

Dreams Can Come True

Outline of Need: Mrs. Lynn G. Sanchez, Age 55, was living in a mobile home that was poorly heated and small. Prior to this, she lived in another mobile home that had no electricity or public water, and was very remotely located. Having diabetes and severe breathing difficulties, this one-person family needed to locate where she could readily receive medical attention when and if needed. All of her life had been filled with difficulties. Ms. Sanchez had never owned a home before; it would be her dream to own a new home.

How Rural Development Helped: Rural Development helped Ms. Sanchez realize that dream—they provided a 502 Housing Loan to purchase a new home, built exclusively for her. The location was near Scottsville where she could obtain medical attention if she needed it. Payments were lower than what she was paying in rent.

The Results:
Ms. Sanchez was exuberant the day of Final Inspection when she moved into her new home. She was speechless as tears of joy flowed down her cheeks.

This had given her a new outlook on her life.

In a gracious, but quivering voice, she exclaimed, “I can’t thank you enough for the help you’ve given me.”

Standing on the porch of her beautiful new home, she smiled. Her dreams of home ownership had come true.

If you are interested in a housing loan, contact the USDA Rural Development office in Bowling Green at 975 Lovers Lane, or call 270-842-1146, ext 4 for an appointment.
