available for forage. The remaining acreage was intended as grazed forage. Because of the increased price for seed, John decided to mechanically harvest seed from the 100 acres intended to be grazed crop. To determine John’s production for his mechanically harvested forage for seed, the production from his intended grazed crop harvested for seed **must** be kept separate and shall **not** be considered “production to count” for calculating his mechanically harvested approved yield for seed.

Note: “Production to count” to determine Jim’s loss on the 100 acres intended to be mechanically harvested for seed will be the total actual harvested production from the:

- 100 acres intended to be mechanically harvested as seed if the production from the acres intended to be mechanically harvested as seed is kept separate from the production of the intended grazed crop harvested for seed
- 200 acres harvested as seed if the production from the acres intended to be mechanically harvested as seed is **not** kept separate from the production of the intended grazed crop harvested for seed.--*

--194.5 Mechanically Harvested Forage for Seed Provisions (Continued)*B Determining Production of Intended Mechanically Harvested Forage for Seed**

COC shall:

- determine production of forage acreage intended to be mechanically harvested for seed according to Part 6
- ensure that producers are aware that they **must**:
 - notify their administrative County Office **before** haying, grazing, abandoning, or destroying forage acreage recorded on FSA-578 as intended to be mechanically harvested as seed
 - establish representative sample areas if an appraisal of forage acreage is required, if the forage acreage intended to be mechanically harvested for seed is to be grazed, hayed, abandoned, or destroyed
 - keep production records from forage acreage, intended to be mechanically harvested for seed, separate from those forage acres intended for haying and/or grazing that were actually mechanically harvested for seed
 - request a measurement service so FSA can identify and measure the quantity of mechanically harvested production from forage acreage reported to FSA as intended to be hayed and/or grazed
- ensure that loss adjustors are available and appraisals are completed timely
- ensure that **all** mechanically harvested forage production for seed from forage acreage, intended to be hayed and/or grazed, is properly and accurately reported on CCC-576
- **not** consider seed production from forage acreage intended to be hayed and/or grazed as “production to count” for seed APH purposes.

Notes: Because forage is unique, it is important to remind producers to maintain **separate** production records on the basis of intended harvest.

See subparagraphs 327 C and D about commingled harvested production.--*

***--194.5 Mechanically Harvested Forage for Seed Provisions (Continued)**

C Determining Eligible Acreage of Perennial Grasses Intended for Seed

To be eligible for NAP coverage, perennial grass acreage intended for seed shall be:

- crop acreage that meets 1 of the following conditions:
 - is seeded to a perennial grass, with an intent of producing certified grass seed; the certified grass seed shall be grass seed produced by an individual, firm, or corporation that produces certified seed and/or plants; the producer **must** have a license to produce certified grass seed
 - is seeded to a perennial grass, with an intent of producing commercial seed, for which a grass seed contract was executed **on or before** the acreage reporting date for the applicable crop, with a seed company that is a business enterprise that possesses:
 - all applicable licenses required for marketing commercial grass seed
 - facilities with enough storage and drying capacity to accept and process the covered crop within a reasonable amount of time after harvest
- was planted to the same forage type and harvested for seed in at least 3 of the 5 years **before** the year of CCC-471; NAP coverage for producers with at least a minimum of 3 years of harvested acreage history will be limited to the Olympic average (dropping the high and low) of the most recent 5 years harvested acreage history **before** the year of CCC-471

Example: Wayne purchased 2008 NAP coverage for FTA with an intended use of seed. The table below shows Wayne’s prior year harvested acreage history of FTA for seed for the years 2003 through 2007. The 2008 NAP coverage for FTA intended for seed will be limited to 41.7 acres based on the Olympic average of 2003 through 2007 FTA harvested for seed acreage (excluding the high and low) is $50.0 + 0.0 + 75.0 \div 3 = 41.7$.

Year	FTA Harvested Acreage For Seed	2008 NAP Covered Acres of FTA for Seed
2007	50	
2006	0	
2005	100	
2004	75	
2003	0	
		41.7

- reported for the year of CCC-471 by the acreage reporting date for the applicable crop.--*

***--194.5 Mechanically Harvested Forage for Seed Provisions (Continued)**

C Determining Eligible Acreage of Perennial Grasses Intended for Seed (Continued)

The producer shall provide a copy of the grass seed contract for the contracted grass seed acreage, or accepted certification application, for the certified grass seed acreage to the administrative County Office **on or before** the acreage reporting date for the applicable crop. Failure to provide a copy of the grass seed contract or certification application accepted by the certifying agency, by the acreage reporting date for the year of CCC-471, shall result in the denial of NAP benefits for the intended grass seed crop.--*

***--194.5 Mechanically Harvested Forage for Seed Provisions**

D Determining Loss on Forage Intended for Seed

Alfalfa, alfalfa mixture, and other hay forage acreage certified on FSA-578 as intended to be mechanically harvested for seed, shall **always** be considered mechanically harvested acreage for crop definition purposes regardless of actual method of harvest.

The following table provides how a loss shall be determined for acreage reported as intended to be mechanically harvested for seed, provided all eligibility requirements are met.

Important: COC shall ensure that the producer is aware of their responsibilities provided in subparagraphs C and D, and the following table.

IF acreage reported as intended to be mechanically harvested for seed is...	AND the producer...	THEN the loss shall be determined based on...
mechanically harvested for seed (all acreage is mechanically harvested for seed only, with no grazing or harvest for hay)	<ul style="list-style-type: none"> • timely files CCC-576 for seed, according to paragraph 401 • provides verifiable or reliable production records for seed, according to paragraph 322 	difference between: <ul style="list-style-type: none"> • expected production (calculated using producer’s approved yield) • actual harvested production.
both mechanically harvested for seed and grazed (all acreage is mechanically harvested for seed at least once, and then grazed)

D Determining Loss on Forage Intended for Seed (Continued)

IF acreage reported as intended to be mechanically harvested for seed is...	AND the producer...	THEN the loss shall be determined based on...
<p>all or part of the acreage intended for mechanical harvest for seed is mechanically harvested for hay</p>	<ul style="list-style-type: none"> • timely files CCC-576 for seed, according to paragraph 401 • provides verifiable or reliable production records for seed according to paragraph 322 • before harvesting the acreage for hay, establishes representative sample areas according to subparagraph 427 B • within 15 calendar days of placement, informs County Office of the location of the sample areas for appraisal and spot check purposes • at the end of the normal harvest date for seed, and before the first freeze, requests an appraisal of the sample areas be completed 	<p>difference between:</p> <ul style="list-style-type: none"> • expected production for seed (calculated using producer's approved yield) • the sum of the actual harvested production and appraised seed production. <p>Note: The appraisal of forage for seed must include the establishment of a secure area to determine potential forage production for seed.</p>

--*

*--194.5 Mechanically Harvested Forage for Seed Provisions

D Determining Loss on Forage Intended for Seed (Continued)

IF acreage reported as intended to be mechanically harvested for seed is...	AND the producer...	THEN the loss shall be determined based on...
<p>abandoned or destroyed (acreage is not mechanically harvested in any manner or grazed)</p>	<ul style="list-style-type: none"> • timely files CCC-576 for seed, according to paragraph 401 • before abandoning or destroying the acreage, establishes representative sample areas according to subparagraph 427 B • within 15 calendar days of placement, informs County Office of the location of the sample areas for appraisal and spot check purposes • at the end of the normal harvest date for seed, and before the first freeze, requests an appraisal of the sample areas be completed <p>Note: See subparagraph C for COC responsibilities.</p>	<p>difference between:</p> <ul style="list-style-type: none"> • expected production (calculated using producer’s approved yield) • total appraised production. <p>Note: The appraisal of forage for seed must include the establishment of a secure area to determine potential forage production for seed.</p>
<p>grazed only (acreage is not mechanically harvested in any manner)</p>	<ul style="list-style-type: none"> • timely files CCC-576 for seed, according to paragraph 401 • notifies the administrative County Office of the actual use of the forage when an application for payment is filed 	<p>provisions in subparagraph E.</p> <p>Note: Losses determined on AUD value will not be used for APH purposes.</p>

--*

***--194.5 Mechanically Harvested Forage for Seed Provisions (Continued)**

E Determining Loss on Forage Acreage Intended for Seed that is Grazed Only

Alfalfa, alfalfa mixture, and other hay forage acreage certified on FSA-578 as intended to be mechanically harvested for seed, shall **always** be considered mechanically harvested acreage for crop definition purposes regardless of actual method of harvest.

Producers **shall not revise** the certified intended use of acreage reported on FSA-578. However, the actual use of the acreage, such as grazing, abandoned, or destroyed, will impact how a loss is determined on the acreage. See 2-CP for reporting acreage and “intended uses”.--*

*--194.5 Mechanically Harvested Forage for Seed Provisions (Continued)

E Determining Loss on Forage Acreage Intended for Seed that is Grazed Only (Continued)

Losses on forage acreage intended to be mechanically harvested for seed, but are grazed **only**, shall be determined according to the following table.

IF the producer...	THEN the loss shall be determined based on...
<p>provides County Office with acceptable and verifiable evidence of both of the following:</p> <ul style="list-style-type: none"> • the acreage for which CCC-576 is filed was planted to the same forage type and intended use for which a loss is being claimed for at least 3 out of 5 years before the year in which a loss is claimed • 1 of the following: <ul style="list-style-type: none"> • documentation to show that the producer is a licensed producer of certified grass seed and/or plants • copy of a grass seed contract executed on or before the applicable acreage reporting date to produce seed on the forage acreage being claimed, in the year in which the loss is claimed <p>Note: The grass seed contract shall be with a seed company that is a business enterprise that possesses all licenses for marketing commercial grass seed.</p> <ul style="list-style-type: none"> • evidence of seed production from the forage acreage being claimed for at least 3 of the 5 years before the year in which a loss is being claimed <p>Note: See subparagraph F for acceptable evidence of acreage and seed production.</p>	<p>an appraisal of the specific acreage, provided the producer:</p> <ul style="list-style-type: none"> • timely files CCC-576 for seed, according to paragraph 401 • before grazing, establishes representative sample areas according to subparagraph 427 B • within 15 calendar days of placement, informs County Office of the location of the sample areas for appraisal and spot check purposes • at the end of the normal harvest date for seed, and before the first freeze, requests an appraisal of the sample areas be completed.

E Determining Loss on Forage Acreage Intended for Seed that is Grazed Only (Continued)

IF the producer...	THEN the loss shall be determined based on...
<p>does not provide County Office with acceptable and verifiable evidence of both of the following:</p> <ul style="list-style-type: none"> • the acreage for which CCC-576 is filed was planted to the same forage type and intended use for seed which a loss is being claimed for at least 3 out of 5 years before the year in which a loss is claimed • 1 of the following: <ul style="list-style-type: none"> • documentation to show that the producer is a licensed producer of certified grass seed and/or plants • copy of contract to produce the specific type of seed that was entered into on or before the acreage reporting date for the forage acreage being claimed, in the year in which the loss is claimed • evidence of seed production from the forage acreage being claimed for at least 3 of the 5 years before the year in which a loss is being claimed <p>Note: See subparagraph F for acceptable evidence of acreage and seed production.</p>	<p>AUD value by determining the percent of loss using 1 of the methods provided in subparagraph 195 I for grazed forage.</p> <p>Note: Losses determined on AUD shall not be used for APH purposes.</p>

--*

--194.5 Mechanically Harvested Forage for Seed Provisions (Continued)*F Acceptable Evidence of Acreage and Seed Production**

Acceptable evidence that acreage for which CCC-576 is filed was planted to the same forage type and intended use for which a loss is being claimed includes 1 of the following:

- timely filed and certified FSA-578 for the applicable years
- late-filed and certified FSA-578 for the applicable years, provided **all** the requirements for a late-filed FSA-578 are met according to 2-CP
- certified reports of acreage from crop insurance.

Important: COC shall contact crop insurance agent to verify accuracy and authenticity of insurance document **before** accepting documents for NAP purposes.

Acceptable evidence of seed production from the forage acreage for which CCC-576 is filed includes, but is **not** limited to:

- production records determined acceptable for NAP APH purposes
- sales receipts
- custom harvest documents that clearly identify the amount of seed produced from the applicable acreage.

COC shall **not** accept any documentation that does **not** clearly identify the total seed produced or from which acreage the production was obtained.--*

195 Grazed Forage Provisions***--A General Information**

Grazing is the consumption of forage by livestock. It is possible to estimate the amount of forage available for consumption and therefore provide coverage for losses of the potential forage for grazing.

Alfalfa, alfalfa mixture, and other hay forage acreage certified on FSA-578 as intended to be grazed, shall **always** be considered grazed acreage for crop definition purposes regardless of actual method of harvest.

Producers shall **not** change the certified “intended use” of acreage reported on FSA-578. However, the actual use of the acreage, such as mechanical harvest for seed or forage, and abandoned or destroyed, will impact how a loss is determined on the acreage. See 2-CP for reporting acreage and “intended uses”.

Planting periods for all forage crop types with the intended use of grazing, based on STC determination, may be broken down into either full season or warm and cool season, but **not** both.

STC shall designate grazed forage types in the county as either of the following:

- full season “01”
- cool season “01” and warm season “02”.

Important: STC’s shall designate grazed forage types as either full season or warm and cool season, but **not** both.

Note: See subparagraph C about establishing warm and cool season forage.--*

195 **Grazed Forage Provisions (Continued)**

B Establishing Full Season Forage

If STC elects to designate grazed forage in a county as “**full season**”, the NCT planting period for forage crops in the county with an intended use of grazing will be “01” regardless of whether the type of forage is considered warm or cool season.

Example: Two of the forage types in the county are FTA and BHI. STC has determined that grazed forage in the county is “**full season**”. The following table provides the crop data for each of the “**full season**” forage types with intended uses of forage (FG) and grazing (GZ).

Crop Code	Crop Type	Planting Period Number	Intended Use	Pay Crop	Pay Type
0102	FTA	01	FG	0102	*--001
0102	FTA	01	GZ	0102	002
0102	BHI	01	FG	0102	001
0102	BHI	01	GZ	0102	002--*

195 **Grazed Forage Provisions (Continued)**

C Establishing Warm and Cool Season Forage

If STC elects to designate grazed forage types in a county as “**warm season**” and “**cool season**”, STC shall identify “**warm season**” and “**cool season**” forage by assigning a planting period number to each type as follows:

- “01” for cool season forage
- “02” for warm season forage.

Example: STC has determined to designate grazed forage types in the State as warm and cool season. Two of the forage types in the State are FTA and BHI. STC designated FTA as a cool season forage and BHI as a warm season forage. The following table provides the crop data based on the STC designations with intended uses of forage (FG) and grazed (GZ).

Crop Code	Crop Type	Planting Period Number	Intended Use	Pay Crop	Pay Type
0102	FTA	01	FG	0102	*--001
0102	FTA	01 (cool)	GZ	0102	002
0102	BHI	01	FG	0102	001
0102	BHI	02 (warm)	GZ	0102	002--*

Note: The same crop type and intended use **cannot** be designated as both warm and cool season. For example, FTA with an intended use of grazing **cannot** be designated as cool season and warm season in the same county; it is either warm season or cool season, but **not** both.

If STC elects to designate grazed forage types as warm and cool season, STC shall determine the period during which the particular seasonal vegetation is generally available for consumption, such as when the type of forage normally comes out of dormancy for grazing purposes.

The length of time of the warm and cool season:

- are **not** required to be equal
- combined shall **not** exceed 12 months.

The coverage period for warm and cool season forage shall correspond to STC-established grazing periods.

Note: Circumstances may warrant differences in time periods between counties; however, STC shall ensure reasonableness and consistency across the State and with adjoining States to the extent practicable.

195 Grazed Forage Provisions (Continued)

***--D Determining Loss for Forage Intended for Grazing**

Alfalfa, alfalfa mixture, and other hay forage acreage certified on FSA-578 as intended to be grazed, shall always be considered grazed acreage for crop definition purposes regardless of actual method of harvest.

The following table provides how a loss shall be determined for forage acreage reported as intended to be grazed, provided all eligibility requirements are met.

Important: COC shall ensure that the producer is aware of their responsibilities provided in subparagraphs 194 D, 194.5 C and D, and the following table.

IF acreage reported as intended as grazed is...	AND the producer...	THEN the loss shall be determined based on...
completely grazed (all acreage is grazed with no mechanical harvesting)	<ul style="list-style-type: none"> • timely files CCC-576, according to paragraph 401 • provides, at the end of the grazing period, production records of forage for similarly mechanically harvested forage acreage on the farm for which an approved yield has been calculated to determine a forage loss <p>Note: If similar acreage of forage on the farm is not available for which an approved yield has been calculated to determine a forage loss, COC shall use similar farms in the area where approved yields have been calculated for forage to determine a forage loss or, if there are no similar farms, use procedure for 2 independent assessments according to subparagraph 195 J.</p>	a percentage of loss of similarly mechanically harvested forage from forage acreage for which an approved yield has been calculated for forage to determine a forage loss or 2 independent assessments according to subparagraphs I and J as determined by COC applied to the expected AUD. <p>Note: See subparagraph E for calculating expected AUD.</p>

--*

195 Grazed Forage Provisions (Continued)

***--E Calculating Expected AUD**

Grazing is the consumption of forage by livestock. It is possible to estimate the amount of forage available for consumption and; therefore, provide coverage for losses of the potential forage for grazing.

A separate expected AUD is calculated for **each** specific crop, type, and practice based on the STC-established carrying capacity for the specific crop, type, and practice.

Note: See paragraph 107.5 for determining carrying capacities.

To calculate expected AUD, follow these steps.

Step	Action	Result
1	Determine the producer's acreage by crop, type, and practice with the same carrying capacity and grazing days.	Producer's total unit acreage for the specific crop, type, and practice with the same carrying capacity.
2	Divide the result of step 1 by the STC-established carrying capacity for the applicable acreage. Round to 4 decimal places.	Number of acres per animal unit needed for the applicable acreage.
3	Multiple the result of step 2 times the number of days in the grazing period.	Expected AUD.

Notes: Expected AUD is calculated on CCC-576C.

Expected AUD calculated in this table does **not** include any AUD adjustments that may be applicable according to subparagraphs F, G, and H.

When calculating expected AUD for acreage physically located in a different county, COC shall use the carrying capacity established for the physical location of the acreage.--*

195 Grazed Forage Provisions (Continued)

***--F AUD Adjustments for Forage Management and Maintenance Practices**

COC may increase a producer's calculated expected AUD, provided **all** the following are met:

- producer requests an increase in AUD
- adequate and verifiable evidence provided by the producer, as determined by COC, shows that the producer has undertaken 1 or more of the following supplementary pasture and range maintenance practices **beyond** the generally recognized practices:
 - seed/fertilizer applications
 - rotation, creep, strip, deferred rotation, or intensive grazing
 - drainage improvements
 - mechanical land treatment

Note: Brush control, weed control, and insect control such as grasshopper and Mormon cricket control are considered normal good farming practice measures, **not** supplementary pasture and range management practices **beyond** the generally recognized practices that would allow for a higher AUD.

- the supplementary pasture and range maintenance practices undertaken were **not** considered by STC when it established the carrying capacity for the crop, type, and practice
- STC authorizes the adjustment.

If **all** of these requirements are met, COC may increase the producer's expected AUD by:

- 3 percent when **both** of the following are met:
 - at least 1 supplementary pasture and range maintenance practice was completed at least 1 time in the previous 3 crop years
 - the supplementary pasture and range maintenance practice is expected to have a positive impact on the carrying capacity for the current crop year
- 5 percent when **both** of the following are met:
 - at least 2 supplementary pasture and range maintenance practices were completed at least 1 time in the previous 3 crop years
 - the supplementary pasture and range maintenance practices are expected to have a positive impact on the carrying capacity for the current crop.--*

195 Grazed Forage Provisions (Continued)

***--G AUD Adjustments Based on History of Carrying Capacity**

COC may increase a producer's calculated expected AUD, provided **all** the following are met:

- producer requests an increase in AUD
- adequate and verifiable evidence provided by the producer, as determined by COC, shows that the specific acreage has supported a number of animal units greater than the carrying capacity established by STC in at least 3 of the last 5 crop years
- the additional animal units were supported by **only** the forage on the acreage, and **not** by extemporaneous factors, such as supplemental feeding, livestock rotation, supplementary pasture or range maintenance practices, or other similar factors
- STC authorizes the adjustment.

If **all** these requirements are met, COC may increase the producer's expected AUD by up to 25 percent.

Increases in expected AUD of 25 percent or more **must** be approved by the National Office Livestock Assistance Program Manager. For increases of 25 percent or more, STC shall submit request to National Office Livestock Assistance Program Manager. Requests shall be FAXed to 202-690-2130, and **must** include **all** of the following:

- unadjusted and adjusted expected AUD
- number, type, and practice of forage acres impacted
- calculated payments for the unit on unadjusted and adjusted AUD
- copy of verifiable evidence submitted by producer
- copy of data STC used to establish carrying capacity for applicable acreage.--*

195 **Grazed Forage Provisions (Continued)**

H Assigning AUD

Acreage leases, rental agreements, or permits with grazing arrangements, may specify the stocking rate and grazing days for specific acreage. The specified stocking rate and grazing days may **not** be consistent with the STC-established carrying capacity.

On review of the acreage lease, rental agreement, or permit, and a determination that the specified stocking rate or grazing days is **not** consistent with the STC-established carrying capacity, COC shall assign the difference in calculated AUD.

Conversions for different units, such as AUM, may be necessary to properly calculate the assigned production. Use conversion procedures generally accepted by CSREES, NRCS, Forest Service, BLM, and forage specialists.

This procedure applies **only** to a reduction of AUD. See subparagraphs F and G for adjustment to AUD for management and maintenance practices and production.

Examples: The following is applicable to all 3 examples:

- unit acres: 800
- STC-established carry capacity: 10 acres/animal unit, 290 grazing days
- AUD calculated on the basis of STC-established carrying capacity: 23,200 AUD.

Example	Lease Requirements		Calculations
	Acres/Animal Units	Days	
1	14	290	800 ÷ 14 x 290 = 16,571 AUD 23,200 - 16,571 = 6,629 Assigned AUD Note difference in acres only .
2	14	250	800 ÷ 14 x 250 = 14,286 AUD *--23,200 - 14,286 = 8,914 Assigned AUD Note difference in both acres and grazing days .
3	10	250	800 ÷ 10 x 250 = 20,000 AUD 23,200 - 20,000 = 3,200 assigned AUD--* Note difference in grazing days only .

195 Grazed Forage Provisions (Continued)

***--I Establishing Grazing Loss**

COC shall, with STC concurrence, establish the grazing loss percentage on grazed forage acreage according to the following table.

IF...	THEN the loss shall be determined based on...
<p>the producer has similar forage acreage on the same farm that was mechanically harvested as forage for which an approved yield has been calculated to determine loss under NAP for the acreage mechanically harvested as forage</p> <p>Important: Similar forage acreage means a similar crop, type, and practice with similar soil types, slope, and elevation that was managed in a similar manner and suffered a similar loss.</p> <p>If either of the following apply, the percentage loss of the acreage mechanically harvested as forage on the producer’s farm shall not be used as similar acreage:</p> <ul style="list-style-type: none"> • perils that impacted the grazing acres were different than the perils that impacted the acreage mechanically harvested as forage on the producer’s farm • disaster conditions that impacted the mechanically harvested acreage improved or worsened after the acreage was mechanically harvested as forage. 	<p>the percentage loss of the similar forage acreage on the producer’s farm that was mechanically harvested as forage.</p>

--*

195 Grazed Forage Provisions (Continued)

*--I Establishing Grazing Loss (Continued)

IF...	THEN the loss shall be determined based on...
<p>the producer does not have similar forage acreage on the same farm that was mechanically harvested as forage for which an approved yield has been calculated to determine loss under NAP, but there are similar farms in the area that have similar forage acreage that was mechanically harvested as forage for which an approved yield has been calculated to determine loss under NAP</p> <p>Important: Similar forage acreage means a similar crop, type, and practice with similar soil types, slope, and elevation that was managed in a similar manner and suffered a similar loss.</p> <p>If either of the following apply, the percentage loss of the acreage mechanically harvested as forage on similar farms in the area shall not be used as similar acreage:</p> <ul style="list-style-type: none"> • perils that impacted the grazing acres were different that the perils that impacted the acreage mechanically harvested as forage • disaster conditions that impacted the acreage mechanically harvested as forage improved or worsened after the acreage was mechanically harvested as forage. 	<p>the percentage loss of the similar forage acreage from similar farms in the area that was mechanically harvested as forage.</p>
<p>there is no similar forage acreage on the same farm, or similar farms in the area, that was mechanically harvested as forage for which an approved yield has been calculated to determine loss under NAP for the acreage mechanically harvested as forage</p>	<ul style="list-style-type: none"> • the percentage of loss as determined by 2 independent assessments, according to subparagraph J • STC concurrence with loss determination.

--*

195 Grazed Forage Provisions (Continued)

***--I Establishing Grazing Loss (Continued)**

COC shall complete determinations of loss for different forage (annual versus perennial, etc.), using similar mechanically harvested losses or independent assessments of forage conditions, when natural disaster events do **not** consistently impact all forage acreage. Where grazed forage consists of both annual and perennial vegetation and 1 suffers damage apart from the other, COC shall determine loss for the impacted vegetation separately. COC shall determine expected AUD on the basis of the carrying capacity and calculate AUD loss based on determined percentage of loss. COC shall summarize forage losses to determine overall AUD losses.

STC shall ensure that:

- an effective and cooperative working relationship with other Federal and State agencies and institutions is maintained at both the State and county level
- each County Office has access to sources that can provide 2 independent assessments of the grazed forage acreage conditions in the area that meet the requirements in subparagraph J
- 2 independent assessments meeting the requirements of subparagraph J are obtained by COC when there is no similar mechanically harvested acreage for forage on the farm or similar farms in the area for which an approved yield has been calculated to determine loss under NAP
- all independent assessments are:
 - documented according to subparagraph J and attached to the COC meeting executive minutes
 - performed by forage specialists **not** having a financial interest in the outcome of the assessment
- the percentage of loss determined by COC, based on 2 independent assessments from forage specialists, accurately reflects the loss of grazing potential in the area by:
 - reviewing COC determination of loss on grazed forage acreage when percent of loss is based on 2 independent assessments
 - thoroughly documenting review of COC determination and 2 independent assessments in STC meeting executive minutes.--*

195 Grazed Forage Provisions (Continued)

*--I Establishing Grazing Loss (Continued)

If STC:

- concurs with COC determination of percentage of loss on grazed forage acreage, notify COC of review and concurrence
- does **not** concur with COC determination:
 - remand determination to COC
 - clearly identify reasons for non-concurrence
 - instruct COC on how to determine loss percentage.

State Office shall review **all** COC determinations about establishment of grazing losses to ensure that the proper method was used to determine the loss percentage.--*

195 Grazed Forage Provisions (Continued)

***--J Independent Assessments of Grazed Forage Acreage Conditions**

When there is no similar forage acreage on the same farm or similar farms in the area for which an approved yield has been calculated to determine loss under NAP, obtaining 2 independent assessments of the grazed forage acreage conditions is the **only** authorized method for determining a percentage of grazing loss in the area.

Both the independent assessments and the loss percentage established, based on the independent assessments, are applicable to all similarly situated producers. Therefore, neither the independent assessments nor the loss percentage established based on the independent assessments are appealable.

FSA has **no** authority to establish a grazing loss by any means other than the options provided in subparagraph I. Accordingly, if there is no similar acreage mechanically harvested as forage on the farm or similar farms in the area for which an approved yield was calculated to determine loss under NAP, and 2 independent assessments of the grazed forage acreage conditions in the area are **not** obtained:

- FSA will **not** be able to determine a percentage grazing loss in the area
- producers in the area will **not** be eligible for NAP benefits on grazed forage.--*

To be acceptable, **each** of the 2 independent assessments:

- **must** be completed by forage specialists having no financial interest in the outcome of the assessment from 1 of the following:
 - Federal, State, or local Government agency, such as NRCS, BLM, CSREES or State Land Departments
 - educational institutions, such as State land grant colleges
 - private organizations--*

195 Grazed Forage Provisions (Continued)

***--J Independent Assessments of Grazed Forage Acreage Conditions (Continued)**

- should include, at a minimum, both of the following:
 - identification of the assessor, such as name, address, telephone number, and affiliated institution, agency, or company
 - statement or chronological narration of the basis for the assessor's determinations, including statements or chronologies addressing spontaneous or progressive changes in grazing conditions.

Assessments of grazed forage acreage conditions completed by anyone other than a forage specialist **not** having a financial interest in the outcome of the assessment shall **not** be:

- accepted by FSA
- used to determine a percentage of grazing loss in the area.

The following do **not** meet the requirements of an independent assessment for NAP purposes and shall **not** be used to establish a percentage of grazing loss in the area:

- assessments completed by anyone who is **not** a forage specialist
- assessments completed by anyone who has a financial interest in the outcome of the assessment, including anyone who was paid to complete the assessment
- opinions and input from a group of representatives from agencies or institutions that may have some knowledge of the grazing conditions in the area
- assessments that do **not** meet the minimum level of documentation to support the assessment, including attaching assessments to COC executive minutes
- 1 assessor agreeing with the assessment completed by another assessor without conducting their own assessment.--*

195 Grazed Forage Provisions (Continued)

***--K Establishing an Area**

When there is no similar mechanically harvested forage acreage on the farm and no similar farms in the area with similar forage acreage that was mechanically harvested as forage for which an approved yield was calculated to determine loss under NAP, the percentage of grazing loss **must** be determined by obtaining 2 independent assessments of the grazed forage acreage conditions in the area.

COC may establish either of the following as the area for which the 2 independent assessments **must** be completed:

- entire county
- any part of the county that can clearly be delineated on a map, such as township boundaries, roads, rivers, or streams.

Note: More than 1 part of a county may be established as an area; however, 2 independent assessments **must** be completed for each separate area.

COC shall **not** establish any of the following as an area for which the 2 independent assessments **must** be completed:

- individual producer's farms or portion of their farms
- only the acreage impacted by a natural disaster, except drought.

Example 1: Some acreage in a county was burned by fire. COC shall **not** establish the area for which the 2 independent assessments **must** be completed to be the burned acreage **only**.

Example 2: Some acreage in a county was flooded by a rainstorm. COC shall **not** establish the area for which the 2 independent assessments **must** be completed to be the flooded acreage **only**.

Example 3: COC shall **not** establish the area for which the 2 independent assessments **must** be completed to be only the farm or portion of a farm of an individual producer.--*

196 Small Grain Forage**A Definition of Small Grain Forage**

--Small grain forage is a stand of pure wheat, barley, oats, triticale, or rye intended for forage for animal consumption.--

Small grain commodities intended as forage shall be considered crops separate and distinct from any other forage commodities and other intended uses of the small grain commodity.

Small grains may be produced for different intended uses, that is, forage (mechanical harvest and grazing) and grain from the same planting. In this situation, the small grain acreage may be recognized as 2 separate crops.

Example: Small grain on the same acreage intended for:

- grain for crop insurance or NAP purposes if not considered insurable
- forage for NAP purposes.

Note: When CAT is not available for the grain, the forage and grain may each be eligible for NAP coverage as separate crops if all other eligibility requirements are met.

196 Small Grain Forage (Continued)**A Definition of Small Grain Forage (Continued)**

Producers may have different share arrangements for the forage and grain crops.

Unlike other forage, small grain forage will not be considered a separate crop on the basis of mechanical harvest and grazed acreage, or warm and cool season. COC shall consider all acreage of the specific small grain intended for forage as a single crop. Small grain forage may not be broken as a crop based on the particular season of use, such as fall/winter, spring, or full season.

B Mechanically Harvested Small Grain

Small grain forage acreage intended to be mechanically harvested for animal consumption that is:

- both mechanically harvested **and** grazed will be considered mechanically harvested forage acreage

Note: An appraisal must be completed before any grazing whether before or after mechanically harvesting. See appraisal requirements in paragraph 427.

- completely grazed will be considered mechanically harvested acreage.

Note: Production will be computed on an AUD basis and extended to dollars.

C Grazed Small Grain

Small grain forage acreage intended to be grazed will always be considered grazed acreage regardless of actual harvest method.

***--Note:** See grazing loss determinations in subparagraph 195 I.--*

196 Small Grain Forage (Continued)**D Small Grain Acreage Eligibility**

Small grain crop acreage eligible for NAP assistance for forage losses includes acreage planted and reported to FSA according to paragraph 151 as intended for forage production.

Small grain interseeded with an existing stand of grass or legume is not considered small grain forage. The acreage may be eligible under the standard forage procedure provided in this part.

COC shall consider the following in all determinations of small grain forage eligibility.

- **Water source.** Water must be available for use by the livestock during the grazing period. Producers must have an established water source, such as pond, municipal water supply, etc., or the capability to support the water requirements of the livestock during the grazing period.
- **Fertilization.** Higher fertilization requirements are necessary when the small grain crop is intended for both forage and grain.
- **Fencing.** Permanent or temporary fencing must exist or be available.

COC will not approve small grain forage eligibility when questions of adequate water, fertilization, or fencing exist.

Small grain crop acreage ineligible for NAP assistance for forage losses includes:

- small grain crop acreage planted and reported without an intent of forage production (intended only for grain production)
- crop residues
- volunteer stands of small grain.

196 Small Grain Forage (Continued)

E Final Planting Dates

COC shall establish an appropriate final planting date on the basis of the intended harvest method, such as mechanical or grazed, and season of use, such as fall/winter, spring, or full season. The final planting date must reflect the latest date the small grain forage can be planted to reasonably expect to achieve 100 percent of the expected yield or carrying capacity.

***--Example:** The final planting date for fall/winter and full season small grains grazing or forage has been established as September 1 to ensure that the carrying capacity for grazing or expected yield for forage will be met. The final planting date for spring small grains grazing or forage and intended for grain has been established as October 15 to ensure that the carrying capacity for grazing or expected--* yields for forage and grain will be met.

Note: There shall only be 2 final planting dates established for small grain forage.

--197 NAP Coverage and RMA PRF Pilot Insurance Program Coverage*A Background**

In 2007 RMA began offering, in selected States and counties, 2 new pilot GRP risk management programs for PRF to provide producers the ability to purchase insurance for losses of forage produced for grazing or mechanically harvested for hay. PRF does not offer coverage for forage seed. CAT coverage is not available under the pilot PRF programs.

Section 196(a)(2)(A) of the 1996 Act provides that commercial crops or other agricultural commodities, except livestock, that is produced for food or fiber for which CAT coverage is **not** available through RMA shall be an eligible crop under NAP. NAP currently provides benefits for forage crop losses. Therefore, NAP will continue to be available to producers in those counties covered by the pilot PRF programs.

However, Section 196(h)(3) of the 1996 Act provides that producers who are eligible to receive benefits under NAP, and are also eligible to receive assistance for the same loss under any other program administered by the Secretary shall be required to elect whether to receive benefits under NAP or under the other program, but not both. Payments for the same loss, under the statute, would be payments for which there is any duplicate coverage whatsoever, such that it would cover all or part of the same period on all or part of the same acres.

Note: A producer under the PRF programs is not required to insure all acres; however, all acres under NAP must be insured.--*

--197 NAP Coverage and RMA PRF Pilot Insurance Program Coverage (Continued)*B RMA PRF-RI Pilot Program**

The RMA PRF-RI policy only covers losses because of drought. Losses are calculated using a deviation from the historical average index, as determined by RMA for a specific time period selected by the producer. Because PRF-RI does not cover all perils, NAP must be made available to producers on the same acres covered by PRF-RI to provide coverage for losses resulting from other eligible NAP conditions, such as flood, fire, and freeze.

A producer could obtain both a PRF-RI policy and NAP coverage on the same acres with the **same intended use** because the PRF-RI policy is limited to drought as a cause of loss and does not cover all perils. However, if the producer earns an indemnity payment under the PRF-RI policy for a **specific intended use**, then the producer is ineligible for a NAP payment on any of the acres covered by NAP for the **same intended use** on that unit.

A producer with an RMA PRF-RI policy:

- insures acres on a grid basis (12 x 12 mile grid), not a county or unit basis
- is not required to insure all insurable forage acres associated with the grid; however, the insured acreage cannot exceed the total number of grazing or haying acres operated
- must select at least two, 2-month time periods (called index intervals) in which acreage is insured for which precipitation is important to the growth and production of the insured's forage species
- does not have to identify the specific location of the acreage within a grid that is insured.

Note: Producers are required to identify a reference point for the insured acreage within the applicable grid(s).--*

--197 NAP Coverage and RMA PRF Pilot Insurance Program Coverage (Continued)*B RMA PRF-RI Pilot Program (Continued)**

A producer with NAP must cover all acreage of the forage species with the same intended use in the producer's unit for all perils.

Notes: An argument could be made that a producer could suffer a loss from a reduction of rainfall and another eligible NAP disaster condition, such as freeze on the same crop/acres, and therefore the producer should receive both a NAP payment and an RMA indemnity payment because they are different losses. However, this is not the case. Under the PRF-RI policy the producer does not have to insure all acres and only has to select insurance coverage for two, 2-month index intervals for the acreage insured. Under NAP, loss determinations are based upon the conditions over the entire growth period for the unit, not for a specific time period in which the disaster occurred.

Accordingly, if a producer suffered both a freeze and a reduction in rainfall on the same acres during the crop year, any NAP payment would be based, at least in part, on the loss associated to the reduction of rainfall as well as the freeze.

Producers could obtain NAP coverage on the grazing crop and a PRF-RI policy on the forage crop, or vice versa, because they are considered separate crops by both RMA and NAP.--*

***--197 NAP Coverage and RMA PRF Pilot Insurance Program Coverage (Continued)**

C County Office Action When a Producer Requests NAP Coverage in a County Eligible for RMA PRF-RI Pilot Program

County Offices shall follow the steps in this table when a producer requests NAP in an area where the PRF-RI Pilot Program is offered. The table references forage acreage intended for grazing; however, the same steps and provisions apply when the acreage is intended for mechanically harvested forage.

Step	Action	
1	A producer visits a County Office to obtain NAP coverage for acreage intended for grazing. The acreage is located in an area where the PRF-RI Pilot Program is offered.	
2	County Office determines if the producer has purchased a PRF-RI policy on any of the forage acres intended for grazing.	
3	<p>IF the producer has...</p> <p>purchased a PRF-RI policy for any of the grazing acres for any interval and grid in the NAP unit</p>	<p>THEN County Office informs the producer that...</p> <ul style="list-style-type: none"> • the only peril covered by the PRF-RI policy is the reduction of precipitation from the historical average index • he/she may obtain NAP coverage on the same acreage intended for grazing for losses because of other perils such as fire, flood, and freeze • he/she will not be eligible for any NAP benefit on any of the forage acreage intended for grazing in the unit if he/she earns an indemnity payment under the PRF-RI policy regardless of whether all acres are covered under the PRF-RI policy • the same provisions apply to his forage acreage intended for forage that is covered by a PRF-RI policy.
	<p>not purchased a PRF-RI policy for any of the grazing acres for any interval and grid in the NAP unit</p>	<ul style="list-style-type: none"> • he/she may obtain NAP coverage on his forage acreage intended for grazing • he/she will be ineligible for NAP benefits if he/she does obtain a PRF-RI policy on any of his forage acreage in the unit intended for grazing and earns an indemnity payment under the PRF-RI policy • the same provisions apply to his forage acreage intended to be mechanically harvested forage if he/she obtains a PRF-RI policy.

--*

--197 NAP Coverage and RMA PRF Pilot Insurance Program Coverage (Continued)*D RMA PRF-VI Pilot Program**

The PRF-VI policy covers multiple perils and is based upon a measure of vegetation greenness that correlates to forage condition and productive capacity. Producers whose crop is eligible for PRF-VI are required to elect either PRF-VI policy or NAP coverage by intended use, but not both, because the same perils are covered by both products.

Producers are required to make the election between obtaining NAP coverage or a PRF-VI policy by the earlier of the application closing date for NAP or the sales closing date for PRF-VI. Purchasing the PRF-VI policy is considered an election by the producer.

Note: Producers could obtain NAP coverage on forage acreage intended for grazing and a PRF-VI policy on forage acreage intended for mechanical harvest, or vice versa, because they are considered separate crops by both RMA and NAP.

A producer with a PRF-VI policy:

- insures acres on a grid basis (approximately 4.8 x 4.8 mile grid), not a county or unit basis
- is not required to insure all insurable forage acres associated with the grid; however, the insured acreage cannot exceed the total number of grazing or haying acres they operate
- must select one or more 3-month time periods (called index intervals) in which acreage is insured that represent a producer's forage species production or utilization
- does not have to identify the specific location of the acreage within a grid that is insured.

Note: Producers are required to identify a reference point for the insured acreage within the applicable grid(s).

A producer with NAP must cover all acreage of the forage species with the same intended use, in the producer's unit for all perils.--*

***--197 NAP Coverage and RMA PRF Pilot Insurance Program Coverage (Continued)**

E County Office Action When a Producer Requests NAP Coverage in a County Eligible for RMA PRF-VI Pilot Program

County Offices shall follow the steps in this table when a producer requests NAP in an area where the PRF-VI Pilot Program is offered. The table references forage acreage intended for grazing; however, the same steps and provisions apply when the acreage is intended for mechanically harvested forage.

Step	Action	
1	A producer visits a County Office to obtain NAP coverage for acreage intended for grazing. The acreage is located in an area where the PRF-VI Pilot Program is offered.	
2	County Office determines if the producer has purchased a PRF-VI policy on any of the forage acres intended for grazing.	
3	IF the producer has...	THEN County Office informs the producer that he/she...
	purchased a PRF-VI policy for any of the grazing acres for any interval and grid in the NAP unit	<ul style="list-style-type: none"> • is not eligible to participate in NAP on any of the forage acreage intended for grazing • may obtain NAP coverage on his/her forage acreage intended for mechanically harvested forage, provided he/she will not obtain a PRF-VI policy on these acres.
	not purchased a PRF-VI policy for any of the grazing acres for any interval and grid in the NAP unit	<ul style="list-style-type: none"> • may obtain NAP coverage on his/her forage acreage intended for grazing provided he/she will not obtain a PRF-VI policy on these acres • will be ineligible for NAP benefits if he/she does obtain a PRF-VI policy on any of his/her forage acreage in the unit intended for grazing • may obtain NAP coverage on his/her forage acreage intended for mechanically harvested forage, provided he/she will not obtain a PRF-VI policy on these acres.

198, 199 (Reserved)

--Section 3 Tropical Region Provisions*200 Coverage for Tropical Regions****A Introduction**

Because of the unique growing climate, agricultural producers in tropical regions typically plant annual crops in a continuous, year-round planting and harvesting cycle. Before amendment 27, each planting was considered a separate crop requiring established planting periods, separate applications for coverage and service fees, and separate records for planting and harvesting. The reporting of numerous planting periods imposes an undue burden on producers in the tropical regions. Accordingly, procedure has been modified to eliminate multiple planting periods in the tropical region and makes other modifications as necessary to implement a single planting period policy for the tropical region.

B Tropical Region

[7 CFR §1437.501] Tropical region is land south of the Tropic of Cancer (23.5 degrees north latitude) and, for the purposes of this program, shall include Hawaii, Puerto Rico, American Samoa, Guam, the U.S. Virgin Islands, and the former Trust Territory of the Pacific Islands (the Commonwealth of Northern Mariana Islands, the Republic of the Marshall Islands, the Federated States of Micronesia, and the Republic of Palau).

201 Tropical Region Eligibility**A Applicability**

Beginning with the 2006 crop year, assistance for loss on eligible crops in the tropical region will be determined, according to the procedure in this section. All other procedure remains applicable for the administration of NAP in the tropical region.

B Covered Crops

Covered tropical crops are those in the ground on or after January 1 through December 31, of each year (beginning in 2006 through subsequent years), which include:

- annual crops, where all plantings of the same crop are planted during the crop year
- perennial or biennial crops, where all acreage of the crop is existing during the crop year.

Note: There is no change to value-loss crops under this section. County offices shall continue to follow value-loss procedure, according to paragraph 181.--*

***--201 Tropical Region Eligibility (Continued)**

C Crop Year

[7 CFR 1437.502] The crop year for all covered crops and commodities, is the calendar year (January 1 through December 31).

D Application Closing Date

[7 CFR 1437.502] The application closing date for all crops is December 1 of the calendar year before the applicable crop year.

E Multiple Planting Periods

Multiple planting periods and final planting and harvesting dates are not applicable for covered tropical crops.

F Service Fees

A service fee of \$100, according to paragraph 24, is required for coverage on:

- annual crops, for all plantings of the same crop planted during the crop year
- perennial and/or biennial crops, for all acreage of the crop existing during the crop year.

G Coverage Period

[7 CFR 1437.502] The coverage period for all crops and commodities begins the later of January 1 or the date the crop acreage is planted, and ends the earlier of the date the crop acreage is harvested, abandoned, or destroyed, or December 31 of that calendar year.--*

***--201 Tropical Region Eligibility (Continued)**

H Eligible Causes of Loss

[7 CFR 1437.502] For American Samoa, Guam, the U.S. Virgin Islands, and the former Trust Territory of the Pacific Islands, eligible causes of loss include only hurricanes, typhoons, named tropical storms, and other related natural disasters, as determined by DAFP.

Note: For Hawaii and Puerto Rico, all natural weather-related disasters are eligible causes of loss according to paragraph 21.

I Prevented Planting

[7 CFR 1437.502] Prevented planting provisions are not applicable (except Hawaii and Puerto Rico) to: American Samoa, Guam, the U. S. Virgin Islands, and the former Trust Territory of the Pacific Islands, because of the unique planting and harvesting practices in these areas and the limited eligible causes of loss.--*

202 Required Records

A Contemporaneous Records

For any covered crop acreage for which an application for coverage is filed, a producer must keep acceptable contemporaneous records created at the time of planting and through the harvest of the crop for the full period of coverage. These records must include date and location, and according to crop type grouping on the unit, the amount of:

- acreage planted
- production appraised and harvested.

Note: For harvested production the producer must provide an explanation of disposition including where and when sold.

B Reporting Requirements

When loss occurs, producers are required to report acreage planted and production harvested from those acres that existed at the time of disaster. This information must be provided at the time notice of loss is filed and shall be captured on the CCC-576 application for payment.

Note: The County Office shall obtain this information from the contemporaneous record kept according to subparagraph 202 A. A photocopy of the map shall be attached to CCC-576 delineating the crop acreage affected by disaster.

At the end of the crop year, all producers will be required to summarize acreage planted during the crop year and actual production (harvested and appraised) from those acres, no *--later than March 31 of the subsequent crop year. If the report is for any annual or perennial crop where production continued or could have continued beyond the period covered in the reports, then an additional report of production shall be filed the later of:

- within 30 days of the end of the last countable production for the covered crop
- 30 days after the last date on which such production could have been obtained.

Note: Claims for losses before the reporting date cannot be calculated until all production is submitted.--*

Acreage shall be reported on FSA-578, according to 2-CP. Actual production shall be certified on the CCC-452 according to Exhibit 25.

--202 Required Records (Continued)*C Notice of Loss**

Under tropical region provisions the disaster event is the trigger mechanism for determining a qualifying loss. As a result, the COC is required to accept each notice of loss. For annual and multiple planted crops, the notice of loss taken for the existing acreage will be used to determine whether a qualifying loss occurred for that disaster event. For perennial and biennial crops, the notices of loss filed during the crop year will be used to determine whether a qualifying loss occurred at the end of the crop year. Notices of loss shall be considered timely filed if received in the administrative County Office:

- for American Samoa, Guam, the U.S. Virgin Islands, and the former Trust Territory of the Pacific Islands, within 15-calendar days after the occurrence of the eligible natural disaster or date damage was apparent to producer
- for Hawaii and Puerto Rico, according to the procedure in subparagraph 401 A.

Notes: A notice of loss shall only be considered timely filed if all information in subparagraph B is provided.

Late-filed notice of loss provisions found in subparagraph 401 B do **not** apply to tropical regions.

See paragraph 181 for value loss crops.

Prevented planting coverage is not available for tropical regions, except Hawaii and Puerto Rico.

County offices shall follow subparagraph 401 C for processing CCC-576 Part B submitted by the producer.--*

--202 Required Records (Continued)*D Loss Adjustments**

Loss adjustments are:

- not required for covered crops in American Samoa, Guam, the Virgin Islands, or the former Trust Territory of the Pacific Islands, unless specifically determined necessary by DAFP
- required for covered crops in Hawaii and Puerto Rico, according to subparagraphs 401 C through F.

Note: Producers are required to certify that covered crop acreage affected by eligible cause of loss is appraised and released by a loss adjuster before destruction of crop residue to maintain NAP eligibility. Producers are required to sign final appraisal and CCC-576-1 before signature of loss adjuster to signify agreement with appraisal.

E Application for Payment

Under tropical region provisions, a separate CCC-576 will be filed for annual and multiple planted crop acreage that existed at the time of the disaster event. For perennial and biennial crops, only 1 CCC-576 will be taken, normally after 1 of the following:

- harvest is complete
- end of the growing season
- when the acreage is released by a CCC representative.

Applications for payment shall be considered timely filed if received in the administrative County Office no later than:

- for American Samoa, Guam, the U.S. Virgin Islands, and the former Trust Territory of the Pacific Islands, the same time the notice of loss is filed.

Note: It is anticipated that the eligible causes of loss in these areas would reflect a 100 percent loss.

- for Hawaii and Puerto Rico, the later of the:
 - date the notice of loss was filed
 - normal harvest completion date in the area for the specific covered crop.--*

--202 Required Records (Continued)*F Loss Calculations**

NAP assistance for tropical regions is calculated based on acres that exist at the time of disaster. When a natural disaster occurs, loss will be determined for:

- **annual crops** (cucumber, squash, cabbage, etc.) by taking the acres that existed at the time of loss times the approved yield to get the expected production; the expected production shall be multiplied by 50 percent to obtain the disaster loss level, and any production harvested or appraised from those acres that existed during the disaster will be subtracted from the disaster loss level to determine if over a 50 percent loss occurred
- **biennial crops** (plantain, banana, pineapple, etc.) and **perennial crops** (grasses, etc.) normally after either:
 - harvest is complete
 - end of the growing season
 - when acreage is released by a CCC representative.

County Offices will take the acreage in existence during the crop year times the approved yield to get the expected production. The expected production shall be multiplied by 50 percent to obtain the disaster loss level, and any production harvested (including multiple harvests) or appraised from those acres that existed during the crop year will be subtracted from the disaster loss level to determine if over a 50 percent loss occurred.

County Offices shall follow paragraphs 282 and 283 for manual payment calculations for grazing and yield-based crops.--*

203-250 (Reserved)

Part 5 Yields**Section 1 Basic Procedure****251 Overview****A Purpose**

The purpose of this part is to:

- explain NAP approved yield procedure
- identify rules that apply to NAP yields
- provide instructions for calculating NAP approved yields.

B Objective of NAP Yields

NAP yield determination methods:

- provide flexibility in the initial year of coverage for producers who are unable to provide acceptable records
- provide a sound basis for determining a producer's expected production of a crop
- safeguard the integrity of NAP.

C Summary of Basic APH Procedure

*--Approved yields:

- are calculated by a producer's unit, not by individual or entity--*
- for producers who:
 - do not have records of past production, are limited to 65 percent of the applicable T-yield the first year the producer and crop are considered for NAP eligibility
 - are able to provide acceptable records of production for 1 to 3 years of actual yields, will be calculated using a combination of variable T-yields and actual yields
 - are new producers of a crop, may have an approved APH yield calculated based on unadjusted T-yields or a combination of unadjusted T-yields and actual yields.

Note: Special procedure for producers who grow feed or forage for on-farm use
--was discontinued with the 2001 crop year.--

251 Overview (Continued)

C Summary of Basic APH Procedure (Continued)

Producers who report NAP crop acreage are responsible for reporting production for all crops selected on CCC-471, according to the:

- requirements of:
 - 7 CFR 1437.7
 - subparagraph 151 D
 - subparagraph 174 E
- instructions in Part 6.

Exception: Approved yields and APH are not applicable to value loss crops, controlled environment crops, and grazed forage. See Part 4 for:

- value loss crops
- grazed forage
- controlled environment crops.

***--D Approved Yield Requirement**

Once an approved yield is established, County offices are required to calculate approved yields for each year a crop is on CCC-471. This should be done:

- in the system rather than manually
- when the necessary information is provided by the producer, such as acreage is reported and production is submitted according to Part 6.

Exception: Approved yields are not applicable to:

- value loss crops
- grazed forage
- controlled environment crops.

Once a producer has had NAP coverage on a crop, they are required to report acreage of that crop each year thereafter. If the producer requests coverage for the crop in a nonconsecutive year, all production for all noncovered years between covered years is required so that a manual CCC-452 can be completed for each noncovered year to maintain continuity of records.--*

251 Overview (Continued)***--E Tree Bearing Crops**

Tree bearing crops, such as apples or peaches, should not have a separate approved yield for the intended uses of fresh and processed, where the crop is taken to 1 market. Production shall be collected by both intended uses and combined in the databases with total acres and production under fresh and processed.

If separate databases and approved yields have been maintained for fresh and processed, combine the fresh and processed data, and then load the total acres and production under both intended uses. Recalculate the prior approved yield to reflect the combined acres and production and enter the resulting approved yield for both intended uses.

Both databases are needed to calculate a loss for either intended use.

When calculating a loss, the loss will be based on the majority of the marketing.--*

252 References to Regulations and Procedure**A Applicable Regulations**

Regulations applicable to NAP yields appear in **7 CFR Part 1437**.

B Policy

NAP yields shall be established based on:

- procedure within this handbook
- regulations in subparagraph A.

253 Types of Yields

A NAP Yields

Definitions of all types of yields are in this table.

*--

Type of Yield	Usage and Meaning	References
Actual Yield; "A"	The total amount of harvested and appraised production on a per acre or other basis, as applicable.	Paragraph 255
Added Practice, Type, Intended Use, or Planting Period; "C"	A yield equal to 80, 90, or 100 percent of the T-yield for any crop year for units that qualify for the "added practice, type, intended use, or planting period" rule.	Subparagraphs 287 A and E
Approved Yield	The APH-calculated yield approved by CCC for making NAP payments. The yield represents a unit's expected production on a per acre or other basis, as applicable.	Paragraph 254
Assigned Yield; "P"	A 1-time yield assigned for a crop year in the base period for which the producer does not file an acceptable production report by PRD. The yield is equal to 75 percent of the prior year approved yield for the crop year in which a report of acreage was not provided or acceptable. A producer can have only 1 assigned yield in an APH base period.	Paragraph 257
Bypass Year; "B"	An APH database entry of "B" in the yield type field indicating that no report of acreage planted was filed. It is not an actual or T-yield. Note: Bypass year applies only if a producer has not filed CCC-471 for the crop year in which the bypass year is used.	Subparagraph 271 C
County-Expected Yield	The amount of average production potential of the crop in the county by practice and intended use on a per acre or other basis, as applicable.	Paragraph 107
Disaster Yield	The unit's total amount of harvested, appraised, and assigned production (net production) on a per acre or other basis, as applicable.	Paragraph 331
Livestock Exception; "X"	A yield for units qualifying for a livestock exception for 1999 or prior years.	Paragraph 283
New Producer; "T"	A yield equal to 100 percent of the T-yield for units that qualify for the "new producer" rule.	Subparagraphs 282 A through D
Replacement Yield; "R"	A yield equal to 65 percent of the T-yield that may replace an actual or appraised yield any year in the base period when the actual or appraised yield is less than 65 percent of the T-yield because of a natural disaster.	Paragraph 256

--*

253 Types of Yields (Continued)

A NAP Yields (Continued)

*--

Type of Yield	Usage and Meaning	References
Special COC Approved Yield; "Q"	A yield equal to less than 100 percent of the T-yield for units that meet the "special COC-approved yield" rule. The yield must be determined and loaded.	Subparagraph 282 E
Substitute Yield; "U"	For those producers who previously participated in NAP before the Agricultural Risk Protection Act, 2000 and reported acreage but no production, the producer may choose to substitute an assigned or zero credited yield with 65 percent of the T-yield 1 time for all assigned or zero credited yields in the APH database for any year before the first year of NAP participation after 2000.	Paragraph 259
T-yield	An estimated yield equal to the county-expected yield used to calculate individual producer-approved yields when less than 4 consecutive years of production records are available.	Paragraph 260
Zero Acres Planted; "Z"	An APH database entry of "Z" in the yield type field indicating an acreage report of zero acres planted or prevented planted acres.	Subparagraph 271 D
Zero Credited Yield; "O"	<p>An APH database entry of "O" in the yield type field indicating that COC has assigned a yield in a previous year and any of the following apply:</p> <ul style="list-style-type: none"> • CCC-471 was filed, but no acreage report was filed • no production report was filed • if acreage is increased by more than 100 percent over any year in the preceding 7 crop years, or if acreage of the crop has increased significantly from the previous crop years, unless exceptions apply. 	<ul style="list-style-type: none"> • Paragraph 258 • Paragraph 323 • Subparagraph 152 A
65 Percent of the T-Yield; "S"	A yield equal to 65 percent of the T-yield when acres and production are left blank and there are no actual yields in the database. The unit is eligible for up to 4 years of 65 percent of the T-yield.	Subparagraph 254 D
80 Percent of the T-Yield; "E"	A yield equal to 80 percent of the T-yield when acres and production are left blank and there is 1 actual yield in the database. The unit is eligible for up to 3 years of 80 percent of the T-yield.	Subparagraph 254 D
90 Percent of the T-Yield; "N"	A yield equal to 90 percent of the T-yield when acres and production are left blank and there are 2 years of actual yields in the database. The unit is eligible for up to 2 years of 90 percent of the T-yield.	Subparagraph 254 D
100 Percent of the T-Yield; "T"	A yield equal to 100 percent of the T-yield when acres and production are left blank and there are 3 years of actual yields in the database. The unit is eligible for 1 year of 100 percent of the T-yield.	Subparagraph 254 D

--*

254 Approved Yields

A Background

The statute authorizing NAP (Pub. L. 104-127) stipulates that approved yields for producers shall be determined using APH of not less than 4 previous consecutive crop years and not *--more than 10 consecutive crop years with the exception of apples and peaches that is based on a maximum of 5 consecutive years.--*

Producers do **not** have the option of having an approved yield calculated based on a T-yield or records of production for previous crop years. The approved yield shall be calculated based on records if acceptable records for the crop are available. Once acreage and production are certified, they will remain in the producer's data base for approved yield purposes.

Approved yields are based on an average APH yield, which can include actual yields, replacement yields, assigned yield, zero credited yield, substitute yields, and T-yields divided *--by the number of yearly yields in the data base. At least 4 and up to 5 or 10 consecutive crop years, as applicable, of these types of yields must exist in the APH base period.

B Base Period

The base period for APH crops is a maximum of ten APH crop years, not calendar years,--* immediately preceding the crop year for which an approved yield is calculated.

For APH data base purposes, APH crop year does not include any year that the crop was any of the following:

- not planted
- prevented from being planted
- for any APH crop year after an initial approved yield is calculated, not reported as planted or prevented from being planted.

Exceptions: The base period for:

- *--apples and peaches is a maximum of the 5 most recent APH crop years--*
- crops with a lag year, such as AZ-CA citrus, macadamia nuts, sugarcane, and Texas citrus fruit, begins with the 1999 APH crop year for crop year 2001.

254 Approved Yields (Continued)

C Disaster Records

When processing approved yields, COC shall:

- review prior year disaster records
- consider all harvested and appraised production from planted acreage
- disregard any disaster year assigned production
- determine an actual yield of zero for any year in the base period for which the producer did not harvest planted acreage and an acceptable appraisal is not available
- disregard prior year prevented planted acreage.

254 Approved Yields (Continued)

D Calculating Approved Yield

--[7 CFR 1437.101] The approved yield established for the producer is equal to the average-- of the yields included in the APH database that include:

- actual yields certified by the producer
- T-yields established according to paragraph 260
- assigned yields determined by COC according to paragraph 257
- a zero yield according to paragraph 258
- replacement yield according to paragraph 256
- substitute yield according to paragraph 259.

An approved yield is based on consecutive years of production records, not to exceed ten APH crop years. A T-yield is used in the approved yield calculation when less than 4 consecutive crop years of actual, assigned, or zero credited yields are available.

The basic formula for calculating the percentage of the T-yield for approved yields is according to this table.

IF...	THEN calculate the current year approved yield based on the simple average of...
producer certifies production records or has any combination of actual, replacement, zero credited, substitute, or assigned yields for 4 through 10 years	those yield years.
producer certifies production records for 3 years and there are no zero credited, substitute, or assigned yields in the APH database	the 3 yield years plus 100 percent of the applicable T-yield for the missing year.
producer certifies production records for 2 years and there are no zero credited, substitute, or assigned yields in the APH database	the 2 yield years plus 90 percent of the applicable T-yield for the missing years.

254 Approved Yields (Continued)

D Calculating Approved Yield (Continued)

IF...	THEN calculate the current year approved yield based on the simple average of...
producer certifies production records for 1 year and there are no zero credited, substitute, or assigned yields in the APH database	the 1 yield year plus 80 percent of the applicable T-yield for the 3 missing years.
there has not previously been an approved yield calculated and there are no production records	65 percent of the applicable T-yield for each of the missing years. Notes: If applicable according to paragraph 283, use 80 percent of applicable T-yield for each of the missing years for livestock feed producers. Use 100 percent of applicable T-yield for each of the missing years for new producers according to paragraph 282.

Notes: An assigned, zero credited, or substitute yield shall not be considered derived from producer-certified production records for the purpose of attaining a higher percentage of T-yield.

*--An assigned, zero credit, or substitute yield is not counted when determining how many years will be filled with a percentage of the T-yield.

Example: If a producer has 1 year of assigned yield and 1 year of actual yield, the producer will receive 2 years of 80 percent of the T-yield.--*

254 Approved Yields (Continued)

* * *

E Special Considerations for Approved Yield Calculations

To establish an approved yield for a producer, special consideration must be made for each of the following according to Section 2:

- continuity or breaks therein
- new producer
- feed and forage grown for on-farm use
- center pivot irrigation system
- succession-in-interest eligibility
- yield limitations, including cups
- *--added land/practice/type/intended use/planting period--*
- combining and dividing APH databases
- unit relationship.

F Manual Calculation of Approved Yields

If approved yields cannot be calculated using the automated system, a manual calculation may be done using CCC-452 Manual. See Exhibit 25.

255 Actual Yields

A Using Actual Yields

Actual yields are used in the APH base period to compute approved yields for a unit. Actual yields are used for each year in the APH base period for which both acreage and production are certified for the crop and unit.

B Determining Actual Yields

Use this table to calculate actual yields.

Step	Action
1	Add the total harvested and appraised production of the unit’s crop for which the producer has provided a certification that can be supported by an acceptable record. Note: If the unit has both reported and determined production, use determined production.
2	Total the certified planted acreage of the crop in the unit. Note: If the unit has both reported and determined acreage, use determined acreage.
3	Divide step 1 by step 2. The result is the unit’s actual yield.

256 Replacement Yield

A Using Replacement Yield

A replacement yield may be recorded in the unit’s APH database period for the crop when an actual or appraised yield is less than 65 percent of the T-yield because of a natural disaster.

--For producers who file an approved notice of loss, the replacement yield for that crop may be updated. Producers who did not file an approved notice of loss will be required to request-- from COC the use of a replacement yield. The replacement yield shall:

- be equal to 65 percent of the T-yield
- replace any actual or appraised yield that is less than 65 percent of the T-yield
- *--be determined annually based on the current year’s T-yield.--*

Note: A replacement yield cannot be used in the APH database period to replace an assigned or zero credited yield.

257 Assigned Yield

A Background

[7 CFR 1437.7 (f)] After an initial approved yield is calculated for any crop year, COC shall assign a yield for the earliest crop year in the APH base period for which the producer does not file a production report according to subparagraph 323 A or reported production is not acceptable.

Producers can only have 1 assigned yield in the APH database per crop per unit.

Note: A producer cannot receive another assigned yield in a subsequent year unless acceptable production records are provided for the missing year or the 1-time option of using substitute yields has been taken. If a producer previously received an assigned yield for which acceptable production records have not been provided and fails to provide acceptable production records, a zero credited yield will be used in the APH base period.

An assigned yield:

- shall be 75 percent of the producer's prior approved yield for the crop year in which a report of production is not provided.

Example: A crop unit has a 1998 approved yield of 100 units per acre. The producer certifies 1998 crop acreage. The producer does not certify production for the 1998 crop acreage. The unit shall have an assigned yield of 75 (equal to 75 percent of the 1998 approved yield) entered in the APH database for the 1998 APH crop year.

- is not recalculated each year
- remains in the database for the entire base period.

B Using Assigned Yield

When calculating an approved yield, the assigned yield is:

- used as the APH database yield in the year for which assigned
- not considered a yield based on a certified production record when determining the percentage of a T-yield according to subparagraph 254 D.

An assigned yield may not be used in place of a production report in the disaster year for which a NAP payment is requested.

257 Assigned Yield (Continued)**C Substituting Assigned Yield**

An assigned yield may be substituted in the APH database by an actual yield if an acceptable record of production is provided.

Note: See paragraph 261 for determining when the revision in the APH database takes effect.

A 1-time substitution of an assigned yield shall be made according to paragraph 259 during the first crop year after 2000 that any producer on the unit files an application for coverage for the crop.

258 Zero Credited Yield**A Using Zero Credited Yields**

*--A zero credited yield shall be recorded in the unit's APH database period for the crop if COC has, for a previous crop year within the APH database period, assigned a yield according to subparagraph 257 A, and any the following apply:

- CCC-471 was filed, but the producer does not file an acreage report--*

Note: If, in this same situation, the producer does not have an assigned yield, follow paragraph 257 and apply 75 percent of the producer's approved yield for the missing year of acreage or production.

- the producer does not file a production report according to subparagraph 323 A
- the acreage of the crop in the administrative county for the crop year has increased more than 100 percent over any year in the preceding 7 crop years, or increased significantly from the previous crop years, as determined by COC according to subparagraph 152 A.

Note: See subparagraph 152 B for exceptions.

B Replacing Zero Credited Yields

A zero credited yield may be replaced in the APH database by an actual yield if an acceptable record of production is provided.

Note: Refer to paragraph 261 for determining when the revision in the APH database takes effect.

A 1-time substitution of a zero credited yield shall be made according to paragraph 259 during the first crop year after 2000 that a producer files an application for coverage.

259 Substitute Yield

A Background

An approved yield is established whenever a producer applies for NAP. Some producers who applied for NAP before 2001 have failed to report production since that time. With the implementation of the Agricultural Risk Protection Act of 2000, producers must pay a service fee for NAP protection. To allow all producers to have an equitable yield after the implementation of the Agricultural Risk Protection Act of 2000, a yield equal to 65 percent of the T-yield shall be substituted for assigned or zero credited yields established for any *--years before the first year of NAP participation after 2000.--*

B Using Substitute Yield

If an approved yield was calculated before 2001, but production data was not filed in subsequent years, a 1-time substitution of 65 percent of the T-yield shall be made for all years for which an assigned or zero credited yield is included in the APH database. The 1-time substitution shall be made during the first crop year after 2000 that any producer on the unit files an application for coverage for the crops.

For all years in which a substitute yield is applicable, the substitute yield shall be based on *--the T-yield for the year when the approval yield was originally established, **not** the T-yield--* for the APH crop year from the database.

A substitute yield:

- is not recalculated each year
- remains in the database for the entire base period.

C Exceptions

A substitute yield shall not be used when:

- the assigned yield is greater than 65 percent of the T-yield

Note: The assigned yield shall be kept for the applicable year.

- an acceptable record of production is provided that is higher than 65 percent of the T-yield. The actual production shall be used for the applicable year.

260 T-Yields

A Using T-Yields

[7 CFR 400.52 (p)] A T-yield is an estimated yield for certain crops used to calculate an individual producer's approved yield when less than 4 consecutive crop years of actual, *--assigned, replacement, substitute, or zero credited yields, as applicable, are available.--*

B Basis of T-Yields

T-yields are equal to county-expected yields for the type or variety of crop for the year in which an approved yield is being calculated.

C T-Yield Adjustments

COC shall reduce T-yields for individual producers when it is determined that an unadjusted T-yield does not accurately reflect the productive capability of specific crop acreage. T-yield reductions are authorized for, but not limited to:

- acreage cultivated or farmed in manner inconsistent with the practices for which the basis for the T-yield was established

Example: A county-expected yield is the basis for a crop's T-yield. The county-expected yield is based on irrigation. There is not an approved county-expected yield established for nonirrigation. COC shall reduce the T-yield by a factor to account for nonirrigation before performing an approved yield calculation.

- acreage located on land not indicative of land used as a basis for the T-yield, or land that is prone to damage from a specific natural disaster

Example: Crop acreage is seeded within a 5-year flood plain. COC applies a T-yield reduction factor of 20 percent to account for the probability of damage from flood.

- acreage that is located on land identified by RMA as high risk or unrated
- immature orchards or vineyards, or sparsely populated orchard crop acreage based on normal spacing according to paragraph 307.

Note: Yield reduction charts used for insurance purposes may be considered when making required T-yield adjustments.

261 Revising Approved Yields

A**Revising
Databases**

*--Producers may replace assigned yields, zero credited yields, substitute yields, T-yields, or bypass year indicators as follows:

- assigned yields, zero credited yields, substitute yields, and T-yields may be--* replaced in the database by providing an acceptable certification on CCC-452, when available, and a record of production for that year
 - bypass year indicator may be replaced in the database, if both of the following apply:
 - a late-filed acreage report is submitted and approved according to 2-CP, paragraph 21
 - producer submits an acceptable certification on CCC-452, when available, and a record of production for that year.
-

B**Effective Date**

The effective date of the revised approved yield, based on the revised database, is determined as follows:

- *--if production records are received by PRD of the latest year applicable to the APH database, the approved yield may be revised for the current year
- if production records are **not** received by PRD of the latest year applicable to the APH database, the approved yield calculations may be revised for the subsequent year.

Example: The producer has a 2001 approved yield that is based on a database which contains an assigned yield. The producer has submitted production records to replace the assigned yield after the 2000 PRD.--* The approved yield will not be recalculated until 2002.

262-270 (Reserved)

Section 2 Special Considerations

271 Continuity

A
**Continuity of
Records**

Continuity of records is required when calculating an approved yield. The records must be consecutive, without any breaks.

B
**Initial Yield
Establishment**

A break in continuity must be considered when COC is calculating an approved yield for the first time.

If there are no acceptable records, either certified by the producer or from disaster records for a previous year in the APH base period and an approved yield has never before been calculated, a break in continuity occurs. The initial approved yield shall be calculated without regard to acceptable records before the break in continuity.

When calculating an approved yield for the first time, continuity is not interrupted if in any APH crop year, the crop was not any of the following:

- planted
 - produced because of an eligible disaster condition
 - reported as planted or prevented.
-

Continued on the next page

271 Continuity (Continued)

B
Initial Yield
Establishment
(Continued)

Example 1: For the 2001 crop year, COC is calculating an approved yield of a specific crop for a producer. The crop does not have a previous crop year approved yield calculated. The producer had previously reported acreage of the specific crop; however, the producer had not certified production and was unable to produce records to support a certification of production for the 1999 crop year.

A break in continuity has occurred with the 1999 crop year, displayed in this table.

Year	Situation
2000	<ul style="list-style-type: none"> • 100 acres planted • Producer certifies acreage and production.
1999	<ul style="list-style-type: none"> • 100 acres planted • Producer did not certify production and was unable to produce records to support a certification of production.
1998	No acreage is planted.
1997	<ul style="list-style-type: none"> • 100 acres planted • Disaster records available.
1996	<ul style="list-style-type: none"> • 100 acres planted • Disaster records available.

Production records for the crop years before 2000 cannot be used in the calculation of an approved yield for the 2001 crop year.

Therefore, the 2001 approved yield is calculated based on a simple average of crop year 2000 actual APH yield and 3 years of 80 percent T-yield for 1999, 1998, and 1997.

Continued on the next page

271 Continuity (Continued)

B Initial Yield Establishment (Continued)

Example 2: For the 2001 crop year, COC is calculating an approved yield of a specific crop for the producer. The crop does not have a previous crop year approved yield calculated. The producer had previously reported acreage of the specific crop; however, the producer had reported no acreage planted for crop years 1999 and 1998.

No break in continuity has occurred in the 1999 and 1998 crop years because acreage of the crop was not planted. However, in 1995 the producer had crop acreage for which the producer could not furnish production records. Thus, a requisite 4 years is obtained as displayed in this table.

Year	Situation
2000	<ul style="list-style-type: none"> • 100 acres planted • Producer certifies acreage and production.
1999	No acreage is planted.
1998	No acreage is planted.
1997	<ul style="list-style-type: none"> • 100 acres planted • Disaster records available.
1996	<ul style="list-style-type: none"> • 100 acres planted • Disaster records available.
1995	<ul style="list-style-type: none"> • 100 acres planted • Producer did not certify production and was unable to produce records to support a certification of production.

The 2001 approved yield is calculated based on a simple average of crop years 2000, 1997, and 1996 actual APH yields and 1 year of 100 percent T-yield for 1995.

271 Continuity (Continued)

C Bypass Year

Continuity is not broken when a producer fails to report crop acreage. Before the 2001 crop year, NAP did not require a zero acreage report.

Note: Beginning with the 2001 crop year, a producer who pays the service fee is required to report acreage.

A bypass year indicator “B” will be recorded in the unit’s APH database if either of the following apply:

- before 2001, if a producer did not file an acreage report for a specific crop year
- *--for 2001 and later, if a producer does not pay the service fee and does not file an acreage report and production.

The approved yield calculation will not consider the bypass year an APH crop year.

Example: The producer’s not filing an acreage report in 2006 did not cause continuity to be broken. The 2006 year is not considered an APH crop year because it is a bypass year.

Year	Approved Yield	Acreage Certified	APH Yield
2007	100	50	100
2006	100	No Report	“B” (bypass)
2005	100	50	100
2004	100	50	100
2003	100	50	100

Note: For the bypass year to be applicable, there must be a prior approved yield.--*

271 Continuity (Continued)

D Zero Acres Planted

Continuity is not broken when a producer certifies that zero acres of a crop were planted. When a producer reports zero crop acreage planted, indicator “Z” shall be recorded in the unit’s APH database period.

***--Example:** The producer’s filing a zero acreage report in 2006 does not cause continuity to be broken. The 2006 year is not considered an APH crop year because it is a zero acres planted year.

Year	Approved Yield	Acreage Certified	APH Yield
2007	100	50	100
2006	100	Zero acres planted	“Z”
2005	100	50	100
2004	100	50	100
2003	100	50	100

Zero production must be loaded when zero acres are loaded. Zero acres planted is also used when there is a change of use.

Example: CCC-471 was taken for grass for forage, but the grass was grazed. If the producer met all obligations, such as reporting the actual use and reporting loss, if applicable, use the zero acres planted yield type.

Zero acres planted is applicable without regard to NAP participation.--*

272-281 (Reserved)

Section 3 Unusual and Special Situations

282 New Producer

A Definition of New Producer

[7 CFR 1437.102] A new producer is a producer who has not been engaged in farming for a share of the production of the crop for more than 2 crop years.

Notes: The formation or dissolution of an entity, which includes individuals with more than two APH crop years of production history during the base period, does not qualify the new entity as a new producer for APH yield determination purposes.

--If successor-in-interest rules apply according to paragraph 285, then new producer rules are not applicable.--

B Policy

To qualify for new producer provisions, all producers on the unit must meet the definition of new producer.

New producers shall have approved yields calculated based on a combination of:

- 100 percent of the applicable T-yield for each year of the minimum base period for which there is no record of production
- any actual yield for each year of the minimum base period.

Note: Special provisions for FCIC pilot county T-yields are not applicable.

Example: Producer A first planted a watermelon crop in 2001. The approved yield will be calculated as follows. (T = 100 cwt.)

1997 = 100	1998 = 100	1999 = 100	2000 = 100	2001 approved yield = 100 cwt.
------------	------------	------------	------------	--------------------------------

282 New Producer (Continued)

B Policy (Continued)

New producers who have produced the crop for 1 or 2 crop years are required to provide production for these crop years. When production reports are not filed, the new producer rules no longer apply.*

Example: Producer B planted watermelons in 2000 and provided his 2000 actual production. The approved yield will be calculated as follows. (T = 100 cwt.)

1997 = 100	1998 = 100	1999 = 100	2000 = 89A	2001 approved yield = 97 cwt.
------------	------------	------------	------------	-------------------------------

If Producer B planted watermelons in 2000 and did not provide 2000 production, the approved yield will be calculated as follows. (T = 100 cwt.)

1997 = 65	1998 = 65	1999 = 65	2000 = 65	2001 approved yield = 65 cwt.
-----------	-----------	-----------	-----------	-------------------------------

Producers who have produced the crop for more than two APH crop years in other administrative counties qualify as a new producer of the crop if they have not produced the crop in the requested administrative county for more than 2 crop years.

Example: Producer F has produced cantaloupes in county J but has never grown cantaloupes in administrative county Y until 2000. Even though Producer F has grown cantaloupes in other administrative counties, he or she has not grown cantaloupes in County Y and can be considered a new producer in establishing an approved yield in County Y.

282 New Producer (Continued)

C Formation of Entities or New Farming Relationships

*--The examples in this paragraph are applicable for both of the following:

- when forming a new entity
- if there is a different operator or owner associated with the unit.--*

The formation of an entity or new farming relationship comprised of 1 or more individuals do not automatically qualify the unit under new producer provisions. Although the entity or new farming relationship may not have records as such, individuals comprising the new unit may have produced the crop in the administrative county during the base period.

* * * When an individual becomes involved in a new unit, history from the involved individuals may be used in establishing the approved yield when the land previously farmed *--by the individuals is the same land farmed by the new entity.

Example: Producer A had a 100 percent share in unit 70. The following shows the total acreage and production history for the unit.

Year	Acreage	Production
2007	25	2,500 cwt
2006	27	2,900 cwt
2005	10	1,500 cwt
2004	15	1,000 cwt

Producer B had a 100 percent interest in unit 100. The following shows the total acreage and production history for the unit.

Year	Acreage	Production
2007	30	1,500 cwt
2006	21	2,100 cwt
2005	10	1,500 cwt
2004	24	1,700 cwt

--*

282 New Producer (Continued)

C Formation of Entities or New Farming Relationships (Continued)

*--In 2008, Producers A and B combine their resources in a joint operation with a 50/50 share with the new unit 177 comprising all acreage from units 70 and 100. The producers elected to use producer A's and B's previous APH history to establish unit 177's 2008 approved yield. To perform this calculation, the FSA office should total all acreage and production for each continuous APH crop year.

Year	Acreage	Production	Yield
2007	55	4,000 cwt	72.73 cwt
2006	48	5,000 cwt	104.17 cwt
2005	20	3,000 cwt	150.00 cwt
2004	39	2,700 cwt	69.23 cwt
Total Production			396.13 cwt
2008 Approved Yield		99.03 cwt/acre (396.13/4)	

--*

If 1 of the individuals in the new unit does not have a history of producing the crop, the unit's approved yield **may** be calculated based on the production history of the individuals in the new unit.

Example: Producer C had a 100 percent share in unit 80. The following shows the total acreage and production history for the unit.

*--

Year	Acreage	Production	Yield
2007	25	2,500 cwt	100.00 cwt
2006	27	2,900 cwt	107.41 cwt
2005	10	1,500 cwt	150.00 cwt
2004	15	1,000 cwt	66.67 cwt
Total Production			424.08 cwt
2008 Approved Yield		106.02 cwt/acre (424.08/4)	

Producer D did not have previous history of producing the crop.

In 2008, producers C and D combine their resources in a joint operation with a 50/50 share with the new unit 188 comprising all acreage from unit 80. The producers elected to use producer C's production history (producer D had no history) to calculate the unit's 2008 approved yield. The 2008 approved yield would be 106 cwt, which is the same as what would have been calculated for--* producer C as an individual.

282 New Producer (Continued)

C Formation of Entities or New Farming Relationships (Continued)

If any of the individuals or members of the new unit have produced the crop for more than 2 crop years but do not provide history for those years, the approved yield will be based on 65 percent of the T-yield.

Example: Producer E and F have each produced the crop for more than 2 crop years. In *--2008, producers E and F combine their resources together and create a new unit with a 50/50 share. The entity has elected not to use actual production history of its members (producers E and F) to calculate an approved yield.

The new unit's approved yield will be calculated based on a percentage of T-yield. If no records from producer E and F are provided and the T-yield equals 100 cwt, the 2008 approved yield will be calculated as follows.

Year	Acreage	Yield
2007	blank	65 cwt
2006	blank	65 cwt
2005	blank	65 cwt
2004	blank	65 cwt
2008 Approved Yield	65 cwt/acre	

--*

Note: New producer provisions do not apply. Although the unit may not have records as such, individuals or members comprising the unit have produced the crop in the county during the base period and could have elected to have the unit's approved yield based on records.

It is important to remember that when reviewing the formation of new entities or farming relationships, COC shall ensure there are substantive changes that occur within these operations. An individual or member being added to an existing entity is not considered a new entity, especially if the individual being added does not share in the risk of the crop.

282 New Producer (Continued)

D Dissolution of Entities

When an entity is dissolved and is comprised of 1 or more individuals, those individuals involved in the entity do not automatically qualify as new producers. County Offices must determine how many crop years the previous entity produced the crop in the county during the base period. If the previous entity produced the crop for 2 crop years or less and production reports are filed for these crop years on land that is now operated by the individual, the approved yield will be calculated using actual yields and 100 percent T-yields.

E Special COC-Approved Yield Requests

Producers who have produced the crop for more than 2 crop years in the county do not qualify as new producers. However, if records are not available for any of the land in the producer's current operation, APH procedure may limit the approved yield to less than 100 percent of the T-yield unless a special request is made to COC.

COC may approve these requests for the following situations.

- Producer shared in the risk of producing a crop for more than 2 crop years, stopped farming **all** land in that farming operation, and is producing the crop on entirely different land.
- A new entity or farming relationship has been created and production records are not available on **any** land in the new entity's farming operation; however, individuals that comprise the new entity have produced the crop for more than 2 crop years on other land.
- An entity or farming relationship has been dissolved and production records are not available on **any** land in the individual's current farming operation; however, the individual as a member of the former entity has produced the crop for more than 2 crop years on other land.

282 New Producer (Continued)**E Special COC-Approved Yield Requests (Continued)**

In these situations, COC will have authority to do an upward adjustment from 65 percent of T-yield to the lower of either of the following:

- county-expected yield
- lowest approved yield of any member.

*--The yield:

- may be carried forward in the database to the next year, as long as the producer maintains NAP coverage and meets acreage and production reporting requirements
- must be requested again if the producer does not maintain NAP coverage or does not meet acreage and production reporting requirements in the prior year
- must be recalculated each year it is used since it is based on a percentage of the T-yield.--*

283 Exceptions for Livestock Producers**A Feed or Forage Grown for On-Farm Use**

Beginning with the 2001 crop year, first-year producers will no longer be given 80 percent of the applicable T-yield unless they provide 1 year of actual yields (standard APH procedures apply). Producers who had previously qualified and have been continuously reporting production by PRD, may keep 80 percent T-yields (identified by the yield identifier) until the database contains at least 1 actual yield.

284 Center Pivot Irrigation Systems

A Documenting Production for Center Pivot Irrigation

For all annual crops except rice, when center pivot irrigation is used and production for the nonirrigated corners is not kept separate, the acres and production from the nonirrigated corners must be included with the portion of the field irrigated by a center pivot irrigation system. Separate approved yields will not be calculated; however, acreage considered to be irrigated will not extend beyond intersecting lines drawn at right angles to the radius of the center pivot.

Example:

Note: A separate line entry for a nonirrigated practice is not required on the acreage report for the corners of the field when they are considered irrigated. However, any nonirrigated acreage extending beyond the intersecting lines to the radius of the center pivot or other nonirrigated fields would require a separate line entry.

Example:

Note: This would be required to have a separate acreage report entry for the nonirrigated acres.

If a producer maintains separate records of acreage and production for the nonirrigated corners of the field and the portion of the field irrigated by the center pivot, 2 practices will be considered carried out and reported as such on the acreage report as separate line entries.

285 Successor-in-Interest Eligibility

A General Rule

The successor shall receive the approved yield history for the crop and unit accumulated by the predecessor.

B Applicability

Successor-in-interest applies to the following:

- an immediate family member, defined as 1 of the following:
 - spouse
 - parent
 - son
 - daughter
 - brother
 - sister
 - legally adopted child
 - grandchild
- individuals who were previously members of an entity or joint operation. Changes include the following:
 - dissolution of a partnership, corporation, or trust
 - settlement of an estate.
- *--a new entity consisting of individuals:
 - who are current or previous NAP participants
 - from a dissolved entity
 - from an existing entity.

Note: The applicant or members of the applicant:

- must have been an active member of the entity or joint operation
- must have been active as an individual
- operates all or part of the same land previously operated by the predecessor.

C Production and Yields

To establish an approved yield for a successor, follow this part to establish an approved yield using the predecessor's actual production history and prior approved yield.--*

286 Yield Limitations**A Qualification for Yield Limitation**

Producers with an approved yield who have subsequently provided at least 1 actual or assigned yield qualify for yield limitation provisions.

Cups apply in the APH database period for a crop if both of the following apply:

- the record contains at least 1 actual or assigned yield
- only production information for the most recent year (including zero planted) is added to the APH database.

If there were zero acres planted and the prior year's approved yield was limited, calculate the current year's average approved yield and apply any applicable limitation.

B Yield Cup

Approved yields may not decrease by more than 10 percent compared to the approved yield for the previous year.

C Yield Limitation Calculations

Determine approved yields when cups apply as follows:

- calculate the *** approved yield using current approved yield procedure
- apply the cup to the *** approved yield when applicable.

286 Yield Limitations (Continued)**D Yield Limitation Exceptions**

Cups do not apply if:

- the producer fails to provide an acceptable production report for more than 1 year
- COC adjusted T-yields are used according to subparagraph 260 C
- information in the APH database is corrected or changed; such as:
 - a revision of a previously reported actual yield based on acceptable, more accurate production records submitted by the producer
 - a revision of the yield for the current crop year when discrepancies in production and/or acreage information are found during a spot check
 - additional actual yields are submitted and accepted for a year or years other than the most recent crop year in the APH database period, such as assigned yields or T-yields are replaced
- databases are combined or divided according to paragraph 288
- the T-yield is revised by more than 10 percent and the T-yield is used as a basis for computing the approved yield
- added land rules applied according to paragraph 287 during the previous year.

--287 Increased Acreage and Added Land, Practice, Type, Intended Use, or Planting Period--**A Definitions**

Increased acreage is based on a comparison of the historical average acreage of the crop compared to the current year acreage.

Added land is land on which the producer has not been farming for a share of the crop's production on a unit for more than 2 crop years.

--An added practice, type, intended use, or planting period is a practice, type, intended use, or planting period of a crop that requires a separate approved yield. If the new practice, type, intended use, or planting period of a crop does not require a separate approved yield, the production from the new practice, type intended use, or planting period of the crop will be-- included in the current APH database for the crop.

***--287 Increased Acreage and Added Land, Practice, Type, Intended Use, or Planting Period
(Continued)--***

B Increased Acreage or Added Land Policy

The approved yield for a crop that has increased acreage or added land shall have an adjustment if all of the following apply:

- the crop has a loss of at least 50 percent based on the initial approved yield for the year
- the percent of loss is not similar to the percent of loss other producers of the crop, or similar crops, incurred because of the disaster condition
- the percent of increase in acreage or addition of land is more than 75 percent of the historical average acreage of the crop.

If the percent of increase in acreage or addition of land is:

- more than 75 percent but less than 200 percent, a factor of 90 percent shall be applied to the * * * approved yield
- 200 percent or greater, a factor of 85 percent shall be applied to the * * * approved yield.

Note: The 85 or 90 percent adjustment is for payment purposes only.

The adjusted approved yield shall be applicable for determining loss for only the year of the acreage increase or land addition.

The adjustment for increased acreage and/or added land is in addition to any T-yield adjustments according to paragraph 260.

--287 Increased Acreage and Added Land, Practice, Type, Intended Use, or Planting Period (Continued)--

C Determining Approved Yield

This table outlines the steps required to determine the approved yield when acreage has been increased or land has been added.

IF the...	THEN...
crop suffered at least a 50 percent loss based on the * * * approved yield	determine whether the acreage unit has increased by more than 75 percent compared to the historical average acreage of the crop in the unit.
unit acreage of the crop has not increased by more than 75 percent	no further action is required * * *.
unit acreage of the crop has increased by more than 75 percent	determine whether the unit loss is similar to losses on other units for the same crop or similar crops because of the disaster condition.
unit loss of the crop is similar to losses on other units for the same crop or similar crops	no further action is required * * *.
unit loss of the crop is not similar to losses on other units for the same crop or similar crops	apply a factor to the * * * approved yield.
increased acreage/added land is more than 75 percent, but less than 200 percent than the historical acreage of the crop	apply a 90 percent factor to the * * * approved yield.
increased acreage/added land is 200 percent or more than the historical acreage of the crop	apply an 85 percent factor to the * * * approved yield.

D Examples

Example 1: If the unit history has an average of 50 acres of watermelon and in 2001, the producer planted 125 acres, the producer has increased their acreage by 75 acres (125 - 50). To calculate the percent of increase, divide the increased acreage/additional acres by the historical average, then multiply by 100 to determine the percentage.

$$75 \div 50 = 1.5 \times 100 = 150\%$$

--If the approved yield was 100 cwt per acre, multiply the yield by 90 percent, resulting in a 2001 approved yield of 90 cwt per acre.--

The 2001 loss will be determined based on 90 cwt per acre. The APH database will not be modified in any manner.

***--287 Increased Acreage and Added Land, Practice, Type, Intended Use, or Planting Period
(Continued)--***

D Examples (Continued)

Example 2: If the unit history has an average of 50 acres of watermelon and in 2001, the producer planted 300 acres, the producer has increased their acreage by 250 acres (300 - 50). To calculate the percent of increase, divide the increased acreage/additional acres by the historical average, then multiply by 100 to determine the percentage.

$$250 \div 50 = 5 \times 100 = 500\%$$

--If the approved yield was 100 cwt per acre, multiply the yield by 85 percent, resulting in a 2001 approved yield of 85 cwt per acre.--

The 2001 loss will be determined based on 85 cwt per acre. The APH database will not be modified in any manner.

***--E Added Practice, Type, Intended Use, or Planting Period Policy**

If a new practice, type, intended use, or planting period is added that requires a separate approved yield and the producer still qualifies as a new producer for the crop and county, the APH database shall be updated according to the new producer provisions included in paragraph 282.

For any new practice, type, intended use, or planting period that requires a separate approved yield and where the producer does not qualify as a new producer, a separate APH database shall be established for the new practice, type, intended use, or planting period. The approved yield shall be calculated according to subparagraph 254 D, using the database from the previous practice, type, intended use, or planting period as a reference database to determine the applicable percentage of the T-yield.

This procedure also applies to a new:

- crop on a unit when the producer has history for the crop on another unit within the county
- intended use when the producer has RMA APH history for an insured intended use of the same crop.

Example: A producer has history for wheat for grain which is an insurable intended use. The producer purchases NAP coverage for wheat for forage. The producer does not qualify as a new producer for the forage. Based on the number of years of RMA APH data, determine what percentage of the forage T-yield will be used in the forage database.--*

288 Combining and Dividing Basic Unit APH Databases

**A
Combining and
Dividing APH
Databases**

For NAP producers who consistently report acreage and production for approved yield purposes, it may be necessary to establish separate, or combine APH databases when the:

- unit definition changes from 1 year to the next
- crop definition changes such that 2 or more previously established databases must be combined.

Combination

Example: Producer A has 2 basic units:

- unit 0100 has 100 percent share of all cash-rented land
- unit 0200 has a 50/50 share basis with landowner B.

For 2001, landowner B decides to give up his interest in unit 0200 and allow producer A the opportunity to cash rent. This would require a combination of all land having a 100 percent interest into one APH database for approved yield purposes.

Division

Example: Producer F has 1 unit 0100 consisting of a 100 percent interest in cash-rented land. For 2001, producer F and landowner D decide to share rent landowner D's land. This would require a division of the APH database to create a separate APH database for unit 0100 and new unit 0200.

Note: For the current crop year, the producer **must** submit acceptable production reports for the most recent APH crop year according to the current year unit arrangement.

Continued on the next page

288 Combining and Dividing Basic Unit APH Databases (Continued)

B

Procedure for Combining APH Databases The historical production information from each APH database that is being combined shall be merged to obtain a blended yield on the new unit.

Step	Action
* * *	* * *
1	<p>Add together the actual or calculated production, by year, from all APH databases that are being combined.</p> <p>Note: For crop years during which no acres were planted on any of the units being combined, a “Z” yield indicator is included in the database. A production report containing zero acres shall be ignored when determining total production on all units included in the combination.</p>
2	<p>Add together the planted acres, by year, from all APH databases being combined.</p> <p>Note: For crop years having a zero credited yield (O yield type indicator), the production will be zero; however, the acres shall be counted.</p>
3	<p>Divide the result of step 1 by the result of step 2 for each year to determine a blended yield.</p>
4	<p>Calculate the approved yield according to subparagraph 254 D.</p>

Continued on the next page

288 Combining and Dividing Basic Unit APH Databases (Continued)

C Example of Combining Databases

This table illustrates combining two APH databases into a single database when both *-databases contain actual or assigned yields. The 2001 T-yield is 23.

Year	APH Database Unit 0100			APH Database Unit 0200			Step 1	Step 2	Step 3
	Yield	Acres	Calculated Production	Yield	Acres	Calculated Production	Total Production	Total Acres	New Yield
1996	N21								
1997	N21			T23					T23
1998	A20	60	1200	A32	90	2880	4080	150	A27
1999	Z	0		A28	60	1680	1680	60	A28
2000	A22	40	880	A24	80	1920	2800	120	A23
Step 4 =							2001 Approved Yield: 101 / 4		25

D Dividing APH Databases

The historical acreage and production information from the APH database that is being divided shall be duplicated in each new database.--*

289 Yield Type Indicators**A Yield Type Indicator Flags**

When completing the APH database, each yield entered in the yield column must be identified with the applicable yield type descriptor (examples are based on a 100-bu. T-yield):

- A = Actual yield (Example: A120)
- B = Bypass year
- *--C = Added practice, type, intended use, or planting period with yield, based on the--* number of actual yields in the reference database (Example: C100)
- I = 100 percent of the T-yield for new producers of the crop (Example: I100)
- O = Zero credited yield
- P = Assigned yield - 75 percent of previous year approved yield (Example: P60)
- Q = Special COC-approved yield based on subparagraph 282 E (Example: Q85)
- R = Replacement yield - 65 percent of T-yield to replace actual production in a disaster *--year (Example: R65)--*
- U = Substitute yield - 1-time substitution of assigned or zero credited yield at 65 percent of T-yield (Example: U65)
- *--X = Livestock producer exception - 80 percent of T-yield for qualified forage producers (Example: X80)--*
- Z = Zero planted
- S = 65 percent T-yield (Example: No actual yields = S65)
- E = 80 percent T-yield (Example: One actual yield = E80)
- N = 90 percent T-yield (Example: Two actual yields = N90)
- T = 100 percent T-yield (Example: Three actual yields = T100).

290-300 (Reserved)

Section 4 Specific Crop Procedures

301 Cotton

A
Separate Reports

Separate production reports are required to establish or update approved yield for all types and varieties of cotton.

B
Converting Skip-Row Cotton to Solid Planted

Skip-row cotton must be converted to a solid plant basis to provide a yield that may be used for any skip-row pattern carried out by the producer.

Refer to 2-CP for determining whether the crop is planted in a skip-row pattern.

C
Computing Acreage Report Yield

To compute the yield for the planting pattern carried out, multiply the yield conversion factor for the qualifying skip-row planting pattern by either of the following:

- county-expected yield when initially establishing the APH data base
- previously approved solid-planted yield when adding to the APH data base.

The tables in the following subparagraphs provide factors to convert nonirrigated skip-row cotton yields to a solid-planted basis.

Continued on the next page

301 Cotton (Continued)

D
Conversion
Table 1

The following factors are applicable to Arkansas, Louisiana, Missouri, and all States east of these States. All row widths are equal unless otherwise indicated. Some conversion factors are limited.

Conversion Table 1	
IF the planting pattern is...	THEN the yield conversion factor is...
solid-planted or non-qualifying skip-row pattern	1.00.
2 rows planted X 1 skip-row	1.33.
2 rows planted X 1 narrow skip (40-40-24)	1.23.
2 rows planted X 1 narrow skip (38-38-26)	1.25.
2 rows planted X 2 skip-rows	1.50.
2 rows planted X pattern with 4 or more fallowed rows (2 X 4, 2 X 6, etc.)	1.67.
4 rows planted X 1 skip-row	1.20.
4 rows planted X 2 skip-rows	1.33.
4 rows planted X 4 skip-rows	1.33.
6 rows planted X 1 skip-row	1.14.
6 rows planted X patterns with 2 or more skip-rows	1.20.
all other	computed based on the following steps.

For planting patterns of unequal row widths within the pattern or row patterns other than those listed in Conversion Table 1, compute the yield conversion factor as follows.

Step	Action
1	Divide the width in inches of the area skipped in the pattern by the width in inches of the whole pattern. Round to 2 decimals.
2	Add 1.00 to the results obtained in step 1.

Continued on the next page

301 Cotton (Continued)

E
Conversion
Table 1
Examples

Example 1: Cotton is planted 3 rows wide with a 40" skip-row between the planted cotton. The entire pattern is 160" wide.

$$40 \div 160 = .25 + 1.00 = 1.25 \text{ conversion factor}$$

Example 2: Cotton is planted in a mixed pattern of 4 rows planted with one 40" skip-row followed by 2 rows planted with one 40" skip-row. The pattern for the 4 X 1 is 200" wide and the pattern for the 2 X 1 is 120" wide.

To calculate the factor for mixed patterns, determine the factor for each part (4 X 1 and 2 X 1) and compute a weighted factor based on the number of planted rows.

$$40 \div 200 = .20 + 1.00 = 1.20 \text{ X } 4 \text{ rows} = 4.80$$

$$40 \div 120 = .33 + 1.00 = 1.33 \text{ X } 2 \text{ rows} = 2.66$$

$$4.80 + 2.66 = 7.46 \div 6 \text{ rows} = 1.24 \text{ conversion factor}$$

F
Conversion
Table 1 Factor
Limitations

If planting patterns do not meet the requirements of Conversion Table 1, factors shall be limited according to this table.

The conversion factor shall not exceed...	For any pattern or part of a pattern of...
1.67	1 planted row or 2 consecutive planted rows alternating with idle land.
1.45	3 consecutive planted rows alternating with idle land.
1.33	4 consecutive planted rows alternating with idle land.
1.20	5 or 6 consecutive planted rows alternating with idle land.
1.00	7 or more consecutive planted rows alternating with idle land.

G
Conversion
Table 2

The factors included in Conversion Table 2 are applicable to New Mexico and the following Texas counties:

- Baylor
- Concho
- Runnels
- Schleicher
- Shackleford
- Sutton
- Taylor
- Throckmorton
- Valverde
- Wilbarger.

In addition, the factors are applicable to all counties west of the list of Texas counties.

Conversion Table 2	
IF the planting pattern is...	THEN the yield conversion factor is...
solid-planted (solid drilled-62") or nonqualifying skip-row patterns	1.00.
1 planted row X 1 or more skipped 30"-35" row	1.14.
1 planted row X 1 or more skipped 36"-62" row	1.28.
1 38" row X 1 34" skip-row	1.28.
1 less than 30" row X 1 less than 30" skip-row	1.00.
2 planted rows X 1 skipped 36"-62" row	1.42.
2 planted rows X 1 skipped 30"-35" row	1.26.

301 Cotton (Continued)

H Conversion Table 3 (Continued)

Conversion Table 3 (Continued)	
IF the planting pattern is...	THEN the yield conversion factor is...
3 planted rows X 2 or more skipped 30"-35" rows	1.37.
4 planted rows X 1 skipped 36"-62" row	1.28.
4 planted rows X 2 or more skipped 36"-62" rows	1.40.
4 planted rows X 1 skipped 30"-35" row	1.14.
4 planted rows X 2 or more skipped 30"-35" rows	1.33.
5 planted rows X 1 skipped 36"-62" row	1.14.
5 planted rows X 2 or more skipped 36"-62" rows	1.34.
5 planted rows X 1 skipped 30"-35" row	1.07.
5 planted rows X 2 or more skipped 30"-35" rows	1.27.
6 or more planted rows and 1 or more skipped rows	the same as included in Conversion Table 2.
mixed; such as 3 X 2, 4 X 1, 2 X 2	calculated by determining a factor for each pattern and computing a simple average.

Following is an example of computing the yield conversion factor when the planting is mixed using a 3 X 2, 4 X 1, 2 X 2 pattern planted in 40" rows.

Example: 3 X 2 = 1.45
 4 X 1 = 1.28
 2 X 2 = 1.50
 4.23 ÷ 3 = 1.41

301 Cotton (Continued)

I
Cotton APH
Computation
Examples

Example 1: This example is a 2-step process to convert skip-row yields to a solid plant yield. The producer's acreage, production, and annual yield information is shown in this table.

Year	Production	Acres	Yield
2000	122,010	400.0	A305
1999	259,000	700.0	A370
1998	143,310	510.0	A281
1997	128,800	400.0	A322
1996	182,250	450.0	A405
1995	217,070	650.2	*--A334

To convert the yields to a solid-plant basis, the average production is divided by the applicable yield conversion factor. The approved yield is calculated based on the adjusted production. Calculation of the approved yield is shown in this table.

Year	Production	Yield Conversion Factor	Factored Production	Acres	Yield
2000	122,010	1.42	85,923	400.0	A 215
1999	259,000	1.42	182,394	700.0	A 261
1998	143,310	1.42	100,923	510.0	A 198
1997	128,800	1.42	90,704	400.0	A 227
1996	182,250	1.42	128,345	450.0	A 285
1995	217,070	1.42	152,866	650.2	A 235
Approved Yield					237

--*

302 Crops With Intended Use of * * * Processing

A
Applicable Crops Crops that have an intended use of * * * processing have specific provisions for determining APH.

B
Harvested Acreage Actual production shall be used for all harvested acreage.

C
Unharvested or Unacceptable Acreage Acreage shall be appraised if the production is:

- unharvested
- not accepted by the processor.

Do not convert compensation received from the processor for acreage that is not accepted by the processor for APH purposes.

Note: If a NAP payment is issued and no potential production was determined (zero appraisal), then no production from the unharvested or acreage not accepted by the processor will be used for APH purposes.

303 Conversion of Dry Pea Production

A
Peas All dry pea production harvested from green pea acreage will be divided by .60 and added to the total green pea production for APH purposes. The total production is divided by the acreage originally planted to green peas.

304 Coarse Grains

A**Unit of Measure**

For APH purposes, harvested production shall be determined in bushels for acreage harvested as grain and in tons for acreage harvested as silage.

Harvested production may require conversion to the intended use determined according to paragraph 174.

B**Grain/Silage
Conversions**

The conversion factor is .15 for grain/silage conversions.

Make the conversion of bushels to tons by multiplying the bushels by the conversion factor.

Example: 5,000 bushels x .15 = 750.00 tons.

Make the conversion of tons to bushels by dividing the tons by the conversion factor.

Example: 750 tons ÷ .15 = 5,000 bushels.

C**Intended Use**

Producers shall file acreage reports based on intended use. APH will be updated based on the actual market or actual use for which more than 50 percent of the acreage's harvested production is marketed.

If the intended use is not insurable in the county and covered by NAP, an APH data base shall be established for the noninsurable intended use.

304 Coarse Grains (Continued)

D

Example 1

Following is an example for determining an approved yield for silage when both grain and silage have been harvested. The data base reflects the following.

Year	Grain		Silage	
	Acres	Production	Acres	Production
1997	400	22,000 bu	100	825 tons
1998	400	24,000 bu	100	900 tons
1999	400	23,200 bu	100	870 tons
2000	400	23,600 bu	100	885 tons

The intended uses for 2001 are 400 acres grain and 100 acres silage. To determine the 2001 approved yield for silage, use the 1997 through 2000 actual silage production. Ignore all grain production.

Year	Silage		Silage Yield
	Acres	Production	
1997	100	825 tons	A 8.25
1998	100	900 tons	A 9.00
1999	100	870 tons	A 8.70
2000	100	885 tons	A 8.85
2001	Silage Approved Yield		8.70 tons

Continued on the next page

304 Coarse Grains (Continued)

E

Example 2

The following example provides the approved yield calculation process when grain is insurable in the county and silage is noninsurable. The database reflects the following.

Year	Grain		Silage	
	Acres	Production	Acres	Production
1996	500	27,500 bu		
1997	500	30,000 bu		
1998	500	29,000 bu		
1999	500	29,500 bu		

The 2000 intentions are 400 acres with an intended use of grain and 100 acres with an intended use of silage. A silage approved yield is required.

To determine the 2000 approved yield for silage, use the 1996 through 1999 actual grain production records and convert to silage.

Year	Acres	Grain Production	Silage Production Based on Grain Conversion	Silage Yield
1996	500	27,500 bu	4,125 tons	A 8.25
1997	500	30,000 bu	4,500 tons	A 9.00
1998	500	29,000 bu	4,350 tons	A 8.70
1999	500	29,500 bu	4,425 tons	A 8.85
2000	Silage Approved Yield			8.70 tons

304 Coarse Grains (Continued)

F

Example 3

Following is information from acreage reports.

Year	Grain Acreage Reported	Silage Acreage Reported
1997	400	100
1998	400	100
1999	400	100
2000	400	100

In 2000, the actual production from the 400 acres of grain is 190 acres harvested as grain and 210 acres harvested as silage. For 2001, the intentions are 400 acres of grain and 100 acres of silage.

To determine 2001 approved yield for **grain**, use the 1997 through 1999 actual grain production and actual 2000 grain production for the acreage harvested; however, since less than 50 percent of the harvested acreage was harvested as grain, use silage production and convert for the remaining 210 acres.

Year	Acres		Grain Production		Silage Production	Grain Yield
	From Grain	From Silage	Actual	Converted		
1997	400		22,000 bu			A55 bu
1998	400		24,000 bu			A60 bu
1999	400		23,200 bu			A58 bu
2000	190	210	9,500 bu	12,600 bu	1,890 tons	A55 bu
2001	Grain Approved Yield					57 bu

Continued on the next page

304 Coarse Grains (Continued)

G**Additional Information**

If the crop is insurable as grain, reported with an intended use of grain, and a loss is:

- reported, a grain appraisal is necessary before the crop is harvested as silage

Note: The grain appraisal would be used for APH and the crop is not eligible for NAP.

- not reported, but 100 percent of the crop is harvested as silage, a conversion is used for APH purposes

Note: The crop is not eligible for NAP.

- not reported, but:

- more than 50 percent of the acreage is harvested for grain, then the grain production together with the silage production converted to grain is used for APH purposes

Note: The crop is not eligible for NAP.

- less than 50 percent of the acreage is harvested for grain, a grain appraisal is necessary before the rest of the crop is harvested as silage. The actual grain production together with the appraisal would be used for APH purposes and the crop is not eligible for NAP.

Note: Insurability is based on intended use, not actual harvest.

If the crop is not insurable as grain, reported with an intended use of grain, and a loss is:

- reported, but the crop will be harvested as silage, no appraisal is necessary and the APH data base will be updated and/or established for silage
- not reported, but more than 50 percent of the crop is harvested as silage, the APH data base will be updated and/or established for silage.

Note: A silage variety intended for grain will be covered by NAP if COC determines that the variety would produce grain.

305 Sugar Cane

A**Unit of Measure**

All production must be converted to pounds of raw sugar. Raw sugar production indicated in net tons must be multiplied by 2000 to determine pounds of raw sugar.

Appraised potential production used for approved yield purposes must also be determined in net pounds of raw sugar using the following formula:

Appraised tons per acre X percent-of-sugar factor X 2000 = Potential production in pounds of raw sugar.

The percent-of-sugar (sucrose) must be determined from:

- field samples from the same field made by the mill
- acreage harvested from the same field
- the percent-of-sugar factor as indicated by a factor on the **county actuarial table** if the percent-of-sugar cannot be determined from either of the above methods.

Note: The county actuarial table can be accessed on the Internet at www.rma.usda.gov/tools/. This will enable States to query using the Actuarial Document Query by State or crop. The percentage of sugar will be included in the “Crop Statements” of the Special Provisions.

Continued on the next page

305 Sugar Cane (Continued)

**B
Seed**

The producer must notify FSA at least 15 calendar days before cutting any sugarcane for seed. The notice must include the unit number and the number of acres the producer intends to cut for seed.

If proper notice is given, the approved yield for the current crop year will be used as appraised potential production for the acreage cut for seed unless a field appraisal was made. Producers may request a field appraisal if they feel the approved yield does not accurately reflect the acreage's potential production. If a field appraisal is made, the appraised potential production will be used for acreage cut for seed.

If the proper 15-calendar-day notice is not given, acreage cut for seed will be considered put to another use without consent. The approved yield for the current crop year will be applied as an ineligible cause of loss and used for loss purposes only. The acreage cut for seed will be used for APH purposes; however, the production associated with those acres will be zero.

* * *

306 Perennial Crops**A Crops Identified**

Perennial tree and vine crops include crops that are present at all seasons of the year, for which new growth occurs without manual reseeding on an annual basis. Perennial crops include, but are not limited to, the following:

- almonds
- apples
- blueberries
- citrus
- cranberries
- figs
- grapes
- macadamia nuts
- * * *
- pears
- plums
- prunes
- stonefruit (apricots, nectarines, and peaches)
- walnuts.

B Base Periods

The base period for each APH database is determined by consecutive APH crop years, not *--calendar years and consists of a minimum of 4 years and a maximum of:--*

- 5 consecutive APH crop years immediately preceding the current crop year for apples and peaches
- 10 consecutive APH crop years immediately preceding the current crop year (a lag year) for crops that meet the provisions of paragraph 308
- 10 consecutive APH crop years immediately preceding the current crop year for all perennial crops, except apples, peaches, and lag year crops.

306 Perennial Crops (Continued)

C

**Perennial Crop
History
Certification**

*--Each producer must certify perennial crop production information by PRD. To determine the approved yield for a perennial crop that is planted by block, the blocks must be converted to an acreage basis according to subparagraph D.

D

**Perennial Crop
Acreage
Certification--***

When the perennial crop is planted by block, the perennial crop information shall include the following:

- acreage reported by block
- the year the plants (trees, vines, bushes, etc.) were set out or the year the block was grafted to the current variety
- the variety or type of plant contained in a specific block
- number of bearing plants (trees, vines, bushes, etc.) by block
- the average tree spacing or pattern observed within the identified block

Example: 18 X 20

- average pruning height for peaches.
- * * * The following instructions provide calculation procedures for plants in a block setting.
- **Percent Stand.** Calculate the percent stand by dividing the number of bearing trees/vines/bushes by the product of density, multiplied by the acres.

Continued on the next page

306 Perennial Crops (Continued)

D
Perennial Crop
--Acreage--
Certification
(Continued)

- **Plant Density.** Calculate the plant density (number of plants per acre) by taking the number of square feet per acre (43,560) divided by the number of square feet per plant.

Example: Based on a tree spacing of 20 X 20 = 400 square feet. The number of trees per acre is calculated as 43,560 square feet per acre divided by 400 square feet per tree = 109 trees per acre. If the normal spacing is 120 trees per acre, the percent stand is 91 percent ($109 \div 120$).

When the perennial crop has not been planted by block or the block is not measurable, the perennial crop information shall include the following:

- number of bearing plants (trees, vines, bushes, etc.)
- the year the plants were set out or grafted to the current variety
- the variety or type of plant.

Assume a 100 percent stand and determine the number of acres in the unmeasurable block by using the normal spacing information included in paragraph 307.

Example: 187 trees are reported and, according to paragraph 307, 15 trees per acre is considered normal. The acreage for the unmeasurable block is 12.5 ($187 \div 15$).

Continued on the next page

306 Perennial Crops (Continued)

E

Field Inspections Perennial field crop inspections are tools primarily designed to establish the validity of the crop and verify information provided by the producer.

--Field inspections may be made if a producer does not provide the required additional data. Field inspections are required according to this table.--

Crop	Status		
	New Producer	New or Previous NAP Applicant and Selected by Pre-Acceptance Field Selection Criteria	New or Previous NAP Applicant and Damage Has Occurred to Trees/ Vines/Bushes/Bog or Cultural Practices Have Been Performed That Will Reduce the Crop's Approved Yield From Previous Levels
Blueberries	An inspection is required.	A new inspection is required if the most recent pre-acceptance field inspection is more than 5 years old.	An inspection is required.
Texas citrus	An inspection is required.	Pre-acceptance field inspection criteria are not applicable.	An inspection is required.
Apples, cranberries, grapes, peaches, pears, plums, or stonefruit	An inspection is not required, unless selected by the pre-acceptance field selection criteria.	An inspection is required if no pre-acceptance field inspection or the most recent pre-acceptance field inspection is more than 5 years old.	An inspection is required.
All other perennial crops	An inspection is not required, unless selected by the pre-acceptance field selection criteria.	An inspection is required if no pre-acceptance field inspection or the most recent pre-acceptance field inspection is more than 10 years old.	An inspection is required.

Continued on the next page

306 Perennial Crops (Continued)

F

Field Inspection Selection Criteria

The following inspection selection criteria apply to all perennial crops. If a field inspection has not been performed, or the most recent field inspection is older than specified for the crop, field inspections are mandatory for any unit for which:

- a greater approved yield than the T-yield is calculated based on a historical record of production
- a high variability of actual yields (used to calculate the approved yield) is indicated by the following yield variance calculations:
 - if the frequency of actual yields that are less than 75 percent of the **producer's average yield** is equal to or greater than that shown on the following Yield Variance Table, and at least 1 such actual yield occurred during the most recent 3 crop years, a field inspection is required

Yield Variance	
Number of Times the Annual Actual Yield Is Less Than 75 Percent of the APH Average Yield	Number of Years of Verifiable Records
2	4 or 5
3	6 or 7
4	8 through 10

- if the average of the most recent 3 years' actual yields is at least 25 percent less than the average yield, a field inspection is required
- productivity is reduced. An inspection is required when **known** plant damage has occurred or cultural practices have been performed that will reduce the crop potential from previous production levels.

307 Adjustments for Fruit and Nut Crops

A Producer Responsibilities

Producers will be responsible for providing the following information:

- *--age of trees, see subparagraph O
- spacing of trees on average of number of trees per unit (to determine number of trees per acre), see subparagraph O
- whether the trees are managed or unmanaged, see subparagraph N.--*

B COC Responsibilities

COC must reduce T-yields, if the age of the crop on the unit is not capable of producing the county yield. DAFP has developed these reductions for COC's use as a guide from sources, such as State university research stations, Extension Service, RMA RSO's, and FSA State Offices.

COC may adjust the percentages in this paragraph; however, any adjustments must be justified and documented in COC minutes with the concurrence of an STC representative.

307 Adjustments for Fruit and Nut Crops (Continued)

C Peaches and Nectarines

Use this table to reduce the yield for peach and nectarine trees based on the age of the trees.

Age of Trees	Estimated Reduction in Yield
less than 4 years	100% reduction
4 years	75% reduction
5 years	50% reduction
6 to 11 years	no reduction
over 11 years	10% reduction for each year not to exceed 50%

Normal spacing for peach and nectarine trees is 90 to 120 trees per acre. An additional reduction of 10 percent shall apply for every 7 trees below 90 trees per acre.

D Limes

Use this table to reduce the yield for lime trees based on the age of the trees.

Age of Trees	Estimated Reduction in Yield
4 years and older	no reduction
more than 2 years but less than 4 years	30% reduction
1 to 2 years	60% reduction

Normal spacing for lime trees is 100 trees plus per acre. An additional reduction of 10 percent shall apply for every 10 trees below 100 trees per acre.

307 Adjustments for Fruit and Nut Crops (Continued)

E
Citrus Except
Limes

Use this table to reduce the yield for citrus trees, except for lime trees, based on the age of the trees.

Age of Trees	Estimated Reduction in Yield
8 years and older	no reduction
more than 5 years but less than 8 years	30% reduction
2 to 5 years	45% reduction

Normal spacing for citrus trees is 100 trees plus per acre. An additional reduction of 10 percent shall apply for every 10 trees below 100 trees per acre.

F
Apples

Use this table to reduce the yield for apple trees based on the age of the trees.

Age of Trees	Estimated Reduction in Yield
12 years and older	no reduction
less than 12 years	10% reduction for each year below 12

Normal spacing for apple trees is 109 trees per acre. An additional reduction of 10 percent shall apply for every 10 trees below 109 trees per acre.

Continued on the next page

307 Adjustments for Fruit and Nut Crops (Continued)

G
Apricots

Use this table to reduce the yield for apricot trees based on the age of the trees.

Age of Trees	Estimated Reduction in Yield
8 to 20 years	no reduction
7 years	25% reduction
6 years	40% reduction
5 years	60% reduction
4 years	75% reduction

Normal spacing for apricot trees is 120 to 160 trees plus per acre. An additional reduction of 10 percent shall apply for every 12 trees below 120 trees per acre.

H
Grapes and
Muscadines

Use this table to reduce the yield for grape and muscadine vines based on the age of the vines.

Age of Vines	Estimated Reduction in Yield
5 years and older	no reduction
4 years	20% reduction
3 years	80% reduction

Normal spacing for grape and muscadine vines is 680 vines per acre. An additional reduction of 10 percent shall apply for every 68 vines below 680 vines per acre.

Continued on the next page

307 Adjustments for Fruit and Nut Crops (Continued)

I
Pears

Use this table to reduce the yield for pear trees based on the age of the trees.

Age of Trees	Estimated Reduction in Yield
16 years and older	no reduction
15 years	10% reduction
14 years	20% reduction
13 years	30% reduction
12 years	40% reduction
11 years	50% reduction
10 years	60% reduction
9 years	70% reduction
8 years	80% reduction
7 years	90% reduction

Normal spacing for pear trees is 100 to 110 trees per acre. An additional reduction of 10 percent shall apply for every 10 trees below 100 trees per acre.

Continued on the next page

307 Adjustments for Fruit and Nut Crops (Continued)

J
Cherries (Tart)

Use this table to reduce the yield for cherry trees (tart) based on the age of the trees.

Age of Trees	Estimated Reduction in Yield
over 23 years	5% reduction for each year over 23
13 to 23 years	no reduction
12 years	10% reduction
11 years	20% reduction
10 years	30% reduction
9 years	40% reduction
8 years	50% reduction
7 years	60% reduction
6 years	80% reduction

Normal spacing for cherry trees (tart) is 100 to 135 trees per acre. An additional reduction of 10 percent shall apply for every 10 trees below 100 trees per acre.

K
Cherries (Sweet)

Use this table to reduce the yield for cherry trees (sweet) based on the age of the trees.

Age of Trees	Estimated Reduction in Yield
over 20 years old	5% reduction for each year over 20
10 to 20 years	no reduction
9 years	15% reduction
8 years	30% reduction
7 years	45% reduction
6 years	60% reduction

Normal spacing for cherry trees (sweet) is 150 trees per acre. An additional reduction of 10 percent shall apply for every 15 trees below 150 trees per acre.

Continued on the next page

307 Adjustments for Fruit and Nut Crops (Continued)

L Pecans

Use this table to reduce the yield for pecan trees based on the age of the trees.

Age of Trees	Estimated Reduction in Yield
13 years and older	no reduction
12 years	50% reduction
9 to 11 years	75% reduction

Use this table to take an additional reduction because of trees per acre.

Age of Trees	Trees per Acre	Additional Reduction
13 to 18 years	27	10% for each 3 trees below 27
more than 18 years to 40 years	14	10% for each 2 trees below 14
more than 40 years to 60 years	7	15% for each tree below 7

M Native Pecans

Consider each 15 native pecan trees as 1 acre regardless of the age of the tree. See subparagraph N for further reductions.

N Unmanaged Orchards

The county average yield shall be reduced an additional 35 percent, if the orchard is unmanaged with no set management system, that is, no pruning, no set spray cycle, etc.

***--O Calculating Adjusted Yields**

Use the following table to determine the yield reduction when trees are not at their full potential or have gone past their full potential of production.

Step	Action
1	Determine the total acres of the crop.
2	Determine the percentage of each age category by dividing each acreage by the result of step 1.
3	Multiply the T-yield by each category percentage from step 2.
4	For each category with an age reduction, multiply the result in step 3 by the applicable reduction percentage.
5	Subtract the result of step 4 from step 3 for each age category with a reduction.
6	Add the results of step 5 to any nonadjusted yield from step 3 to determine the adjusted T-yield. Load the adjusted T-yield during the approved yield process.

Calculate a yield reduction for acres planted at less than normal spacing. Spacing reductions shall be calculated in the same manner as age reductions.--*

307 Adjustments for Fruit and Nut Crops (Continued)***--O Calculating Adjusted Yields (Continued)**

Document all adjusted yields in COC minutes. If COC uses reduction percentages not listed in this paragraph, the adjustment must have concurrence of STC representative. Load the adjusted yield, the reason for the adjustment, and the date of COC or STC minutes documenting the adjustment during the approved yield process.--*

308 Lag Year Crops**A Lag Year**

Some crops do not generally have production records available by PRD; therefore, there is a 1-year lag in the database.

Example: For the 2001 crop year, the base period will begin with the 1999 crop year and may contain up to ten APH consecutive crop years (beginning with 1999 and working backwards).

The base period for lag year crops consists of 10 consecutive APH crop years preceding the current crop year (a lag year) for crops that meet the provisions of this paragraph.

Crops for which lag year provisions may be applicable include, but are not limited to, the following:

- grapefruit
- lemons
- *--limes
- macadamia nuts--*
- oranges
- parsnips
- pummelo
- sugarcane
- tangerines.

B Applying Yield Procedure

Added land provisions apply to units on which the producer has not actively engaged in farming for a share of the crop's production for more than 2 crop years before the previous crop year.

New producer procedures apply if a person was not actively engaged in farming for a share of the sugarcane production for more than 2 crop years before the previous calendar year.

***--308 Lag Year Crops (Continued)**

B**Applying Yield Procedure (Continued)**

For units (by practice) on which a lag year crop was produced for the previous crop year, the previous crop year is recognized as a crop year with actual production available, even though it cannot be reported until the next crop year.

Example: If the current crop year is 2001 and the crop was produced for the 2000 crop year, 2000 is recognized as a crop year with actual production available even though it cannot be reported until 2002.

Special procedure is used to determine the applicable T-yield for:

- new producers who elect to provide production reports
- previous producers who do not qualify as a new producer
- acreage which does not qualify as added land.

The T-yield shall be calculated as follows.

- If no production history before the previous crop year can be provided and assigned yield provisions do not apply, the approved yield shall be 80 percent of the applicable T-yield. The database shall be completed using four 80 percent T-yields.
- If 1 actual yield is applicable, the APH database shall be completed using 1 actual yield and three 90 percent T-yields.
- If 2 actual yields are applicable, the approved yield shall be calculated using 2 actual yields and two 100 percent T-yields. Two actual and two 100 percent T-yields are entered into the database.
- If 3 actual yields are applicable, the approved yield shall be calculated using 3 actual yields and one 100 percent T-yield. The 3 actual yields and one 100 percent T-yield shall be entered into the database.--*

309-320 (Reserved)

Part 6 Production

321 Overview

A Purpose

The purpose of this part is to explain terms, identify production reporting requirements, and clarify policy.

B Definitions

The following terms are used in this part.

Term	Usage and Meaning	References
Actual Production	The total amount of harvested and appraised production on a unit.	Paragraph 326
Harvested Production	The total amount of harvested production from the unit supported by an acceptable record and certification of the producer.	Paragraph 327
Appraised Production	The amount of production: <ul style="list-style-type: none"> • determined present on the unit that is not harvested • harvested, but not included in the unit's acceptable harvested production evidence. 	Paragraph 328
Assigned Production	The amount of unit production: <ul style="list-style-type: none"> • loss because of ineligible causes • that must be attributed to the unit because of a guaranteed contract, payment, or similar arrangement. 	Paragraph 329
Expected Production	The amount of production anticipated on the unit for the crop year.	Paragraph 330
Net Production	Production to count. The total amount of harvested, appraised, and assigned production on the unit. Net production is used to calculate the amount of NAP assistance.	Paragraph 331
Salvage Value	The dollar value of production of the eligible crop type or variety that because of natural disaster cannot be sold or otherwise marketed in any market for which a price or yield is established.	Paragraph 333

322 Records of Production

A Producer Responsibilities

Producers are responsible for providing accurate and complete information. It is the producer's responsibility to report the total amount of unit production. It is not CCC's responsibility to determine the producer's amount of production. The producer's responsibilities include, but are not limited to:

- providing, when required, the best verifiable or reliable production evidence available for *--the crop by practice, type, intended use, or planting period--*
- summarizing all the production evidence
- accounting for all the crop's production, whether or not records reflect this production

Note: This may include production where u-pick operations are established after normal mechanical harvest has been completed.

- providing the information in a manner that can be easily understood by COC
- reporting production by the date specified by CCC
- retaining production evidence for 3 crop years after the crop year it is initially certified.

Notes: All producers including producers of hand harvested crops are required to provide acceptable and verifiable production records for that production which is harvested.

During any year that CCC-576 is filed because of loss, producers of hand harvested crops are required to notify the County Office 15 calendar days after harvest is complete and before destruction of the crop so an appraisal of remaining production can be completed. The purpose of the appraisal is to document production left in the field because of quality or unmarketable because of the lack of market.

If selected for spot check, supporting evidence is required for acreage and production that was certified on the current crop year CCC-452.

If the producer fails to provide acceptable production evidence where required by COC or as the result of a spot check, an assigned, zero credited, or T-yield will apply and shall be included in the APH database according to Part 5.

Refer to paragraph 36 for actions concerning unacceptable, incorrect, or false records and certifications.

322 Records of Production (Continued)

B**Acceptable
Records**

[7 CFR 1437.7 (h)] All acceptable production reports that are continuous, signed, and submitted by PRD by the producer for the applicable base period, will be used. Production records acceptable to CCC include verifiable or reliable:

- commercial receipts, settlement sheets, warehouse ledger sheets, pick records, or load summaries if the eligible crop was sold or otherwise disposed of through commercial channels
- documentary evidence, such as contemporaneous measurements, truck scale tickets, pick records, and contemporaneous diaries, as necessary, to verify information provided by the producer if the eligible crop was stored, sold, fed to livestock, or otherwise disposed of other than through commercial channels
- appraisal information from a loss adjuster acceptable to CCC.

Note: All producers of hand harvested crops will be required to request an appraisal after harvest is complete but before the destruction of the crop to
--document any production left in the field when CCC-576 is filed because of loss.--

C**Verifiable
Records**

Verifiable production records for an eligible crop must be submitted by the producer to support an application for payment or as required to support a certification of production.

[7 CFR 400.52 (q)] Verifiable records of production include contemporaneous records provided by the producer that:

- may be verified by CCC through an independent source
- are used to substantiate the amount of production reported.

Continued on the next page

322 Records of Production (Continued)

C**Verifiable
Records
(Continued)**

Verifiable records shall:

- be dated
 - show disposition of the crop's production, including both quantity and price
 - be seasonal or crop specific for crops that are produced more than once in a calendar year
 - be provided if they exist:
 - together with the producer's certification of production in support of any application for payment
 - whenever a record of production is otherwise required by CCC.
-

D**Reliable Records**

In the event the submission of production records is required and verifiable records are not available, the producer shall provide any documentation available, including, but not limited to:

- copies of receipts
 - ledgers of income
 - income statements of deposit slips
 - register tapes
 - invoices for custom harvesting
 - pick records.
-

Continued on the next page

322 Records of Production (Continued)

E COC Responsibilities

COC shall follow this table when receiving and reviewing production records.

Step	Action
1	Date stamp original hard copy records with county name.
2	Photocopy original date-stamped production records submitted by the producer.
3	Place photocopied date-stamped records in the producer's county file.
4	Return original date-stamped production evidence to the producer. Note: The original date-stamped production evidence can only be returned to the producer if the photocopies have been made and placed in the producer's file.
5	Review the producer's file for previously submitted production evidence. Ensure that records have not been duplicated.
6	Ensure that the producer understands that the production records must be: <ul style="list-style-type: none"> • complete and represent the unit's total harvested production • for the correct unit, crop year, and acreage.
7	Review all production records provided by the producer and determine whether the records support the producer's certification or report of production. If the records: <ul style="list-style-type: none"> • support the producer's certification but are not verifiable, follow step 8 • support the producer's certification and are verifiable, the records are acceptable • do not support or agree with the producer's certification, advise the producer the production records are not acceptable and will not be used for APH purposes or to calculate assistance. Note: Once copies of production records have been placed in the producer's file in the county, they shall not be removed or returned to the producer.

322 Records of Production (Continued)

E COC Responsibilities (Continued)

Step	Action	
8	Before acting on any application for payment or determining the nonverifiable production record acceptable, compare the producer's record of production with *--neighboring producers of the crop who have provided verifiable or reliable--* reports of production.	
	IF...	THEN...
	similar levels of production were experienced on neighboring farms	the producer's certification, supported by some record of production, may be considered reliable and acceptable.
	records do not support the producer's certification of production or the level of production is significantly different than neighboring farms	COC shall deny NAP assistance and notify the producer that the certification and record are unacceptable. Note: Under no circumstances shall COC assign production for a lack of acceptable production evidence. Production may only be assigned for reasons stated in paragraph 329.

323 Reports of Production

A PRD

[7 CFR 1437.7 (a)] For each crop for which an acreage report is filed, the producer must report all production for that acreage not later than the immediately subsequent crop year acreage reporting date for the crop.

Except for grazed forage, controlled environment crops, and value loss crops, production must be reported for any NAP crop acreage. Failure to report production by the production reporting deadline:

- *--shall result in the disapproval of any CCC-576 associated with the year in which benefits are requested--*

Note: Reports of production for an eligible crop in the year for which CCC-576 is filed must be accompanied by an acceptable record of production.

- shall have adverse implications for future year approved yield calculations
- could result in future ineligibility for NAP assistance on this crop.

All certifications of production are subject to verification. Producers providing any certification of production attest that:

- the report of production is accurate and complete to the best of their knowledge
- there is no production of the crop omitted or otherwise not accounted for in the report
- an acceptable record supporting the certification exists and will be made available for review at the request of CCC for a period of not less than 3 years following the year production was certified.

--Production cannot be accepted without an acreage report.--

323 Reports of Production (Continued)

B Requirements for Records and/or Certifications

Depending on circumstances, producers are required to certify production and do either of the following:

- attest that an acceptable record exists to support this certification
- provide an acceptable record in support of this certification.

This table contains examples of when records and/or certifications of production must be provided.

WHEN the producer is reporting unit production for...	AND...	THEN the producer must provide...
the current or previous crop year before PRD for the year	harvest of the unit has been completed, and CCC-576 has not been or will not be filed for the current year	an acceptable certification of production on CCC-452 for such current or previous crop year that can be supported by an acceptable record of production. Note: The producer providing any certification of production certifies that records are available and will be maintained to support this certification for a period of not less than 3 years following the year in which this certification was provided. Submission of the production records is not required unless selected for spot check.
	CCC-576 is or will be filed	an acceptable certification on CCC-452 and record of production for the year for which CCC-576 is or will be filed. Note: COC may require acceptable records of production for any previous year of production certified by the producer before approving any CCC-576.

323 Reports of Production (Continued)

B Requirements for Records and/or Certifications (Continued)

*--

WHEN the producer is reporting unit production for...	AND...	THEN the producer must provide...
a previous crop year for which a NAP acreage report was filed	an acceptable certification of production was not timely filed resulting in either an assigned or zero credited yield being placed in the unit's APH	an acceptable certification on CCC-452 and record of production for such year, before removal of the assigned or zero credited yield from APH database. Notes: Approved yield calculations may be revised only for the following crop year. See paragraph 254.
	an acceptable certification of production was not timely provided, and an approved yield was never calculated for the crop in any crop year	an acceptable certification on CCC-452 and record of production for each year in the APH period or have an applicable T-yield assigned to this year in the base period. The approved yield will be effective for the following year.

--*

324 Using Another Producer's Records

A Acceptable Records Not Maintained

When a producer has not maintained acceptable records, acreage and production evidence from another person who shares in the same acreage of the crop for the current crop year may be used to support production reports certified by the producer when:

- the evidence is acceptable and accounts for all of the other producer's acreage and production of the crop in the county
- continuity requirements are met
- a copy is provided by the producer when selected for approved yield review or when required by COC.

325 Reported and Determined Production

A Using Reported and Determined Production

When a unit has both reported and determined production, COC shall use:

- the larger of the reported or determined production to determine net production and amount of NAP assistance
- determined production for APH purposes.

See Part 2 for NAP provisions concerning:

- unacceptable, incorrect, or false records and certifications
- tolerance
- misrepresentation, scheme, or device.

326 Actual Production**A Definition of Actual Production**

Actual production is the total of the eligible crop unit's:

- harvested production
- appraised production, if not accounted for in harvested production.

Notes: Appraisals must be performed by LA * * *.

Actual production is the only production in the APH database that is the basis for calculating the approved yield.

327 Harvested Production**A Definition of Harvested Production**

Harvested production includes all production of the eligible crop from the unit that can be supported by an acceptable record, including, but not limited to, production:

- gathered by hand
- grazed by livestock
- mechanically harvested.

Except for secondary use (subparagraph 174 C), the quantity of a commodity that has any dollar amount or equivalent value for sale or market as any intended use of the crop for which a price or yield is established by CCC is not salvage and must be counted as production of the crop regardless of whether a price or yield for the intended use is approved for the county.

See:

- paragraph 27 for quality losses
- paragraph 333 for salvage value.

B Multiple-Harvested Crops

The harvested production of eligible crop acreage harvested more than once in a crop year shall include the total harvested production from all harvests.

327 **Harvested Production (Continued)****C Commingled Harvested Production**

Producers must make the unit production of a commodity a matter of record before commingling by doing any of the following, as applicable:

- providing copies of verifiable documents showing that production of the commodity was purchased, acquired, or otherwise obtained from beyond the unit
- having the production measured
- having current year's production appraised.

***--D Commingled Between Practice, Type, Intended Use, or Planting Period**

When production has been commingled, separate production may be determined by practice, type, intended use, or planting period if:

- the producer provides a yield estimate by practice, type, intended use, or planting period from past production records
- the producer accounts for total disposition
- COC considers resulting yields reasonable.

When production has been commingled between practice, type, intended use, or planting period and the producer cannot provide a yield estimate by practice, type, intended use, or planting period, the total acreage and production will be charged to the practice, type, intended use, or planting period that would normally result in the highest yield, such as production commingled between irrigated and nonirrigated practices is charged to the irrigated practice. The approved yield for the lower yielding practice, type, intended use, or planting period will be based on variable T-yields determined by the number of years of actual yields provided.

Example: Producer A has an approved yield for sweet corn that has separate databases for both irrigated and nonirrigated practices. The STC-established yield for sweet corn is 65 cwt. Producer A did not maintain a separate production record between the irrigated and nonirrigated practices for the 2001 crop year. For the 2001--* crop year, the APH database for the irrigated production would include both the irrigated and nonirrigated production. The APH database for the nonirrigated practice would be based on a variable T-yield determined by the number of years of actual yields provided.

327 Harvested Production (Continued)

*--D Commingled Between Practice, Type, Intended Use, or Planting Period (Continued)

Irrigated Approved Yield Database			
Sweet Corn - Irrigated			
Year	Production	Acres	Yield
2007	22,080.00 cwt	120.0	A184
2006	12,000.00 cwt	100.0	A120
2005	16,800.00 cwt	120.0	A140
2004	28,800.00 cwt	180.0	A160
2003	16,800.00 cwt	160.0	A105
2002	16,680.00 cwt	120.0	A139
2001	22,800.00 cwt	120.0	A190
2008 Approved Yield = 148.00 cwt			

Nonirrigated Approved Yield Database			
Sweet Corn - Nonirrigated			
Year	Production	Acres	Yield
2007	5,160.00 cwt	60.0	A86
2006	6,720.00 cwt	80.0	A84
2005	5,760.00 cwt	60.0	A96
2004	Z	Z	Z
2003	3,600.00 cwt	80.0	A45
2002	4,500.00 cwt	60.0	A75
2001	0	60.0	T65
2008 Approved Yield = 75.00 cwt			

--*

327 Harvested Production (Continued)

E Commingled Between Units

Production that is commingled between units before it is a matter of record shall be prorated to each respective unit in proportion to each unit’s harvested crop acreage according to this table.

Step	Action
1	Total the commingled production of the eligible crop.
2	Total the harvested acreage of the crop in each identified unit.
3	Divide step 1 by step 2.
4	Multiply the result of step 3 times each identified unit’s harvested acreage of the crop.
5	Add the result of step 4 for each unit to each unit’s respective harvested production.

F Commingled Between Years

COC shall consider production commingled between years as harvested production for the current year for the purposes of determining net production for the crop year of filing CCC-576, unless the production from another crop year is a matter of record before commingling. Production from a different crop year that is a matter of record before *--commingling must be identified as production not to count on CCC-576, Part D, item 38.--* COC shall not prorate commingled production between crop years.

Records used to identify the crop year from which production arose must be:

- verifiable
- acceptable to COC.

328 Appraised Production

A Definition of Appraised Production

[7 CFR 400.52 (d)] Appraised production is production determined by FSA, RMA, FCIC, company reinsured by FCIC, or other appraiser acceptable to CCC, that was unharvested but which reflected the crop's yield potential at the time of appraisal. For the purpose of APH, appraised production specifically excludes production lost because of ineligible disaster conditions.

See Part 7, Section 2 for procedure on performing appraisals.

329 Assigned Production

A Definition of Assigned Production

Assigned production is the loss of production not related to natural disaster.

Note: An assigned yield in the APH data base is **not** the same as assigned production. See Part 5, Section 1.

Assignments of production are required when there is CCC-576 for an eligible crop and any of the following apply:

- it is determined that the crop's loss is because of an ineligible disaster condition or circumstances other than natural disaster and this ineligible cause of loss has not been otherwise accounted for
- unit acreage was destroyed without consent (paragraph 155)

Note: In this case, the amount of assignment for this acreage shall be equal to the guarantee.

- the producer has a contract to receive a guaranteed payment for all or a portion of the crop, as opposed to or regardless of delivery
- the producer plants the crop after * * * final planting date

Note: See:

- paragraph 25.5 for calculating assigned production
- Part 2 for eligible and ineligible causes of loss
- paragraph 332 for converting the guarantee to assigned production.
- irrigation equipment is not capable of supplying adequate water to sustain the expected production of a normal irrigated crop

329 Assigned Production (Continued)**A Definition of Assigned Production (Continued)**

***--Example:** The county expected yield established in the county is based on pivot irrigation. However, a producer has a different type of irrigation method called drip irrigation. Given the different type of irrigation equipment used by the 1 producer, an assigned yield shall be determined if drip irrigation would not be considered representative of the irrigated yield established.

- for annual or perennial crops, the irrigation practice is not used
- for annual crops, the supply of available water at the beginning of the crop year is not adequate
- for perennial crops, the supply of available water at the beginning of the crop year is not adequate because of a circumstance not related to a natural disaster.--*

B Assigning Production

COC shall document the following in each case where production is assigned:

- the basis for assignment
- the quantity of production assigned
- how the amount of assigned production was calculated or determined.

Note: Producers shall be notified of assigned production, including all of the information required to be documented by COC.

C Use of Assigned Production

Assigned production shall be:

- included in the eligible crop unit's net production for loss purposes
- excluded when calculating approved yields.

330 Expected Production

A

Definition of Expected Production Unit's expected production for a crop is equal to the smaller of the unit's reported or determined acreage multiplied by the eligible crop unit's approved yield.

331 Net Production

A

Definition of Net Production Net production is the **production to count** and applies when CCC-576 has been filed for the eligible crop. It includes all of the following types of unit production:

- harvested
 - appraised
 - assigned.
-

332 **Guaranteed Payments**

A
Required Information

Producers must certify whether there has been any arrangement, agreement, or contract for guaranteed payment for production, as opposed to delivery, of any eligible crop for which CCC-576 is filed.

COC shall consider the failure to report the existence of any guaranteed payment contract or similar arrangement or agreement as providing false information to CCC. See Part 2 for information on determinations of misrepresentation, scheme, or device.

B
Assigning Production for Guaranteed Payments

[7 CFR 1437.7 (i)] Any producer who has a contract to receive a guaranteed payment for production, as opposed to delivery, of an eligible crop shall have net production adjusted upward by the amount of production corresponding to the amount of the contract guarantee.

The adjustment shall be calculated and made according to this table.

Step	Action
1	Determine the total amount of guarantee. If this amount is on a per acre, square foot or yard, or similar basis, multiply the amount by the applicable acreage, square feet or yards, or other basis.
2	Determine the amount of production attributable to the guarantee by dividing the total amount determined in step 1 by the approved average market price for the crop.
3	Determine the amount of any actual and/or other assigned production (not because of guaranteed contracts).

Continued on the next page

332 Guaranteed Payments (Continued)

B
Assigning
Production for
Guaranteed
Payments
(Continued)

Step	Action
4	Subtract the result of step 3 from the result of step 2. Note: If step 3 is greater than step 2, stop . No assignment of production because of guarantee is required.
5	Add the result of step 4 to the unit's net production as assigned production because of guarantee.

Example: A producer has a crop guarantee of \$4,000. The crop has a CCC average market price of \$1. The production associated with the guarantee would be 4,000 pounds. The producer realized 3,000 pounds. actual production. The amount of production that must be assigned because of guarantee is 1,000 pounds.

333 Salvage Value

A**Definition of Salvage Value**

Salvage value is the dollar amount or equivalent received by or available to the producer for the quantity of the commodity that cannot be marketed or sold in any market for which a price or yield is established by CCC. The loss of quality resulting in a commodity becoming salvage must be because of natural disaster.

Note: See paragraph 27 for quality losses.

The quantity of a commodity that is damaged and has no dollar or equivalent value for any intended use of the crop for which a price or yield is established by CCC shall:

- be treated as salvage
- not be considered production of the crop for any purpose.

Example: The producer intended 50,000 pounds of popcorn. Because of disaster, the popcorn suffers in quality and is not marketable as popcorn because it will not pop. The quantity of popcorn suffering a loss of quality and rendered unfit for market as popcorn can be considered salvage and not production of popcorn because the quantity has no dollar or equivalent value in any market for which CCC has established a price for popcorn.

Continued on the next page

333 Salvage Value (Continued)

B

Determining the Value of Salvage Quantity

If the quantity of a commodity qualifying as salvage and not production is marketed, producers must provide evidence of this marketing.

The value of the quantity of a commodity that is salvage and not production shall be determined by:

- COC
 - using the higher of:
 - any market price available to the producer for this quantity of the commodity
 - the dollar amount or equivalent value received for this quantity of the commodity.
-

C

Applying Salvage Value

Salvage value shall:

- be deducted from the NAP payment calculated for the crop of the commodity, which was the basis for this salvage
 - not be considered as any type of production of the crop for any purpose, including, but not limited to:
 - the determination of whether the unit suffered requisite loss
 - APH and approved yield.
-

334-400 (Reserved)

Part 7 Notice of Loss**Section 1 CCC-576****401 Reporting Loss****A Overview**

CCC-576 documents:

- a producer's notice of loss or damage to a crop or commodity
- an explanation of what has been or will be done with the crop acreage or commodity
- a record of production
- an application for payment according to paragraph 502.

File and process CCC-576 according to the following:

- 2-CP, paragraph 24 for 2007 and future years prevented planted CCC-576's
- subparagraph B through G for all other CCC-576's.

B Filing CCC-576, Part B

[7 CFR 1437.10] A notice of loss must be provided within 15 calendar days after the:

- disaster occurrence or date damage to the specific crop acreage is apparent to the producer for yield losses
- final planting date for prevented planting.

--An acreage report shall be filed for the total crop acres in CCC-576, Item 17 A.--

* * * Notice of loss must be provided:

- timely
- on CCC-576, Part B
- for each weather related event or adverse natural occurrence that causes damage to or loss of the specific crop or commodity.

401 Reporting Loss (Continued)

* * *

C Late-Filed CCC-576, Part B

COC shall receive each CCC-576 and determine whether CCC-576, Part B has been filed according to subparagraph A. In the event CCC-576, Part B is determined filed beyond the period identified in subparagraph A, COC shall consider acceptable CCC-576's, that are filed at such time to permit:

- verification of the information on CCC-576, Part B by inspecting the specific acreage or crop involved
- COC or an authorized CCC representative the opportunity to determine, based on information obtained by inspection of the specific crop acreage, etc. that eligible disaster conditions, such as damaging weather or adverse natural occurrence as opposed to other factors, caused the claimed damage or loss.

CCC-576 **shall be denied** in each case where CCC-576, Part B is submitted beyond the period specified in subparagraph A and at a time that would not permit COC or an authorized representative the opportunity to inspect the specific crop acreage to verify the damage or extent of damage caused by the asserted disaster condition.

Note: The inspection must provide specific information about the damage or extent of damage to the specific crop acreage and not merely provide information on the existence of the crop acreage. The inspection must be completed within a reasonable amount of time to give the adjuster the opportunity to determine the percent of loss for that specific acreage.

In no case shall CCC-576, Part B filed beyond the period identified in subparagraph A be determined acceptable unless the criteria in this subparagraph are met. STC's and COC's do **not** have authority to waive the requirement for a field inspection of CCC-576, Part B filed beyond the period identified in subparagraph A. COC shall document its findings on each late-filed CCC-576.

***--Example:** Producer late-filed CCC-576, Part B on January 15, claiming grazing loss because of drought. Snow fell on December 20, before field inspection was performed. In this case, COC cannot approve the late-filed CCC-576, Part B because drought condition cannot be verified by a field visit.--*

401 Reporting Loss (Continued)

D Processing CCC-576, Part B

CCC-576, Part B shall:

- be completed by the producer or farm operator
- provide sufficient information for COC to determine that the claimed prevented planting or damage to specific crop acreage or commodity was the result of natural disaster as opposed to other circumstance
- **be date-stamped when received by the County Office**

Note: A photocopy of the date-stamped completed CCC-576 shall be given to the producer as evidence of filing.

- be reviewed and acted on by COC or a representative according to subparagraph E.

Note: County Office must publicize to all producers that a notice of loss will only be accepted on CCC-576.

401 Reporting Loss (Continued)**E Review of CCC-576, Part B**

COC, or CED if delegated authority exists, shall review each CCC-576, Part B and determine whether:

- notice of loss has been filed according to subparagraph A or B
- the claimed disaster condition or period, in CCC-576, item 9, appears reasonable and meets the definition of “natural disaster”
- a field visit is required to verify information on CCC-576 according to subparagraph F
- the producer has requested an appraisal of the damaged crop acreage to be abandoned or put to another use.

Note: COC may delegate authority to CED to act in Part C of CCC-576. This delegation shall be recorded in the COC minutes.

F Field Visits

Field visits need not be performed with each timely filing of CCC-576, Part B. A field visit need only be performed, to the extent practicable, within 5 calendar days of the date CCC-576, Part B is filed if:

- there is any question regarding the specific crop acreage or claimed disaster condition, including, but not limited to:
 - the amount of acreage, or inventory for value loss crops
 - whether the claimed loss or prevented planting condition occurred as claimed or whether the loss or damage was the result of natural disaster

401 Reporting Loss (Continued)

F Field Visits (Continued)

- cases where the number of producers providing similar notices of loss is low and the alleged disaster condition is not apparent to COC

Note: A decision not to schedule a field visit in no way implies CCC's acceptance or approval of the specific crop acreage or alleged disaster condition. It merely demonstrates that the information on CCC-576 does not appear to be questionable.

- an appraisal is required
- measurement service is requested
- spot check is required
- CCC-576, Part B is filed beyond the period identified in subparagraph A, but within the period stated in subparagraph B
- *--the producer indicates on CCC-576, Part B that the acreage will be destroyed or otherwise disposed of without benefit of harvest. In this case, the County Office shall--* initiate a request for appraisal of the specific crop acreage. See Section 2.

COC and CED shall have the option of scheduling a field visit for any CCC-576 when circumstances require inspection of the specific crop acreage.

Follow subparagraph 427 E for field visits performed for nonappraisal situations.

401 Reporting Loss (Continued)**G COC Action on CCC-576, Part B**

COC or designee shall:

- ensure that the provisions of subparagraphs A through E have been followed
- review CCC-576, Part B
- complete CCC-576, Part C
- document findings and:
 - disapprove notices of loss that are:
 - not filed according to this handbook
 - filed for a circumstance other than natural disaster
 - filed beyond the period specified in subparagraph A or B so as to preclude CCC from verifying, with physical evidence of the specific crop acreage, that the claimed loss or damage occurred

Notes: Each producer with an interest in the specific crop acreage for which CCC-576, Part B is disapproved shall be notified in writing. The notification shall include a right of reconsideration to COC according to 1-APP. See instructions in subparagraph 6 A.

Any producer's right of reconsideration is limited to facts or circumstances of the case. The specific filing deadline for notices of loss is considered a rule of general applicability and is not, therefore, appealable.

- approve CCC-576, Part B's that are filed according to this paragraph and:
 - generate a letter to the producer or producers filing CCC-576, Part B according to instructions in subparagraph 6 A
 - schedule loss adjustment work as applicable according to Section 2.

402-424 (Reserved)

Section 2 Measurements and Appraisals

425 Overview

A Introduction

Producers choose whether to abandon, replant, destroy, or harvest specific crop acreage. A producer’s choice of action on any specific crop acreage could impact the producer’s eligibility for NAP assistance. The decisions made by the producer could have a bearing on the producer’s opportunity to provide acceptable production evidence for NAP purposes.

Part 6 explains:

- different types of production
- production reporting requirements
- when production records are required.

This table summarizes the requirements of 7 CFR 1437.10 and identifies what producers must do when certain situations arise.

IF the producer...	THEN for APH and/or CCC-576 purposes...
chooses not to harvest the crop	all eligible acres and crop units for which the producer intends to make an application for payment must be left intact until the units have been appraised or released * * *.
harvests the crop	the producer must provide such acceptable documentary evidence of crop production as CCC may require according to Part 6.

426 Performing Measurement Services

A Measurement Service Provided at No Charge

Measurement services include the following:

- acreage determinations
- production measurements
- crop appraisals.

For NAP purposes, LA shall provide at no cost to the producer:

- any measurement service required as a result of an acceptable notice of damage or loss, including required appraisals for hand harvested crops in a year of loss according to paragraph 322
- certain production measurements and crop appraisals for APH identified in ~~paragraph 306 for perennial crops~~*
- measurement services required for reviews and inspections, such as:
 - acreage reviews
 - spot checks
- in general, measurements needed for required information for which reporting by certification is not allowed.

B Measurement Service Charges

For NAP purposes, charge for measurement services or late file according to 2-CP when:

- producers request the service to provide acceptable production records for APH

Note: County Office shall charge service fees for hand harvested crops when a producer requests an appraisal for APH purposes in a non loss year.
- certification of records is allowed
- other means of providing acceptable production records are available
- the production measurements and crop appraisals are not those identified in ~~paragraph 306 for perennial crops~~*

Charge measurement services according to 2-CP for all requests for contracts administered by an MPCCI company.

426 Performing Measurement Services (Continued)**C Responsibility of Producers**

Although measurements or appraisals may assist a producer in meeting a requirement for accurate reports of acreage or production, the submission of a request for measurement or appraisal shall not relinquish the producer of the responsibility of providing required and acceptable information.

If any measurement service is not performed:

- and the producer paid a fee for this service, refund the fee
- the producer's eligibility for NAP assistance shall be determined based on acreage and production records acceptable to COC according to Parts 4 and 6.

A producer's failure to provide acreage and production evidence, when required, will result in:

- using assigned yields in calculating the approved yield
- denying NAP assistance for the crop year in which this failure occurred.

427 Performing Appraisals**A Appraisal Requests**

Appraisals shall be requested by producers and completed timely by LA * * * on all crops that will not be taken to harvest because of an eligible disaster condition.

B Loss Adjustment Standards Handbook

COC shall ensure that representative sample areas are established according to the FCIC specific crop loss Adjustment Manual Standards handbook, such as for forage, the FCIC Forage Loss Adjustment Standards Handbook (FCIC-25150).

C Method of Appraising

Perform appraisals and notify producers according to Loss Adjustment Manual procedure. If a loss adjustment appraisal is required for a crop for which Loss Adjustment Manual procedure is not available, complete the loss adjustment by identifying the affected acreage and documenting the method used to determine the production to count.

Record results of appraisal on CCC-576-1.

* * *

427 Performing Appraisals (Continued)**D Similar Treatment**

LA's * * * shall follow established loss adjustment appraisal procedures when making loss adjustments.

Exceptions: No adjustment to the quantity of the crop shall be made because of a loss of quality unless a zero dollar value for this quantity is determined. See paragraph 27.

Pre-acceptance inspections and preharvest inspections are not required for the crop to be eligible for NAP. However, LA * * * and COC must determine the crop was:

- produced using good farming practices
- adversely affected by natural disaster.

Note: A producer cannot elect to make specific crop acreage for which CAT is available eligible for NAP assistance by failing to meet CAT guidelines or provisions.

E Completing Loss Adjustment Activities

Loss adjustment appraisals for NAP shall be completed by LA, whenever possible.

* * *

Loss adjustment activities that are not specifically related to an appraisal can be completed by any County Office employee who is capable of completing all of the following:

- verification of the accuracy of information entered on CCC-576, Part B
- all other necessary documents.

LA * * * who completes the appraisal shall obtain the producer's signature on CCC-576-1. The producer's signature on CCC-576-1 is the producer's concurrence of production determined by LA.

428 (Withdrawn--Amend. 44)

429-501 (Reserved)

Part 8 General Payment Provisions

502 Application for Payment

A Filing CCC-576

[7 CFR 1437.10 (b)] An application for NAP payment must be filed on CCC-576, Parts D through G, as applicable:

- *--with the County Office where the units are administered--*
- in conjunction with filing an acceptable CCC-576-1 that is required only when an appraisal is required or measurement service is requested or required by spot check
- *--**Exception:** If producer has signed the final appraisal and CCC-576-1, and all production is accounted on the CCC-576, Parts D through F, producer does not need to sign Part G.--*
- no later than the subsequent crop year acreage reporting date for the crop following the crop year in which the loss occurred
- *--COC has authority to encourage producers to provide information by an earlier date, such as sales closing date; however, production submitted by the subsequent crop year acreage reporting date for the crop shall be considered timely--*
- with required documentation according to subparagraph B.

Notes: A timely CCC-576 is required. Producers interested in obtaining a NAP payment for a qualifying loss shall file CCC-576.

Other producers involved in the farming relationship may choose to use the production and loss information previously filed. By signing the certification in Part G they acknowledge the information is correct.

COC shall ensure that the filing requirement in this subparagraph is adequately publicized.

502 Application for Payment (Continued)**B When CCC-576 Is Considered Filed**

CCC-576 is considered filed when all the following apply:

- it is accompanied by all required documentation for the unit, including, but not limited to:
 - an acceptable report of acreage according to Part 4
 - an acceptable CCC-576, Part B filed according to paragraph 401
 - acceptable production evidence according to Part 6
 - any document or form required to establish producer or person eligibility according to Parts 2 and 4

Exception: Approved yields are not applicable to:

- value loss crops (paragraph 181)
 - turfgrass sod (paragraph 186).
- any other documentation and information necessary from the applicant for COC to determine the correct payment amount.

C Late-Filed CCC-576's

CCC-576, and any required information and documentation for CCC-576, submitted beyond the period defined in subparagraph A shall be received by the County Office and placed in the producer's file.

COC shall immediately notify the producer in writing that:

- the application was not filed timely
- assistance cannot be paid.

Note: The letter advising any producer that CCC-576 cannot be paid shall include the basis for the determination and a right of reconsideration according to 1-APP. The right of reconsideration is limited to providing facts and evidence that CCC-576 was filed timely.

503 Amount of Assistance

A Amount of NAP Assistance

See paragraph 26 for information on the amount of NAP assistance available for a qualifying loss.

B Average Market Price

DAFP-approved average market prices shall be used to calculate NAP assistance.

Exception: See subparagraph 183 I for ornamental nursery.

STC shall recommend average market prices according to paragraph 108.

C AUD Value

The applicable DAFP-established AUD value in the following table will be used to compute payments for losses of forage intended to be grazed.

Crop Year	AUD Value
2001	\$0.6787
2002	\$0.6599
2003	\$0.5772
2004	\$0.5374
2005	\$0.5304
2006	\$0.5746
2007	\$0.5950
2008	\$0.6359
--2009	\$0.7034--

D Payment Factors

[7 CFR 1437.11] DAFP-approved payment factors shall be used to calculate NAP assistance. STC shall recommend payment factors according to paragraph 109.

When calculating a payment for a unit’s qualifying loss, the DAFP-approved:

- prevented planting payment factor shall be applied to any eligible prevented planted acreage for payment

503 Amount of Assistance (Continued)**D Payment Factors (Continued)**

- unharvested payment factor shall be applied to:
 - crop acreage planted but not harvested
 - any value loss crop's qualifying loss computed for payment

Exceptions: See subparagraph:

- 182 L for aquaculture
- 183 K for ornamental nursery.
- any loss of turfgrass sod
- any loss of honey or maple sap when the producer suffers a total loss of harvested production
- blueberry crop acreage:
 - not harvested
 - harvested by an individual or entity whose charge for harvest was based on the amount of blueberry production.

Note: For each CCC-576 involving blueberries, the applicant shall certify:

- whether the producer performed the producer's own harvest of blueberries, or whether blueberry harvest was performed by another individual or entity
- the basis for harvest expenses, such as cents per pound, dollars per acre, etc., if the producer contracted with another individual or entity to have blueberries harvested.

For crop acreage intended to be grazed, the unharvested payment rate is 1.000.

For crop acreage intended to be harvested, including intended for seed and excluding grazed, an unharvested payment rate recommended by STC and approved by DAFP shall be applied to all crop acreage abandoned or destroyed before harvest.

504 Reductions

A NAP Payment Reductions

NAP payments computed according to this handbook shall be reduced for:

- payment limitation (paragraph 34)
- secondary use (subparagraph 174 C)
- salvage value (paragraph 333).

505 Other Benefits

A Multiple Benefit Exclusion

Before approving CCC-576, COC shall review whether the producer has requested or received other USDA benefits for the loss. County Office shall contact the producer and inquire whether the producer has received any other USDA benefit (including but not limited to a GRP indemnity). If so, the producer should be asked to specify what the other USDA benefit was (not the amount, but the kind of benefit). NAP payments shall not be approved if the producer chooses or has received benefits for the loss under any other program administered by the Secretary.

If any person misrepresents facts or circumstances concerning a person's having received another USDA benefit, action according to paragraph 36 may apply.

See paragraph 35 for information on multiple benefits.

506 Determining Shares

A Eligible Producer and Shares

* * *

*--A grower's claimed share of NAP payment cannot exceed both of the following:

- the grower's share of the risk in producing the crop
- the grower's actual valid claimed ownership share of the crop, at time of loss.--*

507-599 (Reserved)

Part 9 Compliance Reviews

600 NAP Compliance Reviews

A Overview

Compliance reviews for NAP are required to ensure the accuracy of the information provided by producers. Reviews will be required as determined by:

- the National Compliance Review list
 - subparagraph B.
- ***

These reviews consist of:

- approved yields which are based on certified production records
- acreage reports.

B Additional Required Selections

Reviews that fall into 1 of the following categories are designated as required reviews:

- approved yield certified production where the approved yield is greater than 150 percent of the T-yield or adjusted T-yield, as applicable

Note: County Offices shall print the NAP Approved Yield Review Register according to paragraph 1112.

- *** inspections for a unit or crop when the COC, DD, or STC has reason to believe that the:
 - producer’s acreage or production report is inaccurate
 - production evidence submitted by the producer indicates that data is invalid or the reported production is unreasonable when compared to other units in the area.

600 NAP Compliance Reviews (Continued)

***--C Approved Yield Review Process**

Contact the producers and request the production evidence to support any certified production on CCC-452. Verify the production evidence certified by a producer for the most recent 3 APH crop years. If the approved yield does not have any production certified, then no review of production evidence is required. Acres must be reviewed.

Example: A 2007 approved yield is selected for review. The producer certified production for 2003, 2004, 2005, and 2006. Request the producer to provide the production evidence for 2004 through 2006.--*

The production evidence provided by the producers must then be verified by the facility where the production was sold or stored.

When contacting elevators, organizations, or other facilities to verify production evidence, the County Office shall provide:

- specific information, including producer's name and address, and crop or crops
- the reason and explanation for information requested.

Note: Producers authorized the release of the information on CCC-452.

The approved yield historical acres planted should be verified against the FSA-578 record. If planted acres were determined in an APH crop year, that acreage must be loaded in the APH database.

The approved yield must be manually recalculated if there are any changes to the actual production for any APH crop year. Calculate the percentage difference for an approved yield by dividing the current year approved yield by the approved yield determined to be correct.

The current year approved yield must be changed if the difference is more than 5 percent and *--cup procedures do not apply. If the change was 5 percent or less, make the correction for--* the following year.

Follow paragraph 39 to calculate tolerance and determine ineligibility, if applicable. An approved yield record will be considered a discrepancy if the approved yield change is greater than 5 percent.

600 NAP Compliance Reviews (Continued)

D Completing CCC-579

For each producer or unit selected according to subparagraph A, complete CCC-579.

The summary information in CCC-579, items 28 through 30 shall be recorded in the National Compliance Review database:

- only if the producer was on the National Compliance Review list
- according to * * * 2-CP * * *.

600 NAP Compliance Reviews (Continued)

*--E Example of CCC-579

The following is an example of CCC-579.

This form is available electronically.									
CCC-579 (10-16-07)		U.S. DEPARTMENT OF AGRICULTURE Commodity Credit Corporation							
NAP APPROVED YIELD COMPLIANCE WORKSHEET		1. County Office Name	2. Crop Year						
		3. State Office Name

Part 10 County Office Software Operations

--Section 1 National Crop Table, 2008 and Prior Crop Years--

751 Overview

A Introduction

NCT is a web-based application * * * that will be used for all programs requiring price and yield data, such as NAP and future disaster programs.

For NAP purposes, NCT will be used to:

- recommend and approve crop data
- maintain a historical database for prices and yields.

The records will be validated against the crop codes according to Exhibits 7, 7.5, 7.6, or 7.7, as applicable; 2-CP, Exhibit 10.5; FIPS codes; and the insurability file when it becomes available. National, State, and County Office personnel will have access to NCT to view, change, and add crop records.

B NCT Security

USDA eAuthentication security is enforced to ensure that a user can only update crop records for their respective State or County. Authority roles are defined as “County”, “State”, and “National” users in eAuthentication, and different levels of access will be granted according to the user’s role.

Authorized users with a “County”, “State”, or “National” eAuthentication NCT role:

- **must** access NCT software using a valid eAuthentication ID and password through the FSA Intranet web site “FSA Applications”
- will have the capability to access NCT to add and modify crop records **only** for their State or County and to view crop records for all States.

All other users with valid eAuthentication ID’s will have the capability to view, but **not** modify, crop records for all States and counties.

If the State Office needs additional users, the State Office shall:

- request new user access through the State Security Liaison Representative
- ensure that all requests for “County” or “State” authority are verified by the State disaster specialist so that the appropriate NCT authorization role can be assigned to the users eAuthentication ID.

751 Overview (Continued)

C Accessing the National Crop Table Web Site

To access NCT, go to http://intranet.fsa.usda.gov/fsa/FSAIntranet_applications.html.

*--Under Production Adjustment & Disaster Programs, CLICK “NCT – National Crop Table (2001-2008)”.

State & County T-OPS/LWV	<ul style="list-style-type: none"> • WSRIS - IE, WORK STATUS Report System- Internet Enabled <p>Administrative Applications</p> <ul style="list-style-type: none"> • COC Elections • COC State AO Reports • COE Replacement • ERSR • Directive Tools • OIP - Office Information Profile <p>Financial Services</p> <ul style="list-style-type: none"> • Financial Applications <p>Rates and Fact Sheets</p> <ul style="list-style-type: none"> • County LDP Rates • Honey Rates • Pulse Crop Rates • Wool Rates • Grain Warehouse Rates • Program Fact Sheets 	<p>Assistance Payment</p> <ul style="list-style-type: none"> • eLDP - Electronic Loan Deficiency Payments • EWR - Electronic Warehouse Receipts • MILC-X - MILC Extension Program • Peanut Program • Sugar Program • TAA - Trade Adjustment Assistance • Tobacco Transition Payment Program <p>Production Adjustment & Disaster Programs</p> <ul style="list-style-type: none"> • AILFP- American Indian Livestock Feed Program • 2005-2006-2007 CDP Crop Table • Compliance Query Tool • DCP - Direct and Counter-Cyclical Program • Homeland Security • LAPLT - Livestock Assistance Program Load Table • LAP - Livestock Assistance Program • NCT - National Crop Table (2009 -) • NCT - National Crop Table (2001-2008) • STORM • TAP - Tree Assistance Program
-----------------------------	--	--

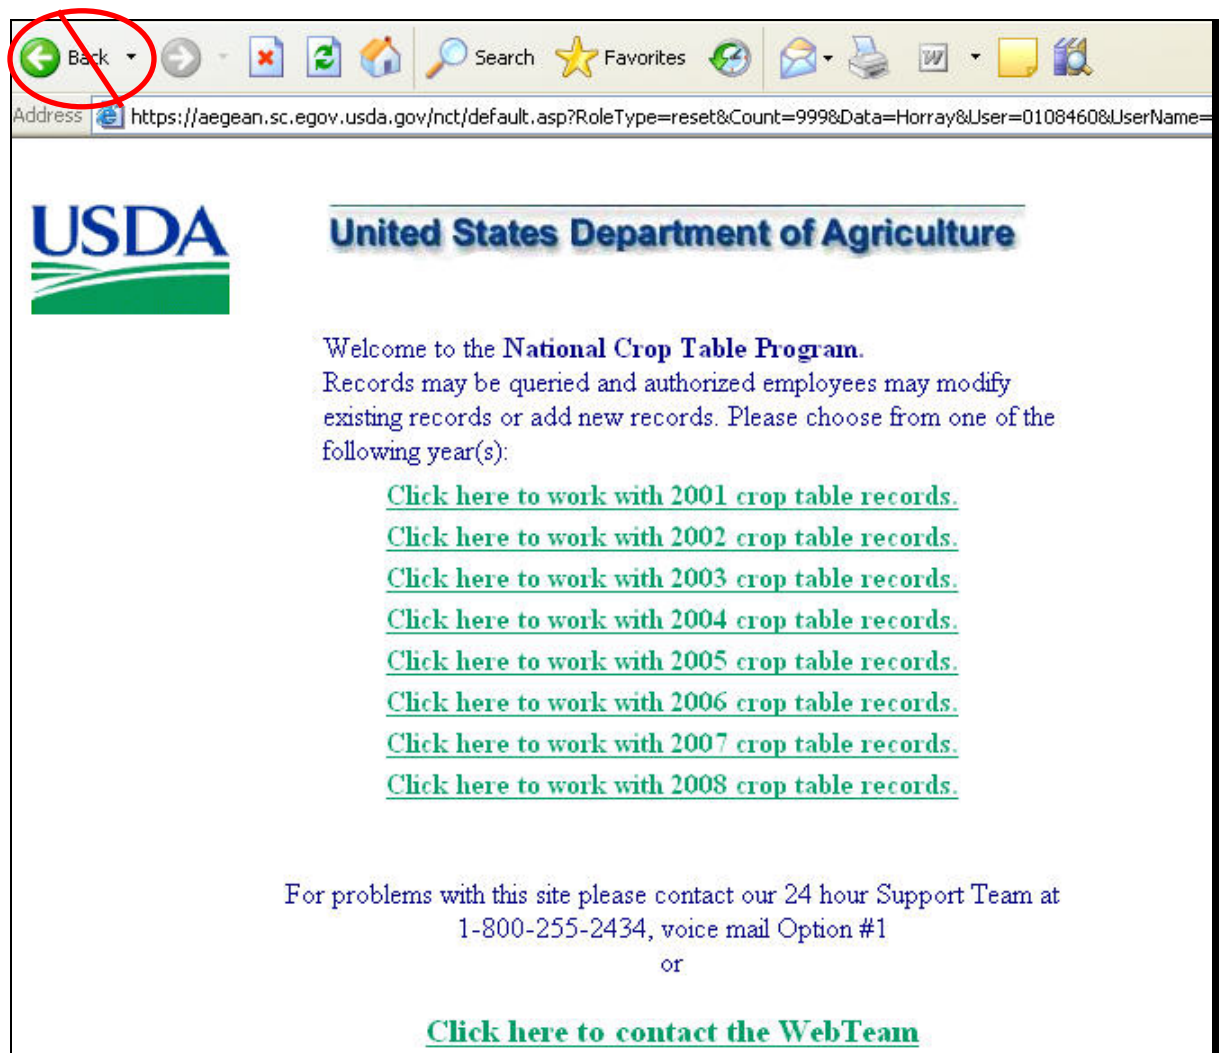

--*

751 Overview (Continued)

C Accessing the National Crop Table Web Site (Continued)

*--The USDA eAuthentication Warning Screen will be displayed, CLICK “Continue”. Enter User ID and password, CLICK “Login”.

The Welcome to the National Crop Table Program Screen will be displayed that allows users to select the crop year and load crop data.

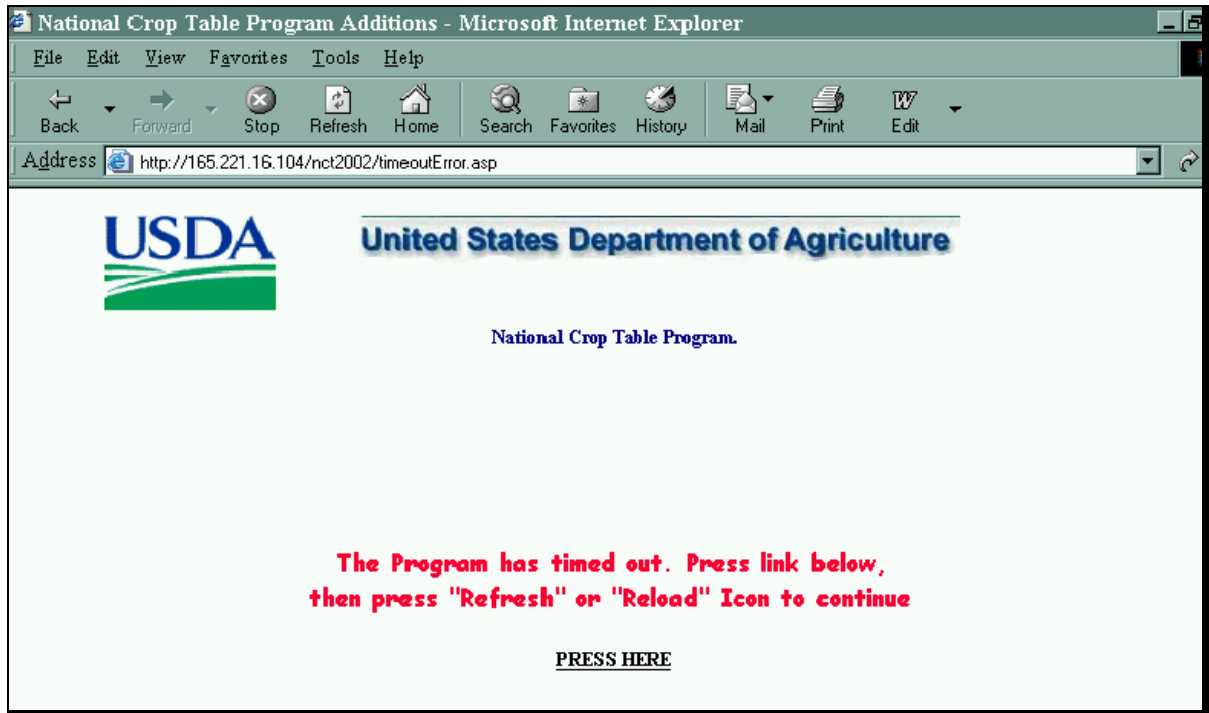

Note: When using NCT, **always** use the NCT screen “back” option.

Using “ Back” from the Internet Explorer tool bar or Netscape Navigator will cause **undetected errors.**--*

751 Overview (Continued)

D Timing Out

--Inactivity will result in system time-out before a user is notified. This eliminates open connections to the web site which could ultimately slow down the system. The user will be notified of system time-out when the user attempts to resume activity. The following screen will be displayed.--

751.5 * * * NCT Pay Groupings

A Background

*--Each year the National Office updates a NAP pay grouping file to include approved NAP crop definition changes. The pay grouping file is used to validate whether crops added to NCT are approved for NAP. Crops added to NCT that do not match the NAP pay grouping file cannot be flagged "Y" for approval and will not be downloaded to the County Office.

B Adding Crops to the NAP Pay Grouping File

Follow subparagraph 170 E to request a new crop to be added to the NAP pay grouping file. An error message will be displayed, according to subparagraph 757 C, for any crop, type, and/or intended use added to NCT that is not included in 2-CP, Exhibit 10.5.--*

752 Rollover Process

A Background

NCT was developed to maintain a current data base of prices and yields that could be used by all programs. For the National Office to review and approve NAP crop data, State and County Offices were requested to data load historical price and yield information in NCT. Any NCT historical data loaded will be rolled over to the subsequent crop year to:

- allow State and County Offices access to NCT
- timely process NAP payments.

This will enable offices to do either of the following:

- update the most recent crop year for the historical data base
- load all 5 years of crop data for those crops not having historical records.

B Initial Download Process (Shell Records)

To ensure applications for coverage are taken timely, NCT must download basic crop information into the System 36 before approval at the county, State, or national level so the application closing date validation can be performed. A rollover of all 2004 NCT records was performed to process the initial download of data. Additional downloads will be *-performed on crops added as shell records. The status code for shell records is "S".--*

State and County Offices will update NCT crop records by entering all other valid data before setting the State approval flag. Once the State approval flag is set to "Y", the record will be downloaded with the updated information.

State Offices may add a shell record to NCT for a crop not included in the County Office crop table according to subparagraph 756 E. However, an application for coverage cannot be entered in the automated system until the:

- basic crop information is downloaded to the County Office crop table
- crop is included on the pay grouping table.

Notes: Shell records do not require a price or yield to be approved before download to the County Office crop table.

752 Rollover Process (Continued)

B Initial Download Process (Shell Records) (Continued)

The following NCT data from the 2005 crop year data was rolled to the 2006 crop year data *--for shell records. The status code for a rolled record is "R".--*

Crop Year Data	
Crop Type	Final Planting Date
Crop Code	Acreage Reporting Date
Practice Code	Normal Harvest Date
Planting Period	Application Closing Date
Intended Use	Graduated Price Code
County Code	

C 2006 Rollover

All 2005 crop year data is rolled to 2006 regardless of an approval flag to expedite the crop table process. The following crop data will be included in the 2006 NCT rollover with the option to change the following:

- practice code
- graduated price code
- planting period
- acreage reporting date
- normal harvest date
- final planting date
- application closing date
- prevented factor
- unharvested factor
- historical yield and price data
- acres per animal unit
- grazing days
- unit of measure.

752 Rollover Process (Continued)

D Historical Data

For 2001 NCT, an exception was made to not require historical data to be loaded before approving a crop record. For subsequent years, historical data must be entered in at least 1 year through the most current crop data year before approving the crop record.

***--Notes:** For 2001, 2002, and 2003, NCT data can only be viewed.

For 2004 NCT, price and yield crop data for 1997 through 2002 will be displayed. The 1997 price and yield data will not be accessible to State and County Offices. However, State Offices will be able to update historical data previously loaded in the *--2003 NCT for crops 1998 through 2001.--*

For 2005 NCT, price and yield crop data for 1998 through 2003 will be displayed. The 1998 price and yield data will not be accessible to State and County Offices. However, State Offices will be able to update historical data previously loaded in the 2004 NCT for crops 1999 through 2002. Historic data must be entered in at least crop data year 2003 when no other crop data is available. If historic data was entered in any previous years, historic data for all subsequent years is required.

***--For 2006 NCT,** price and yield crop data for 1999 through 2004 will be displayed. The 1999 price and yield data will not be accessible to State and County Offices. However, State Offices will be able to update historical data previously loaded in the 2005 NCT for crops 2000 through 2003.--*

Example: Historic data has been entered for 2000; therefore, historic data must be entered for 2001, 2002, and 2003.

E Acres Per Animal Unit/Grazing Days (AUD)

With the exception of the AUD value and year, the NCT rollover process will consist of all data previously established by STC. For 2001 the AUD value was not defaulted. For 2002 and subsequent years, the NCT rollover process will update the AUD value according to subparagraph 503 C.

***--Note:** The 2006 AUD value is .5746.--*

753 National Crop Table Process**A Forage Crops**

When a producer intends a crop to be mechanically harvested, but the actual use of the crop acreage is completely grazed, the loss calculation for the acreage grazed will be determined using AUD. To ensure that records are available for the proper forage calculation on the application for payment, NCT requires a grazing record to be data loaded before a forage crop intended for forage and some forage crops intended for seed. Even though some crops may not normally be grazed, even in a drought year, such as alfalfa, State Offices are required to establish the acres per animal unit and grazing days for the crop. These grazing records must be established for each practice; that is, irrigated or nonirrigated.

Example: If there is an irrigated forage record, you must have an irrigated grazing record.

* * *

Notes: A grazing record will only be required for small grains if the intended use is forage. Intended uses of seed and grain for small grains do not require a grazing record to be entered.

For alfalfa mix, a grazing record must exist before entering a record for the intended uses of seed and forage.

* * *

753 National Crop Table Process (Continued)**B Warm and Cool Season Forage Designations**

For 2001, States that designated warm and cool season grasses for grazing experienced a problem, because the planting period for a warm season grazing crop (02) did not match the planting period for the mechanically harvested forage crop (01). As a result, those States designating both warm and cool season grasses for grazing were required, for the warm season grass, to create a duplicate record for planting period 01, normally considered cool or full season. This enabled the software to find a matching grazing record for the mechanically harvested crop, always designated as planting period 01.

Unlike 2001, for 2002 and subsequent crop years, States that establish warm and cool season grasses will not be required to load a duplicate grazing record for planting period 01 for the sole purpose of matching the mechanically harvested forage record (planting period 01) on the crop table. For 2002 and subsequent years, payment software will process a mechanically harvested forage crop (planting period 01) as long as there is a grazing record regardless of a planting period (could be planting period 01 or 02).

Note: This was not a problem on cool season grasses for grazing for States that designated full season grasses for grazing (both 01), because the planting period designation of 01 already matched the planting period for the mechanically harvested forage crop.

753 National Crop Table Process (Continued)

*--C NCT Options

After selecting a crop year as shown in subparagraph 751 C, the following screen will be displayed to show available NCT options respective to the user's level of authorization.

Note: Specific procedure for each option can be found in:

- paragraph 755 for County Office users
- paragraph 756 for State Office users
- paragraph 756.5 for National Office users.--*

754 Units of Measure in the National Crop Table

A Selecting the Update/Add Option for Units of Measure

If the unit of measure is in barrels, boxes, bunches, bushels, cartons, containers, crates, or lugs, the State Office user shall update the units of measure table before adding or reviewing/modifying crop data into NCT.

For 2005 and subsequent years, if the unit of measure is “bunches,” zeroes will be accepted for pounds per unit of measure for the crop. Zeroes will not be accepted for pounds per unit of measure for crops with the unit of measure other than “bunches”.

To update the unit of measure, select the “Update or Add the number of pounds that a unit of *--measure should contain” option, as displayed in subparagraph 753 C. This option allows--* State Offices to enter the number of pounds per unit of measure by crop.

Notes: This option is also available to County Offices, but only to view information loaded by the State or National Office.

Ensure that the “Back” button on the NCT screen is used.

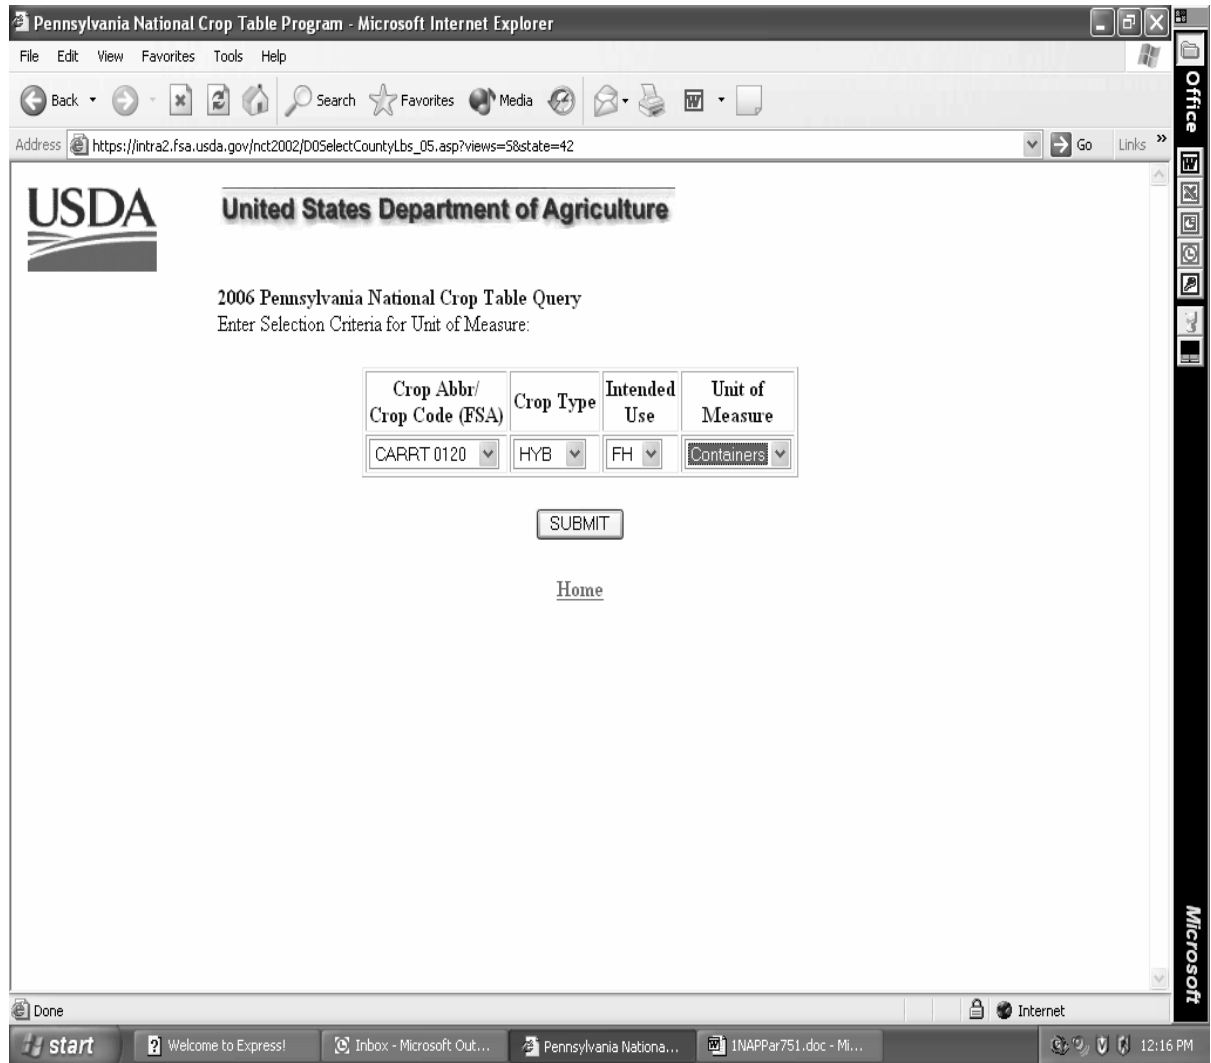

* * *

754 Units of Measure in the National Crop Table (Continued)

B Selection Screen

*--State Office users select the crop code/crop abbreviation, crop type, intended use, and unit of measure, as shown in the following screen. The field may be blank if the crop does not have a crop type and/or intended use.

The State Office user will use the drop down menu to select the applicable information, and click the "Submit" button to proceed.

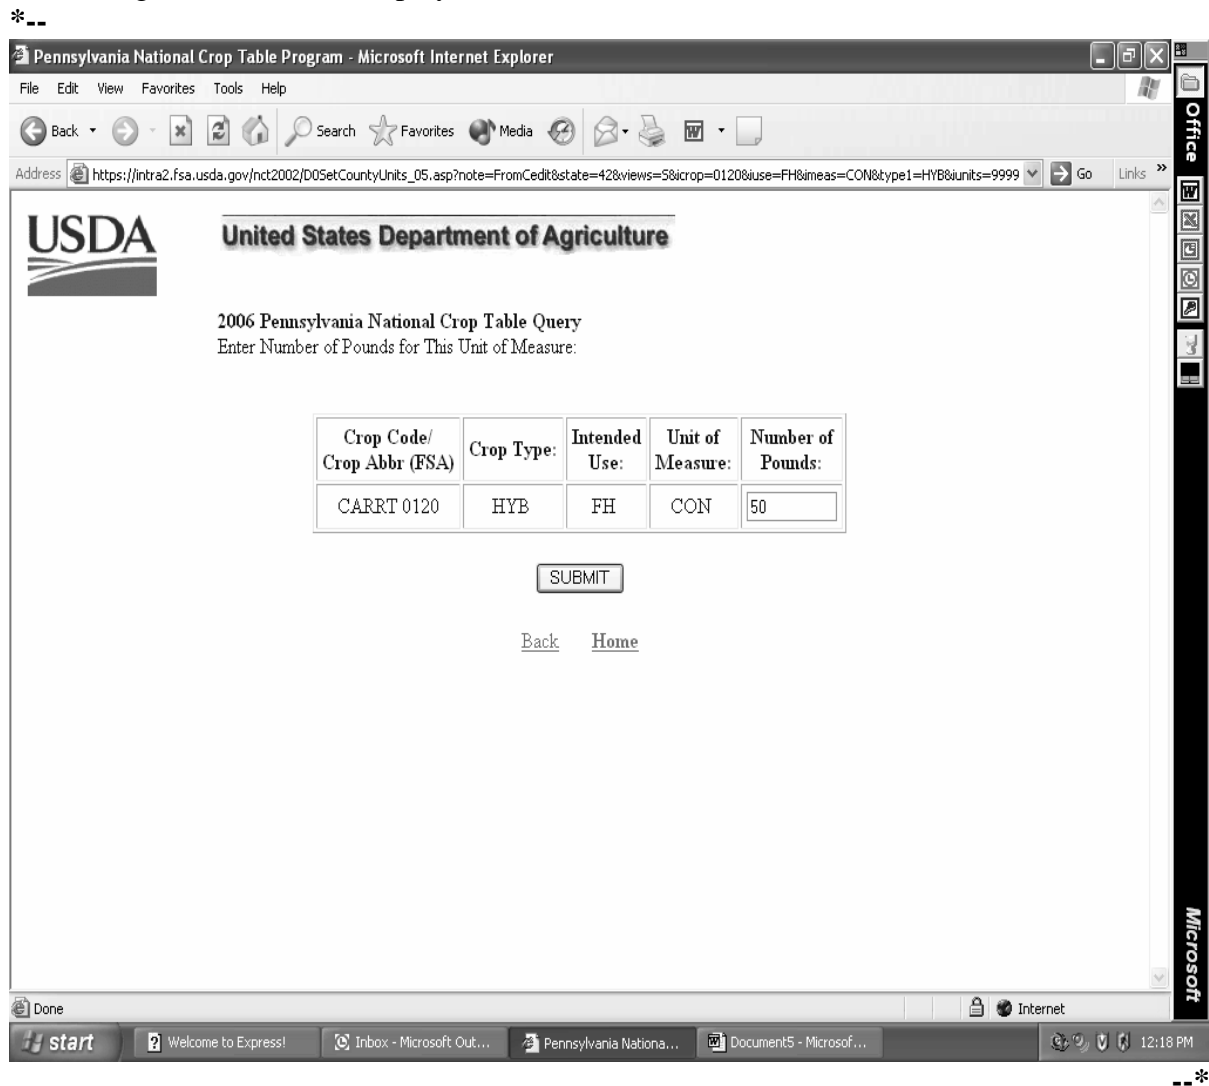

754 Units of Measure in the National Crop Table (Continued)

C Updating Units of Measure

The user must enter the number of pounds for the applicable crop code/crop abbreviation, crop type, intended use, and unit of measure. Only 1 unit of measure can be updated for a crop. If the user attempts:

- to load a second unit of measure for the same crop, type, and intended use, the previous unit of measure will be overwritten
- to add or modify a crop record that requires the number of pounds to be entered, an error message screen will be displayed.

754 Units of Measure in the National Crop Table (Continued)

C Updating Units of Measure (Continued)

The user can also update the unit of measure when adding a new record or modifying a record. When adding or modifying a record and the pounds per unit of measure has not been *--updated, an error message screen will be displayed and the user must select “Edit Pounds”.

--*

754 Units of Measure in the National Crop Table (Continued)

C Updating Units of Measure (Continued)

*--When "Edit Pounds" is selected, the user must enter the number of pounds and click on the "Submit" button.

Note: All other methods of editing pounds remains the same.--*

* * *

D Units of Measure Report

*--State and County Offices can select:

- "View the number of pounds that a unit of measure should contain" option, as displayed in subparagraph 753 C, to view units of measure, individually, for a crop, type, and intended use
- "Print a list of all crop codes for the state along with their pounds value" option, as displayed in subparagraph 753 C, to print a report listing the crop code, crop type, and intended use, with the designated unit of measure and pounds.--*

755 County Office National Crop Table Process

A County Office Action

If the County Office **is authorized** to enter crop data, the County Office shall:

- access NCT according to subparagraph 751 C
- if a crop was never loaded, select “Add a new record” option according to subparagraph B
- enter all applicable county data for the crop, according to subparagraph 757 A, except for the price, prevented and unharvested factors, and the application closing date
- review the crop record
- correct all error messages, if applicable, according to subparagraph 757 B
- select the “View/Change” option according to subparagraph C to:
 - view/modify a crop record previously loaded
 - update crop data to calculate yields
 - set the “County Approval” flag to “Y”
- e-mail the State Office indicating that the “County Approval” flag has been set and the crop records are ready for State Office review and approval
- * * * when approved by the State Office, print approved crop data according to paragraph 759 and maintain a report of approved records for the County Office
- print the “NAP Crop Table Report” according to paragraph 1101 after crops have been approved by the State Office and downloaded to the System 36.

Note: Approved crop data is downloaded to County Offices on a daily basis.

Note: Maintain a copy of all supporting documentation for the crop.

755 County Office National Crop Table Process (Continued)

B Adding a Crop

The County Office can add a crop to the National Crop Table for the first time by selecting *--“Add a new record to the 2006 National Crop Table”, as displayed in subparagraph 753 C.

After choosing the add a new record option and selecting the State from the drop down menu, the following screen will be displayed. Only the fields applicable to the County Office will be accessible. See paragraph 757 for detailed information.

USDA United States Department of Agriculture

755 County Office National Crop Table Process (Continued)

D Record Inserted/Updated Successfully

Once the County Office creates a record and the record is updated successfully, additional fields that were not on the Crop Data Entry Screen will be displayed. These additional fields are not accessible by the County Office. These additional fields include:

- State code
- State and national approval fields
- insurance indicator field

Notes: An “N” flag will be displayed until insurance data is updated with the insurability file. Once updated, the insurance flag will display:

- “Y”, if the crop is insurable in the county
- “N”, if the crop is not insurable in the county

County Offices shall monitor RMA web site at
 --<http://www3.rma.usda.gov/apps/docbrowser/docbrowserB.cfm>--
 to determine crops covered by insurance.

- calculated yield, if no override code is used
- zeroes in the price fields.

The following options will be displayed at the top and bottom of the screen:

- “Back” - select to go back 1 screen
- “Home” - select to go back to the initial selection screen.

Note: If a record has been added through the “Add” option and the user clicks on the “Query Result” button after the record has been updated, the query will be displayed for that crop.

756 State Office National Crop Table Process

A State Office Action

State Offices have the option of either allowing County Offices the authority to data load crop data at the County Office level or loading all crop data at the State Office level. The State Office action will vary depending on where the crop data is loaded. If the crop record *--is first loaded at the State level, it must be loaded through the “Add a new record to the 2006 National Crop Table” option. If the County Office added the crop record to NCT or if the record was previously loaded, then the State Office should access the record through the “View/Change a record that currently exists in the 2006 National Crop Table” option. To process a crop record on NCT, the State Office shall:

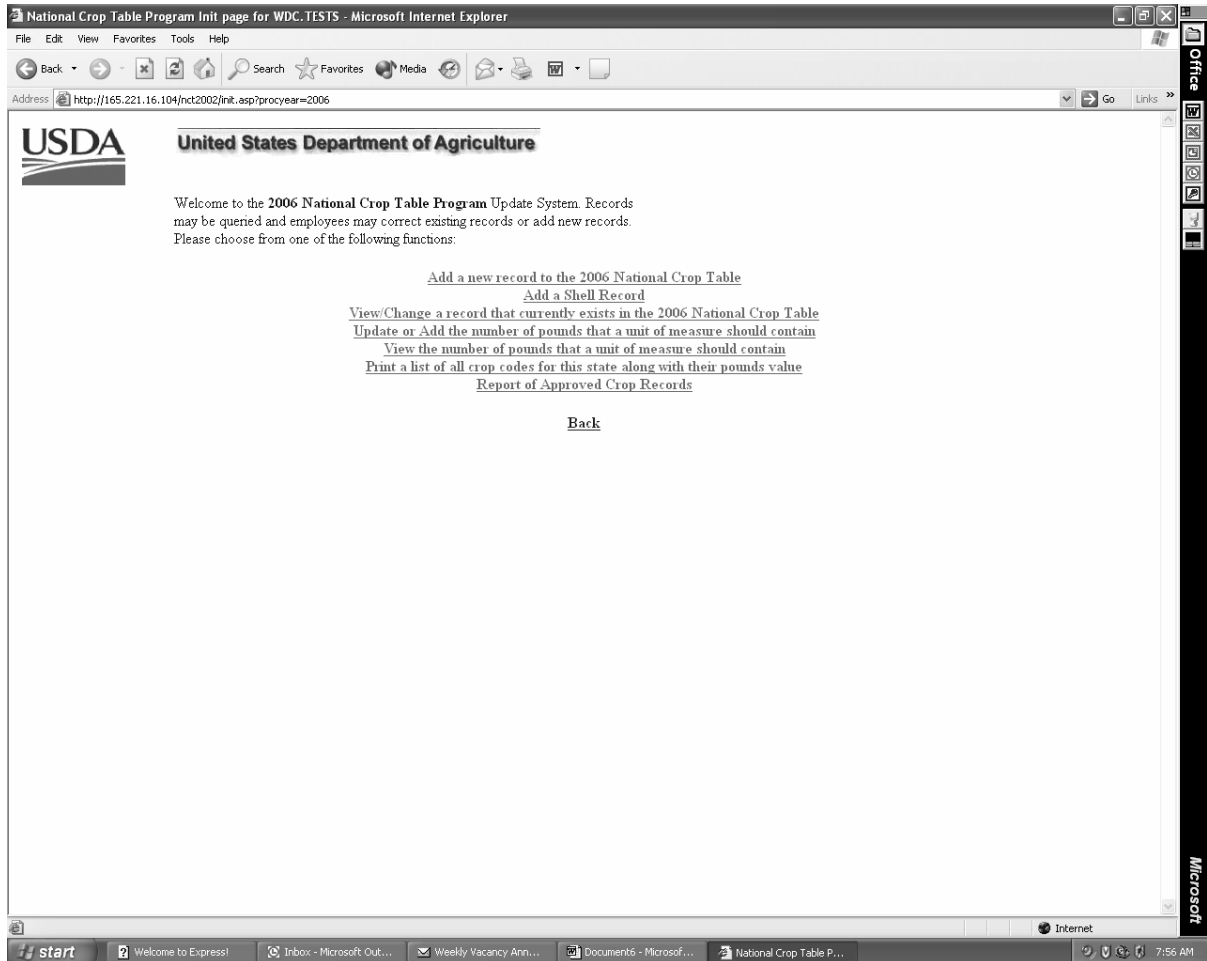

- access NCT according to subparagraph 751 C
- update the unit of measure according to paragraph 754
- if adding a new record, select “Add a new record to the 2006 National Crop Table”--* option according to subparagraph B:
 - enter all applicable data for the crop according to subparagraph 757 A
 - review the crop record
 - correct any error messages according to subparagraph 757 B
- add data into the shell record by selecting “Add Shell Records”
- request the National Office to reset State approval flags to “N” to allow States to correct all State Office mistakes
- if previously loaded, select the “View/Change a record that currently exists in the *--2006 National Crop Table” option according to subparagraph F to:--*
 - view/modify a crop record
 - update crop data to calculate prices and yields
 - set the “State Approval” flag to “Y”
 - *--mass approve crop records available for 2006.--*

Note: Maintain a copy of all supporting documentation for the crop.

756 State Office National Crop Table Process (Continued)

B Adding a New Record

*--If the State Office is adding a new record to 2006 NCT for the first time, select the “Add a new record to the 2006 National Crop Table” option.

Notes: The add a new crop option will not trigger a download to the County Office unless all applicable crop data is entered and the State Office approval flag is set to “Y”.

The State Office approval flag cannot be set to "y" if the crop, type, and/or intended use does not match the NAP pay grouping file.--*

756 State Office National Crop Table Process (Continued)

B Adding a New Record (Continued)

After choosing the add a new crop option and selecting the State from the drop down menu, the following screen will be displayed. Enter all applicable county and State data for the crop according to subparagraph 757 A. Users will have the option to load crop data for a single county, bulk counties according to subparagraph C, or all counties according to subparagraph D.

***--Note:** If pounds per unit of measure have not been previously loaded, an error message will be displayed that provides a link to allow the user to enter pounds per unit of measure.

The screenshot shows a web browser window with the address `http://165.221.16.104/hct2002/AddCrops.asp?state=35`. The page header includes the USDA logo and the text 'United States Department of Agriculture'. Below the header, the title is '2006 New Mexico National Crop Table Program' with the instruction 'Please fill in all required items to add a record.'

The form contains the following sections:

- Basic Information:** Fields for City (001), Crop (0173), Type (CVB), Use (FH), GPrice, Practice (Irrigated), and Plt (01).
- Measure:** Fields for Measure (Pounds), Prevented Factor, Unharvest Factor (55), Acres per AU, and Grazing Days.
- Final Planting:** Fields for Final Planting, Acreage Report (12/31/2005), Normal Harvest (12/31/2006), and Application Close (9/1/2005).
- Yield Data:** A table with columns for Year, Yield, and Source.

Year	Yield	Source
2000		
2001		
2002		
2003	22027	NASS
2004	23335	NASS
- Override Yield:** Fields for Override, Current Yield, and Source.
- Price Data:** A table with columns for Year, Price, and Source.

Year	Price	Source
2000		
2001		
2002		
2003	35	NASS
2004	27	NASS
- Override Price:** Fields for Override, Current Price, and Source.

At the bottom of the form are 'Insert' and 'Clear' buttons, and a 'Back' link.

756 State Office National Crop Table Process (Continued)

B Adding a New Record (Continued)

After applicable data is entered and the user selects “Insert”, the following screen will be displayed, indicating “Record inserted/updated successfully”.

*..

The screenshot shows a web browser window displaying the USDA National Crop Table Program interface. The page title is "2006 Hawaii National Crop Table Program". A confirmation message states "Record inserted/updated successfully". Below this message are buttons for "Modify" and "Add New Crop". The main content area contains several data tables:

C Adding a Crop Record for Bulk Counties

*--State Office users have the option to load data for multiple counties. To load data for selected counties on the Crop Data Entry Screen, select “BULK” in the “Cty” field, enter all applicable information, and select “Insert” at the bottom of the screen.

The screenshot shows a web browser window with the URL `http://165.221.16.104/nct2002/AddCrops.asp?state=35`. The page header includes the USDA logo and the text 'United States Department of Agriculture'. Below this, it says '2006 New Mexico National Crop Table Program. Please fill in all required items to add a record.'

The main form area contains several sections:

- Top Section:** A row of dropdown menus for 'Cty' (set to 'BULK'), 'Crop', 'Type', 'Use', 'GPrice', 'Practice', and 'Plt'.
- Table Section:** A table with columns: 'Cty' (001-055), 'Crop', 'Type', 'Use', 'GPrice', 'Practice', 'Plt', 'Prevented Factor', 'Unharvest Factor', 'Acres per AU', and 'Grazing Days'.
- Summary Section:** Fields for 'Acreage Report', 'Normal Harvest', and 'Application Close'.
- Field and Source Section:** A table with columns 'Field' and 'Source' for rows 027-049.
- Current Yield Section:** Fields for 'Current Yield' and 'Source' for rows 051-055.
- Year Price Section:** A table with columns 'Year', 'Price', and 'Source' for years 2000-2004.
- Override Section:** Fields for 'Override', 'Current Price', and 'Source'.

At the bottom of the form are 'Insert' and 'Clear' buttons, and a 'Back' link.

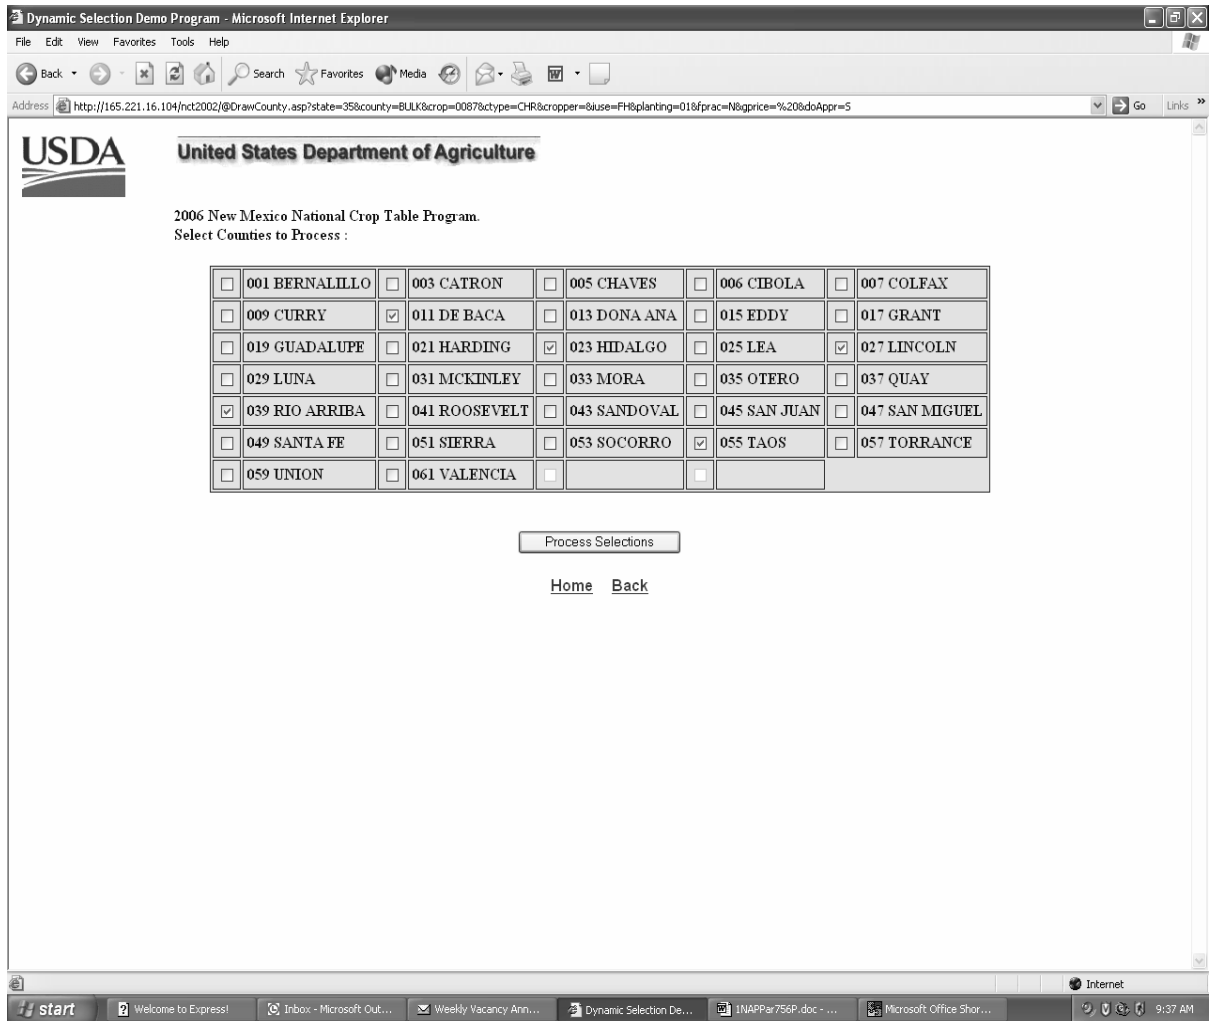

Note: “BULK” and “ALL” options are **not** available for California grapes.

756 State Office National Crop Table Process (Continued)

C Adding a Crop Record for Bulk Counties (Continued)

When the “Insert” button is selected, a selection screen of multiple counties will be displayed. The user must select counties to load by clicking in the boxes provided. In this example, 5 counties have been selected. After the counties are selected, the user will click on the “Process Selections” button. The “Process Selections” will allow the data to be loaded in the counties checked.

*..

756 State Office National Crop Table Process (Continued)

H Record Inserted/Updated Successfully

Once the State Office creates a record and the record is updated successfully, additional fields that were not on the Crop Data Entry Screen will be displayed. These additional fields include:

- the State code
- county and national approval fields
- *--insurance indicator field

Notes: An “N” flag will be displayed until insurance data is updated with the--* insurability file, once updated, the insurance flag will display:

- “Y”, if the crop is insurable in the county
- “N”, if the crop is **not** insurable in the county.

--State Offices shall monitor RMA Web site at <http://www3.rma.usda.gov/apps/docbrowserB.cfm> to determine crops covered by insurance.--

- calculated yield, if no override code is used
- calculated price, if no override code is used.

The following options will be displayed at the top and bottom of the screen:

- “Modify” - to change the crop record, to set approval flag
- “Add New Crop” - to clear screen to add new crop
- “Home” - to return to the “Welcome” screen
- “Query Result” - to return to the query.

756 State Office National Crop Table Process (Continued)

I Processing Mass Approvals

* * * State Office users have the option to mass approve crop records. The user may access the "Mass Approval Report" option from the Query Selection Screen as shown in subparagraph 756 F. The county approval flag of "Y" is not required for mass approvals. To mass approve crop records, select the crop, type, graduate/price code, and intended use, if applicable, and ensure that:

- crop records have a 2004 historical yield--*
- at least 1 record for that crop has been approved.

Note: The user must ensure that at least 1 record for the crop has been approved. If the user has not approved a record before accessing the "Mass Approval Report" option, the message, "Crop has no State approved price in any county," will be displayed.

* * *

756 State Office National Crop Table Process (Continued)

I Processing Mass Approvals (Continued)

After the “Mass Approval Report” runs, the “Mass Approval” option will be displayed at the bottom of the update screen, as follows. When the user selects the “Mass Approval” option, the system will approve all requested records by replacing all “N” State flags to “Y”. The number of records updated will be displayed at the top of the screen.

MASS APPROVAL

*--

756.5 National Office Crop Table Process

A Resetting Approval Flags

For 2001, 2002, and 2003, the National Office approval flag of “Y” triggered a download of approved crop records to County Offices. For 2004 and subsequent years, the State and/or national approval flag of “Y” will trigger a download of county and State approved crop records to County Offices. The National Office will reset the State Office approval flag of “Y” for County download when the State Office requires a change or modification to the *--crop record after the State approval flag has been set. A blank status code indicates that there are active records that may or may not be approved.--*

For 2005, the National Office user will have the option to individually reset State approval flags or mass reset State and national approval flags to allow States to make changes.

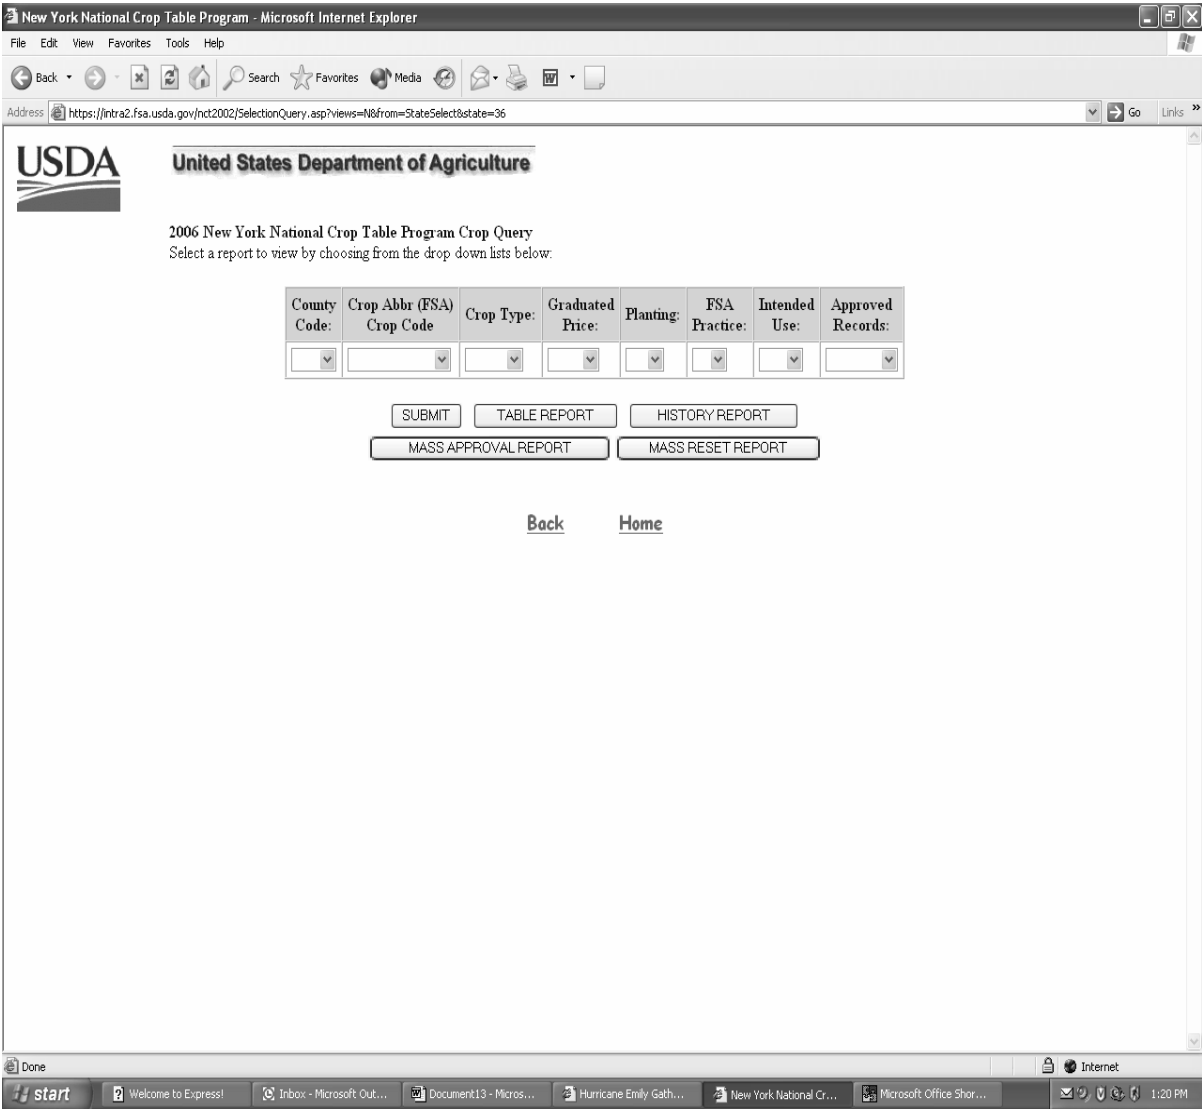

756.5 National Office Crop Table Process (Continued)

A Resetting Approval Flags (Continued)

--The user must enter all data for the crop records, and the level of approval on the query-- screen as follows. When the user selects “Mass Reset Report”, display the State and national reset options.

Note: The “Mass Reset Report” option is displayed at the national level only.

*--

--*

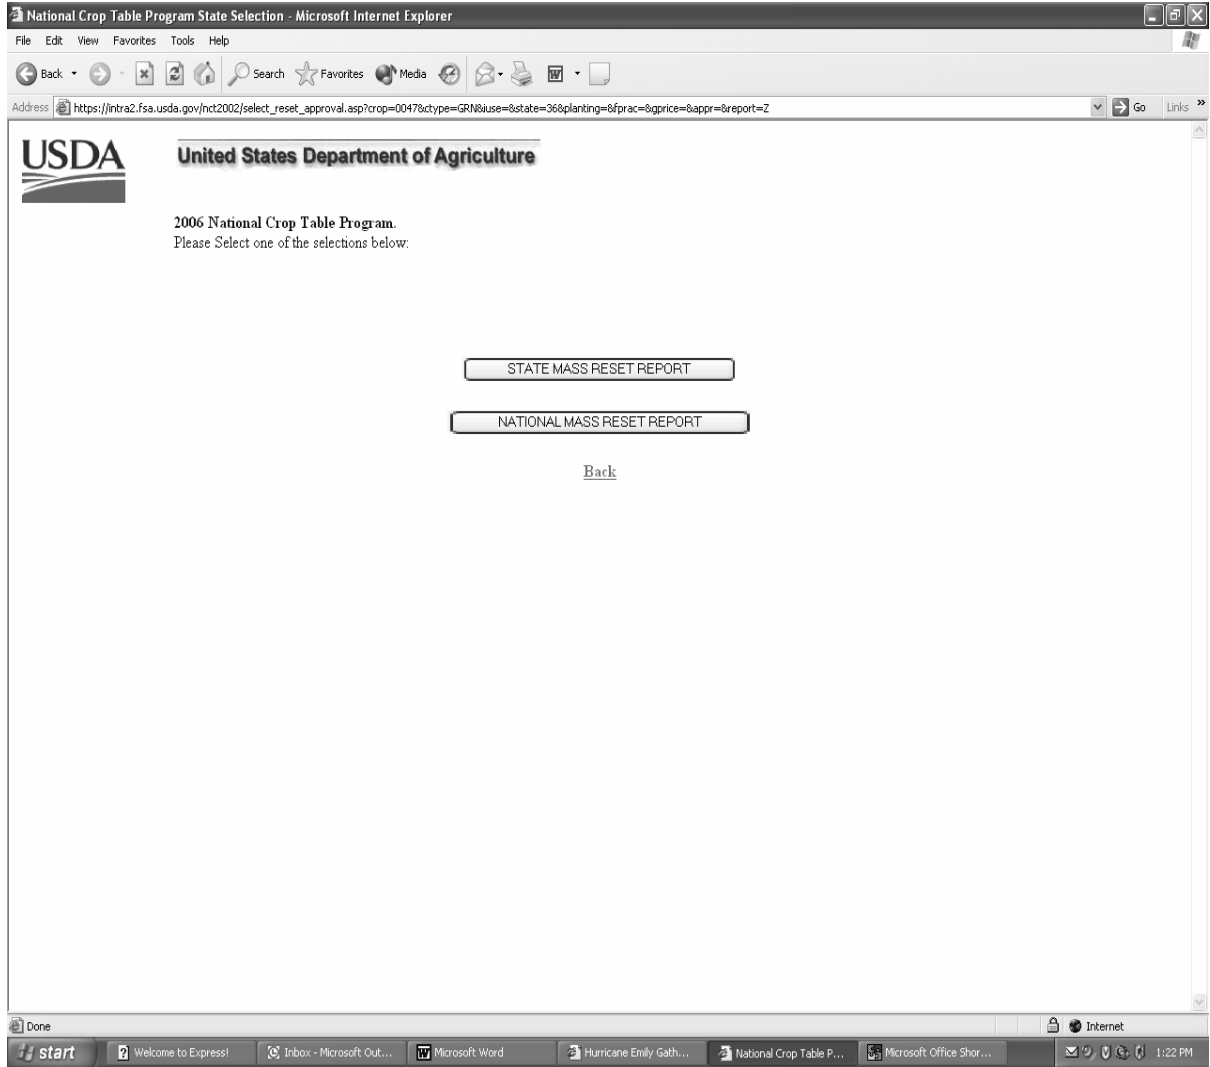

756.5 National Office Crop Table Process (Continued)

B Reset Options

When the user selects:

- “State Mass Reset Report,” change the State and national approval flags to “N”
- “National Mass Reset Report,” change only the national approval flag to “N”.

*--

--*

756.5 National Crop Table Process (Continued)

*--C Deleting a Record

Only National Office users can delete a record. To delete a crop record, enter “D” in the “Status” block in the modify mode.

Note: Before National Office users delete a record, State Office users must ensure that an application for coverage has not been taken for the crop, type, and intended use.

757 National Crop Table Information

A Entering Crop Data

Use the following table when entering crop data information.

Item	Action
(County) County Code	Click on the arrow and select the county code. Note: If the County Office user leaves this field blank, an error message will be displayed.
(Crop) Crop Code	Enter the crop codes 4 numeric characters. See 2-CP, Exhibit 10.5.
(Type) Crop Type	Enter the crop types 3 alphabetic characters. See 2-CP, Exhibit 10.5 for crop types. If a type is not provided in 2-CP, Exhibit 10.5, leave the field blank.
(Use) Intended Use	Enter the intended use 2 alphabetic characters. See 2-CP, Exhibit 11 for intended uses. If an intended use is not provided for that crop, leave field blank.
(GPrice) Graduated Price Code	Enter the price code as indicated below. Enter for value loss crops and *--California processed grapes, with the exception of the following:--* <ul style="list-style-type: none"> • Finfish - Tropical, Haplochromine, Lamprologuine, Mbuna Chichlid, and Tanganyika • Floriculture flowers - all types, except seed • Grass - all types, intended use of sod • Mushrooms - common and shiitake • Nursery - container and field grown • Crops with the intended use of rootstock (RS) or sets (SE).

B Required Data for Value Loss Crops

Use the following table when entering value loss crop data information.

Crop	Type	Data Required	Data Not Required
Christmas Trees (7321)	All	Graduated price code, unit of measure, unharvested factor, planting period (default "1"), acreage *--reporting date (default 9/30 of previous crop--* year), application closing date (default 9/01 of previous calendar year), normal harvest date (default 9/30 of crop year), price, price source.	Prevented planted factor, final planting date, yield, yield source, practice code.
Crustacean (3002)	All	Graduated price code, unit of measure, unharvested factor, planting period (default "1"), acreage *--reporting date (default 9/30 of previous crop--* year), Application closing date (default 9/01 of previous calendar year), normal harvest date (default 9/30 of crop year), price, price source.	Prevented planted factor, final planting date, yield, yield source, practice code.
Finfish (3000)	Haplochromine Tropical (HAP) Lamprologuine Tropical (LAM) Mbuna Chichlid Tropical (MBU) Tanganyika Tropical - (TAN) Tropical - (TRO)	Unharvested factor, planting period (default "1"), acreage reporting date (default 9/30 of *--previous crop year), application closing--* date (default 9/01 of previous calendar year), normal harvest date (default 9/30 of crop year).	Graduated price code, unit of measure, prevented planted factor, final planting date, yield, yield source, price, price source, practice code.
	All other Finfish not listed above.	Graduated price code, unit of measure, unharvested factor, planting period (default "1"), acreage *--reporting date (default 9/30 of previous crop--* year), application closing date (default 9/01 of previous calendar year), normal harvest date (default 9/30 of crop year), price, price source.	Prevented planted factor, final planting date, yield, yield source, practice code.
Flowers (Floriculture) (7501)	All Note: Flowers with the intended use of seed is considered a yield base crop and must have all entries.	Unharvested factor, planting period (default "1"), acreage reporting date (default 9/30 of *--previous crop year), application closing date--* (default 9/01 of previous calendar year), normal harvest date (default 9/30 of crop year).	Graduated price code, unit of measure, prevented planted factor, final planting date, yield, yield source, price, price source, practice code.
Ginseng (intended use of fresh) (0089)	All Note: Ginseng with the intended use of seed is considered a yield base crop and must have all entries.	Graduated price code, unit of measure, unharvested factor, planting period (default "1"), acreage reporting date (default 9/30 of *--previous crop year), application closing date--* (default 9/01 of previous calendar year), normal harvest date (default 9/30 of crop year), price, price source.	Prevented planted factor, final planting date, yield, yield source, normal harvest date, practice code.
Grass (intended use of sod) (0102)	All Note: All other intended uses except grazing are considered a yield base crop and must have all entries.	Unit of measure, unharvested factor, planting period (default "1"), acreage reporting date (default *--9/30 of previous crop year), application--* closing date (default 9/01 of previous calendar year), normal harvest date (default 9/30 of crop year), price, price source.	Graduated price code, prevented planted factor, final planting date, yield, yield source, practice code.

B Required Data for Value Loss Crops

Crop	Type	Data Required	Data Not Required
Mollusk (3001)	All	Graduated price code, unit of measure, unharvested factor, default planting period to "1", acreage reporting date (default to 9/30 of *--previous crop year), application--* closing date (default to 9/01 of previous calendar year), normal harvest date (default to 9/30 of crop year), price, price source.	Prevented planted factor, final planting date, yield, yield source, practice code.
Mushrooms (0403)	All	Unharvested factor, planting period (default "1"), acreage reporting date *(default 9/30 of previous crop--* year), application closing date (default 9/01 of previous calendar year), normal harvest date (default 9/30 of crop year).	Graduated price code, unit of measure, prevented planted factor, final planting date, yield, yield source, price, price source.
Nursery (Ornamental) (1010)	All	Unharvested factor for Container 100%, unharvested factor for Field Grown 50%, planting period (default "1"), acreage reporting date (default *--9/30 of previous crop year),--* application closing date (default 9/01 of previous calendar year), normal harvest date (default 9/30 of crop year).	Price, unit of measure, prevented planted factor, final planting date, yield, yield source, price source, practice code.
Crops with intended use of Root Stock (RS) and Sets (SE)	All	Unharvested factor, planting period (default "1"), acreage reporting date *(default 9/30 of previous crop--* year), application closing date (default 9/01 of previous calendar year), normal harvest date (default 9/30 of crop year).	Graduated price code, unit of measure, prevented planted factor, final planting date, yield, yield source, price, price source, practice code.

757 National Crop Table Information (Continued)

C Error Message Screen

The crop record will not be validated until the “Insert” option is selected. If an entry or entries are invalid, an error screen will be displayed. The error screen will provide the following information:

- “Field in Error” displays the field that has the error
- “Current Value” displays the incorrect entry
- “Error Message” displays the problem.

Any errors must be corrected before the record can be added or updated.

* * *

758 Approval Flags**A Setting the Approval Flags**

The County, State, and National Office approval flags are defaulted to “N”.

The approval flags must be changed to “Y” by County and/or State Offices to process the crop record. To change the flag, the user must select the “View/Change” option according to paragraph 755 or 756, as applicable.

If the “approval” flag is set to “Y” for the:

- County Office, only the State or National Office may change the crop record

Note: If a change is required, contact the State Office.

- State Office, the National Office may change the crop record, or reset the State approval flag to “N” to allow the State Office to make changes. If a change is required, contact the National Office.

Note: A county approval flag is not required if the State Office will be entering County Office data. However, the State Office will be required to enter “Y” in the State’s approval field.

759 National Crop Table Reports

A Report Options

Users of NCT can print reports of crop data previously loaded by accessing the “View/Change” option. These reports can be printed for a specific record (crop, type, practice, intended use, planting period, etc.) or numerous records depending on the element of the record loaded on the query screen. * * *

B Table Report

The table report displays a list of all crop information and may be printed by selecting “Send to Printer” option. * * *

C History Report

--The history report displays 5 years of price and yield historical data and may be printed by selecting "Send to Printer" option.--

* * *

759 National Crop Table Reports (Continued)**D Nationally and State Approved Records**

Report options have been provided that will allow the user to access crop records that are approved either nationally or by State. When the user selects "Report of Approved Crop *--Records" on the "Welcome" screen, as shown in subparagraph 756 F, the following options will be displayed:

- "Check for Nationally Approved Records"
- "Check for State Approved Records".

When the user selects 1 of the 2 options, "Check for Nationally Approved Records" or "Check for State Approved Records", a query will be displayed. The user will only be able to query 1 crop at a time. The query may be specific or as broad as the following key data allows:

- crop
- type
- graduated price
- planting period
- FSA practice
- intended use.--*

The user is required to enter data in at least 1 field before running the approved records. Only those States that contain data requested in the query will be displayed * * *. The user must select no more than 5 States at one time by clicking in the box.

* * *

759 National Crop Table Reports (Continued)

D Nationally and State Approved Records (Continued)

When the user selects the State or States and clicks on “Process Selections”, the following result screen, including multiple records for each State, depending on the query selection, will be displayed.

Texas	507	0011	HRW		GZ	N	01	N	AUD	0	0.5746	0.5	1	3	212

Note: To print all of the approved crops for a county, select the county and “State Approval” on the Query Screen. To ensure that all data prints, adjust the print settings to landscape.

760-770 (Reserved)

*--Section 1.5 National Crop Table, 2009 and Subsequent Crop Years

771 Overview

A Introduction

NCT is a web-based application that is used for NAP and as a source of historical data for possible future disaster programs. The NCT application was redesigned for the 2009 crop year, for increased efficiency and ease of use.

For NAP purposes, NCT will be used to:

- recommend and approve crop data
- maintain a historical database for prices and yields.

The records will be validated against the crop codes according to exhibits listed in paragraph 170, as applicable; 2-CP, Exhibit 10.5; FIPS codes; and the insurability file when it becomes available. National, State, and County Office personnel will have access to NCT to view, change, or add crop records.

B NCT Security

USDA eAuthentication security is enforced to ensure that a user can only update crop records for their respective State or county. Authority roles are defined as “County”, “State”, and “National” users in eAuthentication, and different levels of access will be granted according to the user’s role.

Authorized users with a “County”, “State”, or “National” eAuthentication NCT role:

- **must** access NCT software using a valid eAuthentication ID and password through the FSA Intranet web site “FSA Applications”
- will have the capability to access NCT to add and modify crop records **only** for their State or county and to view crop records for all States.

All other users with valid eAuthentication ID’s will have the capability to view, but **not** modify, crop records for all States and counties.

If the State Office needs additional users, the State Office shall:

- request new user access through the State Security Liaison Representative
- ensure that all requests for “County” or “State” authority are verified by the State NAP Specialist so that the appropriate NCT authorization role can be assigned to the user’s eAuthentication ID.--*

*--771 Overview (Continued)

C Accessing the NCT Web Site

To access NCT, go to http://intranet.fsa.usda.gov/fsa/FSAIntranet_applications.html.

Under Production Adjustment & Disaster Programs, CLICK “NCT –National Crop Table (2009 -)”.

State & County T-OPS/LWV	<ul style="list-style-type: none"> • WSRIS - IE, WORK STATUS Report System- Internet Enabled <p>Administrative Applications</p> <ul style="list-style-type: none"> • COC Elections • COC State AO Reports • COE Replacement • ERSR • Directive Tools • OIP - Office Information Profile <p>Financial Services</p> <ul style="list-style-type: none"> • Financial Applications <p>Rates and Fact Sheets</p> <ul style="list-style-type: none"> • County LDP Rates • Honey Rates • Pulse Crop Rates • Wool Rates • Grain Warehouse Rates • Program Fact Sheets 	<p>Assistance Payment</p> <ul style="list-style-type: none"> • eLDP - Electronic Loan Deficiency Payments • EWR - Electronic Warehouse Receipts • MILC-X - MILC Extension Program • Peanut Program • Sugar Program • TAA - Trade Adjustment Assistance • Tobacco Transition Payment Program <p>Production Adjustment & Disaster Programs</p> <ul style="list-style-type: none"> • AILFP- American Indian Livestock Feed Program • 2005-2006-2007 CDP Crop Table • Compliance Query Tool • DCP - Direct and Counter-Cyclical Program • Homeland Security • LAPLT - Livestock Assistance Program Load Table • LAP - Livestock Assistance Program • NCT - National Crop Table (2009 -) • NCT - National Crop Table (2001-2008) • STORM • TAP - Tree Assistance Program
-----------------------------	--	--

--*

*--771 Overview (Continued)

C Accessing the NCT Web Site (Continued)

The USDA eAuthentication Warning Screen will be displayed, CLICK “**Continue**”.

On the eAuthentication Sign-On Screen, enter User ID and password and CLICK “**Login**”.

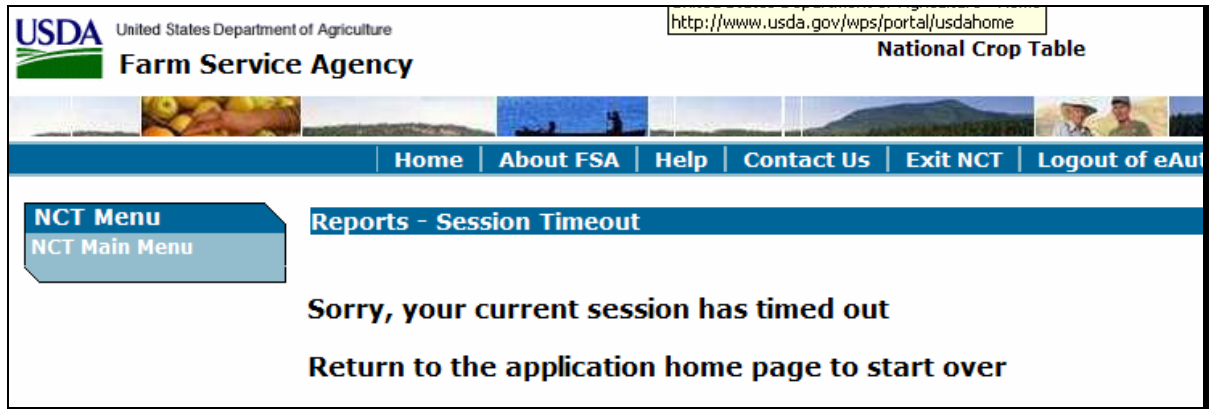

The Welcome to the National Crop Table Program Screen will be displayed. From the Program Year drop-down box, select the program year and CLICK “**NCT Login**”.

Note: When using NCT, **always** use NCT screen “**Back**” option. Using “ Back” from the Internet Explorer tool bar or Netscape Navigator will cause **undetected errors**.--*

*--771 Overview (Continued)

D Timing Out

Inactivity will result in system timeout **before** users are notified. This eliminates open connections to the web site that could slow down the system. Users will be notified of system timeout when users attempt to resume activity. The Reports - Session Timeout Screen will be displayed with the following message.

--*

***--772 NCT Pay Groupings**

A Background

Each year the National Office updates a NAP pay grouping file to include approved NAP crop definition changes. The pay grouping file is used to validate whether crops added to NCT are approved for NAP. Crops added to NCT that do **not** match the NAP pay grouping file **cannot** be flagged “Y” for approval and will **not** be downloaded to the County Office.

B Adding Crops to the NAP Pay Grouping File

Follow subparagraph 170 E to request a new crop to be added to the NAP pay grouping file. An error message will be displayed, according to subparagraph 779 C, for any crop, type, and/or intended use added to NCT that is **not** included in 2-CP, Exhibit 10.5.--*

--773 Rollover Process*A Background**

NCT was developed to maintain a current database of prices and yields that could be used by all programs. For the National Office to review and approve NAP crop data, State and County Offices were requested to dataload historical price and yield information in NCT. Any NCT historical data will be rolled over to the subsequent crop year to:

- allow State and County Offices access to NCT
- timely process NAP payments.

This will enable offices to do either of the following:

- update the most recent crop year for the historical database
- load all 5 years of crop data for those crops not having historical records.

B Initial Download Process (Shell Records)

To ensure applications for coverage are taken timely, NCT must download basic crop information into System 36 before approval at the National, State, or county level so the application closing date validation can be performed. A rollover of all 2008 NCT records was performed to process the initial download of data. Additional downloads will be performed on crops added as shell records. The status code for shell records is “S”.

State and County Offices will update NCT crop records by entering **all** other valid data **before** setting the State approval flag. Once the State approval flag is set to “Y”, the record will be downloaded with the updated information.

State Offices may add a shell record to NCT for a crop not included in the County Office crop table according to subparagraphs 777 B and C. However, an application for coverage **cannot** be entered in the automated system until the:

- basic crop information is downloaded to the County Office crop table
- crop is included on the pay grouping table.

Note: Shell records do **not** require payment factors, prices, or yields to be approved before download to the County Office crop table.--*

***--773 Rollover Process (Continued)**

B Initial Download Process (Shell Records) (Continued)

The following NCT data from the 2008 crop year data was rolled to the 2009 crop year data for shell records. The status code for a rolled record is “R”.

Crop Year Data	
Crop Type	Final Planting Date
Crop Name and Code	Acreage Reporting Date
Practice Code	Normal Harvest Date
Planting Period	Application Closing Date
Intended Use	Graduated Price Code
County and County Code	

C 2009 Rollover

All 2008 crop year data is rolled to 2009 regardless of an approval flag to expedite the NCT process. The following crop data will be included in the 2009 NCT rollover with the option to change the following:

- acreage reporting date
- acres per animal unit
- application closing date
- final planting date
- grazing days
- historical yield and price data
- normal harvest date
- prevented factor
- unharvested factor
- unit of measure.--*

--773 Rollover Process (Continued)*D Historical Data**

Historical data **must** be entered in at least 1 year through the most current crop data year **before** approving the crop record.

For 2009 NCT, price and yield crop data for 2002 through 2007 will be displayed when viewing the record. The 2002 price and yield data is for informational purposes **only** and will not be accessible for modification by State and County Offices. However, State Offices will be able to update historical data previously loaded in the 2008 or prior year NCT for crop years 2006 and earlier. If historic data was entered in any previous years, historic data for all subsequent years is required.

Example: Historic data has been entered for 2004; therefore, historic data **must** be entered for 2005, 2006, and 2007.

E Acres Per AUD

With the exception of the AUD value and year, the NCT rollover process will consist of all data previously established by STC. The NCT rollover process will update the AUD value according to subparagraph 503 C.

Note: The 2008 AUD value is \$.6359.--*

--774 NCT Process*A Forage Crops**

When a producer intends a crop to be mechanically harvested, but the actual use of the crop acreage is completely grazed, the loss calculation for the acreage grazed will be determined using AUD's. To ensure that records are available for the proper forage calculation on the application for payment, NCT requires a grazing record to be data loaded **before** a forage crop intended for forage and some forage crops intended for seed can be data loaded. Even though some crops, such as alfalfa, may **not** normally be grazed, even in a drought year, State Offices are required to establish the acres per animal unit for the crop. These grazing records **must** be established for each practice; that is, irrigated or nonirrigated.

Example: If there is an irrigated forage record, there **must** be an irrigated grazing record.

Notes: A grazing record will only be required for small grains if the intended use is forage. Intended uses of seed and grain for small grains do **not** require a grazing record to be entered.

For alfalfa mix, a grazing record **must** exist **before** entering a record for seed and forage intended uses.

B Warm and Cool Season Forage Designations

States that establish warm and cool season grasses can load a grazing record for planting period 02 for warm season grasses and it will match the mechanically harvested forage record (planting period 01) on the crop table. Payment software will process a mechanically harvested forage crop (planting period 01) as long as there is a grazing record regardless of a planting period (could be planting period 01 or 02).--*

*--774 NCT Process (Continued)

C NCT Options

After selecting a crop year according to subparagraph 771 C and entering eAuthentication information, the following Main Menu will be displayed to show available NCT options respective to the user's level of authorization.

Note: Specific procedure for each option can be found in:

- paragraph 776 for County Office users
- paragraph 777 for State Office users
- paragraph 778 for National Office users.--*

--775 Units of Measure in NCT*A Updating the Units of Measure**

If the unit of measure is in barrels, boxes, bunches, bushels, cartons, containers, crates, or lugs, the State Office user **must** update the pounds per unit of measure when first adding the unit of measure to a crop in NCT.

Users **must** enter the number of pounds for the applicable crop code/crop abbreviation, crop type, intended use, and unit of measure. Only 1 unit of measure can be updated for a crop, crop type, and intended use. If users attempt to load a second unit of measure for the same crop, type, and intended use, the previous unit of measure will be overwritten.

If the unit of measure is “bunches,” zeroes will be accepted for pounds per unit of measure for the crop. Zeroes will **not** be accepted for pounds per unit of measure for crops with the unit of measure other than “bunches”.

Users can update the unit of measure when adding a new record or modifying a record (see subparagraph 777 B for entering the unit of measure when adding a new record or subparagraph 777 D for updating the unit of measure by modifying the record).

B Units of Measure Report

From the Main Menu, if users **CLICK “Reports”**, the Reports - Report Selection Screen will be displayed. State and County Offices can **CLICK “Unit of Measure Report”**, as displayed in subparagraph 781 F, to view pounds per unit of measure individually, for a crop, type, and intended use.--*

--776 County Office NCT Process*A County Office Action**

If the County Office is **authorized** to enter crop data, the County Office shall:

- access NCT according to paragraph 771
- modify records that were either rolled over from the 2008 NCT or added as shell records by the State Office
- review the crop record
- **CLICK “Search/Modify Records”** according to subparagraphs B and C to:
 - view records for any State or county
 - update historic yield data for a crop record previously loaded by the State Office
 - set the “County Approval” flag to “Y”
- e-mail the State Office indicating that the “County Approval” flag has been set and the crop records are ready for State Office review and approval
- when approved by the State Office, print approved crop data according to paragraph 781 D and maintain an Approved Crop Records Report for the County Office
- print the NAP Crop Table Report according to paragraph 1101 **after** crops have been approved by the State Office and downloaded to System 36.

Note: Approved crop data is downloaded to County Offices on a daily basis.

Note: Maintain a copy of **all** supporting documentation for the crop.--*

*--776 County Office NCT Process (Continued)

B Viewing a Crop Record

Users can view a crop record in NCT for any State or county in the nation. On the Main Menu, CLICK **“Search/Modify Records”**.

--*

*--776 County Office NCT Process (Continued)

B Viewing a Crop Record (Continued)

After users CLICK “**Search/Modify Records**”, the Search Records - Search Page will be displayed. The State and county drop-down boxes will default to user’s home State and county. Users may change these to view records in any State or county.

Users can query data for a specific record (crop, type, intended use, practice, planting period, etc...) or numerous records (county, crop) depending on the data entered on the Search Records - Search Page. The following example shows data queried by State, county, crop, and crop type **only**.

C Modifying County Office Data (Continued)

Users shall input the historical yields and sources, as displayed on the following screen (see subparagraph 773 D for requirements for inputting historical data).

The screenshot shows the USDA National Crop Table interface. At the top, it displays the USDA logo and 'United States Department of Agriculture Farm Service Agency'. The page title is 'National Crop Table' and the specific page is 'Program Year 2009 - Modify Record - Record Details Page'. A navigation bar includes links for Home, About FSA, Help, Contact Us, Exit NCT, and Logout of eAuth. A left-hand menu contains options like NCT Menu, NCT Main Menu, Program Year 2009 Main Menu, and Search/Modify Records Reports.

The main content area shows record details for State MI, Crop PEACH 0034, Crop Type CLI, Intended Use FH, Practice Irrigated, and Planting Period 01. Below this, it lists the County as Allegan (005). A note states: 'All fields required to make a shell record are marked by an asterisk(*)'. There are four tables of data:

Unit of Measure	Pounds Per Unit of Measure	Prevented Planting Factor	Unharvested Payment Factor
BU	48.00	0.0000	0.7400

*Final Planting Date (mm/dd/yyyy)	*Acreage Reporting Date (mm/dd/yyyy)	*Normal Harvest Date (mm/dd/yyyy)	*Application Closing Date (mm/dd/yyyy)

At the bottom of the page, there are two buttons: 'Main Menu' and 'Back To Search Results'.

--*

*--776 County Office NCT Process (Continued)

D Setting the County Approval Flag

Users can set the County Approval Flag to let the State Office know that historic yields have been modified at the county level. Setting the County Approval Flag is **not** required, but is recommended if the County Office participates in updating historic yield data in NCT.

Users shall follow the instructions in subparagraph 776 B to search for records. On the View Record – Summary Page, when users CLICK “**View**” next to a record, the following screen will be displayed.

Note: “**Approve Record**” button will **only** be displayed on the View Record - Summary Page if the record being viewed is in user’s home county **and** user has authorization to modify and approve this data.

The screenshot displays the 'Program Year 2009 - View Record - Summary Page' from the USDA National Crop Table. The page includes a navigation menu on the left and a main content area with several data tables.

Navigation Menu:

- NCT Menu
- NCT Main Menu

***--777 State Office NCT Process**

A State Office Action

State Offices have the option of either loading all crop data at the State Office level or allowing County Offices the authority to load yield data at the County Office level. County Offices are **not** authorized to add new records to NCT, so all records **must** be:

- added by the State Office or rolled from the previous year NCT
- present in the current year NCT **before** County Offices can update the historical yields.

The State Office action will vary depending on how and where the crop data is loaded.

IF the crop record ...	THEN to load the record, on the Main Menu, CLICK...
is loaded at the State level	“Add New Record(s)”.
was rolled from the previous year NCT	“Search/Modify Records”.

Note: An “R” status code indicates all records that rolled from the previous year NCT.--*

--777 State Office NCT Process*A State Office Action (Continued)**

To process a crop record on NCT, users shall:

- access NCT according to paragraph 771
- update the unit of measure according to paragraph 775
- if adding a new record, CLICK “**Add New Record(s)**” according to subparagraph B:
 - enter all applicable data for the crop according to subparagraph 779 A
 - review the crop record
 - correct any error messages according to subparagraph 779 C
- request the National Office to reset State approval flags to “N” to allow States to correct all State Office mistakes
- if previously loaded, CLICK “**Search/Modify Records**” according to subparagraphs D, E, and F to:
 - view crop records for any State
 - modify crop records for the user’s authorized State
 - update crop data to calculate prices and yields
 - set the “State Approval” flag to “Y”
- if previously loaded, CLICK “**Mass Update Records**” according to subparagraph G to update crop information for selected counties
- if previously loaded, CLICK “**Mass Approve Records**” according to subparagraph H to approve selected records
- review and print reports as necessary.

Note: Maintain a copy of **all** supporting documentation for the crop.--*

***--777 State Office NCT Process (Continued)**

B Adding a New Record

If State Offices are adding a new record to 2009 NCT for the first time, on the Main Menu, CLICK **“Add New Record(s)”**.

Note: When users CLICK **“Add New Record(s)”** and save the record in NCT, they trigger a download to the County Office as a shell record, regardless of whether or **not** the State Office approval flag is set to **“Y”**.--*

*--777 State Office NCT Process (Continued)

B Adding a New Record (Continued)

After users CLICK “Add New Record(s)”, the following Add Record - Primary Crop Data Page will be displayed. Enter **all** applicable data for the crop, including the State, crop, type, and intended use, according to subparagraph 779 A, and CLICK “Next”. Users will have the option to load crop data for a single county, multiple counties, or all counties.

Note: On the Add Record - Primary Crop Data Page, the only States available in the drop-down box will be the States for which users are authorized to modify or add crop data.

The screenshot shows the 'National Crop Table' interface. At the top, it displays the USDA logo and 'Farm Service Agency'. A navigation bar includes links for Home, About FSA, Help, Contact Us, Exit NCT, and Logout of eAuth. On the left is a 'NCT Menu' with options like 'Add New Record(s)'. The main content area is titled 'Program Year 2009 - Add Record - Primary Crop Data Page' and contains four dropdown menus: 'State', 'Crop', 'Crop Type', and 'Intended Use', all of which are currently empty. 'Next' and 'Main Menu' buttons are located at the bottom right.

In the following example, a new record is being added for fresh cauliflower in New York.

This screenshot shows the same 'Add Record - Primary Crop Data Page' but with data entered into the dropdown menus. The 'State' dropdown is set to 'New York', the 'Crop' dropdown is set to 'CAULIFLOWER (0124)', and the 'Intended Use' dropdown is set to 'FH'. The 'Crop Type' dropdown remains empty. The 'Next' and 'Main Menu' buttons are still present at the bottom right.

--*

*--777 State Office NCT Process (Continued)

B Adding a New Record (Continued)

After the Primary Crop Data is entered and users CLICK “Next”, the following Add Record – Secondary Crop Data Page will be displayed. Users shall select the Practice and Planting Period from the drop down boxes and CLICK “Next”.

The screenshot shows the 'National Crop Table' interface. At the top, it displays the USDA logo and 'Farm Service Agency'. A navigation bar includes links for Home, About FSA, Help, Contact Us, Exit NCT, and Logout of eAuth. A left-hand menu lists options like 'NCT Menu', 'NCT Main Menu', and 'Program Year 2009'. The main content area is titled 'Program Year 2009 - Add Record - Secondary Crop Data Page'. It features a table with the following data:

State	Crop	Crop Type	Intended Use
NY	CLFLW (0124)		FH

Below the table, there are two dropdown menus: 'Practice:' set to 'Irrigated' and 'Planting Period:' set to '01'. At the bottom right, there are 'Next' and 'Back' buttons.

--*

***--777 State Office NCT Process (Continued)**

B Adding a New Record (Continued)

After the secondary crop data is entered and users CLICK “Next”, the following Add Record - County Selection Page will be displayed. Users shall select the counties for which the crop record will be added by clicking a checkmark next to the applicable counties.

Clicking:

- “Select All” will display a checkmark next to all available counties
- “Clear All” will clear the checkmark from all selected counties.

CLICK “Next” after all desired counties have been selected. In this example, the fresh, irrigated, planting period 01, cauliflower will be added to Albany, Bronx, Cayuga, Delaware, and Erie counties.

Next Back

Note: If a record for the crop, type, intended use, practice, and planting period already exists in the State in 1 or more counties, the previously established crop data (such as planting factors and historical price data) will be included in the newly added records. If no other records exist for this crop, type, intended use, practice, and planting period in the State, all data fields will be blank and require user input.--*

*--777 State Office NCT Process (Continued)

B Adding a New Record (Continued)

Users shall input all missing data that is available at the time to the Add Record – Record Details Page.

All fields required to make a shell record are marked by an asterisk (*). Adding a shell record is no longer a separate screen selection for users. The record resulting from the inputs on this screen will produce a:

- shell record to be downloaded
- complete record, pending State approval
- complete record to be downloaded if State approval is entered according to subparagraph F

See subparagraph C for minimum requirements for loading a shell record.

The screenshot shows the 'Add Record - Record Details Page' for Program Year 2009. The page includes a navigation menu on the left with options like 'Add New Record(s)', 'Search/Modify Records', and 'Mass Approve Records'. The main content area contains several tables and input fields:

State	Crop	Crop Type	Intended Use	Practice	Planting Period	Graduated Price	Crushing District
NY	CLFLW 0124		FH	Irrigated	01		

Below this table, a 'Counties' section lists: Albany (001), Bronx (005), Cayuga (011), Delaware (025), Erie (029), Fulton (035).

A note states: 'All fields required to make a shell record are marked by an asterisk(*)'.

Unit of Measure	Pounds Per Unit of Measure	Prevented Planting Factor	Unharvested Payment Factor
Hundredweight		0.3400	0.6200

*Final Planting Date (mm/dd/yyyy)	*Acreage Reporting Date (mm/dd/yyyy)	*Normal Harvest Date (mm/dd/yyyy)	*Application Closing Date (mm/dd/yyyy)

B Adding a New Record (Continued)

After users CLICK “Create Record(s)”, the Add Record – Results Page will be displayed. All records added as new will be displayed. If previously existing records were affected, those updated records will also be displayed.

If there were any errors that resulted in the records **not** being added, the information will be displayed.

The screenshot shows the USDA National Crop Table interface. At the top, it says 'USDA United States Department of Agriculture Farm Service Agency National Crop Table'. Below this is a navigation bar with links: Home, About FSA, Help, Contact Us, Exit NCT, and Logout of eAuth. The main heading is 'Program Year 2009 - Add Record - Results Page'. A 'Main Menu' button is in the top right. The status is '- 6 Records Added -'. Below this is a table with 14 columns: Status, State, County, Crop, Type, Use, Pract., Plant. Period, Grad. Price, Crush. District, Yield (Amount, Over.), Price (Amount, Over.), and Approvals (N, S, C). The table lists 6 records, all with Status 'N' and a 'View' link. Below the table is the text '- Record Addition resulted in updates to the following records: -'. This is followed by another table with the same columns, listing 6 records with Status 'R' and a 'View' link.

Status	State	County	Crop	Type	Use	Pract.	Plant. Period	Grad. Price	Crush. District	Yield		Price		Approvals			View

--*

--777 State Office NCT Process (Continued)*C Adding a Shell Record**

To add a shell record, on the Main Menu users **must** CLICK “Add New Record(s)” and enter the applicable information (subparagraph B).

Note: Adding a shell record is no longer a separate menu item. The added record will be either a shell record or a complete record, depending on what and how much data is entered.

The following fields are required for loading a shell record:

- State
- County
- crop
- crop type*
- intended use*
- graduated price*
- practice*
- planting period
- final planting date*
- acreage reporting date
- normal harvest date
- application closing date.

Note: The asterisked items may be blank for some crops.

The following fields may be left blank when loading a shell record, but will be required for a complete record, if required for the particular crop:

- unit of measure
- pounds per unit of measure
- prevented planting factor
- unharvested factor
- acres per animal unit
- grazing days
- historical yields and sources
- historical prices and sources
- override yield and source
- override price and source.

Data initially entered as a shell record can be modified and updated at a later time to create the complete record according to subparagraph D. In the “Status” column:

- an “S” indicates a shell record
- no code (blank) indicates a full/complete record.--*

*--777 State Office NCT Process (Continued)

D Modifying a Record

Users can modify an unapproved crop record, for a variety of reasons. On the Main Menu, CLICK **“Search/Modify Records”**.

Users need to modify or update records for the following reasons:

- add additional data or update a record rolled from the previous year NCT (indicated with an “R” in “Status” column)
- add additional data or update a record previously loaded in the same crop year as a shell record (indicated with an “S” in “Status” column)
- edit incorrect data in an existing complete record (indicated with no entry (blank) in “Status” column) that has **not** been approved.--*

*--777 State Office NCT Process (Continued)

D Modifying a Record (Continued)

The State drop-down box will default to the authorized user's home State. Users shall select other applicable criteria and CLICK "Search".

Users can query data for a specific record (crop, type, practice, intended use, planting period, etc.) or numerous records (county, crop) depending on the data entered on the Search Records - Search Page. The following example shows specific data queried by State, crop, crop type, intended use, practice, and planting period.

The screenshot displays the USDA National Crop Table search interface. At the top, the USDA logo and 'United States Department of Agriculture Farm Service Agency' are visible on the left, and 'National Crop Table' is on the right. A navigation bar includes links for Home, About FSA, Help, Contact Us, Exit NCT, and Logout of eAuth. The main content area is titled 'Program Year 2009 - Search Records - Search Page'. On the left, a 'NCT Menu' sidebar lists options like 'NCT Main Menu', 'Program Year 2009', 'Main Menu', 'Add New Record(s)', 'Search/Modify Records', 'Mass Update Records', 'Mass Approve Records', and 'Reports'. The search criteria are as follows: State: New York; County: (empty); Crop: CHERRIES (0128); Crop Type: SWT; Intended Use: FH; Practice: Non-Irrigated; Planting Period: 01; Graduated Price: (empty); Crushing District: (empty); Approved: (empty); Level Of Approval: (empty). 'Search' and 'Main Menu' buttons are located at the bottom right of the search area.

--*

*--777 State Office NCT Process (Continued)

D Modifying a Record (Continued)

After applicable data is entered and users CLICK “Search”, the following Search Records - Results Page will be displayed with all records matching the entered search criteria. Users may CLICK “View” next to any record to view the full details about the record.

Click either “Main Menu”, the Main Menu will be displayed, or “Create New Search”, the Search Records – Search Page will be displayed.

D Modifying a Record (Continued)

After users CLICK “View” next to 1 of the records on the Search Records – Results Page, the following View Record – Summary Page will be displayed to allow users to view all details about the record.

To modify data, CLICK “Modify Record”; see subparagraph F for “Approve Record” function.

Note: Once the State approval flag has been set, the crop record **cannot** be modified at the State level. The State Office **must** contact the National Office to reset the State’s approval flags if the record requires modification.

The screenshot displays the 'Program Year 2009 - View Record - Summary Page' for a record in New York (NY) with crop code CHERY 0128. The page includes a navigation menu on the left, a top navigation bar with links like Home, About FSA, and Help, and a main content area with several data tables. The record details include State (NY), Crop (CHERY 0128), Crop Type (SWT), Intended Use (FH), Practice (Non-Irrigated), Planting Period (01), Graduated Price, and Crushing District. It also shows planting and harvest dates, yield history from 2002 to 2007, and approval status (No State, National, or County approval).

D Modifying a Record (Continued)

After users CLICK “**Modify Record**”, the Modify Record – Record Details Page will be displayed. Users may modify any of the fields available for edit.

Notes: Before the record can be **approved**, historical price and yield data for at least 1 year through the most current crop data year is required; however, the record can be created and maintained without the data.

Any changes made to unit of measure, payment factors, and historical prices and sources, will replicate to **all** other records in the State with the same crop, type, and intended use.

Users shall make updates/modifications and CLICK “**Next**”.

The screenshot shows the 'Program Year 2009 - Modify Record - Record Details Page' on the USDA National Crop Table website. The page includes a navigation menu on the left, a header with the USDA logo and 'Farm Service Agency', and a main content area with several data entry sections.

Record Details:

*--777 State Office NCT Process (Continued)

D Modifying a Record (Continued)

After users CLICK “Next”, the Modify Record – Summary Page will be displayed. Users shall review the proposed modifications, and if modifications are correct, CLICK “Save Changes”. If the modifications are incorrect, CLICK “Back” and fix the errors.

The screenshot displays the 'Program Year 2009 - Modify Record - Summary Page' within the USDA Farm Service Agency's National Crop Table. The page includes a navigation menu on the left, a main title bar, and several data tables. A red warning message states: 'Record addition or modification will result in updates to existing records'. The main data table lists crop details for NY (CHERY 0128, SWT, FH, Non-Irrigated, 01). Below this, there are tables for 'Counties' (Cayuga (011)), 'Unit of Measure' (Ton), 'Final Planting Date' (07/15/2009), 'Acres Per Animal Unit' (0.0), a historical 'Yield' and 'Price' table (2002-2007), 'Yield Override' (No, 1.27), 'Insurable' (No), 'NAP Indicator' (Yes), 'Pay Crop' (0128), and 'Pay Type' (002). At the bottom, there are 'Status' (No) and 'County Approval' (No) fields, and 'Save Changes' and 'Back' buttons.

--*

*--777 State Office NCT Process (Continued)

D Modifying a Record (Continued)

After users CLICK “Save Changes”, the Modify Record – Results Page will be displayed with a brief summary of the record that was just modified. If the modifications were replicated to other records within the State, a brief summary of the records will be displayed.

Click either “Main Menu”, the Main Menu will be displayed, or “Back to Search Results”, the Search Records – Results Page will be displayed to select another record to view and modify.

E Viewing a Record for Another State

All eAuthentication users have authority to view records for any State or county in the nation. Users shall follow steps in subparagraph D to search for records and select the record for viewing.

Note: “**Modify Record**” and “**Approve Record**” will **not** be available if users are viewing records outside their State.

The screenshot displays the USDA National Crop Table interface. At the top, it shows the USDA logo and 'Farm Service Agency' branding. A navigation bar includes links for Home, About FSA, Help, Contact Us, Exit NCT, and Logout of eAuth. A left-hand menu lists options like 'NCT Menu', 'Program Year 2009', and 'Add New Record(s)'. The main content area is titled 'Program Year 2009 - View Record - Summary Page' and contains several data tables.

F Approving a Record

Users may approve a single record or multiple records (subparagraph H). To approve a single record, users shall locate the record according to subparagraph D to “**Search/Modify Records**”.

Once users have located and are viewing the record on the View Record – Summary Page, users shall review **all** record information. If the record is complete and accurate, **CLICK “Approve Record”**.

The screenshot displays the USDA National Crop Table interface. At the top, it shows the USDA logo and 'United States Department of Agriculture Farm Service Agency' on the left, and 'National Crop Table' on the right. A navigation bar contains links for Home, About FSA, Help, Contact Us, Exit NCT, and Logout of eAuth. A left-hand menu lists options like 'NCT Menu', 'NCT Main Menu', 'Program Year 2009 Main Menu', 'Add New Record(s)', 'Search/Modify Records', 'Mass Update Records', 'Mass Approve Records', and 'Reports'. The main content area is titled 'Program Year 2009 - View Record - Summary Page' and contains the following data:

State	Crop	Crop Type	Intended Use	Practice	Planting Period	Graduated Price	Crushing District
NY	CHERY 0128	SWT	FH	Non-Irrigated	01

At the bottom right of the page, there are three buttons: 'Modify Record', 'Approve Record', and 'Back'.

--*

--777 State Office NCT Process (Continued)*F Approving a Record (Continued)**

After users CLICK “**Approve Record**”, the Approve Record - Confirmation Screen will be displayed.

The screenshot shows the USDA National Crop Table interface. At the top left is the USDA logo with the text "United States Department of Agriculture" and "Farm Service Agency". At the top right is the text "National Crop Table". Below the header is a navigation bar with links: "Home", "About FSA", "Help", "Contact Us", "Exit NCT", and "Logout of eAuth". The main content area has a blue header that reads "Program Year 2009 - Approve Record - Confirmation". Below this header, the text asks "Are you sure you want to approve the record?". At the bottom of the confirmation area are two buttons: "Confirm" and "Back".

Click either of the following:

- “**Confirm**” to approve the record, the Approve Record – Results Page will be displayed
- “**Back**” to cancel and return to the View Record – Summary Page.--*

*--777 State Office NCT Process (Continued)

F Approving a Record (Continued)

If users CLICK “**Confirm**”, the Approve Record – Results Page will be displayed, notifying users that the record was approved. Note that the State approval flag has been set to “**Y**”.

The screenshot shows the USDA National Crop Table interface. At the top, it displays the USDA logo and 'Farm Service Agency' on the left, and 'National Crop Table' on the right. A navigation bar includes links for Home, About FSA, Help, Contact Us, Exit NCT, and Logout of eAuth. The main heading is 'Program Year 2009 - Approve Record - Results Page'. Below this, it states '- 1 Records Approved -'. A table lists the record details:

Status	State	County	Crop	Type	Use	Pract.	Plant. Period	Grad. Price	Crush. District	Yield		Price		Approvals			
										Amount	Over.	Amount	Over.	N	S	C	
	NY	Cayuga (011)	CHERY (0128)	SWT	FH	N	01			1.27	N	1923.3333	N	N	Y	N	View

At the bottom of the page, there are two buttons: 'Main Menu' and 'Back To Search Results'.

Click either of the following:

- “**Main Menu**”, the Main Menu will be displayed
- “**Back to Search Results**”, the Search Records – Results Page will be displayed to select another record to view and modify.

Notes: Users have the option to “**Create and Approve**” in 1 step (subparagraph B) as the final step in adding a new record, provided all required data is entered.

DAFP establishes the price for grazing records according to subparagraph 503 C. Users may approve grazing records before DAFP establishes the price.--*

*--777 State Office NCT Process (Continued)

G Mass Update Records

To update any crop data for multiple records at 1 time, from the Main Menu, CLICK “**Mass Update Records**”.

The Mass Update Record – Search Page will be displayed. Users can query data for the records they want to update and CLICK “**Search**”.

The screenshot shows the 'National Crop Table' interface. At the top left is the USDA logo and 'United States Department of Agriculture Farm Service Agency'. At the top right is 'National Crop Table'. A navigation bar contains links: Home, About FSA, Help, Contact Us, Exit NCT, Logout of eAuth. A left-hand menu lists: NCT Menu, NCT Main Menu, Program Year 2009 (highlighted), Main Menu, Add New Record(s), Search/Modify Records, Mass Update Records, Mass Approve Records, Reports. The main content area is titled 'Program Year 2009 - Mass Update Records - Search Page'. It contains the following search criteria:

- State: New York
- County: [Dropdown]
- Crop: APPLES (0054)
- Crop Type: COM
- Intended Use: FH
- Practice: Irrigated
- Planting Period: 01
- Graduated Price: [Dropdown]
- Crushing District: [Dropdown]

At the bottom right are 'Search' and 'Main Menu' buttons.

--*

*--777 State Office NCT Process (Continued)

G Mass Update Records (Continued)

After users CLICK “Search”, the Mass Update Records – Results Page will be displayed with all records matching the search criteria.

Users shall select the records to be updated by clicking a checkmark next to the applicable records. Clicking:

- “Select All” will display a checkmark next to all available records
- “Clear All” will clear the checkmark from all selected records.

After users select the records to be updated, CLICK “Update Selected Records”.

The screenshot shows the 'National Crop Table' interface. At the top, it displays the USDA logo and 'United States Department of Agriculture Farm Service Agency'. A navigation bar includes links for Home, About FSA, Help, Contact Us, Exit NCT, and Logout of eAuth. The main heading is 'Program Year 2009 - Mass Update Records - Results Page'. Below this, it states '- 3 Records Found -'. A table lists three records, each with a checked checkbox in the first column. The table columns are: Status, State, County, Crop, Type, Use, Pract., Plant. Period, Grad. Price, Crush. District, Yield (Amount, Over.), Price (Amount, Over.), and Approvals (N, S, C). Each record has a 'View' link at the end of its row. Below the table are buttons for 'Select All' and 'Clear All'. At the bottom of the page are buttons for 'Main Menu', 'Create New Search', and 'Update Selected Records'.

R	Greene (039)	0.00	N	0.0000	N	N	N	N

All fields required to make a shell record are marked by an asterisk(*).

*Final Planting Date (mm/dd/yyyy)	*Acreage Reporting Date (mm/dd/yyyy)	*Normal Harvest Date (mm/dd/yyyy)	*Application Closing Date (mm/dd/yyyy)
12/01/2008	08/15/2009	11/05/2009	11/20/2008

Year	Yield	Yield Source
2007	1150.000	CSREES

Next Back

Note: Any data entered through “Mass Update Records” will update the new, revised, or existing data displayed on this screen to **all** selected records. For example, if the final planting date should be retained as 12/15/2008 for 1 of the selected counties, the final planting date for that county will be overridden with 12/01/2008, based on the date displayed on this screen.--*

G Mass Update Records (Continued)

After users CLICK “Next”, the Mass Update Records – Confirmation Screen will be displayed.

Click either of the following:

- “**Confirm**” to confirm the updates
- “**Back**” to cancel and return to the Mass Update Records – Record Details Page.

--*

*--777 State Office NCT Process (Continued)

G Mass Update Records (Continued)

After users CLICK “**Confirm**”, the Mass Update Records – Results Page will be displayed, notifying users of the updated records.

The screenshot shows the USDA Farm Service Agency National Crop Table interface. At the top, there is a navigation bar with links for Home, About FSA, Help, Contact Us, Exit NCT, and Logout of eAuth. Below this is a blue header for the 'Program Year 2009 - Mass Update Records - Results Page'. The main content area displays '- 3 Records Updated -' above a table with the following data:

Status	State	County	Crop	Type	Use	Pract.	Plant. Period	Grad. Price	Crush. District	Yield		Price		Approvals		
										Amount	Over.	Amount	Over.	N	S	C
S	NY	Broome (007)	APPLE (0054)	COM	FH	I	01			556	N	0	N	N	N	View
S	NY	Fulton (035)	APPLE (0054)	COM	FH	I	01			556	N	0	N	N	N	View
S	NY	Greene (039)	APPLE (0054)	COM	FH	I	01			556	N	0	N	N	N	View

At the bottom of the page, there are two buttons: 'Main Menu' and 'Update Additional Fields'.

Click either of the following:

- “**Main Menu**” to return to the Main Menu
- “**Update Additional Fields**” to return to the Mass Update Records - Select Fields Page to select additional fields to update for the currently selected records.

Note: If users CLICK “**Update Additional Fields**”, the selected fields will update new, revised, or existing data for **all** selected records. If additional updates are required for some, but **not all** of the previously selected records, a new search should be done to identify the records to be updated.--*

*--777 State Office NCT Process (Continued)

H Mass Approve Records

Users have the option to approve multiple crop records at 1 time. From the Main Menu, CLICK “**Mass Approve Records**”. The county “**Y**” approval flag is **not** required for mass approvals. To mass approve crop records, users shall select the crop, type, graduated price, and intended use, if applicable, and ensure that:

- crop records have a 2007 historical yield and price, if required
- **Note:** Crops with intended use of grazing and value loss crops, except nursery, do **not** have historical yields.
- if historic data was entered in any previous years, historic data for all subsequent years is required.

Note: Starting in crop year 2009, users may click “**Mass Approve Records**” **without** approving a single record first.

The following Mass Approve Record – Search Page will be displayed and users shall search for the records to be approved.

The screenshot shows the USDA National Crop Table interface. At the top, it displays the USDA logo and 'United States Department of Agriculture Farm Service Agency' on the left, and 'National Crop Table' on the right. A navigation bar contains links for Home, About FSA, Help, Contact Us, Exit NCT, and Logout of eAuth. The main content area is titled 'Program Year 2009 - Mass Approve Records - Search Page'. On the left, there is a 'NCT Menu' with options: NCT Main Menu, Program Year 2009 Main Menu, Add New Record(s), Search/Modify Records, Mass Update Records, Mass Approve Records, and Reports. On the right, search criteria are listed with dropdown menus: State (New York), County (empty), Crop (CABBAGE (0116)), Crop Type (RED), Intended Use (FH), Practice (Non-Irrigated), Planting Period (01), Graduated Price (empty), and Crushing District (empty).

--*

*--777 State Office NCT Process (Continued)

H Mass Approve Records (Continued)

After users select the search criteria and CLICK “**Search**”, the following Mass Approve Records – Results Page will be displayed with all records matching the search criteria. Users shall select the records to be approved by clicking a checkmark next to the applicable records. Clicking:

- “**Select All**” will display a checkmark next to all available records
- “**Clear All**” will clear the checkmark from all selected records.

After users select the records to be approved, CLICK “**Approve Selected Records**”.

	NY	Cayuga (011)	CABAG (0116)	RED	FH	N	01			425.00	N	14.8667	N	N	Y	N	View

Note: If some of the selected records **cannot** be approved, the Mass Approve Records – Results Page will reflect not only the “Records Approved” but will also identify which “Records Failed Approval” with the reasons for failure.--*

***--778 National Office Crop Table Process**

A Resetting Approval Flags

State and/or National approval of a crop record will trigger a download of county and State approved crop records to County Offices. The National Office **must** reset any record previously approved by the State when the State Office requires a change or modification to the crop record that **must** be downloaded to the County Office.

Users will have the option to individually reset State approval flags or mass reset State and National approval flags to allow States to make changes.

From the Main Menu, CLICK “**Mass Approval Reset**”.

Note: “**Mass Approval Reset**” will be displayed at the National level **only**.

--*

*--778 National Office Crop Table Process (Continued)

A Resetting Approval Flags (Continued)

After users CLICK “Mass Approval Reset” the Mass Reset Records – Search Page will be displayed. Users can query data for the records they want to mass reset and CLICK “Search”.

The screenshot shows the 'National Crop Table' interface. At the top left is the USDA logo and 'United States Department of Agriculture Farm Service Agency'. At the top right is 'National Crop Table'. A navigation bar contains links: Home, About FSA, Help, Contact Us, Exit NCT, Logout of eAuth. A left-hand menu lists: NCT Menu, NCT Main Menu, Program Year 2009, Main Menu, Add New Record(s), Search/Modify Records, Mass Update Records, Mass Approve Records, Mass Approval Reset Reports. The main content area is titled 'Program Year 2009 - Mass Reset Records - Search Page' and contains the following search filters:

- State: New York
- County: [Empty]
- Crop: CABBAGE (0116)
- Crop Type: RED
- Intended Use: FH
- Practice: [Empty]
- Planting Period: [Empty]
- Graduated Price: [Empty]
- Crushing District: [Empty]

At the bottom right of the search area are two buttons: 'Search' and 'Main Menu'.

*--778 National Office Crop Table Process (Continued)

B Deleting a Record

Only National Office users can delete a record. To delete a crop record, users shall locate the record using “**Search/Modify Record(s)**” according to paragraph 777 D. After locating the record, and reviewing it on the View Record – Summary Page, CLICK “**Delete Record**”.

Note: Before a National Office user deletes a record, State Office users **must** ensure that an application for coverage has **not** been taken for the crop, type, and intended use.

The screenshot displays the 'National Crop Table' interface. At the top, it shows the USDA logo and 'United States Department of Agriculture' alongside the 'Farm Service Agency' logo. The page title is 'National Crop Table' and 'Program Year 2009 - View Record - Summary Page'. A navigation bar includes links for Home, About FSA, Help, Contact Us, Exit NCT, and Logout of eAuth. On the left, a 'NCT Menu' is visible with options like 'Add New Record(s)', 'Search/Modify Records', and 'Mass Update Records'. The main content area contains several data tables:

State	Crop	Crop Type	Intended Use	Practice	Planting Period	Graduated Price	Crushing District
NY	CLERY	0126	FH	Non-Irrigated	01		

Below this is a 'Counties' section for Albany (001). It includes tables for 'Unit of Measure' (Hundredweight) with 'Pounds Per Unit of Measure', 'Prevented Planting Factor' (0.2800), and 'Unharvested Payment Factor' (0.5200). Another table shows 'Final Planting Date' (06/30/2009), 'Acreage Reporting Date' (07/15/2009), 'Normal Harvest Date' (10/15/2009), and 'Application Closing Date' (03/15/2009). There are also sections for 'Acres Per Animal Unit' (0.0) and 'Grazing Days' (000).

Year	Yield	Yield Source	Year	Price	Price Source
2002	580.50	Other Rel. Srcs	2002	13.7500	Other Rel. Srcs
2003	522.50	Other Rel. Srcs	2003	13.7567	Other Rel. Srcs

Insurable	NAP Indicator	Pay Crop	Pay Type
No	Yes	0126	001

Status	County Approval	State Approval	National Approval
R	No	No	No

At the bottom of the page, there are four buttons: 'Delete Record', 'Modify Record', 'Approve Record', and 'Back'.

--*

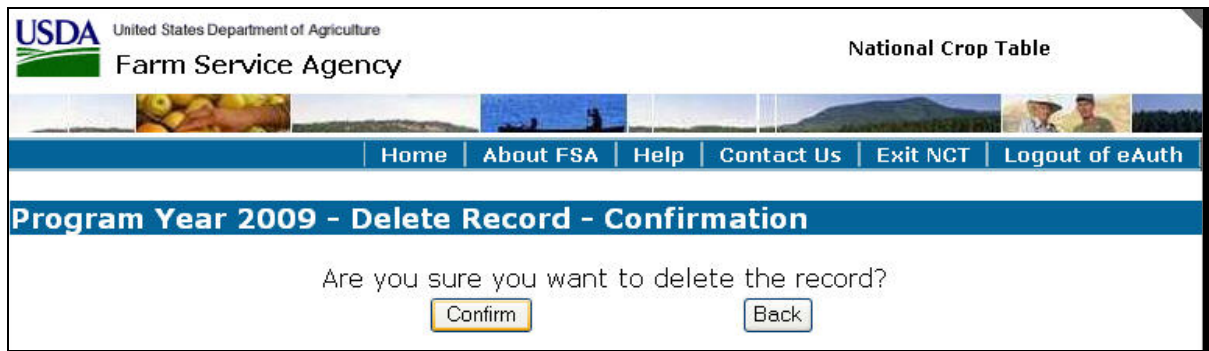

***--778 National Office Crop Table Process (Continued)**

B Deleting a Record (Continued)

After users CLICK **“Delete Record”**, the Delete Record – Confirmation Screen will be displayed.

Click either of the following:

- **“Confirm”**
- **“Back”** to return to the View Record – Summary Page.

--*

***--778 National Office Crop Table Process (Continued)**

B Deleting a Record (Continued)

If users CLICK “**Confirm**”, the Delete Record – Results Page will be displayed, notifying users of the deleted record. Note that the Status code is now “**D**” for deleted.

Click either of the following:

- “**Main Menu**” to return to the Main Menu
- “**Back to Search Results**” to search for additional records to delete.

The screenshot shows the 'National Crop Table' interface. At the top, it displays the USDA logo and 'Farm Service Agency'. A navigation bar includes links for Home, About FSA, Help, Contact Us, Exit NCT, and Logout of eAuth. The main heading is 'Program Year 2009 - Delete Record - Results Page'. Below this, it states '- 1 Records Deleted -'. A table lists the deleted record with columns for Status, State, County, Crop, Type, Use, Pract., Plant. Period, Grad. Price, Crush. District, Yield (Amount, Over.), Price (Amount, Over.), and Approvals (N, S, C). The record shown has a Status of 'D', State of 'NY', County of 'Albany (001)', Crop of 'CLERY (0126)', Type of 'FH', Use of 'N', and Plant. Period of '01'. The Yield and Price columns show '0.00' and '0.0000' respectively. The Approvals column shows 'N N N'. A 'View' link is present at the end of the row. At the bottom, there are two buttons: 'Main Menu' and 'Back To Search Results'.

Status	State	County	Crop	Type	Use	Pract.	Plant. Period	Grad. Price	Crush. District	Yield		Price		Approvals

Drop-Down Box Title	Action																				
Pounds Per Unit of Measure	When adding barrel, box, bunches, carton, container, crate, or lug as a unit of measure for a record, the number of pounds for the unit of measure must be updated.																				
Prevented Planting Factor	<p>An entry of “0.0000” will be defaulted. Enter the prevented planting factor (decimal point first), for instance, “.10”. The prevented planting factor must be the same factor within the State by crop code, type abbreviation, and intended use. The prevented planting factor can be no greater than the unharvested payment factor. If a prevented planting factor greater than zero is entered, there must be an entry in the “final planting date” field.</p> <p>Notes: National and State Office entry only.</p> <p style="text-align: center;">Required entry except for value loss crops and all crops in Tropical Regions.</p>																				
Unharvested Payment Factor	<p>Enter the unharvested factor (decimal point first), for instance, “.30”. The unharvested factor must be the same factor within the State by crop code, type, and intended use.</p> <p>Note: National and State Office entry only.</p>																				
Acres Per Animal Unit	<p>Enter the carrying capacity for forage crops with the intended use of grazing.</p> <p>Note: To accommodate multiple carrying capacities according to paragraph 107.5, see instructions for the Planting Period entry.</p> <p>Examples:</p> <table border="0" style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 25%;">Alfalfa</td> <td style="width: 25%;">Grass</td> <td style="width: 25%;">Mixed Forage</td> <td style="width: 25%;">Sorghum</td> </tr> <tr> <td>Barley</td> <td>Kochia</td> <td>Oats</td> <td>Speltz</td> </tr> <tr> <td>Birdsfoot</td> <td>Kohlrabi</td> <td>Perennial Peanuts</td> <td>Triticale</td> </tr> <tr> <td>Clover</td> <td>Lespedeza</td> <td>Rye</td> <td>Vetch</td> </tr> <tr> <td>Corn</td> <td>Millet</td> <td>Sorghum, Forage</td> <td>Wheat</td> </tr> </table>	Alfalfa	Grass	Mixed Forage	Sorghum	Barley	Kochia	Oats	Speltz	Birdsfoot	Kohlrabi	Perennial Peanuts	Triticale	Clover	Lespedeza	Rye	Vetch	Corn	Millet	Sorghum, Forage	Wheat
Alfalfa	Grass	Mixed Forage	Sorghum																		
Barley	Kochia	Oats	Speltz																		
Birdsfoot	Kohlrabi	Perennial Peanuts	Triticale																		
Clover	Lespedeza	Rye	Vetch																		
Corn	Millet	Sorghum, Forage	Wheat																		
Grazing Days	<p>Enter the number of days in a grazing period for each forage crop with the intended use of grazing. Must not exceed 365 days.</p> <p>Note: To accommodate multiple carrying capacities according to paragraph 107.5, see instructions for the Planting Period entry.</p>																				
Final Planting Date	<p>Enter the final planting date for annual crops. Must be before normal harvest date, after the application closing date, and have an entry greater than zero in the “Prevented Planting Factor” field.</p> <p>Notes: Date format: mm/dd/yyyy.</p> <p style="text-align: center;">Required entry except for value loss crops and crops in Tropical Regions.</p>

B Required Data for Value Loss Crops

Use the following table when entering value loss crop data information.

Crop	Type	Data Required	Data Not Required
Christmas Trees (7321)	All	Graduated price code, unit of measure, unharvested factor, planting period (default "1"), acreage reporting date (default 9/30 of previous crop year), application closing date (default 9/01 of previous calendar year), normal harvest date (default 9/30 of crop year), price, and price source.	Prevented planted factor, final planting date, yield, yield source, and practice code.
Crustacean (3002)	All	Graduated price code, unit of measure, unharvested factor, planting period (default "1"), acreage reporting date (default 9/30 of previous crop year), application closing date (default 9/01 of previous calendar year), normal harvest date (default 9/30 of crop year), price, and price source.	Prevented planted factor, final planting date, yield, yield source, and practice code.
Finfish (3000)	<ul style="list-style-type: none"> • Haplochromine Tropical (HAP) • Lamprologuine Tropical (LAM) • Mbuna Chichlid Tropical (MBU) • Tanganyika Tropical - (TAN) • Tropical - (TRO) 	Unharvested factor, planting period (default "1"), acreage reporting date (default 9/30 of previous crop year), application closing date (default 9/01 of previous calendar year), and normal harvest date (default 9/30 of crop year).	Graduated price code, unit of measure, prevented planted factor, final planting date, yield, yield source, price, price source, and practice code.
	All other Finfish not listed above.	Graduated price code, unit of measure, unharvested factor, planting period (default "1"), acreage reporting date (default 9/30 of previous crop year), application closing date (default 9/01 of previous calendar year), normal harvest date (default 9/30 of crop year), price, and price source.	Prevented planted factor, final planting date, yield, yield source, and practice code.

***--779 NCT Information (Continued)**

C Error Message Screen

The crop record will **not** be created or validated until users click either “**Create Record(s)**” or “**Create & Approve Record(s)**”. If entries are invalid, error messages will be displayed. The error screen will provide information about the invalid conditions or entries.

Any errors or invalid conditions **must** be corrected **before** the record can be created.

The following table contains error messages that may be encountered in NCT, and the actions necessary for correcting them.

Error Message	Explanation or Action Required
A Crop record was not found for the selected Crop, Type, and Intended Use.	There are currently no records loaded for the selected crop, type, and intended use.
A grazing record must be approved before a forage record can be approved for county code.	See subparagraph 774 A.
A grazing record must exist before this record can be approved for county code.	See subparagraph 774 A.
A grazing record must exist before this record can be saved for county code.	See subparagraph 774 A.
Acres Per Animal Unit is required.	Required for all crops with an intended use of grazing (subparagraph 779 A).
Another user has updated or added affected record(s) since you began your updates. Please retrieve the record(s) to obtain the current data and try again.	User must return to Main Menu and re-enter data.
At least one historical price is required.	See subparagraph 773 D.
At least one historical yield is required.	See subparagraph 773 D.
Crop, type, and intended use are not approved for NAP.	Warning message only. User is not stopped from creating record (subparagraph 170 E, paragraph 772, and subparagraph 781 G).
Grazing Days is required.	Required for all crops with an intended use of grazing (subparagraph 779 A).
Grazing Days must be blank.	Required only for crops with an intended use of grazing (subparagraph 779 A).

--*

*--779 NCT Information (Continued)

C Error Message Screen (Continued)

Error Message	Explanation or Action Required
Historical prices need to be entered in consecutive years.	See subparagraph 773 D.
Historical prices need to be entered through the most recent year.	See subparagraph 773 D.
Historical yields need to be entered in consecutive years.	See subparagraph 773 D.
Historical yields need to be entered through the most recent year.	See subparagraph 773 D.
If the Approved indicator is selected, the Level of Approval is required.	CLICK “N” for National, “S” for State, or “C” for county. Must select a level of approval.
If the Level of Approval is selected, the Approved indicator is required.	CLICK “Y” or “N”. Must select an approval indicator.
Must select at least one criteria field.	Selection criteria must be entered in one or more fields.
Override price is not allowed on value loss crops.	Many value loss crops do not require a price (paragraphs 182-189 and subparagraph 779 A).
Override yield is not allowed.	Value loss crops and grazing records do not have a yield (see subparagraph 181 A for value loss crops and subparagraph 107.5 for grazing crops).
Pounds Per Unit of Measure is required.	See subparagraph 779 A.
Prevented Planting Factor must be zero for value loss crops or crops in tropical regions.	See subparagraph 779 A.
Record addition or modification will result in updates to existing records.	Warning message only. If added or changed, unit of measure, pounds per unit of measure, payment factors, or price data updated on the current record will be updated to all records with the same crop, type, intended use, and planting period (subparagraph 777 D).
Requires a Pay Group	The crop is not approved for NAP eligibility and will not be downloaded to county System 36 (subparagraphs 170 E and 781 G, and paragraph 772).

--*

*--779 NCT Information (Continued)

C Error Message Screen (Continued)

Error Message	Explanation or Action Required
The Acreage Reporting Date is invalid.	Required entry; for non-value loss crops, must be equal to or later than the application closing date (subparagraph 779 A).
The Acres Per Animal Unit must be blank.	Required only for crops with an intended use of grazing (subparagraph 779 A).
The Application Closing Date is invalid.	Required entry; must be before the Final Planting Date; cannot be earlier than 01/01 of the previous crop year (subparagraph 779 A).
The Final Planting Date is invalid.	Required if there is an entry in the Prevented Planting Factor field; and must be before the Normal Harvest Date and after the Application Closing Date (subparagraph 779 A).
The Historical Price Amount is invalid.	Historical price must be numeric and not more than 4 decimal places (subparagraphs 2 C and 779 A).
The Historical price must be blank.	Historic data not required for value loss crops and forage crops with intended use of grazing (subparagraph 779 A).
The Historical Yield Amount is invalid.	Historical yield must be numeric and not more than the applicable number of decimal places based on applicable unit of measure (subparagraphs 2 B and 779 A).
The Historical yield must be blank.	Historic data not required for value loss crops and forage crops with intended use of grazing (subparagraph 779 A).
The Normal Harvest Date is invalid.	Required entry; for non-value loss crops, must be equal to or later than the application closing date when the final planting date is not populated (subparagraph 779 A).
The Override Price Amount is invalid.	Override price must be numeric and not more than 4 decimal places (subparagraphs 2 C and 779 A).
The Override Yield Amount is invalid.	Override yield must be numeric and not more than the applicable number of decimal places based on applicable unit of measure (subparagraphs 2 B and 779 A).

--*

*--779 NCT Information (Continued)

C Error Message Screen (Continued)

Error Message	Explanation or Action Required
The Pounds Per Unit Of Measure is invalid.	Every county within a State must have the same pounds per unit of measure by crop, type, and intended use. Insurable crops must use the current RMA unit of measure for crops with RMA prices.
The Pounds Per Unit Of Measure is not required.	Pounds per unit of measure is only required for the following Units of Measure: barrels, box, bushels, bunches, carton, containers, crate, lug (subparagraph 779 A).
The Prevented Planting Factor is invalid.	Prevented Planting Factor must be the same within a State by crop, type, and intended use; must be zero if the final planting date is blank; and is not permitted for value loss crops or tropical region crops (subparagraph 779 A).
The selected Unit of Measure does not match the insurable record value of '{0}'.	See subparagraph 2 B.
The Unharvested Factor is invalid.	Unharvested Factor must be the same within a State by crop, type, and intended use; and must be equal to 1.00 for records with an intended use of grazing (GZ) (subparagraph 779 A).
The Unit of Measure is invalid.	Unit of measure is not required for many value loss crops (subparagraph 779 A).
The Unit of Measure must be blank.	See subparagraph 779 A.
Too many records. Please refine the search criteria.	User must include additional search criteria.
Unit of Measure must be 'Animal Unit Days' for grazing crops.	The unit of measure for forage grazing records must be AUD's (paragraph 107.5).
There is already an Application Closing Date loaded with a different date, are you sure you want a different date than {date}?	Warning message. All crops and types within a pay group must have the same application closing date (subparagraph 23 C).
{Year} Historical Yield Amount must be greater than zero.	Historical yield data is required (paragraph 107).

--*

--780 Approval Flags*A Setting the Approval Flags**

The County, State, and National Office approval flags are defaulted to “N”.

The record **must** be approved by County and/or State Offices to process the crop record. To approve the record, CLICK “**Search/Modify Records**” according to paragraph 776 or 777, as applicable.

If the record has been approved so that the Approval flag is “Y” for the:

- County Office, **only** the State or National Office may change the crop record

Note: If a change is required, contact the State Office.

- State Office, the National Office may change the crop record, or remove the State approval flag to allow the State Office to make changes.

Note: If a change is required, contact the National Office.

Note: A county approval flag is **not** required if the State Office will be entering County Office data. However, the State Office will be required to approve the record.--*

***--781 NCT Reports**

A Report Options

Users can print reports of crop data previously entered. From the Main Menu, CLICK **“Reports”**. The Reports - Reports Selection Screen will be displayed. The reports can be printed for a specific record (crop, type, practice, intended use, planting period, etc.) or numerous records, depending on the selections entered on the query screen.

Important: There are 6 different reports the user can generate. All reports are accessible from the “Reports” section of the Main Menu.

--*

*--781 NCT Reports

B Detail Report

The Detail Report was previously known as the Table Report in NCT for crop years before 2009. The Detail Report displays a list of all crop information, **except** historical yield and price data. To access the Detail Report, from the Main Menu, **CLICK “Reports”**; from the Reports - Reports Selection Screen, **CLICK “Detail Report”**. The Reports - Report Criteria Screen will be displayed.

Users are required to enter data in at least 1 field on the Reports - Report Criteria Screen **before** clicking “Search”.

--*

*--781 NCT Reports

B Detail Report (Continued)

After users CLICK “Search”, the Detail Report will be displayed.

C History Report

The History Report displays 5 years of price and yield historical data. To access the History Report, from the Main Menu, CLICK **“Reports”**; from the Reports - Reports Selection Screen, CLICK **“History Report”**. The Reports - Report Criteria Screen will be displayed.

Users are required to enter data in at least 1 field on the Reports - Report Criteria Screen **before** clicking **“Search”**.

The screenshot shows the 'Program Year 2009 - Reports - Report Criteria' interface. The top navigation bar includes 'Home', 'About FSA', 'Help', 'Contact Us', 'Exit NCT', and 'Logout of eAuth'. The left sidebar menu includes 'NCT Menu', 'NCT Main Menu', 'Program Year 2009', 'Main Menu', 'Add New Record(s)', 'Search/Modify Records', 'Mass Update Records', 'Mass Approve Records', and 'Reports'. The main content area contains the following fields:

- State: New York
- County: [Dropdown]
- Crop: CABBAGE (0116)
- Crop Type: RED
- Intended Use: FH
- Practice: [Dropdown]
- Planting Period: [Dropdown]
- Graduated Price: [Dropdown]
- Crushing District: [Dropdown]

At the bottom right, there are buttons for 'Search', 'Clear', 'Back', and 'Main Menu'.

782-795 (Reserved)

*--Section 2 Unit Maintenance

796 Overview

A**Introduction**

This section provides procedure for:

- creating initial units
- modifying units
- printing the unit description report.

B**Unit Changes**

Unit software was completely rewritten for the 2001 and subsequent crop years. The major changes are as follows:

- no longer year specific
- no more subunits for added land purposes
- land location and crops are not attached
- units are created for a unique farming relationship, not individually by producer
- units are based on administrative not location county
- unit number is now 6 digits and unique within an administrative county.

C**Producer Types**

There are only 2 producer types used to determine unique farming relationships: OP and OW. All OT producer types will be considered OP. An OO producer type that is associated with other producers will be considered an OP if all of the other producer types are OW. An OO producer type that is associated with other producers will be considered an OW if any of the other producer types is an OP. All relationships that are comprised of only 1 producer will be an OP producer type.

Examples: Producer A is an OO and shares with Producer B who is an OW. Producer A will be considered an OP.

Producer A is an OO and shares with Producer B who is an OP. Producer A will be considered an OW.--*

***--797 Basic Unit Definition**

**A
Review of
Definition**

Basic units are established as follows:

- all land administered by a county for which a producer has a 100% share is 1 basic unit, including owner-operator and cash rented land
- each unique instance of a farming relationship of operator(s) to owner(s) is a separate unit.

Note: Reversed roles qualify for separate basic units. Producer A is OP and Producer B is OW on some land and Producer B is OP and Producer A is OW on some land. Each relationship would have a unique unit number.

**B
Examples of
Units**

Example 1: The following are farming operations for producer A:

- owner-operator of farm 1
- cash rents farm 2 for 100 percent share.

Producer A has only 1 unit.

Example 2: The following are farming operations for producer B:

- cash rents farm 3 for 100 percent share
- operator of farm 4 and shares 50/50 with producer C
- owner of farm 5 and shares 50/50 with producer C.

Producer B has 3 basic units. Farm 5 has a different farming relationship because of role reversal with producer C.--*

***--798 Creating Initial Units**

A Accessing Unit Maintenance

Select Option “8” from Menu M00000 or Option “2” from Menu MHB000 to display Unit Relationship Menu MHACU0.

B Unit Relationship Menu MHACU0

This is an example of Unit Relationship Menu MHACU0. This menu provides options to maintain existing units or create initial units for the entire county.

```

COMMAND                                MENU: MHACU0                                W1
Unit Relationship Menu
-----
                                1. Unit Maintenance
                                2. Create Initial Units

                                20. Return to Application Primary Menu
                                21. Return to Application Selection Screen
                                23. Return to Primary Selection Menu
                                21. Sign Off

Cmd3=Previous Menu                                *=Option currently not available.

Enter option and press "Enter".
    
```

C Options on Menu MHACU0

This table shows options on Menu MHACU0 and each option’s result and paragraph reference.

Option	Result	Reference
1	Screen MHACU101 will be displayed to select a producer.	Paragraph 799
2	Queries compliance share file and creates any new relationships. Redisplays Menu MHACU0.	This paragraph

D Initial Units

Units will initially be built by reading the 2001 compliance share files and grouping by unique share relationships. These units will be created using the producer(s) ID and ID type(s) to determine unique farming relationships. Only new units will be created.--*

799 Unit Maintenance

A Unit Maintenance Screen MHACU301

This is an example of Display Unit Screen MHACU301. This screen will be displayed following the creation of initial units according to paragraph 798 and when a producer is selected from Producer Selection Screen MHACU101. The initial unit creation process will be run for the producer selected. The first character of the unit will be the status field. A deleted unit will display a “D”.

```

```

B Options on Screen MHACU301

This table shows options on Screen MHACU301 and each option’s result and paragraph reference.

Option	Result	Reference
Cmd16	Screen MHACU401 will be displayed to add a unit.	*--Paragraph 801
Cmd21	Auto create.	This paragraph
Cmd22	Print screen will be displayed.	Paragraph 802--*
Cmd23	Reactivate previously deleted unit.	This paragraph
Cmd24	Delete unit.	This paragraph

***--799 Unit Maintenance (Continued)**

C

Deleting a Unit

A unit can be deleted by placing an "X" by the unit on Screen MHACU301 and pressing "Cmd24" to delete. The unit will be displayed with a "D".

D

Reactivating a Unit

A deleted unit can be reactivated by placing an "X" by the unit on Screen MHACU301 and pressing "Cmd23" to reactivate. The "D" will be removed from the unit.

E

Auto Creating a Unit

The compliance share file will be queried and new units for the producer will be added, if applicable, by pressing "Cmd21". If no units were created, units must be added according to paragraph 801.--*

***--800 Modifying Units**

**A
Review of
Farming
Relationships**

The County Office may use the information on AD-1026A, CCC-502, and the yearly review of farm constitution according to 2-CM to ensure that all farming relationships are added as units.

Any change in farming operations may result in a change of basic units. This would include, but is not limited to:

- producer changes
- reconstitutions.

Note: Units must be accurate for the current year farming operation to establish accurate basic unit structures.

A unit can be created before acreage reports are taken. The process to read the acreage share file will help with creating units but is not the only way to create units. All units created automatically should be verified for accuracy.--*

*--801 Creating Units

A
Screen
MHACU401

This is an example of Create Unit Screen MHACU401. This screen provides options to add producers to a unit.

Sel	Type	Producers
—	OP	Joe Jones

Section 3 Approved Yields**836 Overview****A Introduction**

This section provides requirements for:

- selecting a NAP specific crop to compute an approved yield
- dataloading approved yield information
- modifying approved yield information
- printing CCC-452.

B Approved Yield Policy

The policy about what information is necessary to compute an approved yield is in Part 5. The approved yield is * * * unit specific. * * * A producer must be selected before the applicable unit can be accessed.

C Prerequisites

The following must be completed or available before an approved yield can be calculated for a producer:

- units must be established
- CCC-471 must be on file for at least 1 of the producers on the unit
- crop record must exist on NCT with a county expected yield
- *--crop record must be approved by the National or State Office.--*

D Starting Year

This software can only be used for 2003 and future year approved yield purposes.

***--837 Approved Yield Screen Flow**

A Accessing Unit Selection Screen MHACYB01

Complete the following to access Screen MHACYB01.

Step	Action	Result
1	On Risk Management and Disaster Payments Menu MH0000, ENTER "2" and PRESS "Enter".	Menu MHB0YR will be displayed.
2	Enter the option for the applicable crop year and PRESS "Enter".	Menu MHB000 will be displayed.
3	ENTER "3", "Approved Yield Maintenance", to select a producer and PRESS "Enter".	Screen MHACYA01 will be displayed.
4	Enter the producer data to select a producer.	Screen MHACYB01 will be displayed.

--*

*--837 Approved Yield Screen Flow (Continued)

B Unit Selection Screen MHACYB01

Use Screen MHACYB01 to select a unit to calculate an approved yield.

On Screen MHACYB01:

- ENTER "X" before the desired unit

Note: Only 1 unit can be selected at a time.

- PRESS "Enter" to display Crop Selection Screen MHACYC01.

This is an example of Screen MHACYB01.

```

837 Approved Yield Screen Flow (Continued)

C Crop Selection Screen MHACYC01

Use Screen MHACYC01 to select a crop, type, planting period, intended use, and practice to calculate an approved yield. On Screen MHACYC01:

- ENTER “X” before the desired crop, type, planting period, intended use, and practice

Note: Only 1 record can be selected at a time.

- PRESS “Cmd2” to display Jump to Crop Screen MHACYC1A

Note: Type in a partial crop name to quickly access crops without going through several roll screens.

- PRESS “Enter” to display Approved Yield Calculation Screen MHACYD01.

Note: Only those records with a county expected yield downloaded on NCT can have an approved yield calculated.

This is an example of Screen MHACYC01.

E Options on Screen MHACYD01

This table shows options on Screen MHACYD01 and each option's result.

Option	Result
Cmd1	Screen MHACYD1A will be displayed to provide a 50 character free-form text field.
Cmd5	Screen MHACYD01 will be redisplayed with resulting calculations of inputs. Notes: Four crop years are required to calculate an approved yield. Screen MHACYD1C will be displayed according to subparagraph L for 2001 and subsequent historic years if the record has a prior approved yield loaded with acres planted and actual production fields blank. Approved Yield Warning Screen MHACYD1D will be displayed according to subparagraph M if the calculated approved yield exceeds the transitional yield by 100 percent or more. *--Substitute Yield Screen MHACYD1B will be displayed according to subparagraph N if a substitute yield is being used.--*
Cmd12	Screen MHACYZ01 will be displayed to select a printer for the printed report. See paragraph 838.
Help	Screen HLPCYD01 will be displayed to provide information on yield types, record types, and reason codes.

*--837 Approved Yield Screen Flow (Continued)

F Field Entries on Screen MHACYD01

This table provides instructions for field entries on Screen MHACYD01.

Note: The procedure for determining the values of some of these fields is in Part 5.

Field Name	Procedure
Trans Yield	This field displays the county expected yield from NCT.
Adj Trans Yield	Enter the adjusted T-yield determined according to subparagraph 260 C.
Reason	Enter the applicable reason code for the adjusted T-yield. Subparagraph G has a list of these codes.
Date	Enter the date of the COC or STC minutes that document the determination of the adjusted T-yield.
Prior Appr Yield	Enter the previous year's approved yield. This field will be blank if the unit has never had an approved yield established. 2004 and future years approved yield software will rollover the approved yield from a prior year into this field.
Approved Yield	This field is calculated when "Cmd5" is pressed. Note: Four crop years are required before an approved yield can be calculated. See subparagraph 254 D.
Substitute Yield?	This field determines whether substitute yield rules apply. This field is defaulted to "N" as the unit may have already used this 1-time substitution. ENTER "Y" if the producer is requesting to use substitute yields as provided in paragraph 259.
Cup Rules Apply?	This field determines whether cup rules apply. This field is defaulted to "Y" meaning that the software will determine whether a cup applies. ENTER "N" if the approved yield should not be cupped. Refer to subparagraph 286 D for instances when the cup rules do not apply. Note: "Y" does not mean that the approved yield was cupped, only that the rules apply.

--*

837 Approved Yield Screen Flow (Continued)

F Field Entries on Screen MHACYD01 (Continued)

Field Name	Procedure
Crop Year	<p>The prior 4 crop years are displayed. Additional years can be added if necessary. Enter data for any prior crop year for which the producer provides records of actual production. Rotation farms only require data to be loaded for the years that the crop is planted.</p> <p>Note: Lag year crops included in paragraph 308 have a 1-year lag.</p> <p>Example: The prior 4 crop years for the 2003 approved yield are 1998 through 2001.</p>
Eligible Disaster	<p>This field is defaulted to blank. Enter either “N” or “Y” for any year that acreage and production is loaded. “Y” will allow the replacement yield rules to apply for that year as provided in paragraph 256.</p>
--Acres Planted	<p>Enter the acres planted for the unit as determined according to Part 4. The acres shall be loaded as irrigated or nonirrigated, as applicable.--</p>
Actual Production	<p>Enter the actual production as determined according to paragraph 326.</p>
Record Type	<p>Enter the record types that support the production entered. Use a comma to separate multiple record types. Subparagraph G has a list of these record types. If record type 5 is one of the types entered, use “Cmd1” to record the type of production record used.</p> <p>Example: 1, 5</p>
Yield Type	<p>This field is determined by the software when “Cmd5” is pressed and, therefore, is generally left blank. This type may be entered or changed to follow procedure in this handbook.</p> <p>Example: The unit qualifies for the “new producer” rule. The system-generated percent of T-yield types can be changed or loaded to “T”. If changed, the approved yield will be recalculated when “Cmd5” is pressed.</p>
Yield	<p>This field is calculated by the software when “Cmd5” is pressed. This entry may be modified to follow procedure in this handbook.</p> <p>*--Example: The unit qualifies for the “added practice, type, intended use, or planting period” rule. The system-generated percent of T-yield types can be changed to “C”, and the yield can be changed to the applicable percentage of T-yield.--*</p>

H Explanation of Help Screen Terms

Definitions and examples of the terms used on Screen HLPCYD01 are in Part 5.--*

837 Approved Yield Screen Flow (Continued)

I Screen MHACYD01 Data Entry Exceptions

The “Eligible Disaster”, “Acres Planted” * * *, “Actual Production”, and “Record Type” fields are generally the only data items that need to be loaded. The yield type and yield are calculated based on the data entries. The exceptions are as follows.

Yield Type	Remarks
B	Can be loaded in any crop year that is determined to be a bypass year according to subparagraph 271 C.
C	Can be loaded in any crop year for units that qualify for the “added practice, type, *--intended use, or planting period” rule according to paragraph 287. The yield--* must also be loaded at 80, 90, or 100 percent of the T-yield.
I	Can be loaded in any crop year to obtain 100 percent of the T-yield for units that qualify for the “new producer” rule according to paragraph 282. The yield will be calculated by the system.
O	Can be loaded in any crop year when zero yield provisions in paragraph 258 are applicable. The yield will be changed to zero by the system.
P	Can be loaded in any crop year other than the most recent to signify an assigned *--yield of 75 percent of the prior approved yield for the crop year in which a report of production was not provided will be used according to paragraph 257. A yield type of “P” will be created by the system in the most recent year, if applicable. The yield must be entered. This yield type may be overridden, if--* applicable, by a substitute yield if the substitute yield flag is “Y” as determined by paragraph 259.
Q	Can be loaded in any crop year for units that qualify for a special COC-approved yield request as provided for in subparagraph 282 E. The yield must be determined according to subparagraph 282 E and loaded.
U	Can be loaded in any crop year that the unit used the substitute rule from *--paragraph 259 in the first year of participation after 2000. Screen MHACYD1B will pop up to provide a data entry for the T-yield that is to be used for the substitute yield. The current year T-yield is the default for Screen--* MHACYD1B, but must be changed to the applicable T-yield for that year. The yield will be calculated by the system.
X	Can only be loaded in crop year 1999 and prior years for units that qualify for the “livestock exception” as determined by paragraph 283.

837 Approved Yield Screen Flow (Continued)

J Screen MHACYD01 System-Generated Data

“Eligible Disaster”, “Acres Planted” * * *, “Actual Production”, and “Record Type” fields are generally the only data items that need to be loaded. The yield type and yield are calculated based on the data entries. The values determined by the software are as follows.

Yield Type	Remarks
A	Determined by the system when acres planted and actual production are entered. The yield will be calculated by dividing the acreage into the production.
--B	Determined by the system, if in a prior year there is an approved yield in the database, and there are no reported acres or production and the crop was not covered by NAP in the applicable year.--
E	Determined by the system when acres planted and actual production are blank and there is 1 actual yield in the database. The yield will be calculated at 80 percent of the T-yield.
N	Determined by the system when acres planted and actual production are blank and there are 2 actual yields in the database. The yield will be calculated at 90 percent of the T-yield.
*--O	<p>Determined by the system, if in a prior year there is an assigned yield in the database, and any of the following apply:</p> <ul style="list-style-type: none"> • a CCC-471 was filed but no acreage was reported • production is not reported • the acreage of the crop in the administrative county has increased more than 100 percent over any year in the preceding 7 crop years or increased significantly from the previous crop year.
P	Determined by the system, if in a prior year there is an approved yield in the database, and there are reported acres but no production or the production is not acceptable.--*
R	Determined by the system when acres planted and actual production are entered, the eligible disaster flag is “Y”, and the calculated yield is less than 65 percent of the T-yield. The yield will be calculated at 65 percent of the T-yield.
S	Determined by the system when acres planted and actual production are blank and there are no actual yields in the database. The yield will be calculated at 65 percent of the T-yield.
T	Determined by the system when acres planted and actual production are blank and there are 3 actual yields in the database. The yield will be calculated at 100 percent of the T-yield.
U	Determined by the system when acres planted are entered, actual production is left blank, the substitute yield flag is “Y”, and the assigned yield is less than 65 percent of the T-yield. The yield will be calculated at 65 percent of the T-yield.
Z	Determined by the system when a zero is entered for acres planted and actual production. The yield will be left blank.
<p>Note: The “Eligible Disaster” and “Record Type” fields are left blank.</p>

	Signature	Date									
Producer											
COC Representative											
Page ____ of ____											

838 Approved Yield Report Screen Flow (Continued)**D Producer and CCC Representative Signatures**

Starting with crop year 2008, "Page ___ of ___" will print at the bottom of the automated CCC-452. This will allow for 1 signature from the:

- producer
- COC representative.

County Office shall:

- print all CCC-452's filed on the current date
- have the producer review the information on each CCC-452
- staple the package together
- enter the individual page number and the total pages on each page of the package
- have the producer sign page 1 of the package
- sign as COC representative and date page 1 of the package.

***--Note:** If the producer refuses to sign, notate reason for refusal in the Remarks section. COC representative shall sign and date, even if producer refuses so sign.--*

E Redlegation of Authority

COC may redelegate, in writing, to CED and program technicians, the authority to complete and sign automated CCC-452's and CCC-452 Manuals.

***--839 Required Approved Yield Changes**

A Introduction

An approved yield is required to be updated if any of the following changes:

- unit of measure
- county expected yield
- lag year applicability
- maximum number of historic years in database.

Note: The approved yield will **not** be valid until it is updated if any of these changes have occurred.

B Unit of Measure Change

If the unit of measure has changed, whether during the year or between years, then several approved yield data elements must be changed. Screen MHACYD1D will:

- be displayed when the changed record is accessed
- allow for an entry of a conversion factor that will be applied to the production and yields on the database.

Note: A conversion factor will already be present if both the previous and current unit of measure are not generic, such as container or bushel.

C Unit of Measure Conversion Factor Screen MHACYD1D

The following is an example of Screen MHACYD1D.

```

--*

839 Required Approved Yield Changes (Continued)**C Unit of Measure Conversion Factor Screen MHACYD1D (Continued)**

*--Determine the conversion factor by dividing the pounds of the “From” unit of measure by the pounds of the “To” unit of measure.

When going from a large unit of measure to a smaller unit of measure, the conversion factor will be **greater** than 1.

Examples: For:

- cwt to 25 pound cartons, the conversion factor will be 4
- 50 pound cartons to 25 pound boxes, the conversion factor will be 2
- ton to cwt, the conversion factor will be 20.

When going from a small unit of measure to a larger unit of measure, the conversion factor will be **less** than 1.

Examples: For:

- 25 pound cartons to cwt, the conversion factor will be .25
- 25 pound boxes to 50 pound cartons, the conversion factor will be .5
- cwt to ton, the conversion factor will be .05.--*

D Other Changes

An approved yield must be accessed and updated if the county expected yield, lag year applicability, or maximum number of historic years in a database changes. The approved yield will then be calculated using the new county expected yield and/or approved yield rules.

840 Approved Yield Rollover**A Introduction**

The approved yield database will be rolled over to the following year approved yield.

--Records will not be rolled to or from a year the crop was not on CCC-471.--

B Rollover Process

The rollover process is on a record by record basis and is initiated by accessing the crop records. The rollover can only be done once per individual record. The following fields are rolled over:

- crop year
- eligible disaster indicator
- planted acres
- actual production
- record type
- yield type
- yield
- approved yield, which is rolled into the prior approved yield field.

If the prior APH database includes the maximum number of years, 5 or 10 as applicable, then the oldest year in the database that does not have an actual or assigned yield is dropped and the prior year is added. If all records are actual or assigned, then the oldest record is dropped.

The crop year, yield type, and yield are not rolled over if that year was based on a percentage of the transitional yield.

C Update Approved Yield

The current year approved yield database will use the rolled over record data. All applicable changes and additions must be entered and the record updated by pressing "Cmd5" before the approved yield is valid.

841-880 (Reserved)

Section 4 CCC-471

881 Accessing NAP CCC-471 Software

A Accessing Software

From Menu FAX250, access NAP software according to the following table.

Step	Menu	Action
1	FAX250	ENTER "3" or "4", "Application Processing", as applicable and PRESS "Enter".
2	FAX09002	Enter the appropriate county on the Office Selection Menu, if applicable, and PRESS "Enter".
3	FAX07001	ENTER "11", "PFC/Compliance", and PRESS "Enter".
4	M00000	ENTER "1", "NAP and Disaster", and PRESS "Enter".
5	MH0000	ENTER "2", "Non-Insured Assistance Program", and PRESS "Enter".
6	MHB0YR	*--Select the applicable crop year and PRESS "Enter". NAP Menu MHB000 will be displayed.

B Example of NAP Menu MHB000

The following is an example of NAP Menu MHB000.

```

COMMAND                                MENU: MHB000                                F6

882 Producer Selection Screen MHACAA01

A Overview

Access to the NAP software screens requires entry of 1 of the following:

- producer’s ID number and type
- last 4 digits of producer’s ID
- producer’s last name.

B Example of Screen MHACAA01

Following is a generic example of a Producer Selection Screen MHACAA01.

```

2001 NAP          107-D TULARE          SELECTION          MHACAA01
Producer Selection Screen          Version: AE19  04/17/2001 13:02  Term F6
-----
                                Producer Selection Screen

                                Producer ID          Type

                                OR

                                Last Four of ID

                                OR

                                Last Name

Cmd7-End                                Enter-Continue
    
```

C Producer Not Active on Name and Address File

Producers must be active on the County Office name and address file to apply for and receive NAP benefits. If the selected producer is not active, add the producer to the name and address file according to 1-CM.

D Producer Not Active on a CY Farm

Producers must be active on a current year farm in the County Office to apply for and receive NAP benefits. If the selected producer is not active, add the producer to a farm according to 3-CM.

***--E Producer Has Temporary ID Number**

Producers must have a permanent ID number to apply for and receive NAP benefits. If the selected producer has a temporary ID number, CCC-471 cannot be taken.--*

882 Producer Selection Screen MHACAA01 (Continued)

F Eligibility

Before CCC-471 is taken for the selected producer, the producer's eligibility *--determinations will be checked to ensure that the producer does not have adverse determinations. If a producer does not have adverse determinations, the application process will continue. If the producer has adverse determinations, a message will be displayed indicating the invalid determination. In these situations, the County Office shall update the determinations according to 3-PL. If the producer truly has adverse determinations, the application shall only be taken after the producer has been notified that fees are non refundable. If the producer still wishes to file an application for coverage, the application shall be taken and applicable fees collected. CCC-471 will be generated indicating that the producer has adverse determinations.

The following table provides the determinations that will be checked and the message that will be displayed on the screen if the determination is adverse.--*

C

Action

Screen MHACAA02 will be displayed with the following questions:

- "You have selected (producer ID number/type, producer name, and producer mailing address), Is This Correct?" Field is defaulted to blank. Enter "Y" if this is the correct producer or "N" if this is not the correct producer.
- "You have selected Crop Year (2003), Is This Correct?" Field is defaulted to blank. Enter "Y" if this is the correct year or "N" if this is not the correct year.

County Offices shall ensure that the correct producer and correct year have been selected before proceeding.

The following table provides an outline of the screens that will be displayed based on how the questions are answered on Screen MHACAA02.

IF...	THEN...
both questions are answered with a "Y"	Crop Selection Screen MHACAB01 or Coverage Screen MHACAC01 will be displayed, as applicable.
both questions are answered with an "N"	NAP Crop Year Selection Menu MHB0YR will be displayed and user will begin application process again.
the producer question is answered with a "Y", and year question is answered with an "N"	NAP Crop Year Selection Menu MHB0YR will be displayed and user will begin application process again.
the producer question is answered with an "N" and year question is answered with a "Y"	Producer Selection Screen MHACAA01 will be redisplayed and the user shall enter the correct ID number.

--*

883 Processing CCC-471's

A

Overview

An automated CCC-471 will be processed when option 1, "Application for Coverage", is selected on NAP Menu MHB000 according to paragraph 881. Producer Selection Screen MHACAA01 will be displayed according to paragraph 882. Once a valid producer has been selected, Crop Selection Screen MHACAB01 will be displayed.

B

**Taking
CCC-471's**

CCC-471 must be taken according to paragraph 23. All applications must be taken or loaded in the system on the date received from the producer. The system date is automatically entered into the file identifying the date the application was accepted from the producer.

***--883.5 Processing CCC-471's for Continuous Coverage Applications, 2005 and Future Years**

A**Overview**

The continuous coverage option, according to subparagraph 23 E, has been incorporated for crop year 2005. Producers will have the option to obtain continuous coverage **if service fees are paid by the earliest application closing date**, for all crops the producer had covered in the previous crop year.

Continuous coverage implies that the producer is covering the same crops as the previous year. By doing so, the producer does not have to sign a new CCC-471. If the producer does not want to continue coverage for all crops covered in the previous year, continuous coverage is not applicable and a new CCC-471 must be generated and the producer must sign the new application. Producers may add crops to a continuous coverage application but only after designating and confirming selection of all crops having prior year coverage. Any additional crops added will require a new CCC-471 to be generated and the producer must sign the new application. If the producer does not purchase coverage for all crops previously selected in the prior year, continuous coverage does not apply. See subparagraph 885.5 E for additional clarification.

B**Example of
Paying Service
Fees**

The following table provides an example of when service fees must be paid to take advantage of the continuous coverage option.

Crop	Type	Use	Pay Crop	Pay Type	Planting Period	Application Closing Date
Fin Fish	BLU	FH	3000	001		September 30, 2004
Grass	NAG	GZ	0102	002	01	December 15, 2004
Beans	GRN	FH	0047	001	01	February 1, 2005

In this example, for the producer to obtain continuous coverage on the 3 crops in this table, the applicable service fee (\$300 in this example) must be paid by September 30, 2004.

If the producer chooses to pay the service fee as each crop's application closing date approaches, this would be acceptable; however, continuous coverage will **not** apply. CCC-471 must be signed by the producer each time an application for coverage is taken.--*

884 Crop Selection Screen MHACAB01

A
Overview

Crop Selection Screen MHACAB01 will be displayed with all the crops on the NAP Interim Crop Table File. Since each crop, type, intended use, pay crop, pay type, and planting period must be selected separately, all crop entries are displayed on the screen. More than 1 crop can be selected at a time.

Note: For 2002 and future years, all crops within a pay grouping will be selected if 1 crop within the pay grouping is selected.

--For 2005 and future years, Screen MHACAB01 will be displayed with all the crops on the National Crop Table File, including each crop's application closing date. Applications for coverage must be loaded in the automated system by the-- crop's application closing date as established by STC. A grace period of 7 calendar days will be provided in the event an application had to be taken manually. County Offices shall ensure that all applications for coverage are taken during the applicable timeframe. Software will not allow applications to be entered after 7 calendar days past the application closing date.

Note: See paragraph 23 if a producer requests to file an application after the application closing date has passed.

B

884 Crop Selection Screen MHACAB01 (Continued)

C Action

Select the crops for which the producer is applying for coverage by placing an “X” in front of the applicable crop records. Multiple crop records can be selected at a time. PRESS “Enter” to continue. Coverage Screen MHACAC01 will be displayed.

Crop Selection Screen MHACAB01 will **not** be displayed:

- after entering the ID number of a producer that has CCC-471 already on file

Note: The Coverage Screen will be displayed showing the crops that were previously selected. Additional crops can be selected by pressing “Cmd16=Add”, which will display Crop Selection Screen MHACAB01.

- if the system recognizes the selected producer as having the option to update the application as continuous coverage. The Coverage Screen will be displayed showing the crops that were on the producer’s prior year application. See paragraph 885.5.

Since Crop Selection Screen MHACAB01 has the potential of having a significant number of crop records, an option has been added that allows for the entry of a letter. When a letter is entered, Crop Selection Screen MHACAB01 will advance to the first crop that begins with the letter. If there are no crops that begin with the selected letter, the screen will advance to the crop with the next letter in the alphabet.

* * *

885 Coverage Screen MHACAC01

A Overview

Coverage Screen MHACAC01 will be displayed with the crop names, *--application closing date, crop types, uses, planting periods, pay crops, and--* pay types that were selected on Crop Selection Screen MHACAB01.

Notes: If 1 crop within a pay grouping is selected, all crops within that pay grouping will be displayed on Coverage Screen MHACAC01. For 2003 and future years, an "S" indicator will be displayed in front of the crop records that were actually selected on Crop Selection Screen MHACAB01. The producer's fee covers all crops within the pay grouping.

Coverage Screen MHACAC01 will be displayed after entering the ID number of a producer that has previously filed CCC-471. Additional crops can be selected by pressing "Cmd16=Add", which will display Crop Selection Screen MHACAB01.

B Example of Screen MHACAC01

The following is an example of Screen MHACAC01.

*--

885 Coverage Screen MHACAC01 (Continued)

C

Action

County Offices shall review the crops listed on Coverage Screen MHACAC01, *--paying close attention to the application closing date, types, intended uses,--* planting periods, pay crops, and pay types that were selected. Producers will not be eligible for NAP benefits on any crops not selected for coverage.

The following table provides the commands and functions that are available on Coverage Screen MHACAC01.

Action	Result
Enter=Continue	Determination Screen MHACAC1A will be displayed. See paragraph 886.
Cmd4= Previous Screen	Either of the following screens will be displayed: <ul style="list-style-type: none"> • Crop Selection Screen MHACAB01 • Producer Selection Screen MHACAA01.
Cmd7=End	NAP Menu MHB000 will be displayed.
Cmd16=Add	Crop Selection Screen MHACAB01 will be displayed. This option will allow counties to add additional crops to a producer’s CCC-471.
Cmd24=Delete	<p>*--Selected pay group will be deleted from CCC-471. To delete a pay group, place the cursor in front of a crop record in the pay group to be deleted, and PRESS “Cmd24”. User must confirm the delete by pressing “Cmd24” a second time. Crops shall only be deleted if selected in--* error. Fees are not refundable.</p> <p>Note: Deleting crops will not remove fees from CCC-257. Applications entered in error, such as wrong ID or wrong year, shall be canceled according to paragraph 890.</p> <p style="text-align: center;">* * *</p> <p>Example 1: Producer A files CCC-471 on cucumbers and lettuce and pays the applicable \$200 service fee. One month later the producer decides that he wants to plant cabbage instead of lettuce. County Office shall not delete the lettuce crop. County Office shall add cabbage to the producer’s application and collect the applicable service fee of \$100.</p> <p>Example 2: Producer A is in the County Office filing CCC-471 for several crops. The County Office completes the application and collected the applicable service fee. CCC-471 is generated and when the producer reviews the application for signature, the producer discovers that an incorrect planting number for a crop has been selected. In this situation, the County Office shall delete the incorrect record and add the correct crop record. No additional fee would be collected.</p>
Roll=Page	If more than 10 “crops” have been selected, the additional crops will be displayed.

***--885.5 Coverage Screen MHACAC01 As Applicable to Continuous Coverage Applications**

A**Overview**

In 2005 and subsequent years, the prior year application for coverage file is rolled over to the current year to create the continuous coverage applications. All producers that had an active CCC-471 on file for the prior year are automatically rolled to the next year. This will assist County Offices when taking applications for coverage since the previous year's data is pulled forward.

Note: The file will only be rolled over 1 time. Any applications loaded in a prior year after rollover occurs (typically the first week in May each year) will not be brought forward to the new file. See subparagraph D for additional information.

To obtain continuous coverage, the producer must be covering the exact same crops that were covered in the previous year. If the producer does not want to continue coverage for all crops covered in the previous year, continuous coverage is not applicable and a new CCC-471 must be generated and the producer must sign the new application.

Producers may add crops to a continuous coverage application but only after designating and confirming selection of all crops having prior year coverage. Any additional crops added will require a new CCC-471 to be generated and the producer must sign the new application. If the producer does not purchase coverage for all crops previously selected in the prior year, continuous coverage does not apply. See subparagraph E for additional clarification.

If the producer is eligible for continuous coverage, Coverage Screen MHACAC01 will be displayed once the questions have been answered on Verification Screen MHACAA02. A "C" will be displayed beside each crop listed. This is the only indicator for continuous coverage. Once the application for coverage is updated, the "C" status is removed and the "S" status is listed beside the crops/crop types, that the producer actually selected in the prior year.--*

Continued on the next page

***--885.5 Coverage Screen MHACAC01 As Applicable to Continuous Coverage Applications**

C

Action

County Offices shall review the crops listed on Coverage Screen MHACAC01 for accuracy. County Offices shall keep in mind that, to obtain continuous coverage, the producer must be covering the exact same crops that were covered in the previous year. If the producer does not want to continue coverage for all crops covered in the previous year, continuous coverage is not applicable and a new CCC-471 must be generated and the producer must sign the new application.

Producers may add crops to a continuous coverage application but only after designating and confirming selection of all crops having prior year coverage. Any additional crops added will require a new CCC-471 to be generated and the producer must sign the new application. If the producer does not purchase coverage for all crops previously selected in the prior year, continuous coverage does not apply. See subparagraph E for additional clarification.

The following table provides the commands and functions that are available on Coverage Screen MHACAC01 for continuous coverage applications.

Action	Result
Enter=Continue	Determination Screen MHACAC1A will be displayed. See paragraph 886. Note: The record is updated as a continuous coverage application. When the application process has been completed, CCC-471 will be generated. Continuous Coverage will be printed in the producer's signature block. The producer does not have to sign CCC-471.
Cmd4=Previous Screen	Producer Selection Screen will be displayed.
Cmd7=End	NAP Menu MHB0000 will be displayed.
Cmd24=Delete ALL	All crops listed on Coverage Screen will be deleted and continuous coverage is not applicable. User is prompted to confirm the delete by pressing "Cmd24" a second time. Enter=Continue is pressed to continue to Crop Selection Screen MHACAB01. See paragraph 884 for Crop Selection Screen. County Offices shall use this option if the producer's application is not a continuous coverage application. See subparagraph E for scenarios.
Roll=Page	If more than 10 crops have been selected, the additional crops will be displayed.

Note: Cmd16=Add is not displayed on the Coverage Screen for continuous coverage applications. Crops cannot be added to the continuous coverage application. See subparagraph E.--*

Continued on the next page

***--885.5 Coverage Screen MHACAC01 As Applicable to Continuous Coverage Applications**

D**Application
Loaded After
Rollover**

Software for the continuous coverage reminder notification letters will recognize new applications as they are loaded. Continuous coverage letters will be generated and shall be mailed to producers. If an application for coverage is loaded in the prior year, after the application for coverage file roll over occurs (usually the first week of May), the crop records will not be rolled to the new year file. Because of the fact that the continuous coverage reminder notification letters are generated and mailed, producers may wish to elect continuous coverage for the current year. However, the current year records will not reflect the continuous coverage option.

Note: This is because the prior year crop records were not on the system when roll over occurred.

County Offices will have to control these situations manually. It will be the County Office's responsibility to ensure the correct records are selected on the Crop Selection Screen. The continuous coverage application must be identical to the prior year's CCC-471. County Offices shall:

- manually notate in the producer's signature block "CONTINUOUS COVERAGE"
- write in the date of the application.

County Offices shall **not** use the procedure in this paragraph for any other situations that arise.--*

Continued on the next page

***--885.5 Coverage Screen MHACAC01 As Applicable to Continuous Coverage Applications**

E

Continuous Coverage Application Scenarios

The following table provides scenarios that may arise when loading continuous coverage applications. This table is not all inclusive.

IF the producer...	THEN...
elects to maintain the exact same coverage, and service fees are paid by the earliest application closing date for all crops the producer had covered in the previous year	the application shall be completed according to subparagraph C. The producer does not have to sign CCC-471.
elects to add additional crops, crop types, intended uses, or planting periods, and service fees are paid by the earliest application closing date for all crops the producer had covered in the previous year	<p>the County Office shall provide the producer the following 2 options:</p> <ul style="list-style-type: none"> • update the continuous coverage application and add an additional CCC-471 with the additional crop records <p>Note: The producer must sign CCC-471 with the additional crop records. The producer must pay the applicable service fee for continuous coverage applications by the earliest application closing date for all crops covered in the previous year. If the producer adds additional crops, the service fee for the added crops must be paid by the crops specific application closing date.</p> <ul style="list-style-type: none"> • delete the continuous coverage application and load one CCC-471 with all crops the producer wishes to have covered. Producer must sign CCC-471.
does not want to continue coverage on all the crops/types/intended uses/planting period for the current year	continuous coverage does not apply. The continuous coverage crops shall be deleted and CCC-471 shall be generated for the crops on which the producer is paying the service fee. The producer must sign CCC-471.
does not want to pay the service fee applicable to all the crops on the continuous coverage application, but does plan to continue the same coverage for this crop year, that is, pay the service fees closer to each crops application closing date	continuous coverage does not apply. The continuous coverage crops shall be deleted and CCC-471 shall be generated for the crops on which the producer is paying the service fee. The producer must sign CCC-471.

--*

886 Determination Screen MHACAC1A

A
Overview

Determination Screen MHACAC1A is a pop up screen that will be displayed when “Enter” is pressed on Coverage Screen MHACAC01. This screen is used to enter the limited resource determination for the producer and to obtain fee amounts collected in other counties.

B
Example of
Screen
MHACAC1A

Following is an example of Determination Screen MHACAC1A.

```

2001 NAP          107-D TULARE          Entry      MHACAC01
Coverage                                     Version: AE19  04/21/2001 13:12 Term F5
-----
Producer  CASE VANDER EYK                ID Number xxxxxxxxx S

  Determination Screen                      MHACAC1A

  Is this a Limited Resource Producer?      N  (Y or N)
  Enter Fee Amount Paid in Other Counties.

  Enter=Continue  Cmd4=Previous Screen

Enter=Continue Cmd4=Prev Screen Cmd7=End Cmd16=Add Cmd24=Delete Roll=Page
    
```

C
Action

This screen will be used to determine whether a producer is considered to be a Limited Resource Producer. Software is defaulted to “N”. County Offices shall change the “N” flag to a “Y” flag if the producer meets the definition of a limited resource producer according to subparagraph 24 D.

This screen will also be used to enter fee amounts paid in another county. Entries must be made in hundred dollar increments, from \$100 to \$900. If no fees have been paid in other counties, this field shall be left blank.

Note: The producer must provide the County Office with a copy of the other counties CCC-471 signed and dated by the CCC representative before any fee amounts paid to other counties are entered into this field.

--When Enter=Continue is pressed, Fees Screen MHACACIB will be displayed.--

887 Fees Screen MHACAC1B

A
Overview

Fees Screen MHACAC1B is a pop up screen that provides a summary of a producers:

- total fee
- total fee previously paid in the county
- fees paid in other counties
- fee amount owed.

B
Example of
Screen
MHACAC1B

Following is an example of Fees Screen MHACAC1B.

```

2001 NAP          107-D TULARE          Entry      MHACAC01

887 Fees Screen MHACAC1B (Continued)

C

Action

The following table provides an explanation of the fields on Fees Screen MHACAC1B.

Fields	Description
Total Fee	Fee amount as calculated for the producer from the crops selected in the home county. This field is a display only field.
Total Fee Previously Paid in this County	Fee amount previously paid in the county. This will occur when a producer files multiple applications for coverage throughout the year. This is a display only field.
Fees Paid in Other Counties	This will display the amount of fees paid in other counties as entered on Determination Screen MHACAC1A. This is a display only field.
Fee Amount Owed	This is the fee amount due from the producer after the subtraction of fees previously paid and fees paid in other counties. County Offices shall inform the producer of the fee amount owed before proceeding to ensure the producer has the money to pay the fees.

County Offices **shall** collect the fee amount owed at the time the producer files CCC-471. Selected crop records can be established as pending records if the producer does not have the money to pay the fee at the time of application. Fees Screen MHACAC1B provides County Offices the opportunity to either establish the records as pending or to proceed to Collection Screen MHACAC1C by answering the question, **“FEE’S MUST BE PAID AT THE TIME THE APPLICATION IS SUBMITTED. HAVE YOU COLLECTED THE FEE AMOUNT OWED FROM THE PRODUCER? (Y OR N)”**

Note: This statement will not appear on the screen if a producer has already met the service fee requirements.

Continued on the next page

887 Fees Screen MHACAC1B (Continued)

C
Action
(Continued)

IF...	THEN...
"Y" is entered	Collection Screen MHACAC1C will be displayed. "Y" shall only be entered if the County Office has collected the fee amount owed from the producer.
"N" is entered	the crop records will be established as pending. At such time the producer returns to the County Office to pay the fee amount owed, Coverage Screen MHACAC01 will be displayed, with "P" status on the crop records, after the producer is selected on Producer Selection Screen MHACAA01. Records can now be updated and fees collected according to current procedure.
fee requirements have been previously met	fee amount owed will be \$000. When "Enter" is pressed, the message, "Records have been updated, press enter to continue", will be displayed. When "Enter" is pressed, Printer Selection Screen MHACART1 is displayed. CCC-471 will be generated.

888 Collection Screen MHACAC1C

A Overview

Collection Screen MHACAC1C is a pop up screen that will be displayed if a "Y" is entered on Fees Screen MHACAC1B to answer the collection of fees question. This screen will be used to enter the fee amount collected from the producer. In addition, if a manual application was taken (this shall be very minimal), the fee collection date can be entered.

B Example of Screen MHACAC1C

Following is an example of Collection Screen MHACAC1C.

```

2001 NAP           107-D TULARE           Entry           MHACAC01
Coverage                               Version: AE19  04/22/2001 10:19 Term F5
-----
Producer  CASE VANDER EYK                ID Number xxxxxxxxx S

Collection Screen                               MHACAC1C

Fee Amount Owed:                               $ 300
Enter Fee Amount Collected From Producer:     $ 300
Is This a Manual Fee Collection? (Y or N)
If yes, enter date of collection:              (MM/DD/YYYY

Pressing Cmd5 on this screen will update the fee amount
to accounting. Cmd5 shall not be pressed if the fee
amount owed has not been collected from the producer.

Cmd4=Previous Screen  Cmd5=Update

Enter=Continue Cmd4=Prev Screen Cmd7=End Cmd16=Add Cmd24=Delete Roll=Page

```

Continued on the next page

888 Collection Screen MHACAC1C (Continued)

C

Action

The following table provides an explanation of the fields on Collection Screen MHACAC1C.

Fields/Commands	Description
Fee Amount Owed	<p>This field provides the fee amount owed from the producer. This is a display only field.</p> <p>Note: Producer must pay the entire fee amount owed to complete their application.</p>
Enter Fee Amount Collected	<p>County Office shall enter dollar amount received from producer.</p> <p>Note: County Office must collect entire amount fee amount owed from producer to complete CCC-471.</p>
Is this a Manual Fee Collection? (Y or N)	<p>This field will be used in the limited situation in which a manual application *--was taken and the fee was deposited on a manual CCC-257. Field is defaulted to an "N". The flag shall be set to "Y" if the application and fee were taken manually on a previous day and the fee was deposited on a manual CCC-257. Applications taken manually on the current day can be loaded in the system, and the flag shall remain defaulted to "N". If this flag is set to "Y", CCC-471 must be printed through NAP Reports Menu MHACR0 option 4, "Producer CCC-471(s)". CCC-471 will not automatically be generated.</p>
If yes, enter date of collection (MM/DD/YYYY)	<p>If CCC-471 and fee were taken manually and the fee was deposited on a manual CCC-257, the date of the manual application shall be entered. A--* date shall not be entered if the Manual Fee Collection flag is set to "N".</p>
Cmd4=Previous Screen	<p>Fees Screen MHACAC1B will be displayed.</p>
Cmd5=Update	<p>Record will be updated and fee data will be transferred to accounting. Accounting Schedule of Deposit Selection Screen AGK00500 will be displayed. See 3-FI.</p> <p>Once records have been updated through accounting, Printer Selection Screen MHACART1 will be displayed. CCC-471 will be generated.</p> <p>Note: The record shall not be updated if the applicable fee has not been collected from the producer.</p>

889 CCC-471 Print Process

A**Application Print Process**

A system generated CCC-471 will be printed each time CCC-471 is entered into the system. All crop data entered on a single day will be printed on the same CCC-471. A different CCC-471 will be printed for crop data entered on different days.

If 1 crop within a pay grouping is selected, all crops within that pay grouping will be printed on CCC-471. The producer's fee covers all crops within the pay grouping. For 2003 and future years, an "S" indicator will print in front of the crop records that were actually selected on Crop Selection Screen MHACAB01. All crops printed on CCC-471 are covered with the fees that were collected.

CCC-471 will not be printed during the application process if:

- crop records are updated as pending (CCC-471 must be printed through NAP Reports Menu MHACR0, option 5, "Producer CCC-471(s) pending".)
- "Y" is entered on Collection Screen MHACAC1C to answer the question, "Is this a manual fee collection?" CCC-471 must be printed through NAP Reports Menu MHACR0, option 4, "Producer CCC-471(s)".

--Continuous coverage applications will print with "Continuos Coverage" and the application date on CCC-471, item 12. Producers do not have to sign CCC-471 if the continuous coverage requirements are met.--

B**Menu Option Print Process**

CCC-471's can be reprinted through NAP Reports Menu MHACR0 by taking option 4, "Producer CCC-471(s)". All CCC-471's entered for the selected producer will print. The CCC-471 date (date original application was filed) will print in the upper right corner.

890 Canceling an Application for Coverage**A Overview**

NAP fees are not refundable; therefore, applications cannot be canceled by the County Office once fees have been accepted from the producer and entered into the automated system. In instances where County Offices have taken applications in error or where the producer failed to clear up a dishonored check, a cancellation of the application may be permitted. All requests for cancellation must be submitted to the National Office with written justification explaining why the cancellation needs to occur. After reviewing the documentation submitted, the National Office will contact the State Office and assist the County Office with the cancellation, if the case was approved.

Note: Cases are handled in the order they are received and may take several days to be resolved. If the application taken in error results in CCC-257 being out-of-balance, the County Office shall notate, "CCC-257 is out-of-balance", on the FAX cover sheet.

B Printing Diagnostic Reports

Diagnostic reports must be submitted to the National Office to cancel NAP applications. County Office's shall print the reports from NAP Menu MHB000, for the applicable crop year, according to the following:

* * *

- on command line, ENTER "MHACAY" and PRESS "Enter"
- enter the ID number and type of the producer to be canceled and PRESS "Enter".

The applicable year "NAP Application Diagnostic Print" and "NAP Fee File Diagnostic Print" will be generated.

890 Canceling an Application for Coverage (Continued)

C County Office Action

County Offices shall:

- use the provisions in this handbook to reduce the number of errors being made
- provide detailed written justification for the cancellation
- generate the diagnostic reports according to subparagraph B
- provide a copy of CCC-471 signed by the producer
- *--prove a copy of CCC-257--*
- identify the State Office contact who will be assisting with the cancellation
- *--**FAX the detailed justification, diagnostic reports, and signed CCC-471**, to the State Office NAP specialist.--*

Note: It is the County Office's responsibility to provide the documentation needed for a complete review. Action will not be taken on any case until **all** of the documentation listed in this subparagraph is received. If proper documentation is not received, the State Office will be notified by e-mail that inadequate documentation was provided and no action will be taken by the National Office.

D State Office Action

State Offices shall:

- work with County Offices to ensure that they understand the NAP Application for Coverage process to eliminate unnecessary errors that require additional effort by all parties to cancel an application that was taken incorrectly
- **not** contact the National Office about NAP cancellation problems.

Note: Once the applicable information has been submitted according to subparagraph C, the National Office will contact the State Office specialist and the NAP application will be canceled at that time.

- *--forward the documentation to PECD, DAB using either of the following methods:
 - FAX to 202-720-4941, ATTN: CDPS
 - mail to:

USDA, FSA, PECD, DAB, ATTN: CDPS
 STOP 0517
 1400 INDEPENDENCE AVE SW
 WASHINGTON DC 20250-0517.--*

891 Continuous Coverage Reminder Notification Letters

A Overview

--Subparagraph 23 E provides that County Offices are to notify producers of prior year NAP coverage and the ability to purchase coverage for the subsequent year no less than 60 calendar days before the first application closing date. For 2005 and subsequent years, an automated process generates continuous coverage reminder notification letters to-- producers who obtained NAP coverage for the previous crop year. A letter and crop list attachment will be generated notifying producers of the crops/types/intended uses/planting periods that were previously covered and the service fee that will be required to continue the same coverage for the current crop year.

The crop list attachment will print the crop/type/intended use/planting period of the crop records that were actually selected on Crop Selection Screen MHACAB01. All crops in the pay group will continue to be covered if the applicable fees are paid timely. But only those crops that were actually selected in the prior year will be printed on the producer's crop list.

The letters are generated based on prior year information in the NCT and the application for coverage file. For example, for the 2005 letters, the 2004 NCT and 2004 application for coverage file are being read to determine the data that is printed in the letters and on the crop list attachment. If the data on the prior year files is incorrect, the data on the continuous coverage reminder notification letters and crop list attachment will also be incorrect.

B Printing Letters

The continuous coverage reminder notification letters shall be printed from the applicable year NAP Reports Menu MHACR0. County Offices shall:

- select option 11, "A200X Continuous Coverage Reminder Letter", from Menu MHACR0
- enter:
 - "all" to print letters for all producers
 - specific producer ID number
 - *--"ALLR" to reprint letters for all producers--*
- enter the printer selection.

Note: The letters will print best if sent to the AS/400 IBM laser printer.

--891 Continuous Coverage Reminder Notification Letters (Continued)*B Printing Letters (Continued)**

As letters are generated, the prior year application for coverage file records are updated with the date the letters were generated. If an application for coverage is modified after the letters are printed, the date will be removed from the file. The "All" option will print letters for all producers who do not have a date in the application for coverage file indicating that a letter has been generated. Reprints of letters can be done at any time for specific producers by selecting the producer from Producer Selection Screen MHACAJ01.

C Data Elements on Attachment

The attachment that will print with the continuous coverage reminder notification letter will contain the following information:

- pay crop
- pay type
- planting period
- application closing date (earliest date for the pay group)
- crop name
- crop type
- crop intended use.

D Mailing Letters

The letters have been formatted to be mailed in standard window envelopes. If folded on the marks provided, the producer's address will show through the window.--*

Section 5 CCC-576, Notice of Loss/Application for Payment
Noninsured Crop Disaster Assistance Program

901 Accessing CCC-576 Software

A

Background

CCC-576 is treated as 2 separate processes in the software. The Notice of Loss process will complete CCC-576, page 1. The Application for Payment process will complete CCC-576, page 2. The Notice of Loss process will be covered in this section.

Only 1 producer from the unit needs to complete CCC-576, Notice of Loss, process. All other producers on the unit who have a valid CCC-471 on file will automatically be added to the CCC-576, Notice of Loss, file.

B

Accessing Software

Access the CCC-576, Notice of Loss, software according to paragraph 881. *--Option 4, "Notice of Loss and Application for Payment", shall be selected on NAP Menu MHB000. NAP Notice of Loss and Application for Payment Menu MHACL0 will be displayed.

C

Example of Menu MHACL0

The following is an example of the NAP Notice of Loss and Application for Payment Menu MHACL0.

```
COMMAND                      MENU: MHACL0                      F6
2001 NAP Notice of Loss and Application for Payment Menu

Options on Menu MHACL0

*--The following table lists the options that are available on NAP Notice of Loss and Application for Payment Menu MHACL0.

Action	Result	Use of Option
ENTER "1", "Notice of Loss", and PRESS "Enter".	Producer Selection Screen MHACL101 will be displayed.	To take the producer's CCC-576, Notice of Loss.
ENTER "2", "Application for Payment", and PRESS "Enter".	Producer Selection Screen MHACWA01 will be displayed.	To take the producer's CCC-576, Application for Payment.
ENTER "3", "Approve/Disapprove Notice of Loss", and PRESS "Enter".	Producer Selection Screen MHACL101 will be displayed.	To enter the approval/disapproval date for CCC-576, Notice of Loss, process.
ENTER "4", "Approve/Disapprove Application for Payment", and PRESS "Enter".	Producer Selection Screen MHACWA01 will be displayed.	To enter approval/disapproval date for CCC-576, Application for Payment, process.--*

***--902 Producer Selection Screen MHACL101**

**A
Overview**

Access to the CCC-576, Notice of Loss, software requires entry of 1 of the following:

- producer's ID number and type
- last 4 digits of producer's ID
- producer's last name.

The selected producer must have an active CCC-471 on file to file CCC-576, Notice of Loss. If the producer does not have an active CCC-471 on file, the message, "Producer did not apply for NAP coverage", will be displayed on Producer Selection Screen MHACL101.

**B
Example of
Screen
MHACL101**

Following is an example of Producer Selection Screen MHACL101.

```

2001 NAP           107-A TULARE           Selection      MHACL101
Producer Selection Screen           Version: AE24  08/21/2001 11:44 Term F6
-----
Enter Producer ID Number:           and Type:

           or

           Last Four Digits of ID:

           or

           Last Name:
           (Enter Partial Name To Do An Inquiry)

Enter=Continue  Cmd7=End
    
```

--*

903 (Reserved)

***--904 Processing CCC-576**

A

Overview

An automated CCC-576 will be processed when option 1, "Notice of Loss", is selected on NAP Loss Menu MHACL0 according to paragraph 901. Producer Selection Screen MHACL101 will be displayed according to paragraph 902. Once a valid producer has been selected, NAP Unit Selection Screen MHACL201 will be displayed.

Only those producers who have a valid CCC-471 on file will be eligible to file CCC-576, Notice of Loss.

Only 1 producer associated with the unit is required to file CCC-576, Notice of Loss. All other producers associated with the unit, who have a valid CCC-471 on file for the selected crop, will automatically be added to the CCC-576, Notice of Loss, file.

B

Taking CCC-576

CCC-576 must be taken according to Part 7. The majority of the information on CCC-576, Notice of Loss, will need to be completed manually by the producer. Only key disaster data is captured in the system for CCC-576, Notice of Loss, to be processed.--*

***--905 NAP Unit Selection Screen MHACL201**

**A
Overview**

If the selected producer has multiple units, NAP Unit Selection Screen MHACL201 will be displayed. NAP Unit Selection Screen MHACL201 shows the units associated with the selected producer. If other producers share in the unit, up to 3 other producer names will be displayed in the "Other Producer" field to help identify the unit. If there are more than 3 producers associated with the unit, 3 producer names will be displayed with the message "more producers". If the selected producer's share on the unit is 1.0000, no other producer names will be displayed.

NAP Unit Selection Screen MHACL201 will be suppressed if the selected producer is only associated with 1 unit.

**B
Example of
Screen
MHACL201**

Following is an example of NAP Unit Selection Screen MHACL201.

```

          .    309    FRANK P. BARCELLOS

Enter=Continue  Cmd4=Previous Screen  Cmd7=End  Roll=Page
    
```

**C
Action**

Select the unit by placing "X" in front of the applicable record. Only 1 unit can be selected at a time. PRESS "Enter" to continue. NAP Crop Selection Screen MHACL301 will be displayed.--*

906 NAP Crop Selection Screen MHACL301

A Overview

NAP Crop Selection Screen MHACL301 will be displayed with the crop name, pay crop, pay type, and planting period of all active crop groupings the selected producer has on the *-CCC-471 file. The crop selection is made by selecting the crop grouping. See Exhibit 7.X for crop groups. The Exhibit 7 numbers are year specific. See the applicable Exhibit 7.X for the specific year for eligible crops.--*

NAP Crop Selection Screen MHACL301 will be suppressed if the selected producer has only 1 crop grouping on the CCC-471 file.

B Example of Screen MHACL301

Following is an example of NAP Crop Selection Screen MHACL301.

```

2001 NAP           107-A TULARE           Selection           MHACL301

.  MIXED FORAGE                              0102 001   01

Enter=Continue  Cmd4=Previous Screen  Cmd7=End  Roll=Page
    
```

C Action

Select the crop grouping by placing “X” in front of the applicable record. Only 1 crop grouping can be selected at a time. PRESS “Enter” to continue. Type Selection Screen MHACL401 will be displayed.

Note: For crops, such as mixed forage and grass that are in the same pay grouping, CCC-576 must be completed for both crops. The system recognizes the fact that both crops are in the same pay grouping; however, since both crops have different types, CCC-576 is taken by crop and type instead of crop grouping.

***--907 Type Selection Screen MHACL401**

A Overview

If there are multiple crop types associated with the crop grouping selected on NAP Crop Selection Screen MHACL301, Type Selection Screen MHACL401 will be displayed. If applicable, a separate CCC-576, Notice of Loss, must be filed for each crop type.

Type Selection Screen MHACL401 will be suppressed if there are not multiple crop types associated with the selected crop grouping.

B Example of Screen MHACL401

Following is an example of Type Selection Screen MHACL401.

```

2001 NAP                107-A TULARE                Selection                MHACL401

C Field Descriptions

The following table describes the fields on Disaster Event Screen MHACL601. The header information on Disaster Event Screen MHACL601 will display the data that was selected on the previous screens.

Field	Description/Action
What Disaster Event caused the loss	<p>This is a required entry. Up to 5 disaster events can be entered if all dates are identical. Causes of Loss Help Screen MHACLH01 will provide a list of applicable disaster event codes. The disaster event title will be displayed when the record is updated.</p> <p>Note: According to policy, insects and plant disease are not eligible causes of loss unless damaging weather or an adverse natural occurrence accelerated or exacerbated the insect infestation or plant disease. CCC-576 will be accepted for insects and plant disease; however, the producer will not be eligible for payment unless a damaging weather or an adverse natural occurrence is also identified as a cause of loss.</p>
Disaster Event Beginning Date	<p>Enter the date the disaster event began. This is a required entry.</p> <p>Example: Drought began on June 12 and continued through August 17. The disaster event beginning date would be June 12.</p>
Disaster Event Ending Date	<p>Enter the date the disaster event ended. In many cases, this will be the same date as the disaster event beginning date or, in cases of drought, the disaster event may not have ended yet. This is not a required entry.</p>
Date Disaster was Apparent	<p>Enter the date the disaster became apparent. CCC-576 must be filed *--for low yield within 15 calendar days after the disaster occurrence or date damage to the crop became apparent. For prevented planting, CCC-576 must be filed within 15 calendar days after the final planting date.</p> <p>This is a required entry.--*</p>
Cmd4=Previous	<p>Previous screen will be displayed.</p>
Cmd5=Update	<p>CCC-576 will be updated. Disaster event titles will be displayed on screen with the message, "Files have been updated".</p>
Cmd7=End	<p>NAP Loss Menu MHACL0 will be redisplayed.</p>
Cmd12=Print	<p>CCC-576 will be printed.</p>
Cmd24=Delete	<p>CCC-576 will be deleted.</p>
Help=Help	<p>Causes of Loss Help Screen MHACLH01 with disaster event codes will be displayed.</p>

*--908 Disaster Events Screen MHACL601 (Continued)

***--909 Loss Claims Selection Screen MHACL501**

**A
Overview**

Loss Claims Selection Screen MHACL501 will be displayed if CCC-576, Notice of Loss, has already been filed on the unit, crop, and crop type selected. This provides for the opportunity to do either of the following:

- modify an existing CCC-576, Notice of Loss
- add an additional CCC-576, Notice of Loss, for the same crop or crop type.

Notes: Loss Claims Selection Screen MHACL501 will be displayed in those cases where a producer having a share in the unit attempts to file CCC-576, Notice of Loss, on a crop or crop type that has already had CCC-576, Notice of Loss, filed by another producer on the unit.

If multiple disaster events correspond to identical disaster dates, all events shall be entered on the same Disaster Event Screen MHACL601.

A separate Disaster Event Screen MHACL601 shall be completed for each disaster event that occurred on either of the following:

- different dates
- the same beginning date, but had a different apparent date.

**B
Example of
Screen
MHACL501**

Following is an example of Loss Claims Selection Screen MHACL501.

```

910-914 (Reserved)

***--915 Updating Approval/Disapproval Dates**

**A
Overview**

CCC-576, Notice of Loss, will be approved or disapproved based on unit, crop, crop type, pay crop, pay type, planting period, disaster codes, beginning disaster date, and apparent date. This will provide COC's with the ability to approve or disapprove CCC-576, Notice of Loss, based on the crop grouping and crop type basis.

Note: In those cases where multiple disaster events are recorded for the same dates, only the first disaster event code loaded on Disaster Event Screen MHACL601 for the unit, crop, crop type, pay crop, pay type, planting period, disaster beginning date, and apparent date will be displayed on Notice of Loss Approval/Disapproval Screen MHACL701 because of space requirements.

To update approval or disapproval dates, select option 3, "Approval/Disapproval Notice of Loss", on NAP Loss Menu MHACL0 according to paragraph 901. Select the producer according to paragraph 902. Notice of Loss Approval/Disapproval Screen MHACL701 will be displayed.

**B

***--Section 6 Application for Payment**

1001 Accessing Application for Payment Software

A

Background

CCC-576 is treated as 2 separate processes in the software. The Notice of Loss process will complete CCC-576, page 1. The Application for Payment:

- process will complete CCC-576, page 2
- will be covered in this section.

All producer's on the unit must file CCC-576, Application for Payment, to receive NAP benefits.

B

Accessing Software

Access the CCC-576, Application for Payment, software according to paragraph 881. Option 4, "Notice of Loss and Application for Payment", shall be selected on NAP Menu MHB000. NAP Notice of Loss and Application for Payment Menu MHACL0 will be displayed.

C

Example of Menu MHACL0

The following is an example of NAP Notice of Loss and Application for Payment Menu MHACL0.

```

*--1002 **Producer Selection Screen MHACWA01**

A
Overview

Access to the CCC-576, Application for Payment, software requires entry of 1 of the following:

- producer's ID number and type
- last 4 digits of producer's ID
- producer's last name.

The selected producer must have an approved, eligible CCC-576, Notice of Loss, on file to file CCC-576, Application for Payment. If the producer does not have an approved, eligible CCC-576, Notice of Loss, on file, the message, "Producer did not file notice of loss", will be displayed on Producer Selection Screen MHACWA01.

B
Example of
Screen
MHACWA01

The following is an example of Screen MHACWA01.

```

2001 NAP                107-TULARE - LISA'S          Selection    MHACWA01

***--1003 Processing CCC-576, Application for Payment**

A

Overview

An automated CCC-576, Application for Payment, will be processed when option 2, "Application for Payment", is selected on NAP Notice of Loss and Application for Payment Menu MHACL0 according to paragraph 901. Producer Selection Screen MHACWA01 will be displayed according to paragraph 1002. Once a valid producer has been selected, Unit Selection Screen MHACWB01 will be displayed.

Note: An application for payment can only be filed on crops that have an approved, eligible CCC-576, Notice of Loss, on file.

B

Taking CCC-576

CCC-576, Application for Payment, must be taken according to Part 7.--*

***--1004 Unit Selection Screen MHACWB01**

**A
Overview**

If the selected producer has multiple units, Unit Selection Screen MHACWB01 will be displayed. Unit Selection Screen MHACWB01 shows the units associated with the selected producer. If other producers share in the unit, up to 3 other producer names will be displayed in the "Other Producer" field to help identify the unit. If there are more than 3 producers associated with the unit, 3 producer names will be displayed with the message, "more producers". If the selected producer's share on the unit is 1.0000, no other producer names will be displayed.

Unit Selection Screen MHACWB01 will be suppressed if the selected producer is only associated with 1 unit that has an approved, eligible CCC-576, Notice of Loss, on file.

**B
Example of
Screen
MHACWB01**

The following is an example of Screen MHACWB01.

```

-----
Producer M CURTI & SONS           Unit 000436
Producer Share Screen           MHACWE0A
Producer Share: .....
Enter=Continue  Cmd4=Previous Screen

Enter=Continue  Cmd4=Previous Screen  Cmd7=End  Roll=Page
    
```

C

Action

Enter the producer's share for the applicable crop and PRESS "Enter" to continue. Entry cannot be greater than 1.0000. If producer has multiple shares for the same unit, each share must be entered separately by answering share question on Record More Data Question Screen MHACWD0C. See paragraph 1014.

Once a valid share has been entered, 1 of the following screens will be displayed:

- Load Acres/Production Screen MHACWD01 if a yield based crop was selected
- Value Loss Screen MHACWE01 if a value loss crop was selected
- *-Forage Intended for Grazing Screen MHACWD03 if selected crop has an--* intended use of GZ.

Note: If the selected crop is a forage crop according to paragraph 193, Forage Question Screen MHACWD0B will be displayed. See paragraph 1008.

*--1008 Forage Question Screen MHACWD0B

A
Overview

Forage crops have special rules if coverage was bought for a crop that was intended to be mechanically harvested but the actual use of the acreage (or portion thereof) was grazed.

Note: See paragraph 193 for a list of the crops that fall in this category.

If 1 of the crops is selected on Crop Selection Screen MHACWC02, Screen MHACWD0B will be displayed with the following questions:

- “Were all acres of this crop mechanically harvested?”
- “Were all acres of this crop only grazed?”
- “Were some of the acres for this crop mechanically harvested and some grazed?”.

Depending on how the questions are answered will depend on which screen will be displayed. Only 1 question can be answered with a “Y” at a time.

B
Example of
Screen
MHACWD0B

The following is an example of Screen MHACWD0B.

```

2001 NAP           107-A TULARE           Selection           MHACWC01

Continued on the next page

1008 Forage Question Screen MHACWD0B (Continued)

C Action

Use the following table to determine how questions should be answered on Screen MHACWD0B.

Note: All questions are defaulted to “N”. Only 1 question can be answered with “Y”.

IF “Y” is answered to question...	THEN...
<p>“Were all acres of this crop mechanically harvested?”</p> <p>Note: This indicates that the production for this crop was 100 percent mechanically harvested or abandoned.</p>	<p>Load Acres/Production Screen MHACWD01 will be displayed. Load data according to paragraph 1012.</p>
<p>“Were all acres of this crop only grazed?”</p> <p>Note: This indicates that 100 percent of the acreage was grazed instead of being mechanically harvested as intended.</p>	<p>Forage Intended for Grazing Screen MHACWD03 will be displayed. Load data according to paragraph 1013.</p>
<p>“Were some of the acres for this crop mechanically harvested and some grazed?”</p> <p>Note: This indicates that some of the acreage was 100 percent grazed and some was 100 percent mechanically harvested.</p>	<p>Load Acres/Production Screen MHACWD01 will be displayed. Actual acreage that was mechanically harvested shall be loaded according to paragraph 1012. PRESS “Enter” to continue once data is loaded. Forage Intended for Grazing Screen MHACWD03 will be displayed. Actual acreage that was grazed shall be loaded according to paragraph 1013.</p>

1009 Date of Loss Selection Screen MHACWL01

A Overview

*--Screen MHACWL01 is only applicable when either of the following applies:

- crop that is considered a value loss crop is selected

Note: See subparagraph 1011 A for a list of value loss crops.--*

1009 Date of Loss Selection Screen MHACWL01 (Continued)

A Overview (Continued)

- *--yield-based crop in a tropical region is selected.

Notes: Tropical region shall include Hawaii, Puerto Rico, American Samoa, Guam, the U.S. Virgin Islands, and the former Trust Territory of the Pacific Islands (the Commonwealth of Northern Mariana Islands, the Republic of the Marshall Islands, the Federated State of Micronesia, and the Republic of Palau).

Perennial crops cannot have multiple loss dates; however, Screen MHACWL01 will be displayed for all yield-based crops. County Offices shall ensure that only 1 date of loss is entered on Screen MHACWL01 for perennial crops.--*

The purpose of Screen MHACWL01 is to identify and load multiple losses, in the automated system, for the same crop during the crop year. To keep records unique in the automated system, the date of loss must be selected.

* * *

The following dates will be displayed on Screen MHACWL01 for each crop and crop type in the pay grouping that had CCC-576, Notice of Loss, filed and approved by COC:

- disaster event beginning date
- disaster event ending date
- date loss was apparent
- COC approval date.

B Example of Screen MHACWL01

The following is an example of Screen MHACWL01.

```

2002 NAP           107-C TULARE           Selection           MHACWL01
Date of Loss Selection Screen           Version: AE51  09/04/2002 08:56 Term F5
-----
Producer JOE VARGAS                               Unit 000266
Pay Crop/Type 3002 001  Plnt Pd 01

Place an 'X' before desired Date of Loss for processing.

Disaster      Disaster      Loss      Loss
Beginning      Ending      Apparent      Approved
11/22/2001    11/22/2001    11/22/2001    12/12/2001
12/02/2001    12/02/2001    12/05/2001    01/25/2002
07/04/2002    07/04/2002    07/04/2002    08/01/2002

Enter=Continue  Cmd4=Previous Screen  Cmd7=End
    
```

1009 Date of Loss Selection Screen MHACWL01 (Continued)

C Action

The County Office shall:

- select the applicable CCC-576, Notice of Loss, dates for the selected crop, crop type, and intended use by placing an “X” in front of the applicable record
- refer to the applicable CCC-576, Notice of Loss, to determine the correct loss dates for the selected crop, crop type, and intended use.

Example: Producer A had a loss on crustaceans with a crop type of crab (pay crop 3002, pay type 001) on December 2, 2001. The producer filed an entire CCC-576. In February, the producer replenished the stock that was lost. In July, the producer had another loss on crustaceans with a crop type of crab. A separate CCC-576 was filed for the second loss on the same crop. The County Office would refer to the applicable CCC-576, Notice of Loss, to select the applicable loss dates when completing CCC-576, Application for Payment, in the automated system.

Note: Crop data for all crops within the pay grouping must be loaded in the automated system even if there was not a loss on a particular crop or type within the pay grouping. The production for all crops is required to ensure that an accurate payment is calculated. In these instances, CCC-576, Notice of Loss, may not be on file to select the loss dates from Screen MHACWL01. In this case, the user shall select the loss dates applicable to the crop or crop type that does have the loss. The system will recognize that the crop does not have CCC-576, Notice of Loss, filed and the payment will be calculated accordingly.

Example: Producer A had a loss on crustaceans with a crop type of crab (pay crop 3002, pay type 001) on December 2, 2001. The producer filed an entire CCC-576. Loss dates were as follows:

- disaster event beginning date on December 2, 2001
- disaster event ending date on December 2, 2001
- date loss was apparent on December 5, 2001
- COC approval date on January 25, 2002.

The County Office would select these loss dates for CCC-576, Application for Payment, for crustaceans with a crop type of crab.

Producer A also has crustaceans with a crop type of large shrimp. The disaster did not affect the large shrimp; however, the applicable crop data for large shrimp must be entered into the system to calculate an accurate payment. CCC-576, Notice of Loss, was not filed for large shrimp, so when CCC-576, Application for Payment, is loaded, the loss dates applicable to the crab CCC-576, Notice of Loss, shall be used.

***--1010 Carrying Capacity Selection Screen MHACWD02**

A Overview

Carrying Capacity Selection Screen MHACWD02 will be displayed when:

- a crop with an intended use of GZ is selected
- “Y” is answered to the question, “Were all acres of this crop only grazed?”, on Forage Question Screen MHACWD0B according to paragraph 1008
- “Y” is answered to the question, “Were some of the acres for this crop mechanically harvested and some grazed?”, on Forage Question Screen MHACWD0B according to paragraph 1008.

Screen MHACWD02 will display the applicable planting periods, carrying capacities, and grazing period days from the National Crop Table. Screen MHACWD02 was added for entering different COC AUD adjustment factors, COC AUD loss factors, and COC AUD assigned amounts, for the same crop, type, intended use, and practice according to approved planting periods and the applicable carrying capacities and grazing period days.

Note: Screen MHACWD02 is only applicable to 2002 and future years.--*

```

C
Action

Select the applicable planting period, carrying capacity, and grazing period days by planting an "X" in front of the applicable record.--*

1011 Value Loss Screen MHACWE01

A

Overview

Value Loss Screen MHACWE01 will be displayed if the selected crop on Crop Selection Screen MHACW02 has been identified as a value loss crop. The following crops are considered value loss crops:

- ginseng
- finfish
- mollusk
- crustacean
- Christmas trees
- nursery
- turfgrass sod
- mushrooms
- floriculture
- *--crops with an intended use of RS
- crops with an intended use of SE.--*

Note: The intended use of seed for ginseng and floriculture will result in a yield based calculation.

The dollar value for ginseng, finfish, mollusk, crustacean, and Christmas trees will be calculated in the automated system based on the producer's actual inventory and the graduated price codes that are present on the County Office crop table. Nursery, grass with an intended use of sod, mushrooms, floriculture, *--tropical finfish, and crops with an intended use of RS or SE do not have--* graduated prices; therefore, the dollar value of these crops must be calculated outside the system and the total dollar value will be entered in the system, as applicable.

B

*--1011 Value Loss Screen MHACWE01 (Continued)

C
Field
Descriptions
(Continued)

Field	Description	Action
The following fields are applicable to ginseng, finfish, mollusk, crustacean, and Christmas trees.		
Price Code	Graduated price codes applicable to the selected crop. All price codes that are on the County Office crop table will be displayed.	
Beginning Inventory	Manual entry field. The actual beginning inventory rather than the total dollar amount shall be entered. The system will calculate the value of beginning inventory based on the actual inventory amounts that are entered.	Enter the actual beginning inventory of the crop applicable to each graduated price code. Example: Before the disaster, Producer A has 10,000 large crabs (LAR/CRB) on hand. 10,000 would be entered in the "LAR" price code field in the "Beginning Inventory" field.
Ending Inventory	Manual entry field. The actual ending inventory rather than the total dollar amount shall be entered. The system will calculate the value of ending inventory based on the actual inventory amounts that are entered.	Enter the actual ending inventory of the crop applicable to each graduated price code. Example: After the disaster occurred, Producer A has 2,245 large crabs (LAR/CRB) on hand. 2,245 would be entered in the "LAR" price code field in the "Ending Inventory" field.
Ineligible Cause of Loss	Manual entry field. The actual inventory rather than the total dollar amount shall be entered. The system will calculate the value of ineligible cause of loss based on the actual inventory amounts that are entered.	Enter the actual inventory of the crop applicable to each graduated price code that perished because of an ineligible cause of loss. Example: Producer A lost 56 large crabs (LAR/CRB) because of a non-disaster related condition. 56 would be entered in the "LAR" price code field in the "Ineligible Cause of Loss" field.

Field Descriptions The following table describes the fields on Load Acres/Production Screen MHACWD01.

Field	Description	Action
Producer	Data as selected.	
Unit		
Pay Crop/Type		
Crop		
Type		
Int Use		
Plnt Pd		
Share	Share that was entered on Producer Share Screen MHACWD0A will be displayed.	
Stage	Stages harvested, unharvested, and prevented will be displayed. *--Note: Applications for prevented planted acres planted to a subsequent crop in the pay group shall not be loaded in the automated system. See paragraph 25.--*	
Acres Irrigated	Manual entry field, by stage, for irrigated and nonirrigated acres for the unit.	Enter the acres associated with the crop, type, intended use, practice, and planting period, by stage, for the unit. For: <ul style="list-style-type: none"> • maple sap, enter the total number of taps • honey, enter the total number of colonies.
Production (TON)	Manual entry field for production of harvested and unharvested acres.	Enter the harvested production supported by acceptable production records and/or appraised production from CCC-576-1.

1012 Yield Based Crops (Continued)

C
Field
Descriptions
(Continued)

Field	Description	Action
Adjusted or Assigned Production	Manual entry field for adjustments made by COC.	Enter the amount of production as determined by COC according to paragraph 329. An entry is not required.
Adjusted or Assigned Production Flag (O or A)	Manual entry field identifying the type of adjustment made by COC.	Enter an: <ul style="list-style-type: none"> • “A” flag, if the assigned production is to be added to actual production according to paragraph 329 • “O” flag, if the assigned production is to override the production certified by the producer according to paragraph 329. <p>Note: A flag is not required for assigned production to prevented planted acres. Production entered for prevented planted acres will be subtracted from the calculated prevented planted net production.</p>
Production Not to Count	Manual entry field.	Enter production not to count when acceptable records identifying this production are available. Entry cannot be greater than the production that is entered. An entry is not required.
Yield	*--Producer’s approved yield. Note: For multiple market crops, the approved yields for “FH”, “PR”, and “JU” will be displayed. If the producer does not have any approved yield for particular use, the message, “No APH”, will be displayed on Screen MHACWD01. The producer must have APH for the final use.	The producer’s approved yield will be displayed. The yield cannot be changed unless the provisions in paragraph 287 apply. See paragraph 1012.5 for using software for adjusting the yield.--*

1012 Yield Based Crops (Continued)

C
Field
Descriptions
(Continued)

Field	Description	Action
Producer Secondary Use/Salvage Value	Manual entry identifying the crops secondary use/salvage value.	Enter the dollar value of secondary use/salvage value according to subparagraph 174 C and paragraph 333.
County Established Secondary Use/Salvage Value	Manual entry field.	Enter the value of secondary use according to subparagraph 174 C and/or salvage value according to paragraph 333 as determined by COC.
Final Use	Manual entry field.	This field is applicable to “FH”, “PR”, and “JU” records. Enter the final use of harvested production according to Exhibit 41. *--Note: The producer must have APH established for the final use.--*

D
Action

Enter data according to subparagraph C. PRESS:

- “Cmd5” to update the record
- “Enter” to continue, if special forage rules apply
- *--“Cmd3” to adjust the yield

Note: See paragraph 1012.5.--*

- “Cmd24” to delete a record that has been previously updated.

Record More Data Questions Screen MHACWD0C will be displayed. See paragraph 1014.

Note: If special forage rules apply, Forage Intended for Grazing Screen MHACWD03 may be displayed depending on how Forage Question Screen MHACWD0B was answered.

***--1012.5 Approved Yield Adjustment Screen MHACWD0Y**

**A
Overview**

The producer's approved yield:

- is displayed on Screen MHACWD01
- cannot be changed on Screen MHACWD01
- may only be adjusted if the provisions in paragraph 287 apply.

Software has been designed to allow for the 85 or 90 percent adjustments for increased acreage and added land.

If COC determines a yield adjustment is applicable, PRESS "Cmd13" on Screen MHACWD01. Screen MHACWD0Y will be displayed.

**B
Example of
Screen
MHACWD0Y**

The following is an example of Approved Yield Adjustment Screen MHACWD0Y.

```

Descriptions
(Continued)**

Field	Description	Action
COC AUD - Assigned	Manual entry field identifying the AUD assigned as established by COC.	Enter the COC AUD assigned. This is not a required entry. See paragraph 329.
*--PRESS "Enter" to continue.		
Acres	Manual entry identifying the number of acres that were grazed.	Enter the acres applicable to the carrying capacity.
Is This Loss on Federal or State Unseeded Land? Y or N	Manual entry field that will capture if land is Federal or State unseeded land.	Entry is required. ENTER: <ul style="list-style-type: none"> • "Y" if land is Federal- or State-owned unseeded land • "N" if land is not Federal or State unseeded land.
Unseeded Land Acres Federal/ State	Manual entry field to enter the number of acres that are Federal or State unseeded land acres.	Entry is required if "Y" was answered to the previous question. Enter the number of acres that are: <ul style="list-style-type: none"> • Federal unseeded land acres • State unseeded land acres.
Name of Lessor	Manual entry field.	Entry is required if "Y" was answered to the previous question. Enter the name of the lessor for the Federal and/or State unseeded land.--*

**D
Action**

Enter data according to subparagraph C. PRESS:

- "Cmd5" to update the record
- "Cmd24" to delete a record that has been previously updated.

Record More Data Question Screen MHACWD0C will be displayed. See paragraph 1014.

1014 Record More Data Question Screen MHACWD0C

A Overview

Record More Data Question Screen MHACWD0C has been designed as a tool for entering additional data for the selected producer. The software process requires that each crop, crop type, intended use, and planting period be loaded separately to ensure accurate records. Users shall ensure that all applications are completed according to program policy, such as all crops with the same pay grouping being grouped together to determine a producer's loss.

B Screen MHACWD0C

The following is an example of Screen MHACWD0C.

Continued on the next page

1014 Record More Data Question Screen MHACWD0C (Continued)

C

Question Description The following table provides an explanation of Screen MHACWD0C. Only 1 question at a time may be answered with “Y”.

Do you want to record data on another...	IF “Y” is selected...	THEN use this option if...
share for this crop, type, intended use, and practice?	Load Acres/Production Screen MHACWC01 will be displayed	multiple shares for the same crop/type/use/practice/planting period for this unit.
crop, type, intended use, and practice for this pay crop/type and planting period?	Crop Selection Screen MHACWC02 will be displayed	several crops, types, uses, or practices need to be recorded for the selected pay crop. Note: CCC-576 print will not be generated.
pay crop/type and planting period for this unit?	Pay Crop Selection Screen MHACWC01 will be displayed	several pay crops/pay types or planting periods need to be recorded for the selected unit. Note: CCC-576 print will be generated.
unit for this producer?	Unit Selection Screen MHACWB01 will be displayed	producer has multiple units. Note: As a new unit is selected, CCC-576, for the previous crop data that was entered will print.
beginning disaster date and/or loss apparent date for this crop, type, and intended use? Note: This question is only applicable to value loss crops.	Date of Loss Selection Screen MHACWL01 will be displayed	several loss dates need to be loaded for the same crop, type, and intended use. Note: CCC-576 will not be generated.
COC AUD adjustment factor, loss factor, and/or assigned amount for this carrying capacity? Note: This question is only applicable to crops with an intended use of GZ.	Forage Intended for Grazing Screen MHACWD03 will be displayed	a different AUD adjustment, loss factor, and/or assigned amount needs to be loaded for the same planting period, carrying capacity, and grazing period days. Note: CCC-576 will not be generated.
carrying capacity for this share? Note: This question is only applicable to crops with an intended use of GZ.	Carrying Capacity Selection Screen MHACWD02 will be displayed	several planting periods, carrying capacities, and grazing period days need to be loaded for the same crop, type, intended use, and unit. Note: CCC-576 will not be generated.

D

Action *--Complete all applications according to subparagraph C. Additional Acres to Plant or Harvest Screen MHACWD0E will be displayed according to paragraph 1014.5.--*

***--1014.5 Additional Acres to Plant or Harvest Screen MHACWD0E**

**A
Overview**

An application for payment should not be approved for payment until all acres in the pay group have been planted and/or harvested.

Screen MHACWD0E will be used to prevent applications for payment from being approved if there is additional data for the pay group to be loaded. The question, "Does the producer have additional acres of this pay group to plant or harvest? (Y/N)", will be asked on Screen MHACWD0E.

Screen MHACWD0E will be used 2 different ways depending on what kind of application is being loaded. Applications for prevented planted acres can be loaded into the system and paid before applications for harvested or unharvested acres if the provisions in paragraph 25 apply. Prevented planted losses do not count against losses on harvested or unharvested acres. As long as all the crops in the pay group have been planted, prevented planted applications can be taken in the system and payments issued if all other eligibility requirements are met.

For applications being loaded for harvested and unharvested acres, all acres in the pay group must be harvested or be determined to be unharvested before an application for payment can be approved for payment.

**B
Example of
Screen
MHACWD0E**

The following is an example of Additional Acres to Plant or Harvest Screen MHACWD0E.

```

2003 NAP                107-A TULARE                Entry                MHACWD01

IM: Previous record has been updated.
  
```

--*

Continued on the next page

***--1014.5 Additional Acres to Plant or Harvest Screen MHACWD0E (Continued)**

**C
Action**

ENTER:

- “Y” if the producer has additional acres of the crop to plant or harvest

Note: CCC-576 cannot be enrolled or approved for payment until all acres have been planted and/or harvested.

- “N” if all acreage has been planted and/or harvested.

Example 1:

Producer A was prevented from planting 50 acres of baby lima beans. Producer A intends to plant 100 acres of dark red kidney beans, but had not planted them at the time he or she was making the application for payment for the prevented planted baby lima beans. Baby lima beans and dark red kidney beans are in the same pay group. For the 50 acres of prevented planted baby lima beans, the question would be answered with “Y” because all the acres of the pay group have not been planted. The application can still be loaded in the system, but cannot be approved for payment until “Y” is changed to “N” after all acres in the pay group are planted.

Example 2:

Producer A was prevented from planting 50 acres of baby lima beans. Producer A did plant 50 acres of dark red kidney beans. These are the only 2 crops being planted in the pay group. For the 50 acres of prevented planted baby lima beans, the question would be answered with “N” because all the acres of the pay group have been planted. The prevented planted acres do not count against harvested and unharvested acres. Therefore, the prevented planted loss could be calculated and paid before harvest of the dark red kidney beans.

Example 3:

Producer B planted 50 acres of baby lima beans and 50 acres of dark red kidney beans. The baby lima beans were completely lost during a flooding situation. The dark red kidney beans were not damaged by the flood. The application for payment cannot be finalized until the production information is available for the dark red kidney beans. The data for the baby lima beans can be loaded in the automated system and the question shall be answered with “Y”. When the production information is available for the dark red kidney beans and the applicable data is loaded into the system, the question will be answered with “N” at which time the loss can be calculated and the application for payment can be approved, if applicable.--*

*--1015 Record Enrollment Date Screen MHACWD0F

A
Overview

Screen MHACWD0F will be displayed when the producer's record is updated. The producer's enrollment date can be entered on either of the following:

- Screen MHACWD0F
- Menu MHACL0, option 4, "Approve/Disapprove Application for Payment".

Note: Screen MHACWD0F will be suppressed if "Y" was answered to the question on Screen MHACWD0E. The enrollment date cannot be entered until the question is answered with "N".

B
Example of Screen MHACWD0F

The following is an example of Record Enrollment Date Screen MHACWD0F.

```

--*

1016 Entering Enrollment/Approval/Disapproval Dates (Continued)**C Action**

County Offices shall:

- enter enrollment date, if not previously entered on Screen MHACWD0F
- enter approval date, if COC approved the application
- enter disapproval date, if COC disapproved the application
- PRESS “Cmd4” to return to Producer Selection Screen MHACWA01
- PRESS “Cmd5” to update dates

Notes: “Cmd5” must be pressed to update records before the “roll-page” option is selected. Any data entered and not updated before using the “roll-page” option will not be retained in the system.

To remove a date previously updated, field exit through the date and PRESS “Cmd5”. The record will be updated without a date.

- PRESS “Cmd7” to end; records will not be updated
- *--PRESS “Cmd12” to print the NAP Estimated Calculated Payment Report--*
- Roll-Page to view additional records.

Note: The enrollment date, approval date, and disapproval date cannot be entered if the question on Screen MHACWD0E has been answered with “Y”.

D Updating or Adding Applications After Approval Date Is Entered

Since applications are being approved on a unit/pay crop/pay type/planting period basis, the approval date will be removed from all records in the pay grouping if any record within the pay grouping is modified or added.

Upon COC approval, County Offices shall enter the revised COC approval date into the system.

If a crop type that contains prevented planted acres is added to an application after the application was already approved, the County Office shall access all other crop types in the pay group that contain prevented planted acres and PRESS “Cmd5”. This will recalculate the eligible prevented planted acres.

1102 Producer CCC-471 Summary

**A
Report**

The NAP Application Coverage Print is being provided as a quick reference report that will summarize all application data that has been loaded for a producer. The following data elements will print on the report:

- producer ID number and type
 - producer name
 - fee amount collected
 - record status (D=Deleted, P=Pending, C= Canceled, blank=active)
 - crop name
 - pay crop
 - pay type
 - planting period
 - intended use
 - application filed date
 - limited resource producer flag (Y=yes, N=no)
 - fee flag (Y=fee paid, N=fee not paid)
 - date fee paid
 - manual flag (Y=application taken manually, N=system generated)
 - manual fee date
 - other fees paid (fees paid in other counties).
-

***--1103 County Office Application for Coverage Summary Report**

**A
Report**

The County Office Application for Coverage Summary Report will be generated when option 10 is selected from Menu MHACR0. The report is year specific and provides the following data:

- number of producers who have applied for coverage
- total fee dollars received
- pay crop name
- pay crop
- pay type
- planting period
- coverage totals.

Note: The “Coverage Totals” column represents the number of applications taken for the specific pay crop/pay type/planting period.

Data will be uploaded to the State Office every Monday during end-of-day processing.--*

***--1104 State Office Application for Coverage Summary Report**

**A
Overview**

The State Office Application for Coverage Summary Report has been created to identify the crops for which NAP coverage is being purchased on by county. The County Office data will be uploaded to the State Office Monday during end-of-day processing.

Note: The data will not be uploaded if either the County Office:

- does not perform end-of-day processing on Monday
- is closed.

**B
Report Option**

The option to print the State Office Application for Coverage Summary Report has been added to Production Adjust/Compliance Menu MOF000 as option 11, "State Office Application for Coverage Summary". The following is an example of Menu MOF000.

```

COMMAND                                MOF000                                F5
Production Adjust/Compliance
-----
          1.  Flue-Cured Tobacco
          2.  Burley Tobacco
          3.  Other Kinds of Tobacco
          4.  Peanuts
          5.  Preparation of Name/Address and
              IRS-ID No. for Peanut Association
          6.  Tobacco Warehouse/Dealer Master File
         10.  Production Adjustment/Compliance Reports
         11.  State Office Application for Coverage Summary
         15.  Flood and Supplemental Disaster

* This Option has been disabled and is not available for your use
  Cmd3=Return to Primary Selection Menu
  Enter the number of your selection and press "Enter"
    
```

C
Application
Summary
Selection Screen
MHGAR201

When option 11 is selected on Menu M0F000, a printer selection screen will be displayed. Once a valid printer ID number has been entered, Screen MHGAR201 will be displayed. State Offices will have the following print options:

- print all summary data
- print only data for a specific:
 - program year
 - State/county code
 - pay crop code.

The following is an example of Screen MHGAR201.

```

NAP                      000-STATE OFFICE                Selection    MHGAR201

Continued on the next page

***--1104 State Office Application for Coverage Summary Report (Continued)**

**D
Report**

The State Office Application for Coverage Summary Report will contain the following data:

- program year
- State code
- county code
- number of producers who have applied for coverage
- total fee dollars received
- the “As of Date” (date the report was prepared)
- pay crop name
- pay crop
- pay type
- planting period
- coverage total.

Notes: The “Coverage Totals” column represents the number of applications taken for the specific pay crop/pay type/planting period.

This will be the data that prints when “All” is selected. If a specific year, county, or pay crop report is selected, the county total for the producers, fee dollars collected, and the “As of Date” will not print on the report.

Data will be uploaded from County Offices every Monday during end-of-day processing.--*

1105-1109 (Reserved)

***--1110 Reconciliation Report**

A Introduction

The reconciliation report is provided for County Offices to identify possible problems or errors with a producer's Application for Coverage, Application for Payment, and eligibility.

The reconciliation report:

- identifies producers whose status in the system will prevent a payment from being issued
- provides County Offices with information that will enable the user to take corrective action, when applicable, to ensure that producer payments are issued properly.

Not all conditions on the reconciliation report will require County Office action. Some of the messages are provided for informational purposes to assist County Offices in determining whether there is a problem with a producer's Application for Coverage, Application for Payment, and/or eligibility.

B When to Run the Reconciliation Report

The reconciliation report shall be run:

- at least weekly to identify possible error conditions
- before issuing NAP payments.--*

1110 Reconciliation Report (Continued)

C Printing the Reconciliation Report

Follow the steps in this table to print the reconciliation report from NAP Reports Menu MHACR0.

Step	Menu	Action
1	FAX250	ENTER "3" or "4", "Application Processing", as applicable.
2	FAX09002	If option 4 was selected on Menu FAX250, then select the appropriate county.
3	FAX07001	*--ENTER "11", "PFC/DCP Compliance".--*
4	M00000	ENTER "1", "NAP and Disaster".
5	MH0000	ENTER, "2", "Non-insured Assistance Program".
6	MHB0YR	Enter appropriate Crop Year for processing.
7	MHB000	ENTER, "7", "Reports".
8	MHACR0	ENTER "9", "Reconciliation Report".

D Reconciliation Report Messages

The messages on the reconciliation report shall be used to identify corrective action that may need to be taken. This table identifies the error messages on the reconciliation report.

Note: Only 8 crops and crop types will be identified at a time for messages listing the crop name and crop type. Additional crops and crop types will be identified when previous listings have been corrected.

Message	Reason For Message	County Office Action
Person Determination Flag * * * is Invalid	Person determination flag * * * is invalid for the applicable year. See paragraph 1276 to determine valid flags.	Determine whether the flag is correct in the specified county for the applicable year and update, if necessary.

D Reconciliation Report Messages (Continued)

Message	Reason for Message	County Office Action
*--PP Payment Factor on Appl. for Payment does match the NCT for "Abbr. CROP NAME" and "CROP TYPE" for Unit Number"	Application for Payment with a stage of "PP" has a different prevented planted payment factor in the application for payment file compared to the prevented planted payment factor in the national crop table record.	Access the Application for Payment, and PRESS "Cmd5" on Load Acres/Production Screen MHACWD01 to update the record.
Payment Rate on Appl. for Payment does match the NCT for "Abbr. CROP NAME" and "CROP TYPE" for Unit Number"	A crop type with a stage of "PP" has a different payment rate in the Application for Payment File compared to the prevented planted payment factor in the national crop table record.	Access the Application for Payment, and PRESS "Cmd5" on Load Acres/Production Screen MHACWD01 to update the record.
Appl. for Payment does not contain the current status of the Notice of Loss File for "Abbr. CROP NAME and CROP TYPE" for Unit Number"--*	Application for Payment does not reflect the current status of the notice of loss.	Access the Application for Payment and PRESS "Cmd5" on Load Acres/Production Screen MHACWD01 to update the record.

***--1111 NAP Applications Needing Update Due to Crop Table Changes**

A NAP Crop Table Report

NAP Applications Needing Update Due to Crop Table Changes Report MHAC03-R001 will print a list of producers with NAP applications associated with a NCT record with a change to 1 or more of the following fields:

- county average yield
- unit of measure
- calculated price
- payment factors (unharvested and prevented).

Note: Report MHAC03-R001:

- will only print during start-of-day processing on the day the NCT record is downloaded
- cannot be reprinted.

B Report Instructions

This report will print with the associated application records and a message code identifying the actions the County Office must take. The following table provides the message codes and action that shall be taken by the County Office.

Code	Message code is printed when...	County Office Action
1	county average yield is changed and producer has APH and application for payment on file.	Access APH software and update producer's approved yield. Access application for payment, and PRESS "Cmd5" on Load Acreage/Production Screen.
2	county average yield changed and producer has APH only on file.	Access APH software and update APH for the unit.
3	unit of measure changed and producer has APH and application for payment on file.	Access APH software and update producer's approved yield. Access application for payment, convert any production amount to corrected unit of measure, and PRESS "Cmd5" on Load Acreage/Production Screen.
4	unit of measure changed and producer has APH only on file.	Access APH software and update APH for the unit.
5	<ul style="list-style-type: none"> • calculated price changed • payment factors changed. 	Rerun NAP payments to determine whether the change caused an over or underpayment to occur.

--*

1111 NAP Applications Needing Update Due to Crop Table Changes

C Data Elements on Report

The following data elements are provided on the report:

- crop year
- producer ID and type

Note: Producer ID and type will not be printed if message codes “2” or “4” are applicable.

- State
- county
- unit
- crop
- crop type
- planting number
- intended use
- unit of measure
- message code.

1112 Approved Yield Review Register

A Overview

NAP approved yields are subject to annual reviews. These reviews include only required spot checks as determined by subparagraph 600 A.

B Report Option

The option to print the NAP Approved Yield Review Register is on NAP Reports Menu MHACR0 as option 12.

C Register Example

*--The following is an example of the Approved Yield Review Register.

CALIFORNIA						USDA-FSA				Prepared: 05-05-2008			
A TULARE						2007 NAP				1:15 PM			
Report ID: MHACYR-R001						Approved Yield Review Register				Page: 1			
Unit Number	Crop Abrv	Crop Type	Int Use	Prac	Plnt Pd		Unit Number	Crop Abrv	Crop Type	Int Use	Prac	Plnt Pd	
526	WHEAT	HRW	GR	N	01								
526	PEARS	BLT	FH	N	01								
End of Report													
All records are required reviews - Approved Yield exceeds 150% of T-Yield or Adjusted T-Yield, as applicable													

If there are no approved yield records that meet the criteria to be on the register, the message, "There are no 20XX NAP approved yields subject to review", will be displayed with "XX" being the applicable year.

D Required Reviews

All records on the Approved Yield Review Register shall be reviewed. These reviews--* shall be in addition to the reviews determined according to the National Compliance Review list.

1113-1150 (Reserved)

Section 8 (Withdrawn--Amend. 42)

1151-1153 (Withdrawn--Amend. 42)

1154-1275 (Reserved)

Part 11 Payment Processing**Section 1 NAP Payment Provisions****1276 General Payment Provisions****A Introduction**

This part contains provisions for:

- general payment provisions
- manual calculation worksheets:
 - CCC-576A
 - CCC-576B
 - CCC-576C.

B NAP Payment Level

The NAP payment level is 55 percent.

C Obtaining FSA-325

FSA-325 shall be completed, according to 1-CM, by individuals or entities requesting payment for a producer who has died, disappeared, or been declared incompetent. Payment shall be issued to the individuals or entities requesting payment using the deceased, incompetent, or disappeared producer's ID number. A revised CCC-576 is not required to be completed when payments are issued under the deceased, incompetent, or disappeared producer's ID number.

D Administrative Offset

[7 CFR 1437.15] Any payment or portion thereof due any producer shall be issued without regard to:

- questions of title under State law
- any claim or lien against the crop, or proceeds thereof, in favor of any creditor, except agencies of the U.S. Government.

The regulations in **7 CFR Part 1403** are applicable to NAP payments.

1276 General Payment Provisions (Continued)**E Assignments**

A producer entitled to a NAP payment may assign payments according to **7 CFR Part 1404** and 63-FI.

F Bankruptcy

Bankruptcy status does not exclude a producer from requesting NAP benefits.

Contact the OGC Regional Attorney for guidance on issuing NAP payments on all bankruptcy cases.

G Payment Limitation

Payment limitation is \$100,000 for NAP benefits. The producer's control county is the only county able to make changes to the PLM totals. Counties should follow procedures in 2-PL, paragraphs 105 and 106 for requesting updates to the PLM set.

H Payments Less Than \$10

The NAP payment process will:

- issue payments that round to at least \$1
- **not** issue payments less than 50 cents.

I Prompt Payment Due Dates

*--[7 CFR 1437.14] According to the Prompt Payment Act, a prompt payment interest penalty applies if a NAP payment is not issued within 30 calendar days from the later of the following:

- date the County Office has the approved national crop data in their County Office
- date the producer signs, dates, and submits a properly completed application for payment. The application for payment is considered filed according to subparagraph 502 B.--*

See 61-FI for additional information on handling prompt payment interest penalties.

1276 General Payment Provisions (Continued)

J Determining Payment Eligibility

The payment process reads the eligibility and multi-county files to determine whether a producer or member of a joint operation is eligible to be paid. If the producer or member is ineligible to be paid, the individual or entity will be listed on the nonpayment register with the applicable message. Eligibility conditions must be updated before the producer or member can be paid. These conditions should accurately reflect COC determinations.

This table identifies:

- eligibility conditions applicable to 2001 and future years NAP
- which conditions are used to determine producer eligibility in which County Office
- condition values that reflect producer or member eligibility or ineligibility.

County	Eligibility Condition	Eligible Determination	Ineligible Determination	Conditions Requiring Other Determinations
Control County	Person Determination	Y	N, P, Blank	
	NAP Gross Income	Y	N	
Home County	Controlled Substance	Y	N	
	6-CP	Y	N	B
	AD-1026	Y	N, A, F	
	FCIC Fraud	Y	N	
	NAP Non-Compliance	Y	N	
Other County	Controlled Substance	Y	N	
	6-CP	Y	N	
	FCIC Fraud	Y	N	
	NAP Non-Compliance	Y	N	

1276 General Payment Provisions (Continued)

***--K “B” Condition in the Home County**

A “B” condition in the home county indicates that the producer is associated with a farm--* that is in violation of HEL, but has been determined to meet the Landlord/Tenant exception established in 6-CP. The producer is ineligible to receive a loss payment on that farm. A message will display when an application is taken on the application screen that “Producer is ineligible for payment on FSN XXX”. However, NAP coverage is based on units and not FSN’s. The County Office shall be responsible to ensure that CCC-471 is not taken on the unit from the HEL farm or payments made on the unit from the HEL farm. The producer would be eligible for benefits on any complying farm.

--1277 Funds Control for NAP Payments*A Funds Control for NAP**

NAP funds are subject to E-FC. E-FC provides real-time funds control for NAP and allows for the monitoring of program disbursements.

B State Office Access to NAP E-FC Program Group

As a rule, the National Office has granted authority to the NAP E-FC Program Group to no more than 2 State Office employees. This authority allows the State employees to control the State reserve and move funds between County Offices.

As a result of changes in personnel, State Offices may require a change to the employees with NAP E-FC authority. State Offices should by e-mail, submit requests to add and remove employees to **all** of the National Office contacts listed in subparagraph D. The e-mail request should include the following information for each employee:

- user's name
- e-Authentication user ID.

Note: If the request increases the number of employees to more than 2, be sure to include an employee whose authority should be removed.

C Allotment of NAP Funds

At the beginning of each FY, an initial allotment of NAP funds will be provided to all County Offices through the funds control process. Additionally, the State will be provided with an allotment amount in the State reserve. If additional funds are required, County Offices should contact the appropriate State Office specialist. The State Office specialist should either:

- move funds from the State reserve to the County Office requesting funds
- reallocate funds from 1 or more County Offices and allocate those funds to the requesting County Office
- contact the National Office to request additional funds, if funds are not available within the existing allocation for the State.

Notes: The additional funds will be sent from the National Office to the State Office, and then the State Office will send the funds to the County Office.

If the specialists responsible for NAP E-FC are not in the State Office and are not able to assist the County Office with an additional funds request, the State Office should contact 1 of the National Office contacts listed in subparagraph C to request additional funds be moved within the State.--*

*--1277 Funds Control for NAP Payments (Continued)

D Submitting Request for Additional NAP Funds to the National Office

State Office specialists shall submit an e-mail to **all** of the following National Office contacts to request a specific amount of NAP funds required:

- **sandy.bryant@wdc.usda.gov**
- **tina.nemec@wdc.usda.gov**
- **steve.peterson@wdc.usda.gov**
- **lenior.simmons@wdc.usda.gov.**

Note: Before requesting additional funds, State Office specialists shall ensure funds from other County Offices within the State are distributed equitably according to program activity. County Offices having excess funds shall always be reallocated before requesting funds from the National Office.--*

1278 NAP Payment Groupings

A Introduction

Each State Office is responsible for establishing the “crop definition” for each crop in the State. NAP payments are calculated at the highest crop level, meaning all types of the crop shall be used to determine whether the producer incurred a loss. However, State Offices have the option of justifying that a particular crop type should be paid as a separate crop, if the price for 1 type of the crop is significantly different from that of other types of the same crop.

If the National Office concurs that the crop type should be paid as a separate crop, then losses are calculated for that crop type without regard to acreage and production of other crop types with the same crop code.

To identify the crop definition for payment purposes, 3 variables are included in the crop table for each crop that is downloaded from KC-ITSDO. All payment processes use these variables to “group” all the calculated loss data by producer and unit to determine the NAP payment for the unit. These variables are described in greater detail in the remainder of this paragraph.

B Planting Period

For those crops that have multiple planting periods within the same crop year, the planting period is used to identify these plantings as separate crops.

Example: Lettuce has 4 plantings during the crop year. A separate record is loaded into the crop table for each planting, which will ensure that the production from the different plantings will not be grouped together.

Crops with the same planting period will be grouped together unless they have different pay
--crop and pay type codes.--

C Payment Crop Code

The payment crop code is the code that identifies the “crop” for the specified crop, crop type, and/or intended use for payment purposes. In most cases, the payment crop code is the same as the 2-CP crop code.

*--**Example:** The 2-CP crop code for lespedeza is “0273”. For NAP payment purposes, lespedeza will actually be paid as grass with a payment crop code of “0102”.--*

1278 NAP Payment Groupings (Continued)

D Payment Type Code

The payment type code is the code that identifies how the types and intended uses for a specified crop will be “grouped”.

Example: Peppers has a payment crop code of “0083”. However, the types of peppers have a significant price difference, justifying that each type of peppers be treated as a separate crop. The data on the crop table is downloaded as follows.

Crop Type	Planting Number	Payment Crop Code	Payment Type Code
ANA	01	0083	001
CHR	01	0083	002
HOT	01	0083	003

In this example, each type of peppers will be treated as a separate crop for payment purposes.

E Example 1

Producer A has the following loss data.

Unit	Crop	Type	Pay Crop Code	Pay Type Code	Planting Period	Int Use	Disaster Level	Production	Net Production for Payment	Calculated Payment
1.00	Lettuce	Bos	0140	001	01	FH	14,000	20,000	-6,000	(\$1,280)
			0140	001	02	FH	2,500	0	2,500	\$533

In this example, there are 2 plantings for Boston Lettuce. For that reason, the plantings do not apply against each other. Producer A is:

- not eligible for a NAP payment on the first planting because the calculated payment amount is negative
- eligible for a \$533 NAP payment on the second planting.

1278 NAP Payment Groupings (Continued)

F Example 2

Producer B has the following loss data.

Unit	Crop	Type	Pay Crop Code	Pay Type Code	Planting Period	Int Use	Disaster Level	Production	Net Production for Payment	Calculated Payment
1.00	Peas	PHL	0067	003	01	FH	8,200.50	10,000	-1,799.50	(\$193)
	Peas	SNA	0067	003	01	FH	4,000	0	4,000	\$428

In this example:

- Purple Hull Peas have a “0067” 2-CP crop code
- Snap Peas have a “0067” 2-CP crop code.

For NAP payment purposes, both crops have a “0067” payment crop code. As a result, Producer B’s loss on Snap Peas will be reduced by \$193 because of the high yield on Purple Hull Peas.

1279 Manual Payment Calculations

A Introduction

County Offices shall use the following table to determine which manual calculation form to use when manually calculating NAP payments.

IF calculating a payment for a...	THEN use...
yield-based crop	CCC-576A.
value loss crop	CCC-576B.
grazing loss	CCC-576C.
--yield based crop when there are multiple crop types within a pay group	CCC-576A-1.--

1279 Manual Payment Calculations (Continued)**B When to Manually Calculate Payments**

County Offices are not required to manually calculate payments for each producer that applies for NAP benefits. However, it is recommended that at least some of the payments are verified before CCC-184's are issued to producers and EFT's are transmitted to producer's financial institutions.

Manual payment calculation worksheets are provided to assist County Offices in reconciling system-calculated payment amounts. County Offices shall use the applicable manual payment calculation form as described in subparagraph A to manually calculate NAP payments.

1280 Manual Payment Calculations for NAP Yield-Based Crops**A Introduction**

CCC-576A is:

- used for yield-based crops only
- the loss calculation worksheet used to determine whether a specific type and intended use of a defined crop has incurred a qualifying loss for payment
- for harvested, unharvested, and prevented planted acreage.

Complete a separate line entry on CCC-576A for all crop types and intended uses for the specified crop (pay group) for the producer's unit. All acres and production from all types of the crop must be accounted for.

***--Note:** Use CCC-576A-1 when there are multiple crop types within a pay group.--*

1280 Manual Payment Calculations for NAP Yield-Based Crops (Continued)

B

**Completing
CCC-576A**

Complete CCC-576A according to the following table.

Note: Unless otherwise specified, all calculations should be rounded to 2 decimal places.

Item	Instructions
1 and 2	Enter the State and county code from CCC-576, item 1B.
3 and 4	Enter the producer's name and ID number from CCC-576, items 23 and 24.
5	Enter the NAP unit number for the producer and crop from CCC-576, item 2.
6	Payment level is 55 percent.
7	Enter the name of the crop from CCC-576, item 8 A.
8	Enter the crop code corresponding with the crop name from CCC-576, item 8 A.
9	Enter the payment crop code from the crop table for the specified crop, crop type, intended use, and practice. See paragraph 1278 for additional information on payment groupings.
10	Enter the payment type code from the crop table for the specified crop, crop type, intended use, and practice. See paragraph 1278 for additional information on payment groupings.
11	Enter the planting period for the specified crop from CCC-576, item 7 D.
Part A and B - Items 12 through 25 are for harvested and unharvested acreage only.	
12	Enter the crop * * * type name or abbreviation from CCC-576, item 29 for the specified crop type.
13	Enter the intended use for the crop from CCC-576, item 35.
14	Enter the practice from CCC-576, item 32 for the specified crop type and intended use. Note: A separate line entry shall be completed, if the producer has both irrigated and nonirrigated acres.
15	Enter the producer's share from CCC-576, item 30 for specified crop type. Enter up to 4 decimal places.

1281 Manual Payment Calculations for NAP Value Loss Crops

A

Introduction CCC-576B is the payment calculation worksheet for the value loss crops only.

B

Completing CCC-576B *--Complete CCC-576B according to the following table.--*

Note: A separate CCC-576B shall be completed for each type of value loss crop.

Item	Instructions
1 and 2	Enter the State county codes from CCC-576, item 1B.
3A and 3B	Enter the producer's name and ID number from CCC-576, items 23 and 24.
4	Enter the producer's share in the crop from CCC-576, item 41. Enter up to 4 decimal places.
5	Enter the unit number for the producer and crop from CCC-576, item 2.
6	Enter the crop code to be paid corresponding to the crop entered on CCC-576, item 8 A.
7	Enter the name of the crop or crop abbreviation from CCC-576, item 8 A.
8	Enter the crop * * * type name or abbreviation, if applicable, from CCC-576, item 29.
--9	Enter the intended use for the crop from CCC-576, item 35.--
10	Payment level of 55 percent.
11	Enter the Field Market Value A from CCC-576, item 42.
12	Compute the disaster level by multiplying the following: <ul style="list-style-type: none"> • Field Market Value A recorded in item 42, times • 50 percent.
13	Determine the Dollar Value of Inventory After Disaster for the specified crop and crop type from CCC-576, item 43. <p>Note: If any portion of the eligible crop identified in item 11 is determined to have any dollar value after disaster, or may re-establish a dollar value for the portion of the specified crop and crop type, that portion of the specified crop and type must be counted as having the dollar value assigned in item 11.</p>
14	Enter the Dollar Value of Ineligible Causes of Loss from CCC-576, item 44.

***--1282 Manual Payment Calculations for Grazing Crops**

A Introduction

CCC-576C is the payment calculation worksheet used for grazing crops.

Complete a separate line entry on CCC-576C for all crops and crop types for the producer's unit. All acres and production from all types of the crop must be accounted for.--*

1282 Manual Payment Calculations for Grazing Crops (Continued)

B Completing CCC-576C

Complete CCC-576C according to the following.

Note: All calculations should be rounded to whole numbers, unless otherwise specified.

Item	Instructions
1 and 2	Enter the State and county code from CCC-576, item 1B.
3 and 4	*--Enter the producer's name and 4-digit ID number from CCC-576, items 23--* and 24.
5	Enter the unit number for the producer and crop from CCC-576, item 2.
6	Enter the AUD value for the applicable crop year. See subparagraph 503 C for additional information on AUD value.
7	Payment level is 55 percent.
8	Enter the payment crop code from CCC-576, item 7B for the specified crop, crop type, intended use, and practice. See paragraph 1278 for additional information on payment groupings.
9	Enter the payment type code from CCC-576, item 7D for the specified crop,--* crop type, intended use, and practice. See paragraph 1278 for additional information on payment groupings.
10	Enter the planting period for the specified crop from CCC-576, item 7D.
11	Enter the name of the crop from CCC-576, item 8A.
12	Enter the crop type name or abbreviation from CCC-576, item 48 for the specified crop type.
13	Enter the practice from CCC-576, item 51 for the specified crop type and intended use. Note: A separate line entry shall be completed, if the producer has both irrigated and nonirrigated acres.

1282 Manual Payment Calculations for Grazing Crops (Continued)

B Completing CCC-576C (Continued)

Item	Instructions
14	<p>Enter the planted acreage, as applicable for the specified crop code and crop type from CCC-576, item 50.</p> <p>The acres entered should be the planted acreage in the unit. If the producer has a unit relationship where the shares differ by farm, then ensure that the acres entered are only the planted acres corresponding to the share in item 15.</p> <p>Example: Producer A and Owner B share in the acreage on 2 farms. On 1 farm, the shares for alfalfa are 60/40. On the other farm, the shares are 50/50. A separate line entry shall be completed for the acres attributable to each share relationship.</p>
15	Enter the producer's share from CCC-576, item 49 for specified crop type. Enter up to 4 decimal places.
16	<p>Calculate the acreage attributable to the producer by multiplying the following:</p> <ul style="list-style-type: none"> • planted acreage recorded in item 14, times • producer share recorded in item 15.
17	Enter the carrying capacity from the crop table for the specified crop, crop type, and planting period.

1282 Manual Payment Calculations for Grazing Crops (Continued)

B Completing CCC-576C (Continued)

Item	Instructions
18	Calculate the animal unit by dividing the following: <ul style="list-style-type: none"> • producer acres recorded in item 16, by • carrying capacity recorded in item 17. <p>Note: Round to 4 decimal places.</p>
19	Enter the grazing period days from the crop table for the specified crop, crop type, and planting period.
20	Calculate the animal unit day by multiplying the following: <ul style="list-style-type: none"> • animal unit recorded in item 18, times • grazing period days in item 19.
21	Enter the AUD adjustment factor determined by COC from CCC-576, item 56. <p>Note: Round to 2 decimal places.</p>
22	Calculate the AUD adjustment by multiplying the following: <ul style="list-style-type: none"> • animal unit day recorded in item 20, times • AUD adjustment factor determined by COC in item 21.
23	Calculate the expected AUD by adding the following: <ul style="list-style-type: none"> • animal unit day recorded in item 20, plus • AUD adjustment recorded in item 22. <p>Note: If there is not an approved Notice of Loss for this line item, the calculation will not continue beyond expected AUD. This ensures that production for all crops and crop types are included in the calculation for the crop.</p>

1282 Manual Payment Calculations for Grazing Crops (Continued)

B Completing CCC-576C (Continued)

Item	Instructions
24	Enter the AUD loss factor determined by COC from CCC-576, item 57. Note: Round to 4 decimal places.
25	Calculate the AUD loss by multiplying the following: <ul style="list-style-type: none"> • expected AUD recorded in item 23, times • AUD loss factor determined by COC recorded in item 24.
26	Enter the assigned AUD determined by COC from CCC-576, item 58.
27	Calculate producer share assigned AUD by multiplying the following: <ul style="list-style-type: none"> • share recorded in item 15, times • assigned AUD determined by COC recorded in item 26.
28	Calculate the adjusted AUD loss by subtracting the following: <ul style="list-style-type: none"> • AUD loss recorded in item 25, minus • producer share assigned AUD recorded in item 27.
29	Calculate the total expected AUD by adding all entries recorded in item 23.
30	Calculate the total adjusted AUD loss by adding all entries recorded in item 28.
31	Calculate AUD covered by NAP by multiplying the following: <ul style="list-style-type: none"> • total expected AUD recorded in item 29, times • 50 percent.

1282 Manual Payment Calculations for Forage Intended for Grazing (Continued)

B Completing CCC-576C (Continued)

Item	Instructions
32	<p>Calculate the net AUD for payment by subtracting the following:</p> <ul style="list-style-type: none"> • total adjusted AUD loss recorded in item 30, minus • AUD covered by NAP recorded in item 31.
33	<p>Calculate the AUD producer payment by multiplying the following:</p> <ul style="list-style-type: none"> • net AUD for payment recorded in item 32, times • AUD value recorded in item 6, times • payment level of 55 percent recorded in item 7. <p>Note: Round to a whole number.</p> <p>If there is:</p> <ul style="list-style-type: none"> • a payment calculation for a yield-based crop in the same pay group as the grazing crop, refer to instructions for completing CCC-576A, item 40 • not a payment calculation for a yield based crop in the same pay group, the unit total is the result of the AUD producer payment. <p>Note: If the AUD producer payment is negative, the unit total will be zero.</p>

1283 Manual Payment Calculations for NAP Yield-Based Crops - 2002 and Future Years

A Introduction

CCC-576A is used:

- for yield-based crops only
- to determine whether a specific type and final use of a defined crop has incurred a qualifying loss for payment
- for harvested, unharvested, and prevented planted acreage.

***--Note:** CCC-576A-1 will also be used when there are multiple crop types within a pay group with prevented planted acreage.--*

Complete a separate line entry on CCC-576A for each crop type and final use for the specified crop (pay group) for the producer's unit. All acres and production from all types of the crop must be accounted for.

1283 Manual Payment Calculations for NAP Yield-Based Crops - 2002 and Future Years (Continued)

B Completing CCC-576A

Follow the instructions in this table to complete CCC-576A.

Note: Unless otherwise specified, all calculations should be rounded to 2 decimal places.

Item	Instructions
1 and 2	Enter the State and county codes from CCC-576, item 1B.
3	Enter the producer's name from CCC-576, item 23.
4	*--Enter the producer's 4-digit ID number from CCC-576, item 24.--*
5	Enter the unit number for the producer and crop from CCC-576, item 2.
6	Payment level is 55 percent.
7	Enter the name of the crop from CCC-576, item 8 A.
8	Enter the crop code corresponding with the crop name from CCC-576, item 8 A.
9	*--Enter the payment crop code from CCC-576, item 7B for the crop, crop type, final use, and practice. See paragraph 1278 for additional information on payment groupings.
10	Enter the payment type code from CCC-576, item 7C for the crop, crop type,--* final use, and practice. See paragraph 1278 for additional information on payment groupings.
11	Enter the planting period for the crop and crop type from CCC-576, item 7D.
Parts A and B - Items 12 through 25 are for harvested and unharvested acreage only.	
12	Enter the crop type name or abbreviation for the crop from CCC-576, item 29.
13	Enter the final use for the crop from CCC-576, item 37.
14	Enter the practice from CCC-576, item 33 for the crop type and final use. Note: A separate line entry shall be completed, if the producer has both irrigated and nonirrigated acres.
15	Enter the producer's share from CCC-576, item 31 for the crop type. Enter up to 4 decimal places.

***--1283.5 Manual Payment Calculations for NAP Yield-Based Crops With Multiple Crop Types Having Prevented Planted Acres**

A Introduction

When calculating payments for multiple crop types with prevented planted acres, additional calculations are required for the pay group.

CCC-576A-1 shall be used:

- when the pay group has multiple crop types with prevented planted acres
- to determine whether the pay group has eligible prevented planted acres
- to determine a ranking for each crop type based on highest to lowest value for each crop type.--*

***--1283.5 Manual Payment Calculations for NAP Yield-Based Crops With Multiple Crop Types Having Prevented Planted Acres (Continued)**

B Completing CCC-576A-1

Complete CCC-576A-1 according to the following. Unless otherwise specified, all calculations should be rounded to 2 decimal places.

Item	Instructions
1 and 2	Enter the State and county codes from CCC-576, item 1 B.
3	Enter the producer's name from CCC-576, item 23.
4	Enter last 4 digits of the producer's ID number from CCC-576, item 24.
5	Enter the unit number for the producer and crop from CCC-576, item 25.
6	Enter the name of the crop from CCC-576, item 8 A.
7	Enter the pay crop code from the crop table for the crop, crop type, final use, and practice, CCC-576, item 26. See paragraph 1278 for additional information on payment groupings.
8	Enter the pay type from the crop table for the crop, crop type, final use, and practice, CCC-576, item 27. See paragraph 1278 for additional information on payment groupings.
9	Enter the planting period for the crop and crop type from CCC-576, item 28.
Items 10 through 14 calculations are used to determine prevented planted eligibility.	
10	Enter the total number of planted acres from CCC-576 for all crop types in the pay group.
11	Enter the total number of prevented planted acres from CCC-576 for all crop types in the pay group.
12	Determine the intended acres by adding the following: <ul style="list-style-type: none"> • planted acres recorded in item 10, plus • prevented planted recorded in item 11.
13	Calculate the disaster level by multiplying: <ul style="list-style-type: none"> • intended acres determined in item 12, times • 35 percent.
14	Enter the eligible prevented planted acres by calculating: <ul style="list-style-type: none"> • prevented planted acreage in item 11, minus • disaster level determined in item 13. <p>Note: If the result is a negative number, the producer is not eligible for prevented planted acres and no further calculation is required.</p>

--*

***--1283.5 Manual Payment Calculations for NAP Yield-Based Crops With Multiple Crop Types Having Prevented Planted Acres (Continued)**

B Completing CCC-576A-1 (Continued)

Item	Instructions
Items 15 through 21 are used to determine the highest value prevented planted crop within a pay group.	
15	Enter the crop type name or abbreviation from CCC-576, item 29 for the crop type.
16	Enter the number of prevented planted acres for the crop type
17	Enter the approved yield according to paragraph 254.
18	Enter the payment rate for the crop code, crop type, and final use from the NCT.
19	Enter the prevented planted payment factor from the NCT for the crop, crop type, and final use.
20	<p>Determine the value for each prevented planted crop type by multiplying the following:</p> <ul style="list-style-type: none"> • approved yield in item 17, times • payment rate recorded in item 18, times • payment factor recorded in item 19. <p>Round the result to whole dollars.</p>
21	<p>The crop type with the highest value shall be ranked number 1 and second highest valued crop should be ranked 2. Continue ranking all crop types from highest to lowest value.</p> <p>Note: On the CCC-576A, item 35 enter the prevented planted acres of the highest ranking crop type, up to the number of available prevented planted acres for that crop type. Continue to allocate the prevented planted acres for each crop type, not to exceed the total determined eligible prevented planted acres determined in item 14.</p>

--*

***--1283.5 Manual Payment Calculations for NAP Yield-Based Crops With Multiple Crop Types Having Prevented Planted Acres (Continued)**

C Example Calculation

A producer submits an application for payment with the following acres for multiple crop types within the same pay group:

- 50 planted acres – sorghum forage
- 200 prevented planted acres (crop types SWI 50 acres and SUD 150 acres).

Step	Calculation
1	250 intended acres are determined by adding the following: <ul style="list-style-type: none"> • 50 total planted acres, from CCC-576 • 200 total prevented planted acres, from CCC-576.
2	87.5 disaster level acres are determined by multiplying: <ul style="list-style-type: none"> • 250 intended acres, determined in step 1, times • 35 percent.
3	112.5 eligible prevented planted acres are determined by subtracting: <ul style="list-style-type: none"> • 200 total prevented planted acres, minus • 87.5 disaster level acres, determined in step 2.
4	The highest value crop is determined by calculating the payment for each crop type by multiplying the following for the crop type: <ul style="list-style-type: none"> • approved yield, times • payment rate, times • payment factor. <p>Example: The crop value for the 2 crop types are:</p> <ul style="list-style-type: none"> • SWI - \$623 (6.4 x 97.4400 x 1.000) • SUD - \$363 (5.4 x 97.4400 x .6900). <p>In this example, the highest value crop is SWI and the next highest value crop is SUD. SWI is ranked number 1 and SUD is ranked number 2.</p>
5	<ul style="list-style-type: none"> • Enter 50 acres in CCC-576A, item 35. This is the number of prevented planted acres for highest ranking crop type (SWI). • Enter 62.5 acres in the CCC-576A, item 35 for the number 2 ranked crop type. <p>Note: 62.5 acres was determined by subtracting the remaining eligible prevented planted acres of 112.5 minus 50 acres already allocated. Although there are 150 prevented planted acres for SUD, only 62.5 acres can be allocated to ensure that the total eligible prevented planted acres are not exceeded.</p>

--*

1284 Manual Payment Calculations for NAP Value Loss Crops - 2002 and Future Years**A Introduction**

CCC-576B is the payment calculation worksheet used:

- for value loss crops only
- to determine whether a specific type and final use of a defined crop has incurred a qualifying loss for payment.

Complete a separate line entry on CCC-576B for each crop type and final use for the specified crop (pay group) for the producer's unit. All values for all types of the crop must be accounted for.

B Completing CCC-576B

Follow the instructions in this table to complete CCC-576B.

Item	Instructions
1 and 2	Enter the State and county codes from CCC-576, item 1B.
3	Enter the producer's name from CCC-576, item 23.
4	*--Enter the producer's 4-digit ID number from CCC-576, item 24.--*
5	Enter the unit number for the producer and crop from CCC-576, item 2.
6	Payment level is 55 percent.
7	Enter the name of the crop from CCC-576, item 8 A.
8	Enter the crop code corresponding with the crop name from CCC-576, item 8 A.
9	*--Enter the payment crop code from CCC-576, item 7B for the crop, crop type, final use, and practice. See paragraph 1278 for additional information on payment groupings.
10	Enter the payment type code from CCC-576, item 7C for the crop, crop type,--* final use, and practice. See paragraph 1278 for additional information on payment groupings.
11	Enter the planting period for the crop and crop type from CCC-576, item 7D.
12	Enter the crop type name or abbreviation for the crop from CCC-576, item 7A.
13	Enter the final use for the crop from CCC-576, item 37.

*--1284 Manual Payment Calculations for NAP Value Loss Crops - 2002 and Future Years
(Continued)

B Completing CCC-576B (Continued)

Item	Instructions
14	Enter the producer's share from CCC-576, item 42 or crop type. Enter up to 4 decimal places.
15	Enter the Field Market Value A from CCC-576, item 43.
16	Compute the disaster level by multiplying the following: <ul style="list-style-type: none"> • Field Market Value A recorded in item 15, times • 50 percent.
17	Enter the Dollar Value of Inventory After Disaster for the crop and crop type from CCC-576, item 44. Note: If any portion of the eligible crop identified in item 15 is determined to have any dollar value after disaster, or may re-establish a dollar value for the portion of the crop and crop type, that portion of the crop and type must be counted as having the dollar value assigned in item 15.
18	Enter the Dollar Value of Ineligible Causes of Loss from CCC-576, item 45.
19	Determine Field Market Value B by adding the following: <ul style="list-style-type: none"> • Dollar Value of Inventory After Disaster determined in item 17, plus • Dollar Value of Ineligible Causes of Loss determined in item 18.
20	Determine the crop loss by subtracting the following: <ul style="list-style-type: none"> • disaster level determined in item 16, minus • Field Market Value B determined in item 19.

--Section 2 Issuing NAP Payments*1310 Overview****A Supporting Files for Integrated Payment Processing**

The NAP payment process is an integrated process that reads a wide range of files to determine whether a payment should be issued and the amount that should be issued. For payments to be calculated correctly, all supporting files must be updated correctly, including:

- NAP application for payment file
- crop table to determine the unharvested and prevented planted payment factors, if applicable
- eligibility file to determine whether the producer is eligible for payment
- name and address file to determine:
 - producer's name and address
 - if a producer:
 - has elected to receive payment by direct deposit
 - has an assignment or joint payee
 - is in bankruptcy status
 - has a claim or receivable
 - is dead, missing, or incompetent
- entity file for joint operations to determine the members of the joint operation and each member's share of the joint operation
- combined entity file for members of a combination
- payment limitation file for multi-county and combined producers to determine the effective payment limitation amount for that producer in the county issuing the payment.--*

1311 Prerequisites for Issuing Payments

A Introduction

*--Actions must be completed before issuing payment to ensure that the producer or entity is eligible for payment.

B Actions Completed Before Issuing Payments

The following contains the actions that must be completed before issuing NAP payments. COC, CED, or designee shall ensure each action is completed.

Step	Action
1	CCC-770 NAP has been completed for approved contracts.
2	CCC-770 Eligibility has been completed for approved contracts.
3	Overpayments have been: <ul style="list-style-type: none"> • computed for all programs for the current year and any applicable prior years • transferred to CRS or had corrective action taken to resolve any overpayment listed in error • established in CRS according to 67-FI for all outstanding debts for nonautomated programs.
4	Ensure that the Financial Services System has been updated to reflect assignment and joint payment information for all CCC-36's and CCC-37's that have been received.
5	Ensure that the NAP reconciliation report has been printed and listed conditions are corrected, as applicable.

--*

--1312 Applying Payment Limitation*A Rule**

The payment limitation for NAP benefits is \$100,000 per “person”. For additional information on payment limitation provisions, see paragraph 34.

B Applying the \$100,000 Payment Limitation

Payments issued to multi-county producers shall be limited to the amount allocated to each County Office for counties in which the producer has filed an application. The payment process will limit the payment to effective limitation in the payment limitation file. See 2-PL for additional information on payment limitation allocations.

C When Payment Limitation is Reached

When the sum of payments in the payment history file or pending payment file exceeds the effective payment limitation for the “person”, the following messages will be printed on the nonpayment register:

- “Producer Has Reached Payment Limitation”
- “Payment Limitation Has Been Exceeded”.

Refer to paragraph 1432 for additional information on nonpayment register messages.

1313 Accessing the NAP Payment Software

A Accessing Menu MHACP0

Access payment processing for NAP according to this table.

Step	Menu	Action
1	FAX250	ENTER "3" or "4", "Application Processing", as applicable.
2	FAX09002	If option 4 was selected on Menu FAX250, then select the appropriate county.
3	FAX07001	ENTER "11", "PFC/Compliance".
4	M00000	ENTER "1", "NAP and Disaster".
5	MH0000	ENTER "2", "Non-insured Assistance Program".
6	MHB0YR	Enter appropriate crop year for processing.
7	MHB000	ENTER "6", "Payment Processing".

B Example of Menu MHACP0

The following is an example of Menu MHACP0.

1314 Payment Processing

A Computing Payments

The automated payment process is an integrated process that reads a wide range of files to:

- determine whether a payment should be issued
- calculate the amount that should be issued.

The following describes the system processing sequence to calculate a NAP payment for producers through the payment process.

Step	Action Performed by the System
1	Reads the Application for Payment file to ensure that COC has approved the producer's application for payment.
2	Reads the crop table to determine the payment rate, unharvested and prevented planted payment factors, carrying capacity, and grazing period days, if applicable, for each crop and crop type for the selected producer.
3	<p>Calculates the loss amount for each crop and crop type for the selected producer. The loss amounts are "totaled" for the crop by the payment grouping.</p> <p>Rounds the result to whole dollars.</p> <p>The following forms can be used to verify gross payment amounts:</p> <ul style="list-style-type: none"> • CCC-576A according to paragraph 1280 or 1283 for yield-based crops • CCC-576B according to paragraph 1281 or 1284 for value loss crops • CCC-576C according to paragraph 1282 for grazing crops.
4	<p>For joint operations, determines the following from the entity file:</p> <ul style="list-style-type: none"> • members of the joint operation • each member's actual share by reading the entity file.
5	<p>Reads the eligibility file and the gross revenue ineligibility file for the selected producer and members of joint operations, if applicable, to determine whether the producer or member is eligible for payment.</p> <p>*---Note: See subparagraph 1276 J for eligibility conditions applicable to NAP.--*</p>

*--1314 Payment Processing (Continued)

A Computing Payments (Continued)

Step	Action Performed by the System						
6	<p>Reads the name and address file to obtain:</p> <ul style="list-style-type: none"> • name and address for the producer • refuse payment flag • assignment and joint payee flags • nonresident alien flag receivable • claim flag • other agency claim flag • bankruptcy flag • deceased flag • missing flag • incompetent flag. 						
7	<table border="1"> <thead> <tr> <th data-bbox="380 787 466 823">Step</th> <th data-bbox="466 787 1482 823">Action</th> </tr> </thead> <tbody> <tr> <td data-bbox="380 823 466 1188">1</td> <td data-bbox="466 823 1482 1188"> <p>Determines the net payment amount for each crop, by multiplying the following:</p> <ul style="list-style-type: none"> • calculated payment amount, determined in step 3, times • member share, if applicable. <p>Rounds the result to whole dollars.</p> <p>Note: At this level, crop is defined by the crop, crop type, planting period, intended use, and practice.</p> </td> </tr> <tr> <td data-bbox="380 1188 466 1472">2</td> <td data-bbox="466 1188 1482 1472"> <p>Totals the net payment amounts for all crop types with the same payment grouping (pay crop code, pay type code, and planting period), by completing the following:</p> <ul style="list-style-type: none"> • adds positive calculated payment amounts • subtracts negative calculated payment amounts. <p>Note: Refer to paragraph 1278 for information on payment groupings.</p> </td> </tr> </tbody> </table>	Step	Action	1	<p>Determines the net payment amount for each crop, by multiplying the following:</p> <ul style="list-style-type: none"> • calculated payment amount, determined in step 3, times • member share, if applicable. <p>Rounds the result to whole dollars.</p> <p>Note: At this level, crop is defined by the crop, crop type, planting period, intended use, and practice.</p>	2	<p>Totals the net payment amounts for all crop types with the same payment grouping (pay crop code, pay type code, and planting period), by completing the following:</p> <ul style="list-style-type: none"> • adds positive calculated payment amounts • subtracts negative calculated payment amounts. <p>Note: Refer to paragraph 1278 for information on payment groupings.</p>
Step	Action						
1	<p>Determines the net payment amount for each crop, by multiplying the following:</p> <ul style="list-style-type: none"> • calculated payment amount, determined in step 3, times • member share, if applicable. <p>Rounds the result to whole dollars.</p> <p>Note: At this level, crop is defined by the crop, crop type, planting period, intended use, and practice.</p>						
2	<p>Totals the net payment amounts for all crop types with the same payment grouping (pay crop code, pay type code, and planting period), by completing the following:</p> <ul style="list-style-type: none"> • adds positive calculated payment amounts • subtracts negative calculated payment amounts. <p>Note: Refer to paragraph 1278 for information on payment groupings.</p>						

--*

1314 Payment Processing (Continued)

A Computing Payment (Continued)

Step	Action Performed by the System
8	Reads the payment limitation file to determine the effective payment limitation for multi-county producers and members of combinations.
9	Determines prior payments issued to the producer or member. If the producer or member received payments, the prior payments are accumulated first by crop type and then by payment grouping.
10	<p>Computes the total payment to be issued to the producer by subtracting prior payments issued from earned payment amounts determined in step 7.</p> <p>If the earned payment amounts determined in step 7 are greater than prior payments issued, the system will determine whether the producer or member can be paid because of payment limitation. If the producer has not reached payment limitation, the earned payment amounts can be issued to the producer or member up to the effective payment limitation.</p>
11	Accumulates the earned payment amounts computed in step 10 and sends 1 total payment amount to the accounting system.

--1315 NAP Payment Processing for Crop Years 2001 Through 2006*A Payment Authorization Requests**

NAP automated payment processing for crop years 2001 through 2006 has been disabled. Complete the actions in subparagraph B for payment authorizations for crop years 2001 and 2002 or subparagraph C for crop years 2003 through 2006.

See subparagraph 1365 F if an overpayment has occurred for a 2001 through 2006 NAP payment.--*

Note: If an appeal to NAD results in a determination in the producers favor, County Offices shall ensure that **all** documentation is reviewed and acted upon by COC before requesting payment authorization from the National Office.

Example: Producer appeals COC decision about the notice of loss. Producer does not file the application for payment pending the outcome of NAD's decision. NAD's decision is in favor of the producer. Producer is now required to file the application for payment and COC is required to review and act on the application for payment before the case is forwarded to the National Office.

--B Crop Year 2001 and 2002 Payment Authorization Requests--

To receive authorization to issue 2001 or 2002 NAP payments, County Offices shall submit the following documentation to the State Office:

- explanation of why payment was not issued
- CCC-471
- CCC-576
- CCC-576E, if available
- completed CCC-576A, CCC-576B, or CCC-576C, as applicable
- PPH print from the NAP payment menu for each:
 - producer
 - affected member of joint operations
 - combined producer

*--1315 NAP Payment Processing for Crop Years 2001 Through 2006 (Continued)

B Crop Year 2001 and 2002 Payment Authorization Requests (Continued)--*

- * * * MABDIG for each:
 - producer
 - affected member of joint operations

*--**Note:** MABDIG should display the year of the payment. If that MABDIG is not available, provide an available MABDIG closest to the year of the payment request.--*

- NCT pages, as applicable
- excerpt of COC minutes about the case, if applicable
- CCC-257, if applicable

Note: For 2002 cases involving a transfer of coverage, the following additional documentation shall be submitted:

- original CCC-471 for the transferor
- CCC-471 for the transferee
- CCC-577
- PPH for both transferor and transferee.

Notes: PPH shall be printed by selecting the applicable menu options from the enabled 2001 or 2002 NAP menus. An accounting history or transaction statement will **not** be accepted in place of PPH from the NAP processing menus.

If the automated forms were not printed before the installation of County Release No. 515 for 2001 processing or County Release No. 543 for 2002 processing, County Offices are no longer able to generate and print those forms, with the exception of PPH. Any required forms that were not printed before the software being disabled shall be **completed manually** and submitted with the other required documentation.

--1315 NAP Payment Processing for Crop Years 2001 Through 2006 (Continued)*C Crop Year 2003 Through 2006 Payment Authorization Requests**

To receive authorization to issue 2003 through 2006 NAP payments, County Offices shall--* submit the following documentation to the State Office:

- explanation of why payment was not issued
 - CCC-471
 - CCC-576
 - CCC-576E, if available
 - completed CCC-576A, CCC-576B, or CCC-576C, as applicable
 - CCC-452
 - PPH print from the NAP payment menu for each:
 - producer
 - affected member of joint operations
 - combined producer
 - MABDIG for each:
 - producer
 - affected member of joint operations
- *--**Note:** MABDIG should display the year of the payment. If that MABDIG is not available, provide an available MABDIG closest to the year of the payment request.--*
- NCT pages, as applicable

--1315 NAP Payment Processing for Crop Years 2001 Through 2006 (Continued)*C Crop Year 2003 Through 2006 Payment Authorization Requests (Continued)--***

- excerpt of COC minutes about the case, if applicable
- CCC-257, if applicable
- for cases involving a transfer of coverage, the following additional documentation shall be submitted:
 - original CCC-471 for the transferor
 - CCC-471 for the transferee
 - CCC-577
 - PPH for both transferor and transferee.

Notes: PPH shall be printed by selecting the applicable menu options from the enabled NAP menu. An accounting history or transaction statement will **not** be accepted in place of PPH from the NAP processing menus.

County Offices are no longer able to generate and print automated NAP forms, with the exception of PPH after installation of the following software:

- County Release No. 557 for 2003 processing
- County Release No. 584 for 2004 processing
- County Release No. 610 for 2005 processing
- *--County Release No. 636 for 2006 processing.--*

D State Office Responsibility

State Offices shall:

- review the documentation submitted by County Offices to ensure that:
 - the payment should be issued
 - all applicable documentation has been provided
- forward the documentation to PECD, CPB using either of the following methods:
 - FAX to 202-720-0051, Attention: Sandy Bryant
 - overnight mail to: USDA, FSA, PECD, CPB
Attn: Sandy Bryant
Room 4756 South Building
1400 Independence Avenue, SW
Washington, DC 20250.

1316-1320 (Reserved)

1321 Issuing Payments

A Processing Payments

--County Offices shall follow the steps in this table to issue payments for 2007 and subsequent years. See paragraph 1315 for issuing 2001 through 2006 NAP payments.--

Notes: County Offices **are not authorized** to issue typewritten checks.

If a condition occurs that prevents the payment from being issued through the automated payment software:

- County Offices shall immediately contact the State Office to explain the circumstances surrounding the situation
- State Offices shall:
 - provide guidance on correcting the condition preventing the payment from being issued
 - contact PECD if additional guidance is needed.

Failure to follow the provisions of the paragraph about typewritten checks could result in disciplinary action.

Step	Action	Result
1	Access Menu MHACP0 according to paragraph 1313.	
2	ENTER "1", "Issue Payments", and PRESS "Enter".	Screen MHACPRT2 will be displayed.
3	Screen MHACPRT2 allows the user to select the printer where the pending and nonpayment registers should be sent after payments have been computed. Enter the printer ID number and PRESS "Enter".	Screen MHACPA01 will be displayed.

-----
                Enter 'ALL' For All Producers

                OR      Producer Last Four Digits of ID:

                OR      Producer Last Name
                        (Enter Partial Name To Do An Inquiry)

Enter=Continue  Cmd3=Previous Menu

```

--*

1322 Payment Selection Screen MHACPA01 (Continued)

B Error Messages on Screen MHACPA01

The following describes the error messages that may be displayed on Screen MHACPA01 when selecting a payment processing method.

IF the following message is displayed...	THEN...	Action
"Producer is Not on the NAP Application for Payment File."	an ID number was entered, but a match was not found on the application for payment file.	Ensure that the correct ID number is entered or select the producer by entering the producer's last name
"Selected Producer ID or range of Producer ID's conflicts with the Producer ID or range of Producer ID's on Workstation XX."	payment for the producer, or 1 of the randomly selected producers, is being processed on another workstation.	PRESS "Enter" to terminate the request.
--"Must enter 'All' and Last Name, Last 4."--	"Enter" was pressed without selecting a producer on Screen MHACPA01.	Select a specific producer or all producers * * * .
* * *	* * *	* * *
"Invalid ID Number - Please Try Again."	an ID number was entered that is not on the name and address file.	Ensure that the correct ID number is entered or select the producer by entering the producer's last name.
"No Producer Selected - Please Try Again."	the last 4 digits of an ID number were entered, but a match was not found on the name and address file.	Ensure that the correct last 4 digits of the ID number are entered or select the producer by entering the producer's last name.
* * *	* * *	
<ul style="list-style-type: none"> • "Entry Must Be Blank When *--Entering All."--* • "Entry Must Be Blank When Entering Last 4 of Producer ID." • "Entry Must Be Blank When Entering a Producer Last Name." 	an entry was recorded in more than 1 producer selection field.	Enter producer selection data in only 1 field.

*--1323 Batch Check and Printing Control Screen MHACPN01

A Example of Screen MHACPN01

After all payment records for selected producers have been processed and the payment amounts have been calculated, Screen MHACPN01 will be displayed if payments can be issued to at least 1 producer that was selected on Payment Selection Screen MHACPA01.

Screen MHACPN01 will be displayed with the number of work records:

- to be processed
- that have been processed
- remaining to be processed.

Note: The number of work records listed **does not** always match the number of CCC-184's to be printed or the number of EFT's to be processed.

Example: If the producer has an assignment and part of the payment is being used to fulfill the assignment, two CCC-184's will be printed, but only 1 work record will be displayed for processing.

The following is an example of Screen MHACPN01.

```

MHACPN              107-Tulare              ENTRY              MHACPN01
2001 NAP Payments          Version: AD67    01-14-2002  18:29  Term E0
-----
          BATCH CHECK AND PRINTING CONTROL

Warning  Record count does not accurately reflect check
          count especially when 'A' or 'O' batches are processed.

          28 Check records to be processed
           0 Have been processed
          28 Records remain to be processed

Enter (Y)es to start or continue a Batch Print Processing.
Enter (N)o to suspend the Batch Print Processing.

Only one "Y" entry will be accepted. One "N" entry will suspend all batches.

          17 "B" (regular payments) work records to be processed
           3 "A" (assignments) work records to be processed
           8 "O" (claims/receivables) work records to be processed

                                           Enter-Continue
    
```

--*

***--1323 Batch Check and Printing Control Screen MHACPN01 (Continued)**

B**Sorting Payable
Records**

For NAP payments, payables are sorted into the following 3 categories.

- “B”atch - payments have no special circumstances. These records are sent in batches of 200 or less.
- “A”ssignment - payments marked in the name and address file as having an assignment or joint payee form on file. These records are sent in batches of 100 or less.
- “O”nline - payments marked in the name and address file as having 1 of the following flags set to “Y”:
 - receivable
 - claim
 - other agency claim
 - bankruptcy
 - deceased
 - missing
 - incompetent.

These records are sent in batches of 50 or less.

Note: The “O” batch of payments requires user intervention. See 6-FI.--*

Continued on the next page

***--1323 Batch Check and Printing Control Screen MHACPN01 (Continued)**

C**Selecting Batches
to Print or
Suspend**

Batches of payments may be selected for processing in several different ways. The following provisions apply to batch payment processing.

- When a batch of payments is selected, that entire batch must be completed before selecting another batch to be printed.
- Batches may be selected in any order.
- After a batch of payments completes printing, the option to select that batch is no longer available.

Payment batches may also be suspended for processing at a later time. The following provisions apply to suspending or suspended payment batches.

- “N” can be entered next to any payment batch with work records still to be processed and all remaining batches will be suspended.
- If a batch of payments is suspended on Screen MHACPN01 after a portion of the payments in that batch have been printed, that batch must be completed before another batch can be selected.
- If a batch of payments was suspended on Screen MHACPN01, on Menu MHACP0, ENTER “8”, “Continue Suspended Payment Batch”, to continue processing the suspended payments batch.--*

Continued on the next page

1323 Batch Check and Printing Control Screen MHACPN01 (Continued)

D Batch Print Capability

The following table lists the options available on Screen MHACPN01.

Selection	Action	Result
Start batch print processing on either of the following batches: <ul style="list-style-type: none"> • “B” • “A”. 	ENTER “Y” in the field before either of the following: <ul style="list-style-type: none"> • “B” batch • “A” batch. 	Accounting-Checkwriting Screen ANK00201 will be displayed to enter CCC-184 information. See 6-FI.
Start batch print processing on batch “O”.	ENTER “Y” in the field before “O” batch.	Screen ABK10001 will be displayed. See 6-FI. <p>Notes: Screen ABK10001 allows the user to enter amounts in the “Other Payees” field. This field can be used to process payments for producers with name and address flags set to “Y” for:</p> <ul style="list-style-type: none"> • receivable • claim • other agency claim • bankruptcy • deceased • missing • incompetent • nonresident alien. <p>The amount of the setoff and the payee should be known before accessing this batch.</p>
Suspend batch print processing on any of the following batches: <ul style="list-style-type: none"> • “B” • “A” • “O”. 	ENTER “N” in the field before any of the following: <ul style="list-style-type: none"> • “B” batch • “A” batch • “O” batch. 	Records are sent to the interim holding file where they remain until option 8, “Continue Suspended Payment Batch”, is accessed from Menu MHACPO. <p>Note: These records must be processed before accessing any other payments on the terminal.</p>

--1324 NAP Funds Control Verification--

A Funds Control Verification

NAP uses the e-funds accounting process which controls funding allotments and monitors program spending and halts program disbursements when the funding allocation has been exhausted. The payment process will function in the normal manner up to the point of sorting the payables into the applicable payment batches.

A check will be performed to ensure that adequate funds are available to process all pending payments in the county.

If the accumulated net payment amount for all pending payments:

- exceeds the funding allotment for the County Office, then:
 - the payment process will be aborted without any payables being sorted into applicable batches
 - a rejected payment report, as described in subparagraph B, will be printed
 - the County Office can process payments individually, or in smaller batches, for producers or farms unless or until an increased funding allotment is obtained
- does not exceed the funding allotment for the County Office, the payables will be sorted into the applicable payment batches in the normal manner.

B Rejected Payment Report

A rejected payment report will be printed from data on the pending payment file when NAP funding is insufficient for the payment batch being processed.

The following is an example of the rejected payment report that will print when the payment process is aborted on the NAP program side.

State Name	United States Department of Agriculture			Prepared: 99/99/9999
County Name	Farm Service Agency			Page: XXXX
	Program Name			
	Rejected Payment Register			
Farm Number	Producer Name	Producer ID and Type	Crop	Net Payment
9999999	XXXXXXXXXXXXXXXXXXXXX	999-99-9999 X	XXXXXX	\$999, 999, 999
9999999			XXXXXX	\$999, 999, 999
9999999			XXXXXX	\$999, 999, 999
9999999			XXXXXX	\$999, 999, 999
9999999	XXXXXXXXXXXXXXXXXXXXX	99-9999999 X	XXXXXX	\$999, 999, 999

1325-1349 (Reserved)

--Section 3 Canceling Payables*1350 Canceling Erroneous Payables**

A**Introduction**

After payment processing has been completed, County Offices shall review transaction statements to ensure that the correct disbursements have been generated. If an error is determined, the payable **shall be** canceled. To cancel the payment, on Menu MHACPO, ENTER "2", "Cancel Payables".

B**When to Cancel Payables**

Payables **shall be** canceled using the NAP application software, **only** when original NAP payable amounts are incorrect and the following apply:

- CCC-184 is available (County Office has physical possession of CCC-184)
- direct deposit records have not been queued or transmitted.

Extra caution **shall be** observed when canceling payables to ensure that:

- correct payables are being canceled
- only payables for which CCC-184 is in the office or the direct deposit records have not been queued or transmitted to the producer's financial institution are being canceled
- payables are being canceled through the proper application.

Note: See subparagraph D for additional information on when the payable shall **not** be canceled through the NAP application software.--*

Continued on the next page

*--1350 Canceling Erroneous Payables (Continued)

C**When to Correct Payable Through the Accounting Application**

In some situations, data in the accounting application needs to be corrected and a substitute CCC-184 issued. Use the accounting cancel/issue substitute option according to 1-FI when any of these situations apply:

- payee on an original CCC-184 is incorrect but payable amount is correct
- 1 or more CCC-184's in a printed batch needs to be reprinted
- CCC-184 is lost, stolen, or destroyed
- CCC-184 is expired.

Note: If the computer-generated CCC-184 numbers on CCC-184's do not match the preprinted CCC-184 numbers, see 1-FI, paragraph 233.

D**When Not to Cancel Payables Through NAP Application Software**

Payables **shall not** be canceled from the NAP application software when either of the following situations apply:

- CCC-184 is not available (County Office does not have physical possession of CCC-184)
- direct deposit record has been queued or transmitted.

Once CCC-184 has been issued to the producer or the direct deposit record queued or transmitted, an overpayment or underpayment situation exists if the payable was incorrect. Maintain a copy of the Application for Payment with the notation that an overpayment has occurred. Forthcoming procedure and software will provide for processing the overpayment. Issue additional payment amounts if the producer was underpaid.--*

E

Examples of Payable Cancellation Situations

The following table provides examples of when payables shall be canceled and which application should be used for the cancellation.

Situation	Action	
Something on CCC-576 was entered in the system incorrectly. CCC-184: <ul style="list-style-type: none"> • was generated for the incorrect amount • has not been issued to the producer. 	Cancel the payable through the NAP application by: <ul style="list-style-type: none"> • canceling all payables associated with CCC-184 • correcting the situation that caused the incorrect payment to be issued • reissuing the payment through payment processing. 	
Something on CCC-576 was entered in the system incorrectly. CCC-184: <ul style="list-style-type: none"> • was generated for the incorrect amount • has been issued and mailed to the producer. 	Do not cancel the payable. Correct the situation that caused the payment to be calculated incorrectly.	
	IF the original CCC-184 resulted in the producer being...	THEN...
	underpaid	issue an additional payment to the producer.
	overpaid	procedure and software will be forthcoming to process the overpayment.
CCC-184 was lost, stolen, or destroyed and notification has been received from KC-ITSDO that CCC-184 has not been negotiated.	Issue a substitute CCC-184 using the accounting cancel/issue substitute option according to 1-FI.	
CCC-184 has expired, but the statute of limitations has not elapsed.

***--1351 Canceling Payables Through the NAP Payment Application**

A

Introduction

The NAP payment cancellation process has been developed to restrict the number of payables that are displayed on Cancel Screen MHACPA02. This:

- ensures that the correct payables are displayed for a requested producer
- reduces the possibility that the wrong payable will accidentally be canceled.

County Offices shall take extra caution to ensure that the correct payable is selected for cancellation according to paragraph 1340.

B

How to Cancel Payables

Use the following table to cancel erroneous payments that **have not been issued** to the producer.

Reminder: Do **not** cancel the payable if:

- CCC-184 has been mailed to the producer
- EFT has been queued or transmitted to the producer’s financial institution.

Step	Action	Result
1	Access Menu MHACP0 according to paragraph 1313.	
2	On Menu MHACP0, ENTER “2”, “Cancel Payables”, and PRESS “Enter”.	Screen MHACP007 will be displayed.

Step	Action	Result
7	Screen ANK52010 requires the user to specify whether or not CCC-184 is available. How this question is answered will determine whether receivables are or are not created. For fiscal tracking purposes, it is very important that this question be answered accurately.	
	IF CCC-184 is...	
	THEN on Screen ANK52010... <ul style="list-style-type: none"> • ENTER "Y" to answer the question, "Is the check to be canceled available?" • PRESS "Enter". 	Screen ANK53005 will be displayed. Follow 6-FI to complete the cancellation process.
	<ul style="list-style-type: none"> • ENTER "N" to answer the question, "Is the check to be canceled available?" • PRESS "Enter". 	Screen ANK52020 will be displayed. Follow 6-FI to properly establish the receivable.

--*

*--1352 Cancellation Screen MHACPA02

A Example of Screen MHACPA02

NAP payments can only be canceled if both of the following are entered on Screen MHACPA02:

- producer identification, by entering either of the following:
 - ***
 - the producer’s last name
 - last 4-digits of the producer’s ID number
- transaction number associated with the “unit total” payable issued to the identified producer.

Note: See paragraph 1406 for additional information on the PPH print and how “unit total” records can be identified.

The payment cancellation process has been developed to restrict the number of payables displayed on Screen MHACPA02. This:

- ensures that the correct payables are displayed for a requested producer
- reduces the possibility that the wrong payable will accidentally be canceled.

The following is an example of Screen MHACPA02.

*--

MHACPA	107-TULARE	SELECTION	MHACPA02
2001 NAP Cancel Screen	Version: AE36	01-14-2002 16:28	Term E0
Enter Producer Last Four Digits of ID: OR Producer Last Name (Enter Partial Name To Do An Inquiry) AND Transaction Number			
Cmd3=Previous Menu		Enter=Continue	

--*

1352 Cancellation Screen MHACPA02 (Continued)

B Error Messages

The following describes error messages that may be displayed on Screen MHACPA02 when processing payments.

Recommendation: The PPH print includes all payables issued to the producer with the transaction number for each payable. It is recommended that the County Office use the PPH print to verify the payable to be canceled.

IF the following message is displayed...	THEN...	Action
“Enter * * * Last 4 of ID or Last Name AND Transaction Num.”	“Enter” was pressed without selecting a producer and transaction number on Screen MHACPA02.	Select a specific producer and enter the associated transaction number for the payable to be canceled.
“Transaction Number Must be Entered.”	a producer ID number was entered, but the “transaction number” field was left blank.	Enter the associated transaction number for the payable to be canceled.
“Total Record NOT Found on Payment History for Selected Transaction Number.”	a valid transaction number was entered for a payable associated with the producer, however the transaction number entered is not for the “unit total” record.	Enter the transaction number associated with the record for the “unit total” payable to be canceled. Refer to PPH to determine transaction numbers. Note: See paragraph 1406 for additional information on the data printed on PPH.
“Producer Does Not Have an Active Record on the Payment History File.”	a valid producer was selected, but there are no records on the payment history file associated with the selected producer.	Ensure that the correct ID number is entered or select the producer by entering the producer’s last name.

1352 Cancellation Screen MHACPA02 (Continued)

B Error Messages (Continued)

IF the following message is displayed...	THEN...	Action
“Invalid Transaction Number for Selected Producer.”	a valid producer was selected and there are records on the payment history file associated with the producer, but the transaction number entered does not match the transaction number for any payable associated with the producer.	Enter the transaction number associated with the record for the “unit total” payable. Refer to PPH to determine transaction numbers. Note: See paragraph 1406 for additional information on the data printed on PPH.
“Invalid ID Number - Please Try Again.”	an ID number was entered that is not on the name and address file.	Ensure that the correct ID number is entered or select the producer by entering the producer’s last name.
“No Producer Selected - Please Try Again.”	the last 4-digits of an ID number was entered, but a match was not found on the name and address file.	Ensure that the correct last 4-digits of the ID number are entered or select the producer by entering the producer’s last name.
*** “Entry Must Be Blank When Entering Last 4 of Producer ID.”	an entry was recorded in more than 1 producer selection field.	Enter producer selection data in only 1 field.
“Selected Producer ID or Range of Producer ID’s conflicts with the Producer ID or Range of Producer’s ID on Workstation XX.”	cancellation for the producer is being processed on another workstation.	PRESS “Enter” to terminate the request.

***--1353 Payable Cancellation Screen MHACOA01**

**A
Example of
Screen
MHACOA01**

After a payable has been selected on Cancel Screen MHACPA02, Screen MHACOA01 will:

- be displayed
- display data from the payment history file to allow the user to verify the correct payable has been selected.

The following information is displayed on Screen MHACOA01:

- producer name, ID number, and ID type
- transaction number for the “unit total” record
- payment issue date
- net payment amount.

Note: Since the payable was selected by entering the transaction number on Screen MHACPA02, only 1 payable will be displayed for cancellation on Screen MHACOA01.

The following is an example of Screen MHACOA01.

```

MHACOA                107-Tulare                SELECT                MHACOA01

**Error Messages
on Screen
MHACOA01**

The following table describes the error messages that may be displayed on Screen MHACOA01 and the action that shall be taken.

IF the following message is displayed...	THEN...	Action
"Invalid Response."	something other than "X" was entered in the "SEL" field	ENTER "X" to select the payable for cancellation.
	something other than "Y" or "N" was entered in the "Has the payment been mailed or transmitted to the producer?" field	ENTER "Y" or "N".
"If Selection is correct, PRESS 'Cmd5' to verify."	the payable was selected for cancellation and required field entries have been entered.	<p>Do either of the following:</p> <ul style="list-style-type: none"> • if the selected payable is correct, PRESS "Cmd5" again to complete the cancellation • if the selected payable is not correct, PRESS "Cmd7" to end processing. <p>Warning: After "Cmd5" is pressed, user will not have another opportunity to end processing without canceling the payable.</p>

***--1354 Canceling NAP Payment Process**

A**Overview**

Paragraphs 1321 through 1323 provide procedure for the NAP payment process and steps to be taken during system processing. Automated software is working correctly; however, a problem results when users cancel the payment process from the system console.

B**Payment Processing**

Paragraph 1323 specifically refers to Batch Check and Printing Control Screen MHACPN01. This screen shows that payables have been sorted into 3 categories of “B” for batch, “A” for assignment, and “O” for online. Also, the Pending Payment Register and Nonpayment Register are sent to the printer. At this point in processing, some users are choosing to cancel the payment process from the system console.

The payment process should **not** be canceled once processing has begun. As a result of canceling the payment process:

- the payment data for all “B”, “A”, and “O” batches is left behind on the system in such a way that the data can no longer go through the accounting process
 - there is no way to complete issuing payments to producers in those payment batches as the system is designed to continue processing a properly suspended payment batch only
 - producers will not be issued a NAP payment
 - County Offices will require assistance from the National Help Desk if a NAP payment process has been erroneously canceled.--*
-

Continued on the next page

***--1354 Canceling NAP Payment Process (Continued)**

C

**Identifying an
Erroneously
Canceled
Payment Process**

County Offices can recognize the problem in 1 of 2 ways.

- A single producer is selected for processing on NAP Selection Screen MHACPA01. If that producer was involved in a previously canceled payment batch, the payment screens will display as if a payment is being calculated, but will return the user to NAP Selection Screen MHACPA01 without displaying Batch Check and Printing Control Screen MHACPN01.
- After running a payment batch, any producer involved in the previously canceled payment batch will not be listed on either the pending or nonpayment register.

The National Help Desk should be contacted if a NAP payment has been erroneously canceled.--*

1355-1364 (Reserved)

--Section 4 Overpayment Processing*1365 General Overpayment Provisions****A Introduction**

The NAP payment process is an integrated process that reads a wide range of files to determine whether payments issued to a producer were earned in full or in part.

The process for determining overpayments is similar to the process for computing payments. See paragraph 1314 for additional information on the process for computing payment amounts.

B Running the Overpayment Process

Overpayments may be calculated at any time by 1 of the following methods:

- specific producer
- all producers
- randomly selected producers.

However, the system will force an “ALL” process to be run every 60 calendar days. If it has been 60 calendar days since the last “ALL” overpayment batch has been run, the following message will be displayed, “The Overpayment File is more than 60 calendar days old. All overpayments must be run; do you want to run an all overpayment cycle at this time? ENTER ‘Y’ to run the all cycle or ‘N’ to end this process.”

Note: An “ALL” overpayment batch must be completed the first time option 1, “Compute Overpayment”, on Menu MHACO2 is accessed.

If this message is received, overpayments may not be processed by a single producer or by randomly selected producers until the “ALL” batch has been completed.

Note: Each time the overpayment process is run, the previous overpayment file will be deleted.--*

1365 General Overpayment Provisions (Continued)**C Required Processing**

Overpayments shall be calculated for all producers at least once every 60 calendar days to ensure that:

- producers are timely notified of overpayments
- the finality rule will not apply.

D Collecting Overpayments

County Offices shall take necessary action to collect overpayments **immediately** upon determining that a legitimate overpayment exists. Before an overpayment is transferred to CRS, County Offices shall:

- verify the debt is actually owed to CCC
- correct the condition causing the overpayment if the overpayment is not legitimate.

E Overpayment Less Than \$35

For overpayment amounts less than \$35, County Offices shall transfer the overpayment to CRS according to this section. If the receivable amount is:

- less than \$10, follow 67-FI to perform a small balance write-off
- \$10 or greater but less than \$35, notify the producer of the debt according to 67-FI. If the debt is not repaid within 60 calendar days, transfer the receivable to the claims system according to 67-FI. Process the claim according to 64-FI.

***--F NAP Overpayment Processing for Crop Years 2001 Through 2006**

The NAP overpayment menu option for crop years 2001 through 2006 was disabled at the same time as the NAP payment software for the same crop years. If an overpayment is determined for a 2001 through 2006 NAP payment, County Offices must establish a manual receivable using the Common Receivables Function in the Accounting application. County Offices shall follow instructions in 67-FI to establish the manual receivable.--*

1366 Charging Interest

A Introduction

*--Program interest shall be charged on all NAP overpayments to producers when COC has determined fraud, scheme, or device for the producer.

B When Program Interest Applies

A producer will be charged program interest if COC determines that the producer did either of the following:

- fraudulently represented any act affecting a determination
- knowingly adopted a scheme or device that tends to defeat the purposes of the program.

Program interest for ineligible producers shall be charged from the date of disbursement. The system will compute this interest. See subparagraph 1379 B.--*

***--1367 Debt Basis Codes**

A Introduction

The debt basis code is the code transferred to CRS that identifies the reason for the debt. The system will default to the appropriate code coinciding with the message printed on the overpayment register. Under certain conditions, the displayed debt basis code may be changed. However, it is important that the debt basis code transferred to CRS is correct to track all overpayments.

B Overpayments Found as Result of Audits

If an overpayment is discovered as the result of an audit, the first 2 digits of the debt basis code must be changed to "19". The system will then require that the audit number that identified the overpayment be entered in the "Audit No." field.--*

1367 Debt Basis Codes (Continued)

C Allowable Basis Codes

The appropriate debt basis code will be displayed on Screen MHACOF01; however, in some cases the code displayed should be changed to * * * “10-423” for fraud, scheme, or device.

This table identifies the system-displayed debt basis codes and specifies whether the code can be changed.

IF the overpayment message is...	THEN the system will default the basis code to...	AND the debt basis code...

1372 Computing Overpayments

A Processing Overpayments

County Offices shall compute overpayments according to the following.

Step	Action	Result	
1	Access Menu MHACO2 according to paragraph 1371.		
2	ENTER "1", "Compute Overpayments", and PRESS "Enter".	Screen MHACPRT2 will be displayed.	
3	Screen MHACPRT2 allows the user the select the printer where the overpayment register should be sent after overpayments have been computed. <ul style="list-style-type: none"> • Enter the printer ID number. • PRESS "Enter". 	Screen MHACPA01 will be displayed.	
4	Screen MHACPA01 provides users with several options for processing overpayments. Select either specific producers or all producers according to the following.		
	Selection	Action	Result
	Process overpayments for all producers.	*--ENTER "ALL" in the "Enter 'All' for All Producers" field,--* and PRESS "Enter".	The overpayment process will run for all producers on the payment history file to determine which producers are overpaid.
	Process overpayments for a selected producer.	Enter 1 of the following, and PRESS "Enter": * * * <ul style="list-style-type: none"> • last 4 digits of the producer's ID number in the "Producer Last Four Digits of ID" field • producer's last name in the "Producer Last Name" field. *--Note: A partial name may be entered to perform an inquiry.--*	If the selected producer is on the payment history file, the overpayment process will run for the selected producer to determine whether the producer is overpaid. Note: If more than 1 producer is found on the name and address file matching the criteria entered, Screen MACR04-01 will be displayed to allow the user to select the desired producer.
	* * *	* * *	* * *
5	After the overpayment computation process has completed: <ul style="list-style-type: none"> • Menu MHACO2 will be redisplayed • the overpayment register will be sent to the printer selected in step 3.

***--1373 Transferring Overpayment Amount to CRS**

A

Action Required Before Establishing Receivables

Before any overpayment is transferred to CRS, County Offices shall verify that the overpayment amount listed on the overpayment register is actually a debt due by the producer. If it is determined that the overpayment is **not** a legitimate overpayment, County Offices shall correct conditions causing the producer to be erroneously listed on the overpayment register. This will ensure that the overpayment is not inadvertently transferred to CRS.

B

Transferring Amount to CRS

Once it has been determined that the producer is actually overpaid and that a receivable should be established, County Offices shall follow the steps in this table to transfer the overpayment to CRS.

Step	Action	Result
1	Access Menu MHACO2 according to paragraph 1371.	
2	ENTER "3", "Transfer Overpayments to CRS", and PRESS "Enter".	Screen MHACPA01 will be displayed. Note: The message, "No Overpayments To Be Selected", will be displayed if there are not any calculated overpayments on the overpayment file.

--*

**B
Sorting
Overpayment
Records**

Overpayments are sorted into 2 categories for the NAP program.

- “B”atch - regular overpayments that have no special circumstances. These records are sent in batches of 75 or less.
- “O”nline - overpayments for producers with an entity type of 02, 03, 05, and 07. These records are sent in batches of 10 or less.--*

Continued on the next page

***--1380 Batch Overpayment Printing Control Screen MHACON01 (Continued)**

C**Selecting Batches
to Print or
Suspend**

Batches of overpayments may be selected to complete the CRS transfer process and print the initial notification letter. The following provisions apply to the batch overpayment processing.

- When an overpayment batch is selected, that entire batch must be completed before selecting the other batch.
- Batches may be selected in either order.
- After an overpayment batch completes printing, the option to select that batch is no longer available.

Overpayment batches may also be suspended for processing at a later time. The following provisions apply to suspending or suspended overpayment batches.

- An “N” should be entered next to either overpayment batch with work records still to be processed and all remaining batches will be suspended.
 - If a batch of overpayments is suspended on Screen MHACON01 after part of the overpayments in that batch have been printed, that batch must be completed before another batch can be selected.
 - If a batch of overpayments was suspended on Screen MHACON01, then access option 8 on Menu MHACO2 to continue processing the suspended overpayment batch.--*
-

1381-1384 (Reserved)

***--1385 Canceling Overpayments**

A Introduction

If it is discovered that an overpayment has been transferred to CRS erroneously, the overpayment cannot be canceled until subsequent transactions, such as collections applied to the receivable, have been canceled in CRS.

Note: See 67-FI for deleting transactions.

If an error is determined, the overpayment shall be canceled by accessing option 4, “Cancel Overpayments” on Menu MHACO2.

B Steps to Cancel Overpayments

The overpayment cancellation process has been developed to restrict the number of overpayments displayed on Screen MHACOS01. This:

- ensures the correct overpayment is displayed for a requested producer
- reduces the possibility that the wrong overpayment is accidentally canceled.

County Offices shall take extra caution to ensure the correct overpayment is selected for cancellation by printing PPH according to paragraph 1406.

Follow the provisions of this table to cancel erroneous overpayments.

Step	Action	Result
1	Access Menu MHACO2 according to paragraph 1371.	
2	ENTER “4”, “Cancel Overpayments”, and PRESS “Enter”.	Screen MHACPA02 will be displayed.

1386 Cancellation Selection Screen MHACPA02

A Example of Screen MHACPA02

Overpayments can only be canceled if both of the following are entered on Screen MHACPA02:

- producer identification by entering any of the following:
 - * * *
 - the producer's last name
 - last 4 digits of the producer's ID number
- transaction number associated with the overpayment for the identified producer.

Note: See paragraph 1406 for additional information on the PPH print.

This is an example of Screen MHACPA02:

*--

MHACPA	107-TULARE	SELECTION	MHACPA02
2001 NAP Cancel Screen		Version: AE39	04-03-2002 13:43 Term E0
	Producer Last Four Digits of ID:	_____	
OR	Producer Last Name	_____	
	(Enter Partial Name To Do An Inquiry)		
AND	Transaction Number	_____	
Cmd3=Previous Menu		Enter=Continue	

--*

1386 Cancellation Selection Screen MHACPA02 (Continued)

B Error Messages

The following describes the error messages that may be displayed on Screen MHACPA02 when canceling overpayments.

Recommendation: The PPH print includes all transactions associated with the producer along with the transaction number for each transaction. It is recommended that County Offices use PPH to verify the overpayment to be canceled.

Error Message	Explanation	Action
"Enter * * * Last 4 of ID or Last Name AND Transaction Num."	"Enter" was pressed without entering both a producer and transaction number on Screen MHACPA02.	Select a specific producer and enter the associated transaction number for the overpayment to be canceled.
"Transaction Number Must Be Entered."	A producer ID number was entered, but the transaction number field was left blank.	Enter the associated transaction number for the overpayment to be canceled.
"No Overpayment Record Found for Selected Producer and Transaction Number."	A valid transaction number was entered for an overpayment associated with the producer; however, the transaction number entered is for a member of a joint operation.	Cancel the overpayment using the joint operation's ID number and transaction number. Refer to PPH to determine the transaction number. Note: See paragraph 1406 for additional information on the data printed on PPH.
"Producer Does Not Have an Active Record on the Payment History File."	A valid producer was selected, but there are no receivable records on the payment history file associated with the selected producer.	Ensure that the correct ID number is entered or select the producer by entering the producer's last name.
"Invalid ID Number - Please Try Again."	An ID number was entered that is not on the name and address file.	Ensure that the correct ID number is entered or select the producer by entering the producer's last name.

*--1386 Cancellation Selection Screen MHACPA02 (Continued)

B Error Messages (Continued)

Error Message	Explanation	Action
"No Producer Selected - Please Try Again."	The last 4 digits of an ID number were entered, but a match was not found on the name and address file.	Ensure that the correct last 4 digits of the ID number are entered or select the producer by entering the producer's last name.
<ul style="list-style-type: none"> • "Entry Must Be Blank When Entering a Producer ID and Type." • "Entry Must Be Blank When Entering Last 4 of Producer ID." 	An entry was recorded in more than 1 producer selection field.	Enter producer selection data in only 1 field.
"Selected Producer ID or Range of Producer ID's Conflicts With the Producer ID or Range of Producer ID's on Workstation XX."	Overpayment for the producer is being processed on another workstation.	PRESS "Enter" to terminate the request.

--*

*--1387 Overpayment Cancellation Screen MHACOS01

A

Example of Screen MHACOS01

After an overpayment has been selected for cancellation on Screen MHACPA02, Screen MHACOS01 will be displayed with data from the payment history file to allow the user to verify that the correct overpayment has been selected. The following information will be displayed:

- producer name, ID number, and ID type
- transaction number for the overpayment record
- date the receivable was established
- net overpayment amount.

Note: Because the overpayment was selected by entering the transaction number on Screen MHACPA02, only 1 overpayment will be displayed for cancellation on Screen MHACOS02.

To continue with the cancellation process, ENTER “X” next to the overpayment record displayed, and PRESS “Cmd5”.

This is an example of Screen MHACOS02.

```

MHACOS                      107 -TULARE                      SELECT      MHACOS01

***--1388 Overpayment Register**

**A
About the
Overpayment
Register**

When overpayments are computed, an overpayment register will be printed that includes information for each selected producer that is overpaid. This register informs County Offices of the reason the overpayment has been calculated and the amount of the overpayment.

Note: An overpayment register will be printed even if none of the producers in the selected batch are overpaid. The message, “No Exceptions for Selected Producers”, will be printed on the overpayment register.

**B
Reviewing the
Nonpayment
Register**

The overpayment register is automatically printed after all selected overpayments have been computed. County Offices shall review the overpayment register to ensure that:

- producers are timely notified of overpayments
 - the finality rule will not apply.
-

**C
DD Review**

DD’s shall review the overpayment register to ensure that County Offices are:

- running the overpayment process in a timely manner
 - collecting overpayments in a timely manner
 - correcting information in the system that creates an erroneous overpayment condition.--*
-

Continued on the next page

***--1388 Overpayment Register (Continued)**

**D
Register
Retention**

County Offices shall retain copies of NAP overpayment registers for 1 year from the date the overpayment register is prepared.

**E
Reprinting the
Overpayment
Register**

The overpayment register for the most recent computations can be reprinted by accessing option 2, "Reprint Overpayment Register", on Menu MHACO2.

Note: The overpayment register cannot be reprinted if the system date is more than 7 calendar days past the date the overpayments were last computed.--*

1389 Overpayment Register Messages

A Exception Messages on the Overpayment Register

The following lists the messages that may be displayed on the overpayment register.

Message	Reason for Message
--“Payment History Record-- Only”	Producer has a payment recorded on the payment history file and the following conditions exist: <ul style="list-style-type: none"> • COC payment approval date for the application for payment is not recorded in the system • application for payment has been deleted • application for payment has been disapproved for payment • refuse payment flag for the producer in the name and address file is set to “Y”.
“Prior Payment Exceeds Current Payment”	Producer’s payment recorded on the payment history file is more than the calculated payment amount earned by the producer. Reasons for this may be: <ul style="list-style-type: none"> • acres or yield have been reduced for applicable crops • production has been increased for applicable crops • inventory amounts have changed reducing the producer’s crop loss on a value loss crop.
“Payment Limitation Has Been Exceeded”	Payments issued to the producer now exceed the producer’s payment limitation allocation.
“Producer Is a Joint Operation”	This is an informational message. The entity displayed has an entity code of “02” or “03”.
“One or More Members of the Joint Operation Have Been Rejected”	The producer is a joint operation in which at least 1 member of the joint operation is in an overpayment condition.

Section 5 Payment Registers and Reports

1400 Overview

A Introduction

There are a variety of reports and registers that have been developed to assist County Offices with processing payments. These include:

- pending payment registers for the “B”, “A”, and “O” payment batches
- nonpayment registers for producers that cannot be paid
- *--CCC-576E’s--*
- PPH’s.

B Accessing Menu MHAC01

The following reports for NAP payment processing can be generated from Reports Menu MHAC01:

- *--CCC-576E’s--*
- PPH’s.

Note: The pending and nonpayment registers are automatically generated after a payment batch has completed processing. These reports cannot be regenerated.

Access Menu MHAC01 according to the following table.

Step	Menu	Action
1	FAX250	ENTER “3” or “4”, “Application Processing”, as applicable.
2	FAX09002	If option 4 was selected on Menu FAX250, then select the appropriate county.
3	FAX07001	ENTER “11”, “PFC/Compliance”.
4	M00000	ENTER “1”, “NAP and Disaster”.
5	MH0000	ENTER “2”, “Non-insured Assistance Program”.
6	MHB0YR	Enter appropriate crop year for processing.
7	MHB000	ENTER, “6”, “Payment Processing”.
8	MHACP0	ENTER “5”, “Reports”.

1401-1405 (Reserved)

A**Introduction**

PPH is 1 of the most important reports generated from the payment system. This report identifies all records that have been written to the payment history file, including:

- all payments issued to producers
- payment amounts attributed to members of joint operations
- all payables that have been canceled
- receivable amounts transferred to CRS
- canceled receivables.

County Offices shall use PPH to verify and ensure that payments are issued properly.

B**How the Payment History File Gets Updated**

The following 3 types of records written to the payment history file will be printed on PPH:

- producer-level records for payments issued to producers and joint operations
- member-level records for amounts attributable to members of joint operations
- “unit total” records reflecting the total combined payment issued to the producer.

For payments issued to producers, 1 record is written to the payment history file for:

- each crop, crop type, and unit
- the defined payment crop definition on the crop table.

If the producer is a joint operation, a record is also written to the payment history file for each member sharing in each crop, crop type, and unit.--*

Continued on the next page

1406 PPH Print (Continued)

C

Information on PPH

Depending on the type of record printed, data for certain fields will not be printed. The following table describes the information on PPH.

Item/Field	Description	
Producer Name, Address, and ID Number		
Payment Date	Date the payable or total record was either issued or canceled from the payment history file.	
Joint Op/Member ID Number	Data will only be printed in this field if PPH is for a joint operation or a member of a joint operation.	
	IF PPH is for...	THEN...
	joint operation	<ul style="list-style-type: none"> • a record will be printed on PPH for each member of the joint operation that was eligible for a payment • the member's ID number will be printed in this field.
member	the joint operation's ID number will be printed in this field.	
Unit Number	This field represents the unit number recorded on the application for payment.	
Crop	Abbreviated crop name from the application for payment will be printed in this field.	
Type	Crop type from the application for payment will be printed in this field.	
Planting Period	Planting period from the application for payment will be printed in this field.	
Pay Indicator	<p>This field represents the calculation method used to calculate the payment. The calculation methods are as follows:</p> <ul style="list-style-type: none"> • "YB" - yield based crop calculation • "VL" - value loss crop calculation; excluding ginseng and floriculture • "FG" - grazing crop calculation • "GN" - ginseng crop calculation • "FL" - floriculture crop calculation. <p>*--Note: This field will print for 2001 and 2002 processing years only.--*</p>	

Continued on the next page

C
Information on
PPH (Continued)

Item/Field	Description	
Payment Type	Identifies the status or type of transaction that has been recorded.	
	IF the payment type is...	THEN the record...
	"CHK/EFT"	is for a payment issued to the producer. The record with this indicator represents the total combined payment issued to the producer. Note: The "CHK/EFT" will only be printed on the "unit total" records. This is the record that is actually sent to the accounting system for checkwriting or EFT processing.
	"CANCEL"	has been canceled through the NAP payment cancellation process.
	"RECV"	is for an overpayment amount that was sent to CRS.
	"C/RECV"	is for an overpayment amount that was sent to CRS, but has been canceled through the overpayment cancellation process.
	blank	is 1 of the following: <ul style="list-style-type: none"> • crop payable record • for the joint operation • for a member of the joint operation. These records cannot be selected during the payable cancellation process.

--*

Continued on the next page

C
Information on
PPH (Continued)

Item/Field	Description
Transaction Number	<p>A system-assigned number used to uniquely identify each payable generated through the NAP payment process. The transaction number is also sent to the accounting system and printed on the producer transaction statement.</p> <p>The transaction number is very important for payables that need to be canceled. To alleviate potential erroneously canceled payables, the transaction number must be entered on Cancel Screen MHACPA02 with the producer ID number or name. Since the record with "CHK/EFT" is the only record sent to the accounting system, the transaction number for the "CHK/EFT" or "unit total" record is the only transaction number that can be used on Screen MHACPA02. This record represents all payables that have been combined together for the producer. When a payment is canceled for a "unit total" record, than all records associated with the "unit total" record are also canceled.</p>
Gross Payment	<p>Amount of the calculated payment before payment limitation has been applied.</p>
Pay Limit Reduction	<p>Amount that cannot be issued to the producer because payment limitation was met on that record.</p> <p>Amounts listed in the payment limitation reduction field represent the amount of the reduction at the time the payment was computed. A "total" payment limitation reduction is not printed on the PPH.</p> <p>Note: Records are only written to the payment history file if a payment was issued. If the entire payable was not issued because of payment limitation reductions, then the record is not printed on the PPH. County Offices shall use the nonpayment register to determine which payments are not issued and the exact reason the payment was not issued.</p>
Net Payment	<p>Amount of the calculated payment after payment limitation has been applied. This is the amount actually issued to the producer.</p>

--*

1407 Printing PPH

A Printing the Report

PPH can be printed for a producer or for members of joint operations. Print PPH according to the following.

Step	Action	Result
1	Access Menu MHACP0 according to paragraph 1313.	
2	*--On Menu MHACP0: <ul style="list-style-type: none"> • ENTER "5", "Reports" • PRESS "Enter". 	Menu MHAC01 will be displayed.
3	On Menu MHAC01, ENTER "1", "Producer Payment History", --* and PRESS "Enter".	Screen MHACPRT2 will be displayed.
4	On Screen MHACRPT2, enter the appropriate printer ID and PRESS "Enter".	Screen MHACO601 will be displayed.
5	Screen MHACO601 provides users with several options for printing PPH's.	
	IF the user wants to print PPH for...	
	THEN...	
	all producers	*--ENTER "ALL" in the "Enter 'All' for All Producers" field.--* Screen MHACO601 will be redisplayed.
	a selected producer	enter 1 of the following and PRESS "Enter": * * * <ul style="list-style-type: none"> • last 4 digits of the producer's ID number in the "Producers Last Four Digits of ID" field • producer's last name in the "Producer Last Name" field. Screen MHACO601 will be redisplayed.
	* * *	* * *

1408-1412 (Reserved)

***--1413 CCC-576E, NAP Estimated Calculated Payment Report**

A Introduction

CCC-576E is a computer-generated document that lists all the calculated payment--* amounts for a producer based on the data currently loaded in the NAP Application for Payment file.

CCC-576E:

- summarizes the payment data, by payment crop groupings
- calculates a projected payment the producer may be eligible to receive.

Reminder: Crops are grouped for payment purposes by unit, payment crop code, payment crop type, and planting period. All matching payment crop codes, payment type codes, and planting periods are considered 1 crop for payment purposes. County Offices shall review the Crop Table File Report to determine which crops are grouped together.

Note: See subparagraph E for CCC-576E distribution requirements.

--1413 CCC-576E, NAP Estimated Calculated Payment Report (Continued)--

B Approved Notice of Loss Flag

The approved Notice of Loss flag will indicate whether or not an approved Notice of Loss is on file for the crop and crop type. How this flag is set is very important in the calculation process. Paragraph 322 requires all production in the unit to be reported, however a loss on a crop or crop type without an approved Notice of Loss will not be included in the calculation process. If the Notice of Loss has been filed and is approved, both a gain or loss for the crop calculation will be included in the payment calculation for the crop group. The following examples for wheat show how the “approved loss” flag affects the payment calculation for the crop.

Pay Crop Name	Crop Type	Apr. Loss Flag	Actual Calc. Payment	Revised Calc. Payment shown on CCC-576E	Calc. for Pay Group
---------------	-----------	----------------	----------------------	---	---------------------

Example 1: For crops **with** an approved Notice of Loss. Wheat is shown with a crop type of winter and spring and both crops and crop types have an approved Notice of Loss. The calculated payment for both crops and crop types will be included in the calculation for the pay group and unit.

WHEAT	HRW	“Y”	\$ 2081	\$ 2081	
WHEAT	HRS	“Y”	\$ 372-	\$ 372-	\$ 1709

Example 2: For 1 crop **without** an approved Notice of Loss and 1 crop with an approved Notice of Loss. Wheat is shown with a crop type of winter and does not have an approved Notice of Loss. A crop **loss** is the result of the calculated payment for this crop and crop type. Wheat is also shown with a crop type of spring and has an approved Notice of Loss. This crop also had a loss for the calculated payment. Since the wheat crop and crop type without the approved Notice of Loss had a loss for the calculated payment, the payment must be reduced to zero. Otherwise, the calculated payment for the pay group and unit will be erroneously increased by a crop and crop type that has not met all the provisions to receive a NAP payment.

WHEAT	HRW	blank	\$ 1651	\$ 0	
WHEAT	HRS	“Y”	\$ 2500	\$ 2500	\$ 2500

Example 3: For 1 crop **without** an approved Notice of Loss and 1 crop with an approved Notice of Loss. Wheat is shown with a crop type of winter and does not have an approved Notice of Loss. A crop **gain** is the result of the calculated payment for this crop and crop type. Wheat is also shown with a crop type of spring and has an approved Notice of Loss. This crop also had a loss for the calculated payment. Since the wheat crop and crop type without the approved Notice of Loss had a gain for the calculated payment, the calculated payment must be included in the calculation for the pay group and unit to account for all production.

WHEAT	HRW	blank	\$ 840-	\$ 840-	
WHEAT	HRS	“Y”	\$ 2800	\$ 2800	\$ 1960

--1413 CCC-576E, NAP Estimated Calculated Payment Report (Continued)--**C Information on CCC-576E**

CCC-576E contains information for all crop losses for the selected producer, including the following:

- detail payment calculation by crop, crop type, and intended use

***--Note:** The crop listed on CCC-576E is the pay crop name, not the crop name.--*

- calculated NAP payment amount unit totals by payment groupings as defined by the crop table
- total projected amount.

CCC-576E is organized and contains data according to the following:

- Part A - yield-based crops, excluding crops with an intended use of RS or SE
- Part B - value loss crops, excluding ginseng, floriculture, and crops with an intended use of RS or SE
- Part C - grazing crops
- Part D - ginseng crop losses
- Part E - floriculture crop losses
- Part F - apple losses
- Part G - apricot losses
- Part H - asparagus losses
- Part I - chia losses
- Part J - chicory losses
- Part K - gailon losses
- Part L - greens losses
- Part M - peach losses
- Part N - pear losses

--1413 CCC-576E, NAP Estimated Calculated Payment Report (Continued)--

C Information on CCC-576E (Continued)

- Part O - plumcot losses
- Part P - plum losses
- Part Q - prune losses
- Part R - rambutan losses
- Part S - rhubarb losses
- Part T - strawberry losses
- Part U - tangerine losses
- Part V - tomato losses
- Part W - yu cha losses
- Part X - beet losses
- Part Y - onion losses
- Part Z - pepper losses.

1413 CCC-576E, NAP Estimated Calculated Payment Report (Continued)

C Information on CCC-576E (Continued)

If a producer does not have crop data for at least 1 crop for a particular part, the message, “An application has not been filed for this type of crop.”, will be printed in the applicable part of CCC-576E.

The following table describes information printed on CCC-576E.

Field	Description
Producer Name, Address, and ID Number	*--Producer name, mailing address, 4-digit ID number, and ID type.--* CCC-576E’s are producer specific; therefore, only one CCC-576E will be generated for each producer.--*
Part A - Gross Payment Data for Yield-Based Crops	
<p>Part A contains data for all yield based crops loaded in the NAP Application for Payment file and will print in Part A with the following 3 exceptions:</p> <ul style="list-style-type: none"> • if the crop is ginseng or floriculture, or starting in 2003, is a crop group with an intended use of “RS” or “SE”, the yield-based data, if present, prints in CCC-576E, Parts D through Z, as applicable, with all data and headings for Part A <p>Note: See this subparagraph for CCC-576E organization for a list of applicable parts on the report.</p> <ul style="list-style-type: none"> • if the yield-based crop also has a grazing record present for the pay group, the yield-based data prints in CCC-576E, Part C, with all the data and headings for Part A • if the yield-based crop had an intended use of “FG” or “SD” and part or all of the acres had a final use of “GZ”, the yield-based data, if present, prints in CCC-576E, Part C, with all the data and headings for Part A. <p>The following information is printed for each crop record on the Application for Payment file.</p>	
Payment Level	The payment level of 55 percent.
Pay Crop Name	Pay crop name for the crop.
Pay Crop	Pay crop from the crop table for the specified crop, crop type, and intended use for the crop on which the application for payment was filed.
Pay Type	Pay type from the crop table for the specified crop, crop type, and intended use for the crop on which the application for payment was filed.
Planting Period	Applicable planting period for the specified crop.
Unit Number	Unit number for the producer and crop.
Crop Type	Crop type name or abbreviation.
Fnl Use	Intended or final use for the crop, as applicable.

--1413 CCC-576E, NAP Estimated Calculated Payment Report (Continued)--

C Information on CCC-576E (Continued)

Field	Description
Stage	<p>Indicates whether the crop record is for:</p> <ul style="list-style-type: none"> • harvested acreage (H) • unharvested acreage (UH) • prevented planted acres (PP).
Practice	<p>Practice for the specified crop type and intended use.</p> <ul style="list-style-type: none"> • “I” for irrigated acreage • “N” for nonirrigated acreage <p>Note: A separate line entry will be present if the producer has both irrigated and nonirrigated acres.</p>
Aprv Loss	<p>Indicates whether an approved Notice of Loss is on file. This field is used to determine if a resulting payment calculation will or will not be included in the payment calculation for the unit.</p> <ul style="list-style-type: none"> • “Y” indicates the approved Notice of Loss is on file. • A blank indicates an approved Notice of Loss is not on file. <p>Note: Refer to subparagraph B for information about the approved Notice of Loss flag and how it affects the calculated payment.</p>

Field	Description	
Share	Producer's share for the specified crop and crop type.	
--Planted-- Acres	For harvested and unharvested planted acreage, as applicable, for the crop, crop type, and final use.	
PP Acres	Prevented planted acreage for the crop, crop type, and intended use.	
Yield	Producer's approved yield, irrigated or nonirrigated as applicable, for the crop, crop type, and intended use.	
Disaster Level	Calculated disaster level for the producer, crop, crop type, and intended use.	
	Calculation for harvested and unharvested crop stages.	
	Step	Calculation
	1	Calculated acreage attributable to the producer is the result of multiplying: <ul style="list-style-type: none"> • acres, times • producer share.
	2	Calculated disaster level for the producer is the result of multiplying: <ul style="list-style-type: none"> • result of step 1, times • approved yield, times • disaster level percent of 50 percent.
	2002 and future years calculation for prevented planted crop stage.	
	Step	Calculation
1	Calculated disaster level is the result of: <ul style="list-style-type: none"> • total acres for the pay group, plus • prevented planted acres for the crop and crop type, times • 35 percent. 	

Note: Disaster level does not apply to a 2001 crop and crop type with a prevented planted crop stage.

1415-1424 (Reserved)

***--1425 Pending Payment Registers**

**A
About the
Pending
Payment
Registers**

When payments are processed, pending payment registers will be printed for each selected producer that is eligible for payment. This register informs County Offices of the following:

- amounts of the payment that has been computed
- which payment batch the payment will be processed through.

According to subparagraph 1324 B, the payment batches are as follows.

- “B”atch - regular payments that have no special circumstances. These payments require no user intervention.
- “A”ssignment - payments marked in the name and address file as having an assignment or joint payee form on file. These payments require no user intervention, but may require more time to print because they will read the assignment/joint payee file.
- “O”nline - payments marked in the name and address file as having a flag set for any of the following:
 - nonresident alien
 - receivable
 - claim
 - other agency claim
 - bankruptcy
 - deceased
 - missing
 - incompetent.

Note: Pending payment registers will only be printed for the payment batches being processed.

**B
Reviewing the
Pending
Payment
Registers**

The pending payment register is automatically printed after all selected payments have been computed. County Offices shall review the registers to ensure that payments have been computed properly. If a payable is not computed properly, County Offices shall:

- cancel CCC-184 or EFT immediately after it is processed
 - correct the condition that caused the payable to be computed improperly
 - reprocess the payment.--*
-

Continued on the next page

1425 Pending Payment Registers (Continued)

C

Information on the Pending Payment Register

The following information is printed on the pending payment register.

Field	Contents of Field
ID Number and Type	Producer ID number and ID type. Note: If the payment is for a joint operation, the joint operation will be printed. Members will not be printed.
Name	Name of producer. Note: If the producer or entity is a joint operation, the name of the joint operation appears first followed by the names of all the members eligible for payment.
Unit	Unit number for the crop on the application for payment.
Crop	Crop name from the application for payment.
IND	Indicator specifying that the payable is for: <ul style="list-style-type: none"> • “YB” - yield based crop loss • “VL” - value loss crop loss; excluding ginseng and floriculture • “FG” - grazing crop loss • “GN” - ginseng crop loss • “FL” - floriculture crop loss. *--Note: This field will print for 2001 and 2002 processing years only.--*
Gross Payment	Calculated payment amount before payment limitation has been applied.
Pay Limit	Amount the payable is being reduced because of payment limitation. Note: Amount will only be printed in this field for the crop on which the producer reaches payment limitation. If a payable is completely reduced to zero because of payment limitation, the payable will be printed on the nonpayment register.
Net Payment	Calculated payment amount after payment limitation has been applied.

1426-1430 (Reserved)

***--1431 Nonpayment Register**

A

About the Nonpayment Register

When payments are processed, a nonpayment register will be printed for each selected producer that is not eligible for payment. This register informs County Offices of the reason the payment is not being issued.

Note: A nonpayment register will be printed even if all the producers in the selected batch are being paid. The message, “No Exceptions for Selected Producers”, will be printed on the nonpayment register.

B

Reviewing the Nonpayment Register

The nonpayment register is automatically printed after all selected payments have been computed. County Offices shall review the nonpayment register to identify conditions that are preventing payments from being issued and take the appropriate action.

1432 Nonpayment Register Messages

A

Exception Messages

County Offices shall resolve exception messages printed on the nonpayment register according to the following table.

Message	Reason for Message	County Office Action
“Application for Payment not Approved.”	COC payment approval date for the application for payment is not recorded in the system.	Enter the COC approval date in the system according to paragraph 1016.
“Payment Computed to Zero.”	<p>The payment for the producer calculated to zero for either of the following reasons:</p> <ul style="list-style-type: none"> • production on other crops in the payment group offset the producer’s loss • the calculated loss multiplied times the member’s share, if applicable, is less than 50 cents. 	Ensure that all application data is loaded correctly in the system.

--*

Continued on the next page

*--1432 Nonpayment Register Message (Continued)

A
Exception
Messages
(Continued)

Message	Reason for Message	County Office Action
“Prior Payment Exceeds Current Payment.”	Payments issued exceed the total payments the producer may have earned.	Ensure that all application for payment data is loaded correctly in the system and determine whether the producer is overpaid.
“Payment Limitation Allocated to Zero.”	A payment cannot be issued to a multi-county producer because the applicable payment limitation is set to zero.	Contact the control county to request a payment limitation allocation.
“Payment Limitation has been Exceeded.”	Producer has exceeded the effective payment limitation.	Contact the control county to request an increase in the payment limitation allocation. If the payment limitation cannot be increased, determine whether the producer is overpaid.
“Producer has Reached Payment Limitation.”	Producer has reached the effective payment limitation.	Contact the control county to request an increase in the payment limitation allocation. If the payment limitation cannot be increased, the producer is not eligible to receive any additional payments.
“Producer has Refused All Payments.”	Refuse payment flag in the name and address file is set to “Y”.	If the producer has: <ul style="list-style-type: none"> • refused program payments, disregard the message • not refused program payments, change the refuse payment flag to “N” in the name and address file.
“Producer is a Federal Entity.”	Entity type in the name and address file is “08”.	Do not issue payment to a Federal entity.

A Exception Messages (Continued)

Message	Reason for Message	County Office Action
“No Eligibility Record on File.”	Either: <ul style="list-style-type: none"> • an eligibility record is not on the system for the producer • the PCW flag for the producer is blank. 	Update the producer’s eligibility flags, according to COC determinations, according to 3-PL. Note: Print Report MABDIG to determine the invalid flags.
“Multiple Invalid Eligibility Flags.”	The individual or entity being paid has multiple invalid eligibility flags.	
“Person Determination Flag * * * is Invalid.”	Person determination flag in specified county is invalid. See paragraph 1276 to determine valid flags.	
“Person Determination Flag for Joint Operation * * * is Invalid.”		
“Person Determination Flag for Member * * * is Invalid.”		
“AD-1026 Flag * * * is Invalid.”	AD-1026 flag in specified county is invalid. See paragraph 1276 to determine valid flags.	
“AD-1026 Flag for Joint Operation * * * is Invalid.”		
“AD-1026 Flag for Member * * * is Invalid.”		

1432 Nonpayment Register Messages (Continued)

A Exception Messages (Continued)

Message	Reason for Message	County Office Action
“6-CP Flag * * * is Invalid.”	6-CP flag in specified county is invalid. See paragraph 1276 to determine valid flags.	Update the producer’s eligibility flags, according to COC determinations, according to 3-PL. Note: Print Report MABDIG to determine the invalid flags.
“6-CP Flag for Joint Operation * * * is Invalid.”		
“6-CP Flag for Member * * * is Invalid.”		
“Controlled Substance Flag * * * is Invalid.”	Controlled substance flag in specified county is “N”.	
“Controlled Substance Flag for Joint Operation * * * is Invalid.”		
“Controlled Substance Flag for Member * * * is Invalid.”		
“NAP Non-Compliance Flag * * * is Invalid.”	NAP noncompliance flag is invalid. See paragraph 1276 to determine valid flags.	
“NAP Non-Compliance Flag for Joint Operation * * * is Invalid.”		
“NAP Non-Compliance Flag for Member * * * is Invalid.”		
“NAP Gross Income Flag * * * is Invalid.”	NAP gross income flag is invalid. See *--paragraph 1276--* to determine valid flags.	
“NAP Gross Income Flag for Member * * * is Invalid.”		
--“FCIC Flag is Invalid.”		FCIC fraud flag is invalid. See paragraph 1276 to determine valid flag.--

1433-1444 (Reserved)

--Section 6 Recovery Process*1445 Using the Recovery Process****A Introduction**

If the system is interrupted for any reason while processing payments, the recovery program is executed when the option to issue payments is accessed again.

B Recovery Process

When an interruption occurs, the system attempts to automatically recover when either of the following occurs:

- the user selects any option on Menu FAX250 from the workstation that was processing payment before the interruption
- the user selects a payment option on the applicable payment processing menu.

The system recovers to the point of interruption or a report, file listing, or both print to assist in the recovery process.

C If an Interruption Is Detected

Screen MHACPRV2 will be displayed if an interruption is detected. The message, "An interruption in the payment processing has been detected. PRESS 'Enter' to attempt the recovery process. PLEASE DO NOT CANCEL.", will be displayed. Canceling the process will damage the Payment History file.

D After Recovery Is Completed

After the recovery process has been completed, Screen MHACPRV3 will be displayed. The message, "The recovery process has completed. PRESS 'Enter' to continue with the options originally selected.", will be displayed. The system then returns to the process that was originally selected on the applicable payment processing menu.

The user may now continue with original processing.--*

1446 Diagnostic Report

A When Report Will Print

If intervention is required from the National Help Desk, the Diagnostic Report is placed on the spool file. A message will be displayed instructing the user that the recovery program has printed a report. The report will be on hold. The user must release the report from the spool file.

Do not destroy the report. This report contains information that is helpful to the National Help Desk in restoring the system.

B Contacting the Help Desk

If the Diagnostic Report is received, immediately contact the National Help Desk through the appropriate State Office personnel. Ensure that the report is available to assist the National Help Desk.

C State Office Action

The State Office shall:

- immediately contact the National Help Desk
- **not** attempt to correct the County Office system.

1447-1460 (Reserved)

--Part 12 Problems Loading CCC-471's*1461 Overview****A Purpose**

This part informs State and County Offices:

- that the shell record process shall be used to timely load crop records when CCC-471's are taken for a missing crop and/or crop type on NCT, if producers pay applicable fees
- that the State Office specialist shall submit the necessary information to the National Office to correct problems on CCC-471's in a timely manner
- what documents are required for National Office review
- when manual CCC-471's can be taken
- that CCC-471's not loaded within the 7-calendar-day grace period **must** be submitted, with supporting documentation, to the National Office to be reviewed on a case-by-case basis
- how to add crops for a producer with a continuous coverage CCC-471
- what to do when incorrect producers are selected on CCC-471's.

B Exhibit 7.X

Paragraphs 1462 and 1467 refer to "Exhibit 7.X". The Exhibit 7 numbers are year specific. See the applicable Exhibit 7.X for the specific year for eligible crop.

C Reasons for Needing to Load or Reload CCC-471's

Reasons for needing to load or reload CCC-471's include, but are not limited to:

- County Office employee deleted a crop or crops from CCC-471
- CCC-577 has been approved
- crop or crop type was not on NCT
- change in administrative county was made
- crop or crops were not loaded within the 7-calendar-day grace period.--*

***--1462 Missing Crop or Crop Type**

A Timely Requests

It is imperative that County Offices make timely requests to the State Office so missing crops can be added to NCT to enable CCC-471's to be loaded within the 7-calendar-day grace period. State Offices shall use the shell record process to download crops to the County Offices so CCC-471's can be loaded before the application closing date or within the 7-calendar-day grace period. Follow:

- subparagraph 756 E to load a shell record for 2008 and prior years
- subparagraphs 777 B and C, to load shell record for 2009 and subsequent years.

The 7-calendar-day grace period is based on the application closing date for the crop and is **not** adjusted for weekends or holidays.

B Approved NAP Crop Not Listed on County Crop Table

If preparing CCC-471 for a crop **not** on the county crop table, but is listed in Exhibit 7.X, County Offices shall follow the steps in this table.

Step	Action	
1	IF...	THEN process...
	fewer than 3 pay groups are available to be selected	a manual CCC-471 and manual CCC-257.
	3 or more pay groups are available to be selected	an automated CCC-471 and notate the missing crop on the automated CCC-471.
2	Immediately notify the State Office of the missing crop, according to paragraph 106.	
3	If the downloaded crop is received before the end of the 7-calendar-day grace period, load the crop in the automated system.	
	Note: These steps shall be taken before the end of the 7-calendar-day grace period.	
4	If the downloaded crop is received after the 7-calendar-day grace period, submit the required documents, according to paragraph 1463, to the State Office.	

--*

*--1462 Missing Crop or Crop Type (Continued)

C Approved NAP Crop Type Not Listed on County Crop Table

If preparing an automated CCC-471 for a crop type **not** on the county crop table, but is listed in Exhibit 7.X, County Offices shall follow the steps in this table.

Step	Action
1	Select a crop type with the same pay type code.
2	Select a crop type that most closely represents the requested type in the lowest pay crop/pay type, if there is not a type with the same pay type code.
3	Record the actual requested type in brackets on CCC-471.
4	Immediately notify the State Office of the missing type, according to paragraph 106.
5	If the downloaded type is received before the end of the 7-calendar-day grace period, delete the similar type and load the correct type in the automated system. Note: These steps shall be taken before the end of the 7-calendar-day grace period.
6	If the downloaded type is received after the 7-calendar-day grace period, submit the required documents, according to paragraph 1463, to the State Office.

D Crop Not Approved for NAP

If preparing CCC-471 for a crop that is **not** listed in Exhibit 7.X, County Offices shall follow the steps in this table.

Step	Action	
1	IF...	THEN process...
	fewer than 3 pay groups are available to be selected	a manual CCC-471 and manual CCC-257.
	3 or more pay groups are available to be selected	an automated CCC-471 and notate the missing crop on the automated CCC-471.
2	Immediately notify the State Office of the missing crop, according to subparagraph 170 E.	
3	If the downloaded crop is received before the end of the 7-calendar-day grace period, load the crop in the automated system. Note: These steps shall be taken before the end of the 7-calendar-day grace period.	
4	If the downloaded crop is received after the 7-calendar-day grace period, submit the required documents, according to paragraph 1463, to the State Office.	

--*

***--1462 Missing Crop or Crop Type (Continued)**

E Crop Type Not Approved for NAP

If preparing an automated CCC-471 for a crop type that is **not** listed in Exhibit 7.X, County Offices shall follow the steps in this table.

Step	Action
1	Select the crop type that most closely represents the requested type in the lowest pay crop pay type.
2	Record the actual requested type in brackets on CCC-471.
3	Immediately notify the State Office of the missing type, according to subparagraph 170 E.
4	If the downloaded type is received before the end of the 7-calendar-day grace period, delete the similar type and load the correct type in the automated system. Note: These steps shall be taken before the end of the 7-calendar-day grace period.
5	If the downloaded type is received after the 7-calendar-day grace period, submit the required documents, according to paragraph 1463, to the State Office.

--*

--1463 Required Documentation for State Office Review*A Documentation Required for Review**

When County Offices are requesting assistance to load CCC-471's for any reason, CED's shall submit the following documentation to the State Office program specialist:

- a written explanation of the problem and request of specific action from the National Office
- a signed copy of CCC-471, manual or automated
- a copy of CCC-257, manual or automated

Note: Do **not** use a different program code on CCC-257 to process NAP service fees when taking manual CCC-471's. Follow procedure in subparagraph 24 E, and 3-FI when processing a manual CCC-257.

- diagnostic reports printed according to subparagraph 890 B.

Exception: This does **not** apply to manual CCC-471's.

Note: Additional documentation is required according to subparagraph:

- 1466 A, if an incorrect crop or crop type was selected unless instructed to do so according to paragraph 1462
- 1466 B, if an incorrect producer was selected on CCC-471.

For transfers, one CCC-577 may be completed for **all** crops and crop types being transferred to a person.

B Out-of-Balance CCC-257's

If CCC-471's taken in error result in CCC-257's being out-of-balance, State and County Offices shall notate "CCC-257 is out-of-balance" on FAX cover sheet.

If an out-of-balance CCC-257 is created, do **not** move the service fee to another CCC-257.--*

***--1464 Manual CCC-471's**

A Accepting Manual CCC-471's

Manual CCC-471's shall only be taken under the following situations. Manual CCC-471's shall be taken according to subparagraphs 23 A and 24 E, **only** if the:

- CCC-471 is late-filed
- automated system is **not** available
- crop or crop type does **not** exist in the county crop table and fewer than 3 pay groups are available to be selected for the producer.

B Loading Manual CCC-471's

County Offices should maintain all manual CCC-471's in a pending file and review the file periodically to determine which CCC-471's can be loaded in the automated system.

Manual CCC-471's shall be loaded **immediately** when the automated system or crop data is available.--*

--1465 Continuous Coverage and Selected Crops*A Continuous Coverage**

County Offices shall review the continuous coverage options provided in subparagraph 885.5 E.

There are 2 ways to add crops to a continuous coverage application:

- process the continuous coverage application and then add the additional crops on a separate CCC-471; the producer must sign CCC-471 with additional crop records
- delete the continuous coverage application and then load one CCC-471 with all crops the producer wants to have covered; the producer must sign CCC-471.

Note: Deleting a continuous coverage crop will delete **all** continuous coverage crops.

B Selected Crops

Once crops have been selected through continuous coverage or on a new CCC-471, County Offices shall **not** delete any crop unless:

- the crop was selected in error
- instructed to do so by the procedure in paragraph 1462.

An “S” indicator next to the crop indicates the crop has been selected and fees have been paid by the producer. All crops within the pay group will be eligible for NAP.--*

***--1466 Incorrect Crop, Crop Type, or Producer**

A Incorrect Crop or Crop Type Is Selected

When an incorrect crop or crop type is selected and printed on CCC-471 and the producer is still in the office, re-access application, delete the incorrect crop or crop type and add the correct crop or crop type.

If the County Office does **not** handle an incorrect crop or crop type in this manner, additional documentation is required from the County Office, including:

- why the incorrect crop was selected
- how the County Office “knows” the crop or crop type selected is incorrect.

Note: Additional documentation does **not** apply if the crop or crop type was selected according to paragraph 1462.

When the producer signs CCC-471, item 12A, they are certifying that **all information on the CCC-471 is correct**, including the selected crops, types, intended uses, and planting periods, and that the producer’s intent is to have coverage for the selected crops.--*

--1466 Incorrect Crop, Crop Type, or Producer (Continued)*B Incorrect Producer Is Selected**

When an incorrect producer is selected and the accounting portion of the application has been accessed, continue with the application process. Do **not** load the correct producer using the same money. On the automated CCC-471:

- line through the incorrect producer information and write in the correct information
- have the producer sign and date the modified CCC-471.

Immediately submit the documents required, according to paragraph 1463, to the State Office.

If the County Office does **not** handle an incorrect producer in this manner, additional information is required from the County Office, including:

- why the incorrect producer was selected
- how the County Office “knows” the selected producer is incorrect.

When the producer signs CCC-471, item 12A, they are certifying that **all information on the CCC-471 is correct**, including the producer name, and that the intent is to have coverage for the selected producer and crops, types, intended uses, and planting periods.

Immediately submit the documents required, according to paragraph 3, to the State Office.

Note: Loading a second CCC-471 will cause the accounting records to be out-of-balance.--*

--1467 Action*A State Office Action**

State Offices shall:

- remind County Offices that CCC-471's shall **not** be taken manually unless the:
 - CCC-471 is late-filed
 - automated system is unavailable
 - crop or crop type does **not** exist on the county crop table
- remind County Offices that when manual CCC-471's are not loaded timely or are loaded incorrectly when transferring data from the manual CCC-471's to the automated system, it requires extra resources to complete the task
- review the required documentation submitted by County Offices to ensure that:
 - all applicable documentation has been provided
 - CCC-471's were timely filed

Note: Only CCC-471's that were timely filed shall be submitted. Follow procedure in 7-CP for CCC-471's that were **not** timely filed, but where relief may be warranted.

- County Offices properly followed procedure
- forward the documentation to PECD, DAB using either of the following methods:
 - FAX to 202-720-4941, Attention: CDPS
 - mail to:

USDA, FSA, PECD, DAB, ATTN: CDPS
STOP 0517
1400 INDEPENDENCE AVE SW
WASHINGTON DC 20250-0517
- follow subparagraph 170 E when a crop or crop type has been requested and the crop or crop type is not listed in Exhibit 7.X, and NAP eligibility has not been determined for the crop or crop type--*

--1467 Action (Continued)*A State Office Action (Continued)**

- follow subparagraph 170 F when a crop or crop type has been requested and the crop or crop type is not listed in 2-CP, Exhibit 10.5, and NAP eligibility has not been determined for the crop or crop type
- use the shell record process when crops are requested that previously have not been loaded in NCT

Notes: Follow:

- subparagraph 756 E, to load a shell record for 2008 and prior years
- subparagraphs 777 B and C, to load a shell record for 2009 and subsequent years.

2008 and prior year records added according to subparagraph 756 B will **not** download to the County Office without a State approval flag of “Y”. Refer to subparagraph 756 B.

- research price and yield historical data to ensure that an approved yield can be processed timely
- contact the National Office immediately for guidance, if problems cannot be resolved in taking CCC-471’s.

B National Office Action

The National Office shall:

- review submitted documentation
- request additional information, if necessary
- for approved requests, provide assistance to County Offices for loading CCC-471’s in the automated system
- for denied requests, notify the State Office of the denial.

Note: Relief may be requested from DAFP, if applicable.--*

Redelegations of Authority

This table lists the redelegations of authority in this handbook.

Redelegation	Reference
<p>In routine cases, COC may redelegate, in writing, to CED the authority to act on, or sign, as applicable, CCC-576, Parts C and H.</p> <p>The redelegation must define what COC considers routine.</p>	<p>401</p>
<p>COC may redelegate, in writing, to CED and program technicians, the authority to complete and sign automated CCC-452's and CCC-452 Manuals.</p>	<p>838, Ex. 25</p>

Definitions of Terms Used in This Handbook

Abandoned

Abandoned means discontinued caring for a crop, provided care so insignificant as to provide no benefit to the crop, or failed to harvest in a timely manner.

Actual Production

Actual production is the total of the eligible crop unit's:

- harvested production
- appraised production, if not accounted for in harvested production.

Actual Production History (APH)

APH is the actual production history of the crop for the unit used to determine the approved yield for NAP purposes according to paragraph 251.

Actual Yield

Actual yield is the total amount of harvested and appraised production on a per acre or other basis, as applicable.

Added Land

Added land is land on which the producer has not been farming for a share of the crop's production on a unit for more than 2 crop years.

*--Added Practice, Type, Intended Use, or Planting Period

An added practice, type, intended use, or planting period is a practice, type, intended use, or planting period of a crop that requires a separate approved yield. If the new practice, type, intended use, or planting period of a crop does not require a separate approved yield, the production from the new practice, type intended use, or planting period of the crop will be--* included in the current APH database for the crop.

Administrative County

Administrative county is the county or counties for which the administrative FSA office is designated to make determinations, handle official records, and issue payments for the producer.

Definitions of Terms Used in This Handbook (Continued)

***--Alfalfa**

Alfalfa means a stand of either:

- pure alfalfa
- a mixture of alfalfa and grasses, legumes, or other forage in which 60 percent or more of the plant population is alfalfa.

Alfalfa Mixture

Alfalfa mixture is alfalfa and grasses, legumes, or other forages in which **less** than 60 percent of the plant population is alfalfa.--*

Animal Unit (AU)

AU is a standard expression of livestock based on a daily net energy maintenance requirement equal to 13.6 Mcal.

Animal-Unit-Day (AUD)

AUD is an expression of an expected or actual stocking rate.

Definitions of Terms Used in This Handbook (Continued)

Application Closing Date

Application closing date is the last date, as determined by CCC, producers can submit CCC-471 for noninsured crops for the specified crop year.

Appraised Production

Appraised production is production determined by FSA, RMA, FCIC, company reinsured by FCIC, or other appraiser acceptable to CCC, that was unharvested but which reflected the crop's yield potential at the time of appraisal. For the purpose of APH, appraised production specifically excludes production lost because of ineligible disaster conditions.

Approved (for CCC-576)

Approved means all requisite forms and information have been submitted according to procedure **and crop approval exists for the crop, unit, and disaster which is the basis of the application.** COC representative shall check the approved box, sign, and date.

Approved Yield

Approved yield means the APH-calculated yield approved by CCC for making NAP payments. The yield represents a unit's expected production on a per acre or other basis, as applicable, according to paragraph 254.

Aquaculture Facility

An eligible aquaculture facility is a commercial operation conducted:

- on private property
- in water in a controlled environment
- according to paragraph 182.

Aquacultural Species

Aquacultural species means any species of aquatic organism grown as food for human consumption, or fish raised as feed for fish that are consumed by humans, or ornamental fish propagated and reared in an aquatic medium by a commercial operator on private property in water in a controlled environment according to paragraph 182.

Eligible aquacultural species must be:

- seeded in the aquacultural facility
- planted or seeded in containers, wire baskets, net pens, or similar devices designed for the protection and containment of the seeded aquacultural species.

Definitions of Terms Used in This Handbook (Continued)

Assigned Production

Assigned production is the loss of production not related to natural disaster. Assignments of production are required when there is CCC-576 for an eligible crop and any of the following apply:

- it is determined that the crop's loss is because of an ineligible disaster condition or circumstances other than natural disaster and this ineligible cause of loss has not been otherwise accounted for
- unit acreage was destroyed without consent (paragraph 155)

Note: In this case, the amount of assignment for this acreage shall be equal to the guarantee.

- the producer has a contract to receive a guaranteed payment for all or a portion of the crop, as opposed to or regardless of delivery
- the producer plants the crop after the * * * final planting date

Note: See:

- paragraph 25.5 for calculating assigned production
- Part 2 for eligible and ineligible causes of loss
- paragraph 332 for converting the guarantee to assigned production.
- irrigation equipment is not capable of supplying adequate water to sustain the expected production of a normal irrigated crop

Example: The county expected yield established in the county is based on pivot irrigation. However, a producer has a different type of irrigation method called drip irrigation. Given the different type of irrigation equipment used by the 1 producer, an assigned yield shall be determined if drip irrigation would not be considered representative of the irrigated yield established.

- for annual or perennial crops, the irrigation practice is not used
- for annual crops, the supply of available water at the beginning of the crop year is not adequate
- for perennial crops, the supply of available water at the beginning of the crop year is not adequate because of a circumstance not related to a natural disaster.

Definitions of Terms Used in This Handbook (Continued)**Assigned Yield**

Assigned yield means a one-time yield assigned for a crop year in the base period according to paragraph 257 for which the producer does not file an acceptable production report by PRD.

AUD Value

AUD value is the dollar value of a daily energy requirement equivalent of 15.7 pounds of corn determined on the basis of the 5-year national average price per pound of corn.

Average Market Price

Average market price is the price or dollar equivalent per bushel, ton, etc., for an eligible crop, established by DAFP. Average market price is:

- used to calculate NAP payments
- on a harvested basis without the inclusion of transportation, storage, processing, packing, marketing, or other post-harvest expenses
- based, in part, on historical data.

Brownout

Brownout is a reduction in electric power that affects the unit.

Bypass Year

Bypass year is an APH data base entry of “B” in the yield type field indicating that the producer did not pay the service fee, and no report of acreage planted was filed.

Carrying Capacity

Carrying capacity consists of a stocking rate and the number of days grazing can normally be sustained without detrimental effects on the land resource.

Definitions of Terms Used in This Handbook (Continued)

CAT Coverage CAT coverage means a catastrophic risk protection plan of insurance offered by FCIC.

Catastrophic Coverage Catastrophic coverage means a CAT level of crop insurance available according to section 508(b) of the Federal Crop Insurance Act.

Catastrophic Loss Catastrophic loss means, as the result of an eligible cause of loss and as determined by CCC:

- prevented planting of greater than 35 percent of the intended crop acreage
- the yield loss of greater than 50 percent of the approved yield
- value loss of greater than 50 percent of the pre-disaster value
- AUD loss of greater than 50 percent of the expected AUD.

The quantity will not be reduced for any quality consideration unless a zero value is established.

Continued on the next page

Definitions of Terms Used in This Handbook (Continued)

CCC

CCC is a wholly owned Government corporation within USDA.

Certified Employee

A certified employee means employee has successfully completed Phase I training.

*--Considered Planted for 2009 and Future Years

For determining late planting for 2009 and future years, crops will be considered planted at the time the seed comes into contact with the soil upon which growth can begin.--*

Controlled Environment

A controlled environment is, with respect to those crops for which a controlled environment is expected to be provided, including but not limited to ornamental nursery, aquaculture (including ornamental fish), and floriculture, an environment in which everything that can practicably be controlled with structures, facilities, growing media (including but not limited to water, soil, or nutrients) by the producer, is in fact controlled by the producer, as determined by industry standards.

County-Expected Yield

The county-expected yield is the eligible crop yield for the administrative county, established by STC and approved by DAFP.

The county-expected yield should reflect the average production potential of the crop in the county by practice and intended use.

Coverage Period

The coverage period is the time during which coverage is available against loss of production of the eligible crop as a result of natural disaster.

Crop Year

The crop year is the period of time within which the crop is normally grown and designated by the calendar year in which the crop is normally harvested.

For crops:

- harvested over 2 calendar years, the crop year is the calendar year in which the majority of the crop would have been harvested
- grown over more than 2 calendar years, each year in the growing period will be considered as a separate crop year designated by the calendar year in which the crop sustained a loss
- for which CAT coverage is available, the crop year will be as defined by such coverage.

Definitions of Terms Used in This Handbook (Continued)**Disapproved (for CCC-576)**

Disapproved means the application cannot be approved because all required forms or information have not been furnished as required, or the application was not timely filed. COC representative shall check the disapproved box, sign and, date.

Disaster Yield

Disaster yield is the unit's total amount of harvested, appraised, and assigned production (net production) on a per acre or other basis, as applicable.

Eligible Crops

Eligible crops are any commercial agricultural crop (excluding livestock and their by-products), commodity, or acreage of a commodity grown for food or fiber for which CAT is not available.

Eligible Producer

An eligible producer is a person identified in paragraph 29.

Expected Production

Unit's expected production for a crop is equal to the smaller of the unit's reported or determined acreage multiplied by the eligible crop unit's approved yield.

Feedstuff

Feedstuff is any product, of natural or artificial origin, that has nutritional value in the ration when properly prepared.

Fiber

Fiber is a slender and greatly elongated natural plant filament, such as cotton, flax, etc., used in manufacturing.

Final Planting Date

--The final planting date is the last date upon which a normal yield can reasonably be expected. See 2-CP, subparagraph 16 A for establishing the final planting date for insurable crops.--

Floriculture

Floriculture means cut flowers or similar products of annual and perennial flowering plants grown under glass, fiberglass, and other rigid plastics, film plastic, shade cloth, natural shade, other shade, and outdoors in a container or controlled environment for commercial sale.

Food

Food is a material consisting essentially of protein, carbohydrates, and fat used in the body to sustain growth, repair, and vital processes including the crops used for the preparation of food.

Definitions of Terms Used in This Handbook (Continued)

Forage Eligible for NAP Coverage

Forage eligible for NAP coverage is:

- alfalfa consisting of a pure stand or mixture of alfalfa/grass, alfalfa/other legumes, etc. in which 60 percent or more of the plant population is alfalfa
- alfalfa mixture consisting of alfalfa/grass, alfalfa/other legumes, etc. in which less than 60 percent of the plant population is alfalfa
- other hay consisting of a stand of grass, legumes, mixes, etc. in which no alfalfa plants exist
- small grain forages, such as wheat, barley, oats, triticale, or rye
- sorghum forage
- forage soybean/sorghum
- perennial peanuts.

Fully Certified Employee

A fully certified employee means an FSA employee has successfully completed Phases I and II of LA or has had Phase I and substantial field appraisal and inspection experience to substitute for Phase II, and is knowledgeable in FCIC-approved appraisal and inspection methods.

Ginseng

The crop definition for ginseng includes both mature root, immature rootlet intended for transplant, and seed; therefore, the loss for ginseng must include the value loss for seed, mature root, and rootlet in determining more than a 50 percent loss.

Good Farming Practices

Good farming practices are the cultural practices generally used for the crop to make normal progress toward maturity and produce at least the individual unit approved yield. The practices are normally those recognized by CSREES as compatible with agronomic and weather conditions.

*--Grazing

Grazing is the consumption of forage by livestock. It is possible to estimate the amount of forage available for consumption and therefore provide coverage for losses of the potential forage for grazing.--*

Definitions of Terms Used in This Handbook (Continued)**Harvested**

A harvest crop is considered harvested when the crop is, by hand or mechanically, or by grazing of livestock, removed from the acreage.

A multiple harvest crop is considered harvested when at least 1 mature crop is, by hand or mechanically, removed from the acreage.

Crop acreage is considered harvested once crop production is taken off the crop acreage and placed in a truck or other conveyance.

Exception: Crops not normally placed in a truck or other conveyance and taken off the crop acreage, such as hay, are considered harvested when in bale, whether removed from the field or not.

Harvested Production

Harvested production includes all production of the eligible crop from the unit that can be supported by an acceptable record, including, but not limited to, production:

- gathered by hand
- grazed by livestock
- mechanically harvested.

Increased Acreage

Increased acreage is based on a comparison of the historical average acreage of the crop compared to the current year acreage.

Industrial Crop

Industrial crop is a commercial crop, or other agricultural commodity used in manufacturing. Industrial crops include castor beans, chia, crambe, crotalaria, cuphea, guar, guayule, hesperaloe, kenaf, lesquerella, meadowfoam, milkweed, plantago, ovato, sesame, and other crops specifically designated by DAFP.

Intended Use

Intended use means for what end use the crop/commodity is being grown and produced.

Livestock Feed Producer

Only for the purpose of determining approved yield, livestock feed producer means an individual or entity who conducts a commercial livestock enterprise, such as dairy, beef, or poultry, who receives more than 50 percent of net farm income from these operations.

Loss of Production

Loss of production is the unit's expected production minus net production.

Definitions of Terms Used in This Handbook (Continued)***--Mature Turfgrass Sod**

Mature turfgrass sod is that which is available for market.--*

Misrepresentation, Scheme, or Device

Misrepresentation, scheme, or device includes, but is not limited to:

- concealing any information having a bearing on the application of any of the rules governing NAP
- submitting false information to a CCC representative, including, but not limited to, COC, STC, or authorized agent or employee thereof
- creating fictitious entities for the purpose of concealing the interest of a person in a farming operation.

Multiple-Harvested Crop

A multiple-harvested crop is a crop that is harvested more than once during the same crop year from the same plant.

Example: Alfalfa hay is cut several times during the crop year. The total amount of alfalfa hay harvested from all cuttings must be summarized for the acreage.

Multiple-Planted Crop

A multiple-planted crop is a crop planted or prevented from being planted in more than 1 approved planting period in a crop year on different acreage.

Native Forage

Native forage is grass or other vegetation (forage) not meeting the definition of seeded forage.

Natural Disaster

A natural disaster is that which is identified in subparagraph 21 A.

Net Production

Net production is the **production to count** and applies when CCC-576 has been filed for the eligible crop. It includes all of the following types of unit production:

- harvested
- appraised
- assigned.

Definitions of Terms Used in This Handbook (Continued)**New Producer**

A new producer is a producer who has not been engaged in farming for a share of the production of the crop for more than 2 crop years.

Normal Harvest Date

Normal harvest date is the date harvest of the crop is normally completed in the administrative county.

Olympic Average

An Olympic average is calculated by:

- obtaining the yields of the crop for the 5 consecutive crop years immediately preceding the previous crop year
- dropping crop years with the highest and lowest yields
- averaging the yields for the remaining 3 crop years.

Operator

An operator is an individual, entity, or joint operation that is in general control of the farming operation on the farm during the crop year.

Ornamental Fish

An ornamental fish is a decorative fish produced in a commercial fishery for sale.

Ornamental Nursery Crop

Ornamental nursery crop includes decorative plants grown in a container or controlled environment for commercial sale.

***--Other Hay**

Other hay is a stand consisting of grasses, legumes, and/or other forages in which **little or no** alfalfa plants exist, including small grain forage, sorghum forage, soybean forage, and perennial peanut forage.--*

Definitions of Terms Used in This Handbook (Continued)

Perennial Peanut Forage

Perennial peanut forage is a stand of perennial peanuts * * * intended for forage for animal consumption.

* * *

Prevented Planting

Prevented planting is the inability to plant the intended crop acreage with proper equipment during the established planting period for the crop type.

Definitions of Terms Used in This Handbook (Continued)

Producer

A producer is an owner, landlord, tenant, or sharecropper who:

- shares in the risk of producing the crop
- is entitled to share in the crop available for marketing from the farm or would have shared had the crop been produced.

Production Report

A production report is a written record showing the commodity's annual production and used to determine the producer's yield for NAP purposes. See paragraph 323.

Qualifying Gross Revenues

Qualifying gross revenues mean, with respect to a "person" who receives:

- more than 50 percent of this "person's" gross income from farming, ranching, and forestry operations, the annual gross income for the taxable year from these operations
- 50 percent or less of this "person's" gross income from farming, ranching, or forestry operations, the "person's" total gross income for the taxable year from all sources.

Note: See paragraph 33.

Repeat Crop

A repeat crop is a subsequent planting of a commodity planted on the same acreage as the previous planting of the same commodity in the same crop year.

Replacement Yield

A replacement yield is a yield equal to 65 percent of the T-yield that may replace an actual or appraised yield any year in the base period when the actual or appraised yield is less than 65 percent of the T-yield because of a natural disaster.

Salvage Value

Salvage value is the dollar amount or equivalent received by or available to the producer for the quantity of the commodity that cannot be marketed or sold in any market for which a price or yield is established by CCC. The loss of quality resulting in a commodity becoming salvage must be because of natural disaster.

Definitions of Terms Used in This Handbook (Continued)**Seed Crop**

Seed crop is propagation stock commercially produced for sale as seed stock for eligible crops.

Seeded Forage

Seeded forage is acreage that is mechanically seeded with grasses or other vegetation at regular intervals, at least every 7 years, according to good farming practices.

Share

Share is the producer's percentage interest in the eligible crop as an owner, operator, or tenant at the time of planting or beginning of the crop year.

For determining eligibility for NAP payments, the producer's share will not exceed the producer's share at the earlier of the time of loss or the beginning of harvest.

Acreage or interest attributed to a spouse, child, or member of the same household may be considered part of the producer's share, unless such individual is considered a separate person according to 1-PL.

Small Grain Forage

*--Small grain forage is a stand of pure wheat, barley, oats, triticale, or rye intended for forage for animal consumption.

Sorghum Forage

Sorghum forage is a stand of sorghum intended for forage for animal consumption.

Soybean Forage

Soybean forage is a stand of soybeans intended for forage for animal consumption.--*

Substitute Yield

A substitute yield is for those producers who previously participated in NAP before the Agricultural Risk Protection Act, 2000 and reported acreage but no production, the producer may choose to substitute an assigned or zero credited yield with 65 percent of the T-yield 1 time for all assigned or zero credited yields in the APH data base for 2000 and prior years.

Definitions of Terms Used in This Handbook (Continued)

Tolerance

Tolerance is the number of acres that the reported acreage may differ from the determined acreage without either of the following:

- the total loss of benefits
- the overall accuracy of the acreage report being questioned.

Rule: Tolerance is the larger of 1 acre or 5 percent of the reported acreage, not to exceed 50 acres.

Type or Variety of a Crop

A type or variety of a crop is a scientifically recognized subspecies of a crop or commodity having a particular characteristic or set of characteristics.

T-Yield

T-yield is an estimated yield equal to the county-expected yield used to calculate individual producer-approved yields when less than 4 consecutive years of production records are available according to paragraph 260.

Unit

Unit is all acreage of the eligible crop, in the administrative county, for the crop year, under either of the following criteria:

- the person has 100 percent crop share
- acreage is owned by 1 person and operated by another person on a share basis.

Value Loss Crop

Value loss crop means ornamental nursery, Christmas trees, aquaculture, or other crops determined by DAFP that because of their unique nature do not lend themselves to yield calculations or expected yield loss situations. Eligibility for a crop categorized or value loss shall be determined based on a loss of value at the time of the disaster, as determined by DAFP.

Definitions of Terms Used in This Handbook (Continued)**Zero Acres Planted**

Zero acres planted is an APH data base entry of “Z” in the yield type field indicating an acreage report of zero acres planted, including prevented planted acres.

Zero Credited Yield

A zero credited yield is an APH data base entry of “0” in the yield type field indicating that:

- no production report was filed although an acreage report was filed for the applicable crop year
- an assigned yield already appears in the APH base period.

2003 Crop Groups

This table lists the 2003 crop codes, names, type abbreviations, pay crop codes, and pay type codes for completing CCC-471.

Note: Unless indicated otherwise, pay types listed include **all** the intended uses for a crop as specified in 2-CP, Exhibit 10.5.

***--2004 Crop Groups**

This table lists the 2004 crop codes, names, type abbreviations, pay crop codes, and pay type codes for completing CCC-471.

Note: Unless indicated otherwise, pay types listed include **all** the intended uses for a crop as specified in 2-CP, Exhibit 10.5.

***--2005 Crop Groups**

This table lists the 2005 crop codes, names, type abbreviations, pay crop codes, and pay type codes for completing CCC-471.

Note: Unless indicated otherwise, pay types listed include all the intended uses for a crop as specified in 2-CP, Exhibit 10.5.

Example of Continuous Coverage Reminder Notification Letter

*--

Richard Doe
Anytown, USA 12345

Dear _____,

Our records indicate you had (enter current crop year, i.e. 2004) NAP coverage for the crop(s) listed on the enclosed attachment.

If you wish to continue coverage of the same crop(s) for the (enter the subsequent crop year, i.e. 2005) crop year, the applicable service fee must be received in the (enter name of the administrative County Office) County Office by (enter the producer's earliest application closing date). The total service fees calculated based on (enter current crop year, i.e. 2004) coverage is \$(enter dollar amount). **Please note these fees are calculated only for crops and land administered out of this County Office.** Multi-county producers having land administered by other County Offices will be notified by those offices. The maximum service fee per producer is \$300 per administrative county, not to exceed \$900 for multi-county producers. Upon receipt of the applicable service fee, the (enter name of the administrative County Office) County Office will process your application and send you a copy of your application for coverage for the (enter the subsequent crop year, i.e. 2005) crop year.

Please note that by sending the applicable service fees, you are not required to visit the County Office and complete another CCC-471, Application for Coverage, for the applicable crop(s) listed on the attachment. However, if you are adding or deleting crop(s) not specifically listed on the attachment, or you choose not to pay the total service fees by (enter the producer's earliest application closing date) in order to have crop coverage, you must file another application for coverage and pay the applicable service fees in the administrative County Office by the application closing date for the crop(s).

Please make your check payable to "CCC".

Service fees received after (enter the producer's earliest application closing date) will be returned and continuous coverage denied. Coverage may be obtained for specific crops as long as the application closing date for that crop has not passed; however, you will have to visit the County Office and file an application for coverage.

Application closing dates for all crops are available in your local County FSA Office. If you have questions regarding additional program requirements to maintain NAP eligibility, please contact the (enter name of the administrative County Office) County FSA Office.

Note: It is important to note that coverage is not continuous from the date of initial purchase of NAP. Coverage periods are established by type of crop (i.e. annual, perennial, value loss, etc.) and these periods are established annually. For more information about coverage periods, please contact your administrative County Office.

Sincerely,

/S/ CED Name

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status.

CCC-577, Transfer of NAP Coverage

A Instructions

Producers use CCC-577 to request a transfer of NAP coverage when a change of share or sale of covered crop acreage occurs during the coverage period.

Producers shall submit the original of the completed CCC-577 in hard copy or FAX to the appropriate FSA servicing office.

The following are instructions for completing CCC-577. Producer must complete items 1 through 17B.

Item	Field Name	Instructions	
1	Transferor's Name and Address	Enter first (name or initial, as applicable) and last name and address. Note: Address is not necessary unless it has changed recently and the new address is being reported. If reporting a new address, enter "New" and the new address.	
2	Taxpayer ID No. or SSN	Enter last 4 digits of taxpayer ID or SSN.	
3	Crop	*--IF...	THEN...
		<ul style="list-style-type: none"> • all crops are being transferred to 1 transferee • only part of the crops are being transferred to the transferee 	<ul style="list-style-type: none"> • ENTER "All" • list all crops being transferred.
4	Pay Crop	• all crops are being transferred to 1 transferee	• ENTER "All"
		• only part of the crops are being transferred to the transferee	• list all pay crops being transferred
		• the pay crop is not known	• leave blank.
5	Pay Type	• all crops are being transferred to 1 transferee	• ENTER "All"
		• only part of the crops are being transferred to the transferee	• list all pay types being transferred
		• the pay type is not known	• leave blank.
6	Planting Period	• all crops are being transferred to 1 transferee	• ENTER "All"
		• only part of the crops are being transferred to the transferee	• list all planting periods being transferred
		• the pay type is not known	• leave blank.--*

CCC-577, Transfer of NAP Coverage (Continued)

A Instructions (Continued)

Item	Field Name	Instructions
7	Crop Year	Enter crop year of the crop. * * *
8	Unit Number	Enter NAP unit number. If NAP unit number is not known, leave blank.
9	Farm Location	Describe location of the crop acreage. Example: FSA farm and tract number, legal description, map coordinates, common farm name, etc.
10	Transferee Name and Address	Enter first (name or initial, as applicable) and last name and address of producers receiving the right to the NAP payment.
11	Social Security Number	Enter last 4 digits of the taxpayer ID or SSN of producers identified in item 10.
12	Farm Number	Enter farm number associated with producers identified in item 10.
13	Share Transferred	Enter share transferred to producers identified in item 10.
14	Effective Date of Transfer	Enter effective date of the transfer.
15	Nature of Transfer	Enter the nature of the transfer. Example: Sale of land or change of share.
16A and 16B	Transferor's Signature	*--Transferor and transferee shall: <ul style="list-style-type: none"> • read Part B - Terms and Conditions • sign and date in their respective space.--*
17A and 17B	Transferee's Signature	
18A-22	For CCC use only .

COLLECTION OF INFORMATION AND DATA (PRIVACY ACT)

The following statement is made in accordance with the Privacy Act of 1974 (5 USC 552a) and the Paperwork Reduction Act of 1995, as amended. The authority for requesting the following information is Pub. L. 93-86. The information will be used to document legal transfer of interest from one producer to another. Furnishing the requested information is voluntary. Failure to furnish the requested information will result in agency's inability to transfer crop interests. This information may be provided to other agencies, IRS, Department of Justice, or other State and Federal Law enforcement agencies, and in response to a court magistrate or administrative tribunal. The provisions of criminal and civil fraud statutes, including 18 USC 286, 287, 371, 641, 651, 1001; 15 USC 714m; and 31 USC 3729, may be applicable to the information provided.

PAPERWORK REDUCTION ACT

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0560-0175. The time required to complete this information collection is estimated to average 10 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. RETURN THIS COMPLETED FORM TO YOUR COUNTY FSA OFFICE.

NONDISCRIMINATION STATEMENT

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410 or call (202) 720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.

***--Prevented Planting for 2007 and Future Years**

A Unit Equals 1 Entire Farm

The following:

- example shows a unit composed of 1 farm with planted acres and approved prevented planted acreage that meets requirements in 2-CP, paragraph 24
- table shows the current year reported prevented planted acres, approved prevented planted acres, and planted acres for the farm/unit

Year	Farm/Unit	Reported Prevented Planted Acres	Approved Prevented Planted Acres 1/	Planted Acres
2007	Farm	125.00	100.00	100.00
	Unit	N/A	100.00	100.00

1/ Approved prevented planted acres that meet requirements of 2-CP, paragraph.

- shows the calculation for determining the number of prevented planted acres eligible for payment on the unit.

2007 planted acres + approved prevented planted = total intended for planting.
 (100.00 + 100.00 = 200.00)

Total intended for planting x 35 percent = disaster level.
 (200.00 x .35 = 70.00)

Determined prevented planting - disaster level = prevented planting for payment.
 (100.00 - 70.00 = 30.00)

Note: 30.00 prevented planted acres qualify for payment on the unit.--*

Examples for Determining Gross Income

This exhibit provides examples of gross annual income determinations.

- All possible situations are not included.
- The entities in the examples may be actual producers or entities or in combination with another producer because of "person" determinations according to 1-PL.

Example 1.

Situation.

Farmer or rancher, A. Bravo's, gross annual income from the sale of agriculture production was \$50,000. Production expenses for producing these products was \$30,000. A. Bravo's gross income from farming, ranching, and forestry operations is \$50,000.

A. Bravo also owns 51 percent of A.B. Grain Co., Inc. The grain company bought grain from producers for \$3,000,000 and sold the grain for \$3,050,000. A. Bravo's gross income from A.B. Grain Co., Inc., is \$3,050,000. Less than a majority of A. Bravo's annual income was from farming, ranching, and forestry operation; therefore, A. Bravo's qualifying gross income is the gross income from all sources.

Determination.

A. Bravo is ineligible for NAP assistance because the qualifying gross income exceeds \$2,000,000 (\$50,000 plus \$3,050,000 equals \$3,100,000).

Example 2.

Situation.

A livestock feeder paid \$1,300,000 for feeder calves, spent \$200,000 for feed, and had hauling, veterinarian, and other expenses of \$20,000. When the calves were sold, the livestock feeder received \$2,850,000.

Determination.

The livestock feeder's qualifying gross income is \$2,850,000. The livestock feeder is ineligible to receive NAP assistance.

Continued on the next page

Examples for Determining Gross Income (Continued)

Example 3.

Situation.

An investor paid \$500,000 for stocks, bonds, and other investment vehicles. Six months later the investor sold those investments for \$670,000. Do not reduce income for the cost of the investment. The investor's gross income for investment vehicles is \$670,000.

The investor also received \$50,000 in gross income from the sale of agricultural production. Expenses for producing these products was \$30,000. The producer's gross income from farming, ranching, and forestry operations is \$50,000.

Determination.

The investor's qualifying gross income is \$720,000 (\$670,000 plus \$50,000). The investor, therefore, qualifies under the qualifying gross income provision.

Example 4.

Situation.

When a husband and wife are considered 1 person, the gross income from both must be included. His gross income from farming is \$1,000,000. His wife sold clothing costing \$500,000 for a total of \$1,600,000. Overhead expenses were \$150,000.

Determination.

The qualifying gross income is \$2,600,000 (\$1,000,000 plus \$1,600,000). Less than a majority of the producer's gross income is from farming, ranching, and forestry operations. Therefore, qualifying gross income is gross income from all sources. The entity is ineligible to receive NAP assistance.

Continued on the next page

Examples for Determining Gross Income (Continued)

Example 5.

Situation.

Shark Farms, Inc., has \$60,000 gross income from grain and livestock farming. D. Shark and spouse own 51 percent of Shark Farms, Inc. D. Shark owns Shark Equipment, which has gross income from machinery inventory and depreciation is \$1,950,000.

Determination.

The qualifying gross income from all sources is \$2,010,000 (\$1,950,000 plus \$60,000). Shark Farms, Inc., is ineligible for NAP assistance.

Example 6.

Situation.

Shady Farms, Inc., had gross income of \$1,900,000 from farming. The corporation is owned by Earl E. Floyd and Thelma Floyd, his wife. Earl E. Floyd also had controlling interest in Aerial Applications, Inc., and aerial spraying and seeding business. Aerial Applications, Inc., had gross income of \$150,000.

Determination.

Since a majority of the annual income of Shady Farms, Inc., was from farming, ranching, and forestry operations, the qualifying gross income is \$1,900,000. Shady Farms, Inc., is eligible to receive NAP assistance.

Continued on the next page

Examples for Determining Gross Income (Continued)

Example 7.

Livestock order buyers receive orders to purchase livestock.

Situation 1.

The order buyer purchased livestock for \$20,000 with money from the buyer's account, and sold the livestock to orderers for \$20,000, plus a commission of \$600.

Determination 1.

The total amount of \$20,600 received by the order buyer for the livestock is gross income.

Situation 2.

The order buyer received \$30,000 from orders, deposited the money in the order buyer's account, and purchased the livestock that was ordered.

Determination 2.

The \$30,000, plus a \$900 commission, received by the order buyer from the orderer gives the order buyer gross income of \$30,900.

Situation 3.

The order buyer purchased livestock for \$20,000 with drafts from orderers. The livestock were not purchased with money from the order buyer's account.

Determination 3.

Gross income for the order buyer is only the \$400 commission that the order buyer charged the orderers for obtaining the livestock.

Continued on the next page

Examples for Determining Gross Income (Continued)

Example 8.

Auction houses operate in various ways.

Situation 1.

The auction house collected \$40,000 for the sale of livestock, and put it into the auction house account. The sellers of the livestock were then paid \$39,200 by the auction house. The \$800 difference was withheld by the auction house as a commission.

Determination 1.

The gross income for the auction house is the \$40,000 collected before paying the seller's sales price, commissions, and other expenses.

Situation 2.

The auction house sold livestock for \$30,000. The \$30,000 was deposited in a special account set up by the auction house and designated a "Custodial Account for Shippers' Proceeds." Funds in this account are trust funds. The only payments that may be written on this account are payments to the sellers of the livestock and payments to the general account of the auction house for marketing charges. To offset the \$30,000 deposit, the sellers were paid \$29,400 for their livestock, and the auction house was paid \$600 for commissions.

Determination 2.

Include only \$600 from commissions as gross income for the auction house. Because funds in the custodial account are trust funds, they are not considered gross income for the auction house. The custodial account must be set up according to P&SA regulations to be considered a "custodial account".

Continued on the next page

Examples for Determining Gross Income (Continued)

Example 9.

Feedlot operators may have the following situations and determinations.

Situation 1.

A feedlot operator purchased livestock for \$1,000,000. Expenses for feeding and caring for the livestock were \$300,000. The livestock were later sold for \$1,650,000.

Determination 1.

The feedlot operator's gross income is \$1,650,000.

Situation 2.

A feedlot operator fed and cared for livestock for other people without purchasing the livestock and received \$250,000.

Determination 2.

The feedlot operator's gross income is \$250,000. Income includes commissions, yardage fees, and reimbursement for other expenses incurred while holding the livestock, such as veterinarian fees.

CCC-456, NAP Crop Data Information

A

**Completing
CCC-456**

--CCC-456 must be completed for every county. For those value loss crops-- that have varying prices by size, 1 type may have separate column type entries. Complete CCC-456 according to this table.

Item	Instructions
1	Enter State name and State code from 1-CM, Exhibit 131.
2	Enter county name and county code from 1-CM, Exhibit 131.
3	Enter crop year.
4	If additional pages are needed for a county, enter <u>X</u> of <u>Y</u> . Note: "X" denotes the specific page number, "Y" denotes the total pages for a county.
5	Enter the crop name. The crop name shall be: <ul style="list-style-type: none"> • reflected in 2-CP, Exhibit 10.5 • identified in item 5 of each column if there are recommendations including different specific data in items 6 through 21. Note: For Category 1 forage, enter the crop name, type or variety of each forage specie and complete items 6 through 21 in separate columns. If crop approval is needed for any crop that is not in 2-CP, Exhibit 10.5, notify NAPB, at FAX number 202-690-3646.
6	Enter the crop code reflected in 2-CP, Exhibit 10.5.
7	Enter the crop by type or variety, if applicable, reflected in 2-CP, Exhibit 10.5.
8	Enter "IR" if the crop is irrigated or "NI" if the crop is nonirrigated. Note: If the crop has both irrigated and nonirrigated in the county, identify the crop in separate columns; one column for IR, the other for NI.

Continued on the next page

CCC-456, NAP Crop Data Information (Continued)

A
Completing
CCC-456
(Continued)

Item	Instructions
9	<p>Enter the intended use of the crop. Examples are:</p> <ul style="list-style-type: none"> • fresh • processed •*--forage--* • silage • seed. <p>Notes: If the crop has more than 1 intended use, use separate columns for each intended use.</p> <p style="text-align: center;">If STC anticipates the need for a CCC-established price for secondary use according to subparagraph 174 C, complete CCC-456 for this secondary use. After identifying all elements of the secondary use, add the suffix "SU" to name of crop.</p>
10	<p>Enter the unit of measure for the crop. Refer to paragraph 2 for applicable units of measure. If a container is used, include the number of pounds per container in parenthesis to the right of the unit designation.</p> <p>Example: CON (42#)</p> <p>For value loss crops, use a separate column entry for each size.</p>
11	<p>If there are multiple plantings of the crop within the crop year, enter the planting number and inclusive data in separate columns for each planting period. If there is only 1 planting within the crop year, ENTER "1". Refer to paragraphs 176 and 177 for information on repeat or multiple-planted crops.</p>
12	<p>The application closing date for each crop within your State should correspond with the sales closing date as established by FCIC.</p>
13	<p>Enter the final planting date of the crop based on the planting(s).</p> <p>Note: Some crops, such as tree crops, value loss crops, and other perennial crops, may not have a final planting date. ENTER "N/A" if a final planting date is not applicable.</p>
14	<p>Enter the crop acreage reporting date according to 2-CP, Exhibit 6.</p>

Completing
CCC-456
(Continued)

Item	Instructions
*--15	Enter the normal harvest date for the crop.
16a	Enter the STC-recommended average market price. Include the source data used for each year up to 5 years for each crop according to paragraph 108. Exception: For forage intended for grazing including small grain forage enter the number of days grazed.
16b	Enter the STC-recommended county-expected yield. Include the source data used for each year up to 5 years for each crop according to paragraph 107.--* For forage intended for grazing enter the acres per animal unit.
17	Enter the prevented planting factor established according to paragraph 109 for computing payments when a producer was prevented from planting the crop. Note: Some crops, such as tree crops, value loss crops, and other perennials, may not have a preventing planting factor. ENTER "N/A" if a prevented planting date is not applicable.
18	Enter the unharvested payment factor established according to paragraph 109 for computing payments when a producer planted the crop but was unable to harvest the crop.
19a	Enter the price previously approved. If the State has more than 1 previously approved price, enter the most recently approved price. If no price has been previously approved within the State, leave blank.
19b	Enter the yield previously approved. If the county or State has more than 1 previously approved yield, enter the most recently approved yield. If a yield has not been previously approved within the State, leave blank.
20a	Enter the NASS average price calculated according to paragraph 108. If NASS data from outside the State is considered, include the name of the State in parenthesis to the right of the price. If NASS data is available in the State, it must be entered on CCC-456. If NASS does not have price date, leave blank.

Item	Instructions
20b	Enter the NASS average yield calculated according to paragraph 107. If NASS data from outside the State is used, include the name of the State in parenthesis to the right of the yield. If NASS data is available in the State, it must be entered. If NASS does not have yield data, leave blank.
21a	If insurance is available within the State, ENTER "Y". If insurance is not available with the State, ENTER "N".
21b	Enter the FCIC price established within the State. If the crop is insurable other than in the county included in item 2, include the names of any counties where insurance is available within the State in parenthesis to the right of the price. If the crop is not insurable within the State, leave blank.
21c	Enter the FCIC T-yield established for the administrative county. If the crop is insurable other than in the administrative county include in item 2, include the names of any counties where insurance is available in parenthesis to the right of the yield. If the crop is not insurable in the administrative county or other counties within the State, leave blank.
22	The State Office employee completing CCC-456 shall sign, enter their title, and date signed.
23	A second party review shall be complete on all information. The State Office employee performing the review shall sign, enter their title and date signed.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Written Building, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410 or call (202) 720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.

Examples for Determining Peanut Average Market Price

This exhibit provides examples of peanut average market price determinations when a unit has some, but insufficient effective peanut poundage quota available to cover the unit's total loss of expected peanut production for the entire peanut marketing year.

To determine whether a unit has sufficient effective quota available for the loss of expected peanut production:

- review the latest FSA-1001's issued for the crop year of peanuts from the farms associated with the unit
- add the effective quota from each of the farms associated with the unit
- subtract the pounds of peanuts marketed from the farms associated with the unit to determine the total pounds of effective quota available for loss pounds of peanuts.

In all cases when determining an average market price of peanuts on a unit which does not have effective quota available for the entire loss of peanuts, the calculated price is the smaller of the following:

- the national average quota price established for the type of peanuts involved
- the price calculated according to the following formula:

additional price + [(pounds effective quota available to unit after subtracting quota peanut marketings divided by pounds total unit loss) X (quota price - additional price)] = calculated price.

The examples described and prices used are hypothetical.

In each example, assume:

- peanuts produced are or were marketed as quota peanuts using effective quota
- a quota price of \$0.3050 per pound
- an additional price of \$0.0660 per pound.

Continued on the next page

Examples for Determining Peanut Average Market Price (Continued)

Example 1

A unit has:

- expected peanut production of 100,000 pounds
- 50,000 pounds of effective quota available for peanut marketings
- 30,000 pounds actual production
- suffered a loss of peanut production of 70,000 pounds
- only 20,000 pounds of effective quota available for the loss of expected peanut production.

The average market price of peanuts for this unit is computed as follows:

$$\begin{aligned} & \$0.0660 + [(20,000 \text{ lbs. effective quota available divided by } 70,000 \text{ lbs. total loss}) \times (\$0.3050 - \$0.0660)] = \$0.1343 \\ & \$0.0660 + [(0.285714) \times (.2390)] = \$0.1343 \\ & \$0.0660 + 0.0683 = \$0.1343. \end{aligned}$$

Example 2

A unit has:

- expected peanut production of 100,000 pounds
- 60,000 pounds of effective quota available for peanut marketings
- 30,000 pounds actual production
- suffered a loss of peanut production of 70,000 pounds
- only 30,000 pounds of effective quota available for the loss of expected peanut production.

The average market price of peanuts for this unit is computed as follows:

$$\begin{aligned} & \$0.0660 + [(30,000 \text{ lbs. effective quota available divided by } 70,000 \text{ lbs. total loss}) \times (\$0.3050 - \$0.0660)] = \$0.1684 \\ & \$0.0660 + [(0.428571) \times (0.2390)] = \$0.1684 \\ & \$0.0660 + 0.1024 = \$0.1684. \end{aligned}$$

Example 3

A unit has:

- expected peanut production of 100,000 pounds
- 97,000 pounds of effective quota available for peanut marketings
- 30,000 pounds actual production
- suffered a loss of peanut production of 70,000 pounds
- only 67,000 pounds of effective quota available for the loss of expected peanut production.

The average market price of peanuts for this unit is computed as follows:

$$\begin{aligned} & \$0.0660 + [(67,000 \text{ lbs. effective quota available divided by } 70,000 \text{ lbs. total loss}) \times (\$0.3050 - \$0.0660)] = \$0.2948 \\ & \$0.0660 + [(0.957143) \times (\$0.2390)] = \$0.2948 \\ & \$0.0660 + .2288 = \$0.2948. \end{aligned}$$

CCC-452 Manual, NAP Actual Production History and Approved Yield Record

A Completing CCC-452 Manual

CCC-452 Manual shall only be used in those instances where APH cannot be calculated electronically.

COC may delegate, in writing, to CED and program technicians the authority to complete and sign CCC-452 Manual.

Item	Instructions
1	Enter crop year for which production history is being provided.
2	Enter unit number for which production history is being provided.
3A through 3C	*--Enter names, telephone numbers, and ID numbers (last 4 digits) for up to--* 5 individuals on the unit. If more than 5 individuals are on the unit, continue the information in item 29.
4	Check appropriate box indicating whether a spot check is required.
5A and 5B	Enter County Office name and the State and county codes.
6	Enter crop name. Example: Pears.
7	Enter crop type. Example: Bartlett.
8	*--Enter planting period.--*
9	Enter either of the following: <ul style="list-style-type: none"> • “I” for irrigated • “N” for nonirrigated.
10	Enter intended use for the crop. Example: Fresh.
11	Enter unit of measure for the crop. Example: Pounds.

CCC-452 Manual, NAP Actual Production History and Approved Yield Record (Continued)

A Completing CCC-452 Manual (Continued)

Item	Instructions
12	Check appropriate box indicating whether yield limitation rules apply.
13	Enter county-expected yield or T-yield.
	Items 14 through 14C are for COC representative use only, if applicable.
14A	Enter adjusted T-yield determined according to subparagraph 260 C.
14B	Enter applicable reason code for the adjusted T-yield.
14C	Enter date of the COC or STC minutes that document the determination for the adjusted T-yield.
15	Enter APH crop year.
16	Check appropriate box indicating whether the crop in item 6 was affected by an eligible disaster during the crop year in item 15.
17	Enter number of planted acres for the crop in item 6 for the crop year in item 15.
18	Enter actual production for the crop in item 6 during the crop year in item 15.
19	Enter code for record type as indicated in <u>1</u> /.
	Items 20 through 28 are for COC representative use only, if applicable.
20	Calculate yield by dividing item 18 by item 17. If applicable, change the yield based on the yield type code entered in item 21 and handbook procedure.
21	Enter code for the yield type as indicated in <u>2</u> /.
22	Total all yields in item 20.
23	Enter number of APH crop years, with a minimum of 4.
24	Calculate yield by dividing item 22 by item 23.
25	Enter prior approved yield.
26	ENTER “.90”.
27	*--Calculate the yield cup by multiplying item 25 by item 26.--*
28	If item 12 is: <ul style="list-style-type: none"> • “YES”, enter the higher of item 24 or item 27 • “NO”, enter the amount from item 24.
29	Use this area as needed to continue or explain information in other items on CCC-452 Manual.
30A and 30B	The producer representing the unit shall sign and date. *-- Note: If producer refuses to sign, notate reason for refusal in item 29. COC representative shall sign and date in item 31A and 31B.
31A and 31B	The COC representative shall sign and date. Note: COC representative shall sign and date even if producer refuses to sign.
31C	Enter County Office information.--*

PART E - REMARKS AND ACTUAL INFORMATION		
29. REMARKS:		
<p><i>NOTE: The following statement is made in accordance with the Privacy Act of 1974 (5 USC 552a) and the Paperwork Reduction Act of 1995, as amended. The authority for requesting the following information is the Agricultural Act of 1996, as amended, the Commodity Credit Corporation Charter Act, the regulations promulgated thereunder (7 CFR Part 1437), and the Internal Revenue Code (26 USC 6109). The requested information is necessary for CCC to consider and process a request for assistance under the Noninsured Crop Disaster Assistance Program and to assist in determining eligibility. Furnishing the requested information is voluntary; however, failure to furnish correct information will result in rejection of the request. This information may be provided to other agencies, IRS, Department of Justice, or other State and Federal law enforcement agencies, and in response to a court magistrate or administrative tribunal. The provisions of criminal and civil fraud statutes, including 18 USC 286, 287, 371, 641, 651, 1001; 15 USC 714m; and 31 USC 3729, may be applicable to the information provided.</i></p> <p><i>According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0560-0175. The time required to complete this information collection is estimated to average 5 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. RETURN THIS COMPLETED FORM TO YOUR COUNTY FSA OFFICE.</i></p>		
PART F - PRODUCER'S CERTIFICATION		
<p>I hereby certify that the information included on this form includes a complete and accurate record of actual record of actual production history. The actual production history is accurately identified to the unit, crop and crop years shown. I understand that the information on this form may be spot checked and failure to certify accurately may result in a loss of program benefits. Additionally, I direct the purchaser, warehouse operator, ginner, or any person who otherwise stores or purchases crop production identified on this form to disclose those storage or purchase records of the identified crop to USDA representatives of the purpose of verification of production. I understand that the payment yield may be different than the approved yield if the unit acreage increases or plant density changes.</p>

Instructions for Completing CCC-576-1

A

**Completing
CCC-576-1**

Complete CCC-576-1 according to this table.

Item	Action
<p>Part A - General Information This part is to be completed by County Office.</p>	
1	Enter County Office name, address, and telephone number.
2A	<p>Enter NAP unit number and applicable planting period.</p> <p>Example: Unit #1. Planting Period #3.</p> <p>See paragraph 28 for the definition of NAP unit and paragraph 178 for defining planting periods.</p>
2B	<p>Enter NAP application number.</p> <p>The County Office shall maintain a register of NAP application numbers. The register will begin with number 000001 for each crop year. At a minimum, the register will contain the application number, unit number, producer's name, and date the notice of loss was filed. The same application number will be used for each notice of loss filed for a specific unit.</p>
3	Enter the name and address of producer associated with unit who is providing the notice of loss.
4	For the producer identified in item 3, enter the producer's telephone number (including area code). Enter e-mail address of applicant, if available.
5	Enter the farm numbers associated with unit.
6	Enter crop, type or variety, that suffered loss as result of disaster event. Use a separate CCC-576-1 for each type or variety of crop affected by disaster.
<p>Part B - Appraisal or Report of Production This part is to be completed by LA or FSA representative.</p>	
7	Enter tract identification from photocopy or sketch map.
8	Enter field identification from FSA-578 and attach photocopy or sketch map.
9	Enter the number of preliminary appraised acres, in tenths, when producer requests release to put crop to another use. Determine acres, if applicable, when boundaries may not be determined later.

Continued on the next page

Instructions for Completing CCC-576-1 (Continued)

**A
Completing
CCC-576-1
(Continued)**

Item	Action	
10	FOR...	ENTER...
	yield-based crops	the final acres associated with the type/variety, practice, and stage
	maple sap	the total number of taps
	honey	the total number of colonies
	Identify field on aerial photocopy. <u>Final acres</u> may be measured acres obtained through FSA measurement service as requested by producer or during FSA spot check of producer's certified acres, or acres certified and signed by the producer on CCC-576. The LA or FSA representative shall review whether the reported crop acreage appears to be accurate. If crop acreage appears to be more than 5 percent different than reported crop acreage, the acreage shall be determined. See paragraph 154.	
11	Enter practice, such as "I" for irrigated and "NI" for nonirrigated.	
12	Enter the stage abbreviations according to Exhibit 41, such as: <ul style="list-style-type: none"> • H - Harvested • UH - Unharvested • NP - Acreage eligible for prevented planting that was not planted to any crop intended for harvest in the same crop year.

Completing
CCC-576-1
(Continued)**

Item	Action
13	Enter intended use from abbreviations in Exhibit 41.
14	Enter per acre appraisal in bushels, pounds, cwt, or tons. Obtain information from appropriate appraisal worksheet.
15	Enter potential production that is the result of multiplying each row of column 10 times each row in column 14.
16	Enter ineligible causes of loss according to subparagraph 21 B, if applicable.
17	Enter the amount of production loss attributable to the ineligible cause(s) identified in item 16.
18	Enter total acres, to tenths, from all rows of column 10.
19	Enter total potential production from all rows of column 15.
20	Enter total production loss attributable to ineligible causes of loss from all rows of column 17.
<p>Note: County Offices shall continue to determine losses using current RMA or State Office loss adjustment procedure. Transfer any appropriate information to CCC-576 for processing the individual's application for payment.</p>	
21	Enter bin number for farm stored commodity. For off-farm stored commodities, attach copies of warehouse receipts, etc., and enter data in subsequent rows, as appropriate. For the quantity of current crop year production fed to the producer's livestock, used as seed on the producer's farm, and sold, attach documentary evidence, that is, feeding records, planting records, etc., or copies of sales documents, etc., and enter data in subsequent rows, as appropriate.

Item	Action
22	Enter internal length measurement in feet, to tenths, of structural space occupied by crop, if rectangular or square. Enter diameter, if round.
23	Enter internal width measurement in feet, to tenths, of structural space occupied by crop, if rectangular or square. Enter RND if round.
24	Enter internal depth in feet, to tenths, of structural space occupied by crop.
25	Enter cubic feet deduction, to tenths, for vents, crossties, etc.
26	Enter shelled, ear, or ground silage, or other, if applicable.
27	Enter gross production. Gross production is total production determined by measurement before applying adjustments or any factors, such as percent of shell or sugar, percent of moisture, test weight, percent of dockage, or other production not to count. Obtain gross production for the unit from the summary and/or settlement sheets, if needed.
28	Enter shelling percentage factor for ear corn, rounded to whole percent. Leave blank if not applicable.
29	Enter 4 place factor from grain moisture chart, if applicable.
30	Enter 3 place factor from test weight chart, if applicable. Enter test weight only when storage structure measurements were entered in whole pounds or pounds to tenths after any foreign material is removed. If factor from test weight chart is not applicable, enter the result of dividing the actual test weight by the standard test weight (ear corn must be shelled for sample) to 3 decimal places. For corn silage, divide the actual test weight by 12. Refer to Loss Adjuster's Handbook.

37. 2nd or Final					

NOTE: The following statement is made in accordance with the Privacy Act of 1974 (5 USC 552a) and the Paperwork Reduction Act of 1995, as amended. The authority for requesting the following information is Pub. L. 93-502. The information will be used to determine eligibility for disaster program benefits. Furnishing the requested information is voluntary. Failure to furnish the requested information will result in determination of ineligibility for disaster benefits. This information may be provided to other agencies, IRS, Department of Justice and Federal Law Enforcement agencies and in response to a court magistrate or administrative tribunal. The provisions of criminal and civil fraud statutes, including 18 USC 286, 287, 371, 641, 1001, 15 USC 714a, and 31 USC 3729, may be applicable to the information provided.

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0560-0175. The time required to complete this information collection is estimated to average 67 minutes per response including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. RETURN THIS COMPLETED FORM TO YOUR COUNTY FSA OFFICE.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Western Building, 1400 Independence Avenue, SW, Washington, DC 20250-2410 or call (202) 720-6261 (voice or TDD). USDA is an equal opportunity provider and employer.

***--Instructions for Completing CCC-576**

**A
Completing
CCC-576**

CCC-576 is broken down by parts to accommodate both the notice of loss and application for payment information. As a result, CCC-576, Part B may be completed by anyone sharing in the risk of the farming operation. As long as 1 person having an interest in the farming operation files a timely notice of loss, according to paragraph 401, all producers having an interest will be considered timely filed. CCC-576, Parts D through G, as applicable, shall be completed by each producer having a share in the farming operation to document their individual share of the loss and complete the application for payment.

Note: The first producer, having an interest in the unit, that completes CCC-576, Parts D through F, as applicable, may file the production and loss information for all other producers having an interest in the crop. Other producers who file must certify by signing Part G that the production and loss information currently on file is correct before receiving their benefits. If a producer does not agree that the information on file is correct, the producer will be required to supply supporting documentation to justify any changes or corrections. If applicable, COC shall follow paragraph 36 for unacceptable, incorrect, or false record certifications.

A separate CCC-576, Part B shall be filed for each:

- crop, type, within the pay crop pay type grouping recorded for each natural disaster, except multiple disasters that occur concurrently

Note: Concurrent disasters may be recorded on the same CCC-576, Part B.

- planting period for crops with multiple planting periods.

Note: See paragraph 178 for defining multiple planting periods.

One CCC-576, Parts D through G , as applicable, may be completed for all types within the pay crop pay type grouping. CCC-576, page 2 will summarize all acres and production for all types within the pay crop pay type grouping. A separate CCC-576, page 2 will be completed for each planting period.--*

Item	Instructions
Part A - General Information This part is to be completed by the County Office.	
1A	Enter County Office name, address, and telephone number.
1B	Enter State and administrative county code.
2	Enter NAP unit number. Note: See paragraph 28 for the definition of NAP unit.
3	Date stamp indicating when application is received.
4	Enter the name and address of the producer who is providing the notice of loss for the unit.
5A	Enter the telephone number, including area code, for the producer entered in item 4.
5B	Enter e-mail address of producer, if available.
6	Enter the farm numbers associated with unit.
7A	Enter the 4 or 5 character alpha crop abbreviation from 2-CP, Exhibit 10.5. Example: The alpha crop abbreviation for eggplant is "EGGPL".
7B	Enter the 4 character numeric pay crop code from 1-NAP (Rev.1) Exhibit 7. Example: The numeric pay crop code for eggplant is "0318".
7C	Enter the 3 character numeric pay type code from 1-NAP (Rev. 1) Exhibit 7. Example: The numeric pay type code for Oriental is "001".
7D	Enter the numeric planting period as established according to paragraph 178.

Item	Instructions
<p>Part B - Notice of Loss This part is to be completed by the producer.</p>	
<p>Note: If a subsequent disaster event occurs on the same crop, type or variety, and NAP unit, the producer must complete Part B on a separate CCC-576 and attach it to the original filed CCC-576.</p>	
8A	Enter crop name that suffered loss as result of disaster event identified in item 9.
8B	Enter the crop type that suffered loss as result of disaster event identified in item 9. Use a separate CCC-576 for each type or variety of crop affected by disaster.
9	Enter disaster event that caused loss, such as tornado, hurricane, drought, flood, disease, aflatoxin, virus, insect infestation, etc.
10A, B	Enter beginning and ending dates of the disaster event.
11	Enter date when damage or loss of crop was apparent.
12	<p>Enter "yes" or "no" to answer the question in this item.</p> <ul style="list-style-type: none"> • If "no", go to item 13. • If "yes", document any written or verbal grower contract or arrangement with a potential buyer to sell or purchase a guaranteed amount, regardless of production. If such contract or arrangement exists, include any indemnity not covered by USDA and document in Item 37. <p>Note: COC will adjust net production upward by the amount of production corresponding to amount of the contract guarantee according to paragraph 332. Enter result of assigned production in block 39.</p>
13	Check type of loss suffered as a result of event identified in item 9, that is, prevented planting and/or damaged crop/low yield. Appraisal is required for damaged/low yield crop before destruction to be eligible for NAP benefits according to paragraph 425.
14	Check the applicable practice for the crop identified in item 8. If both practices are used check both.

Completing
CCC-576
(Continued)

Item	Instructions
15	If item 13 is checked for "prevented planting", enter intended but prevented acreage in item A, and planted acreage in item B.
16	For intended but prevented acreage entered in item 15, provide evidence of purchase, delivery, and/or arrangement for seed, chemicals, fertilizer, and land preparation measures for acreage affected. Note: COC may require attachment of expense receipts to verify preparation measures. Retain copies of expense receipts only; return originals to the producer.
17	If damaged crop/low yield is checked in item 13, enter total crop acreage and affected crop acreage.
18	If damaged crop/low yield is checked in item 13, explain cultivation practices for expected crop production, before and after date of damage, on affected crop acreage, that is fertilizer amounts, cultivation, seeding rate and variety, pesticides/herbicides and amounts, irrigation measures, etc.
*--19	Describe what will be done with affected crop acreage (include dates), that is, will be destroyed, will be replanted to another crop, will not be harvested, will be harvested, or not planted. If the crop will be harvested, producer is required to provide production evidence to the local FSA County Office.
20	Describe what has been done with the affected crop acreage (include dates), that is, has been destroyed, has been replanted to another crop, has not been harvested, has been harvested, or not planted. If the crop has been harvested, producer is required to provide production evidence to the local FSA County Office.--*
21	Producer's Signature: Certification by producer to accuracy of all information provided, and acknowledgment of receipt of photocopy of the notice of loss to be maintained by producer as evidence of filing. Note: If not signed and dated by producer, Part B is considered as not filed.

Item	Instructions
31 (Con't)	<p>Identify field on aerial photocopy. Final acres may be measured acres obtained through FSA measurement service as requested by producer or during FSA spot check of producer's certified acres, or acres certified and signed by the producer on CCC-576. Follow subparagraph 154 A for reported and determined crop acreage. The FSA representative shall review whether the crop acreage appears accurate.</p> <p>If crop acreage appears to be more than 5 percent different than reported crop acreage, the acreage shall be determined. When the unit has both reported and determined crop acreage, COC shall follow subparagraph 154 A. If this crop is forage intended for mechanical harvest but was 100 percent grazed then go to Part F as applicable.</p>
32	Enter the practice "I" for irrigated and "N" for nonirrigated.
33	<p>Enter the applicable stage abbreviations according to Exhibit 41.</p> <p>Examples: G - Grazed H- Harvested UH - Unharvested</p>
34	<p>Enter the harvested production supported by acceptable production records and/or appraised production from CCC-576-1. Attach copies of date-stamped sales receipts.</p> <p>Note: When the appraised acreage is harvested and the harvested production exceeds the appraised production, use the actual harvested production. When the appraised production exceeds the harvested production, use the appraised production.</p> <p>Example 1: Producer A indicates crop acreage will not be timely harvested. Producer A requests appraisal to determine production. LA appraises the crop at 30 bushels per acre. Producer harvests the crop 2 months after normal harvest date and harvests 50 bushels per acre. Production to count in block 34 would be harvested production.</p> <p>Example 2: Producer C indicates crop acreage will not be harvested timely. Producer requests appraisal to determine production. LA appraises the crop at 75 bushels per acre. Producer harvests the crop 3 months after normal harvest date and harvests 25 bushels per acre. Production to count in block 34 would be appraised production.</p>

This form is available electronically. Form Approved - OMB No. 0580-0175

CCC-576 U.S. DEPARTMENT OF AGRICULTURE (07-10-03) Commodity Credit Corporation		PART A - GENERAL INFORMATION (To be completed by County Office)	
NOTICE OF LOSS AND APPLICATION FOR PAYMENT NONINSURED CROP DISASTER ASSISTANCE PROGRAM		1A. COUNTY FSA OFFICE NAME & ADDRESS (including Zip Code) Your County FSA Office 123 Oak Street Everytown, USA 12345-6789 Telephone Number (Area Code) 890-123-4546	2. NAP UNIT NO. 1
<i>See Page 2 for Privacy Act and Public Burden Statements.</i>		1B. STATE & COUNTY CODE C0001	3. DATE RECEIVED BY COUNTY FSA OFFICE (MM-DD-YYYY) 06-03-XXXX
4. PRODUCER'S NAME AND ADDRESS (Include street, city, State and Zip Code) John and Jane Doe My Lane Ray Place, USA 12345-6789		5A. TELEPHONE NO. (Area Code) 123-456-7800	6. FARM NUMBERS ASSOCIATED WITH UNIT 678 9874
		5B. E-MAIL ADDRESS	
		7A. CROP ABBREVIATION Cabag	7B. PAY CROP 0116
		7C. PAY TYPE 001	7D. PLANTING PERIOD 01
PART B - NOTICE OF LOSS (To be completed by Producer)			
8. For loss suffered, enter A. Crop Name Cabbage		9. What disaster event(s) caused loss? Flood	
B. Crop Type Napa		10A. Beginning date of disaster (MM-DD-YYYY) 05-21-XXXX	11. When was loss apparent? 05-25-XXXX
		10B. Ending date of disaster (MM-DD-YYYY) 05-25-XXXX	12. For the crop type entered in item 8, was there any agreement or contract for payment for growing the crop, as opposed to delivery of production? YES <input type="checkbox"/> NO <input checked="" type="checkbox"/> If "YES", provide a copy of such agreement, contract, or a written narrative explanation of agreement or contract.
13. Check type of loss suffered as a result of event identified in item 9. Prevented Planting <input type="checkbox"/> Low Yield <input checked="" type="checkbox"/>		14. Was the crop in item 8 irrigated or Non-Irrigated? Check the applicable practice(s) used for the crop identified in item 8. IR <input checked="" type="checkbox"/> NI <input type="checkbox"/>	
15. If "Prevented Planting" is checked in item 13, enter the following: A. Intended but Prevented Acreage B. Planted Acreage		17. If "Low Yield" is checked in item 13, enter the following: A. Total Crop Acreage 3.0 B. Affected Acreage 2.5	
16. For the intended but prevented acreage entered in item 15, complete the following entries: A. Purchased, Delivery, or Arranged for: YES NO B. If "YES", Explain and attach copies (1) Seed, Chemical, and Fertilizer (2) Land Preparation Measures			
18. What cultivation practices have been and will be employed on damaged crop acreage (e.g., fertilizer, seeding, irrigation, pesticide and herbicide applications; before and after date of damage)? Acreage prepared for seeding on April 30, seeded May 3. Irrigation placed and functional, May 3. Pesticide and herbicide applied.			
19. What will be done with damaged crop acreage (e.g., destroyed, replanted to another crop, unharvested, harvested, or not planted)? NOTE: "You must request an appraisal of any planted acreage of the specified crop that will be abandoned, destroyed, or put to another use. You must not destroy or put acreage to another use before written consent is given by an authorized CCC or FIC loss adjuster for such destruction or other use." Failure to do so will result in loss of program assistance. Complete Part D: Half an acre to be harvested. Remaining acreage to be killed to a fall (September and or October) crop of cabbage.			
20. What has been done with prevented planted or damaged crop acreage (include dates crop was destroyed, harvested, or replanted, as applicable) Nothing			
21. Producer certifies that all information in Part B is correct and acknowledges receipt of copy of this form.			
A. PRODUCER'S SIGNATURE /s/ Jane Doe		B. DATE (MM-DD-YYYY) 06-03-XXXX	
PART C - COC APPROVAL OR DISAPPROVAL OF LOSS			
22. COC must approve or disapprove for low yield and or prevented yield, as applicable.			
A. For Low Yield: APPROVED <input checked="" type="checkbox"/> DISAPPROVED <input type="checkbox"/>		B. COC SIGNATURE /s/ COC Member	
C. DATE (MM-DD-YYYY) 06-03-XXXX		E. COC SIGNATURE	
D. For Prevented Planted: APPROVED <input type="checkbox"/> DISAPPROVED <input type="checkbox"/>		F. DATE (MM-DD-YYYY)	

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, videotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-N, Whitten Building, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410 or call (202) 720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.

PART G - CERTIFICATION AND APPLICATION FOR PAYMENT

THIS PORTION MUST BE COMPLETED PRIOR TO PAYMENT. Attach Appraisal Worksheet, actual production evidence, CCC-576-1, and, if applicable FCI-6, Statement of Facts. Do not use appraisal when harvested production is available. If destroyed prior to appraisal, crop acreage is ineligible.

The undersigned producers apply for NAP payment on the unit identified in Item 2 in accordance with 7 CFR Part 1437. The producers signing certify that all the information provided is true and correct, and, the production is accurately identified to the unit, share relationship, pay crop, pay type, and year shown. I understand this report may be spot-checked and failure to certify accurately may result in a loss of program benefits. Additionally, I direct the purchaser, warehouse operator, ginner, or any person who otherwise stores or purchases crop production listed on this form to disclose the production records of such crops to USDA representatives for the purpose of verification. The producer has not chosen or received another USDA benefit that is subject to the multiple benefit exclusion (7 CFR Part 1437.12).

NOTE: The following statement is made in accordance with the Privacy Act of 1974 (5 USC 552a) and the Paperwork Reduction Act of 1995, as amended: The authority for requesting the following information is Pub. L. 93-502. The information will be used to determine eligibility for disaster program benefits. Furnishing the requested information is voluntary. Failure to furnish the requested information will result in determination of ineligibility for disaster benefits. The information may be provided to other agencies, the Department of Justice or other State and Federal Law enforcement agencies and in response to a court, magistrate or administrative tribunal. The provisions of criminal and civil traffic statutes, including 18 USC 236, 287, 371, 641, 651, 1061, 15 USC 714a, and 11 USC 377a, may be applicable to the information provided.

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0560-0175. The time required to complete this information collection is estimated to average 1 hour and 20 minutes per response including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. RETURN THIS COMPLETED FORM TO YOUR COUNTY FSA OFFICE.

The unit has acres but no production for 2002. The unit had a prior approved yield of 650 bushels. Pressing "Cmd5" will redisplay the screen with a "P" yield type in 2002 and 5 yield types for previous years. The yield type for 2002 is determined to be "U" as unit qualifies for the substitute yield rule. The yield type of "P" was replaced and the calculated yield of 488, which is 75 percent of the prior year approved yield, was replaced with 65 percent of the T-yield. Following is an example of the screen after the updates were made and "Cmd5" is pressed.

```

The yield types for 2000, 2001, and 2002 are determined to be “R” as there were appraisals done for all years. The approved yield has been cupped as the calculated yield of 738 is less than 90 percent of the prior year approved yield.
