

2008 USDA-CSREES National Water Conference  
Sparks, NV

### **Cyanobacteria and Water Quality**

Ron Turco, Ken Hudnell, Jennifer Graham

**Abstract Text:**

Speakers: Ken Hudnell, US EPA, and Jennifer Graham, US Geological Survey

This symposium will provide a comprehensive evaluation of the role water managers play in controlling cyanobacteria. The panel will cover the ecology and the factors that may lead to a Cyanobacteria bloom. Careful planning and management practices will help to limit the repetition of blooms and the goal of this series of talks is to provide information to allow this to occur.
