# Fruit and Tree Nuts Situation and Outlook Yearbook

**Agnes Perez and Susan Pollack**

## Abstract

Total fruit and tree nut utilized production declined 4 percent in 2003 from the year before due to smaller citrus, noncitrus, and tree nut crops. Growers received higher prices for most noncitrus and tree nut crops, boosting the value of all fruit and tree nut crops up 8 percent in 2003, to \$13.1 billion—the highest value since 1997. Despite declines in domestic fruit production, U.S. fruit consumption increased fractionally in 2003 from the previous year, to 280.3 pounds per person, fresh-weight equivalent. The average American consumed 100.4 pounds of fresh fruit and 178.5 pounds fresh-weight equivalent of processed fruit. Consumption increased for fresh fruit, canned and frozen fruit, and fruit juice, while consumption fell for dried fruit. With record-high imports and large beginning inventories contributing to the boost in total available supplies, U.S. tree nut consumption reached a record high in 2003/04, at 2.93 pounds per person (shelled basis).

**Keywords:** Fruit, tree nuts, noncitrus, citrus, utilized production, crop value, imports, exports, stocks, pack, price, consumption, fresh, frozen, canned, juice, dried.

## **Summary**

### **Fruit and Tree Nut Production Down in 2003**

Total fruit and tree nut utilized production was down 4 percent in 2003 from 2002. The citrus crop was 6 percent smaller in 2003, and unlike the year before, the noncitrus and tree nut crops were also 3 percent and 2 percent smaller. Citrus production declined for the third consecutive year and was the smallest crop since a freeze damaged the California crop in 1999. Tree nut production has had the fastest growth pattern in recent years, and although most tree nut crops were bigger, total production fell in 2003 due to moderate to significant declines in almond and pistachio production. Almonds lead in U.S. tree nut production, accounting for more than half of total output. Although almond production declined 6 percent in 2003, it was the second highest next to the record-large production in 2002.

Much of the decline in noncitrus utilized production during 2003 came from a 13-percent decline in grape utilized production from the year before. Grape production accounted for 39 percent of all noncitrus production in 2003, down from 43 percent in 2002. Utilized production was also lower for California figs, dates, and nectarines, Oregon blackberries and black raspberries, boysenberries, and some tropical fruit, including Hawaiian papayas, pineapples, and guavas.

Production of most citrus crops for the marketing year 2002/03 was lower, except for lemons and Florida tangelos. Orange production declined in Florida, Texas, and Arizona but was up 20 percent in California. Meanwhile, a decline in bearing acreage resulted in lower grapefruit production in all four major producing States. Lower average yields in Florida and Texas also pushed grapefruit production down in 2002/03.

Almond and pistachio production fell in 2003 after record crops for both commodities during the on-year of their alternate-bearing cycle the preceding year. Strong demand for almonds both in the domestic and international markets has led growers to continue to increase acreage for the crop in 2003 but lower yields forced production down from the record-large production harvested in 2002. Similarly, lower yields also pushed pistachio production down 61 percent in 2003.

The value of all fruit and tree nut crops increased 8 percent in 2003 from the previous year. At \$13.1 billion, it was the highest value since 1997. Crop value increased for both the noncitrus and tree nut crops but was down for citrus. Smaller crops pushed prices higher for grapes, California figs, dates, nectarines, and kiwifruit, Oregon blackberries and black raspberries, cultivated blueberries, boysenberries, and Hawaiian papayas and pineapples. Increased production along with higher prices also boosted grower revenues for apples, avocados, wild blueberries, and California raspberries. Crop value for most citrus crops was lower in 2002/03, except for tangelos.

The value of most tree nut crops rose in 2003, except for pistachios. Unlike the almond crop which was also smaller, the decline in pistachio production

more than offset the increase in grower prices. Meanwhile, despite larger crops, grower prices were higher in 2003 for hazelnuts, pecans, and walnuts. Also, higher prices boosted revenues for macadamia nut growers while production remained unchanged.

### ***Bearing Acreage Declines For the Third Year***

The number of fruit-bearing acres declined for the third consecutive year in 2003. At 4.0 million acres, the number of acres producing fruit in 2003 was the lowest since 1998. Much of the decline in fruit bearing acreage may be attributed to reduced acreage for all the citrus crops. Overall citrus bearing acreage fell 2 percent, with larger declines reported for grapefruit, tangerine, and lemon acreage than for oranges. Bearing acreage for major noncitrus crops was unchanged in 2003 but acreage producing miscellaneous noncitrus crops fell by less than 1 percent.

Tree nut bearing acres continue to expand as it has since 1995. In 2003, there were 896,800 acres producing tree nuts in the United States, 1 percent more than in 2002. This increase in acreage in 2003 has slowed from the 2-to 3-percent growth rate experienced over the previous 7 years. Acreage increased for almonds, pistachios, and walnuts, but declined for hazelnuts. Meanwhile, acreage for macadamia nut production was unchanged. Data are unavailable for pecans.

### ***Prices Received by Growers Up Slightly in 2003***

The index of prices received by growers for fruit and nuts rose nearly 1 percent in 2003 from the previous year, to 106 (1990-92=100). Helping to boost the index were higher grower prices for many noncitrus fruit, including apples and grapes, the leading noncitrus fruit. Prices were also higher for grapefruit, tangerines, and temples as well as for almonds, hazelnuts, macadamia nuts, pecans, and pistachios.

At the retail level, higher prices for most fresh fruit in 2003 drove the Consumer Price Index for fresh fruit up 3 percent, to 115.7 (1982-84=100). Among the major fruit commodities, consumers paid higher prices for Red Delicious apples, bananas, Thompson seedless grapes, grapefruit, and navel and Valencia oranges. Anjou pear and lemon prices were lower.

### ***Fruit Consumption Nearly Unchanged in 2003***

U.S. fruit consumption increased fractionally in 2003 from the year before, following 2 straight years of declines. In 2003, consumption reached 280.3 pounds per person, fresh-weight equivalent, lower than prior years since 1996. The average American consumed 100.4 pounds of fresh fruit and 178.5 pounds fresh-weight equivalent of processed fruit (including juices, canned, frozen, and dried). Consumers ate more noncitrus fruit, both fresh and processed, than the year before, but less citrus fruit, particularly processed citrus which is mostly juice. The smaller Florida orange crop in 2002/03 contributed to the decline in consumption of processed citrus. Most

Florida oranges are processed into orange juice which makes up the bulk of citrus consumption in the United States. Although the orange crops were also smaller in Arizona and Texas in 2002/03, more oranges from these crops were processed, while less got sent to the fresh market.

**Fresh fruit:** Fresh fruit consumption increased 1 percent in 2003 to 100.4 pounds per capita. Fresh citrus consumption increased 3 percent, with higher consumption of oranges, tangerines, and limes. Fresh noncitrus consumption was up only fractionally. Higher consumption of fresh apples, apricots, avocados, cherries, mangoes, papayas, pineapples, and strawberries offset lower consumption of bananas, grapes, peaches (including nectarines), and pears, all considered major noncitrus fruit.

Bananas continued to be the number one fresh fruit consumed by Americans, followed by apples and oranges. In 2003, Americans consumed 26.2 pounds of bananas per person, almost all of which were imported. While down 2 percent from the previous year and the lowest quantity consumed since 1991, it still accounted for over a quarter of all fresh fruit consumption.

Consumption of apples increased 3 percent in 2003. While rising for the second straight year to 16.5 pounds per person, this is lower than levels consumed during the 1980s and 1990s. In 2003, although domestic fresh-market production was reduced in Washington, the leading apple-producing State, higher imports and the lowest exports since 1990 left more apples for domestic consumption.

Consumption of fresh oranges increased 1 percent. While the U.S. orange crop was smaller in 2003, production in California was higher, providing more oranges to the fresh market than the year before. In the same year, California's grape production declined, driving down overall domestic production. With lower domestic fresh-market production and fewer imports, fresh grape consumption, the fourth most popular fresh fruit among Americans, declined 9 percent.

**Canned fruit:** Total consumption of nine canned fruits, not adjusted for stock changes, increased to 14.93 pounds per person (product-weight basis) in 2003, up 1 percent from 2002 but still lower than prior years since 1995. Increased domestic supplies led to higher consumption of canned apples, sweet and tart cherries, olives, pears, and pineapples. Consumption of canned apricots and peaches fell while consumption of canned plums and prunes remained unchanged. Changes in canned fruit inventories have not been accounted for since 1988 when industry tabulation and publication of carryover data ceased. Examination of the per capita consumption data using a 2-year average helps to compensate for some of the fluctuation in the data. When 2002/03 and 2003/04 are averaged and compared with the previous 2 years, per capita canned consumption actually fell 4 percent, with lower consumption of apples, apricots, tart cherries, peaches, pears, and plums and prunes.

**Frozen fruit:** Per capita consumption of nine types of frozen fruit increased 1 percent in 2003 to 3.48 pounds (product-weight basis). Although showing a small increase, this quantity is 2 percent less than the average frozen fruit consumed during the 1990s. In 2003, consumption increased for blueberries,

raspberries, cherries, peaches, and “other berries,” that includes boysenberries and loganberries. Consumption fell for blackberries, strawberries, apples, and apricots. Frozen fruit consumption in the United States was highest in 2001, at 4.17 pounds per person. Berries account for more than half of U.S. frozen fruit consumption, with strawberries leading the way. Although domestic strawberry production, imports, and beginning inventories were all higher in 2003, commercial frozen strawberry pack fell sharply, driving frozen strawberry consumption down to 1.25 pounds per person, from 1.61 pounds in 2002.

**Dried fruit:** Consumption of eight types of dried fruit totaled 2.38 pounds per person (dried basis) in 2003/04, down 6 percent from 2002/03 and the lowest quantity since 1980/81. Raisins and prunes continued to make up the bulk of dried fruits consumed by Americans, accounting for 80 percent of dried fruit consumption in 2003/04. Raisin consumption declined 2 percent in 2003/04, and although Americans consume far less prunes than raisins, prune consumption fell more drastically, down 17 percent. Lower domestic production and imports contributed to the decline in raisin consumption. Meanwhile, domestic supplies were higher for dried prunes but record-high exports left less of the product for domestic consumption. Consumption also fell for apples, dates, and figs. Consumption of dried apricots and peaches were the only two that increased in 2003, with sharply higher imports boosting domestic supplies.

**Fruit juice:** Following 2 straight years of declines, fruit juice consumption in the United States increased 1 percent in 2003/04, reaching 8.29 gallons per person. Consumption increased for all the major fruit juices, except for orange, lemon, and grape. Fifty-eight percent of the juice consumed by Americans in 2003/04 was orange juice. Orange juice consumption decreased 1 percent to 4.82 gallons per person. Apple juice consumption was at a record high, increasing 9 percent to 1.95 gallons per person. Apple juice demand was met by increased domestic production and more so by the rise in imports. Pineapple juice consumption continued to climb steadily for the fourth straight year. Although pineapple juice production declined slightly, imports more than compensated to increase total available supply.

**Tree nuts:** Tree nut consumption reached its highest level in 2003/04, at 2.93 pounds per person (shelled basis). While overall domestic production was lower and exports were the highest ever in 2003/04, record-high imports and large beginning inventories helped boost total available supply. Consumers ate more almonds, walnuts, macadamia nuts, and “other nuts” which are mostly imported varieties, such as Brazil nuts, pine nuts, and cashews. Consumption of hazelnuts, pecans, and pistachios declined. Hazelnut and pecans were on the “on-year” of their alternate-bearing cycle in 2003/04, but strong exports for hazelnuts and sharply lower beginning stocks for pecans drove down supplies available for domestic consumption. Almond production was on its “off-year” in 2003/04, but the lower production was compensated by record-high imports and large beginning inventories. Sharply higher imports and continued large beginning stocks helped increase walnut consumption, despite the smaller crop.

## **Glossary of Terms**

**Brix:** The concentration of soluble solids in juice, mostly sugar, but also includes salts, protein, and acid content. The denser the juice the higher the degrees Brix. For example: frozen concentrated orange juice is stored and often shipped at 660 Brix, reconstituted with water to 420 Brix and canned for retail sale in the popular 8- to 16-ounce cans found in the freezers at retail level, and further reconstituted to 11.80 Brix for consumption. Juice in its natural state, not-from-concentrate orange juice, is at 11.80 Brix.

**Cash receipts:** The value of commodity marketings during the calendar year, irrespective of the year of production. For program crops, also includes net CCC loans (there are none for fruit and tree nuts).

**C.I.F. value:** (Cost, insurance, and freight). Terms of sale whereby the seller's (exporter) price includes the cost of the goods being sold and all transportation charges, including insurance expenses, to the destination point (importer).

**Constant 1996 dollars:** Expression of value in terms of 1996 purchasing power. Frequently referred to as deflated or real dollars.

**Cwt:** Abbreviation for hundredweight, a unit of measure equal to 100 pounds.

**Dumping:** The sale of a commodity in a foreign market at less than fair market value.

**Equivalent on-tree returns:** Citrus price calculated at the on-tree level by deducting the costs of hauling, picking, sorting, grading, packing, cooling, marketing, and other costs from the base price growers receive at the processing plant or packinghouse door. In some cases, this results in negative returns.

**Farm weight:** The raw or unprocessed weight of a product in fresh form prior to any processing; also called fresh-weight, field-run, or orchard-run.

**F.A.S. value:** (free alongside ship). A price quotation that included all costs of transportation and delivery of the goods to the dock alongside the ship (within reach of the ship's tackle).

**F.o.b. shipping-point price:** The average, unweighted unit price received by the shipper or grower-shipper primarily for sales in carload or truckload quantities, but also including mixed loads.

**Fresh-market fruit:** Sold primarily as fresh.

**Grower price:** The average price received by producers from the first level of sales for the commodity, also called returns to grower. The grower price includes all grades and qualities. For citrus fruit, the grower price is the equivalent on-tree price or return.

**Hectoliter:** A liquid unit of measure equal to 26.41721 gallons (single-strength equivalent). A hectoliter equals 1,000 liters.

**Loss and exempt:** The difference between total production and marketable production. Production not used for human consumption due to poor quality or use of the product for industrial purposes, such as crushing nuts for oil, or for animal feed.

**Liter:** A liquid unit of measure equal to 0.2641721 gallons (single-strength equivalent).

**Marketing spread:** The difference between the retail price and the grower return.

**Marketing year:** A 12-month period beginning the month when harvesting of a crop normally begins. Marketing years vary by commodity.

**Metric ton:** A unit of measure equal to 2,204.623 pounds or 1.102311 short tons. A metric ton of orange juice is stored at 650 Brix. To convert to single-strength equivalent, the number of tons is multiplied by 1,405.88.

**Pack:** The quantity of fresh or processed product placed in containers (e.g. cans). Generally referred to as the output of a processing industry (e.g. frozen pack of concentrated orange juice).

**Packinghouse door price:** The price growers receive for their fruit when delivered to the packinghouse (the price before costs are deducted).

**Per capita use (consumption):** A measure of commodity disappearance on a per-person basis. Equal to total supply (production plus imports, plus beginning stocks) less use (exports, shrink and loss, and ending stocks) divided by total U.S. population (including military).

**Processing fruit:** Commodities sold primarily to processors; include (but not limited to) oranges, grapefruit, lemons, grapes, apples, apricots, cherries, peaches, plums, pears, pineapple, blueberries, strawberries, raspberries, cranberries, and olives.

**Product weight:** The weight of a product in its final packaged form, for example, the weight of the contents of a can of peaches.

**Pounds solids:** The total dissolved solids in oranges, usually measured as pounds solids per box. In Florida, payments for oranges sold for juice are based on the pounds solids per box, calculated by multiplying the amount of juice per box of oranges by the Brix level of the juice.

**Retail price:** The average price consumers pay for a product at the retail level—grocery stores, supermarkets, convenience stores.

**Season-average price:** Average price received by the grower, weighted by quantity marketed.

**Shipments:** Quantity of produce marketed from major production areas.

**Single-strength equivalent:** A measure for juice in its consumable form. Juice at 11.80 Brix.

**Short ton:** A unit of measure equal to 2,000 pounds.

**Tree nuts:** Hard shelled dried fruit or seed with separable rind or shell and edible kernels that grow on trees. Tree nut varieties grown for commercial production in the United States include: almonds, hazelnuts, macadamia nuts, pecans, pistachio nuts, and walnuts.

**Tropical fruit:** Fruit grown in tropical climates, limited in the United States to southern Florida, California, and Hawaii; includes bananas, pineapple, guavas, papayas, mangoes.

**Value of production:** The value of commodities produced during the crop year. Calculated as production times the marketing year average price. May be equal to cash receipts when the crop year for the fruit runs from January through December.

## **Conversion Factors**

1 metric ton = 1.102311 short tons

1 metric ton = 2204.622 pounds

1 metric ton = 1,000 kilograms

1 kilogram = 2.204622 pounds

1 gallon single-strength equivalent = 11.8<sup>0</sup> Brix

1 liter = 0.2641721 single-strength equivalent (sse) gallons

1 hectoliter = 26.41721 sse gallons

1 hectoliter = 1,000 liters

Frozen concentrated orange juice:

1 gallon 42<sup>0</sup> Brix = 4.0389 sse gallons

1 metric ton at 650 Brix = 1,405.88 sse gallons

Frozen concentrated grapefruit juice:

1 gallon 40<sup>0</sup> Brix = 3.81341 sse gallons

grower price, and value, California, 1980 to date ..... 52
- B-32. Prunes and plums: Production, utilization, and  
season-average grower price, four States, 1980 to date ..... 52

## **CITRUS FRUIT**

**Grapefruit:**

- C-1. Grapefruit: Bearing acreage and yield per acre,  
by State, 1980/81 to date ..... 53
- C-2. Grapefruit: Production, by State, 1980/81 to date ..... 53
- C-3. Grapefruit: Utilization of production, by State,  
1980/81 to date ..... 54
- C-4. Grapefruit: Equivalent-on-tree returns, by State,  
1980/81 to date ..... 54
- C-5. All grapefruit: Monthly equivalent-on-tree returns  
received by growers, Arizona, 1980/81 to date ..... 55
- C-6. All grapefruit: Monthly equivalent-on-tree returns  
received by growers, California, 1980/81 to date ..... 55
- C-7. All grapefruit: Monthly equivalent-on-tree returns  
received by growers, Florida, 1980/81 to date ..... 56
- C-8. All grapefruit: Monthly equivalent-on-tree returns  
received by growers, Texas, 1980/81 to date ..... 56
- C-9. All grapefruit: Monthly equivalent-on-tree returns  
received by growers, United States, 1980/81 to date ..... 57

C-10. Grapefruit processed, Florida, 1980/81 to date .....	57
C-11. Frozen concentrated grapefruit juice: Canners' stocks, pack, supplies, and movement, Florida, 1980/81 to date .....	58

**Lemons:**

C-12. Lemons: Acreage, yield per acre, and production, by State, 1980/81 to date .....	58
C-13. Lemons: Utilization of production, by State, 1980/81 to date .....	59
C-14. All lemons: Equivalent-on-tree returns, by State, 1980/81 to date .....	59
C-15. All lemons: Monthly equivalent-on-tree returns received by growers, Arizona, 1980/81 to date .....	60
C-16. All lemons: Monthly equivalent-on-tree returns received by growers, California, 1980/81 to date .....	60
C-17. All lemons: Monthly equivalent-on-tree returns received by growers, United States, 1980/81 to date .....	61

**Limes:**

C-18. Limes: Acreage, yield per acre, production, utilization, season-average grower price, and value, Florida, 1980/81 to date .....	61
---	----

**Oranges:**

C-19. Oranges: Bearing acreage and yield per acre, by State, 1980/81 to date .....	62
C-20. Oranges: Production, by State, 1980/81 to date .....	62
C-21. Oranges: Utilization of production, by State, 1980/81 to date .....	63
C-22. All oranges: Equivalent-on-tree returns, by State, 1980/81 to date .....	63
C-23. All oranges: Monthly equivalent-on-tree returns received by growers, Arizona, 1980/81 to date .....	64
C-24. All oranges: Monthly equivalent-on-tree returns received by growers, California, 1980/81 to date .....	64
C-25. All oranges: Monthly equivalent-on-tree returns received by growers, Florida, 1980/81 to date .....	65
C-26. All oranges: Monthly equivalent-on-tree returns received by growers, Texas, 1980/81 to date .....	65
C-27. All oranges: Monthly equivalent-on-tree returns received by growers, United States, 1980/81 to date .....	66
C-28. Oranges processed: Florida, 1980/81 to date .....	66
C-29. Frozen concentrated orange juice: Canners' stocks, pack, supplies, and movement, Florida, 1980/81 to date .....	67

## BERRIES

**Blackberries:**

D-1. Blackberries: Commercial acreage, yield per acre, production, and season-average grower price, Oregon and Washington, various years to date .....	68
--	----

**Blueberries:**

- D-2. Blueberries: Commercial acreage, yield per acre, production, and season-average grower price, by State, various years to date ..... 69

**Boysenberries and loganberries:**

- D-3. Boysenberries and loganberries: Commercial acreage, yield per acre, production, and season-average grower price, California and Oregon, various years to date ..... 73

**Black raspberries:**

- D-4. Black raspberries: Commercial acreage, yield per acre, production, and season-average grower price, Oregon and Washington, 1980 to date ..... 75

**Red raspberries:**

- D-5. Red raspberries: Commercial acreage, yield per acre, production, and season-average grower price, Oregon and Washington, 1980 to date ..... 76

**Cranberries:**

- D-6. Cranberries: Acreage harvested, yield per acre, production, utilization, season-average grower price, and value, United States, 1980 to date ..... 77

**Strawberries:**

- D-7. Strawberries: Acreage, production, season-average grower price, and value, United States, 1980 to date ..... 77

- D-8. Strawberries, fresh market and processing: Production, season-average grower price, and value, United States, 1980 to date ..... 78

- D-9. Strawberries, fresh: Monthly prices received by growers, United States, 1980 to date ..... 78

**TREE NUTS****General:**

- E-1. All tree nuts: Bearing acreage, United States, 1980/81 to date ..... 79

- E-2. All tree nuts: Gross return per bearing acre, United States, 1980/81 to date ..... 79

- E-3. All tree nuts: Utilized production (shelled basis), United States, 1980/81 to date ..... 80

- E-4. All tree nuts: Season-average grower prices received, United States, 1980/81 to date ..... 80

- E-5. All tree nuts: Value of production, United States, 1980/81 to date ..... 81

- E-6. All tree nuts (shelled basis): Supply and utilization, United States, 1980/81 to date ..... 81

**Almonds:**

- E-7. Almonds: Acreage, yield per acre, production (shelled basis), season-average grower price, and value, California, 1980 to date ..... 82

E-8. Almonds: Supply and utilization (shelled basis), 1980/81 to date .....	.82
--	-----

**Hazelnuts:**

E-9. Hazelnuts (filberts): Bearing acreage and yield per acre (in-shell), by State, 1980 to date .....	.83
E-10. Hazelnuts (filberts): Production (in-shell), season-average grower price, and value, by State, 1980 to date .....	.83
E-11. Hazelnuts (filberts): Supply and utilization (shelled basis), 1980/81 to date .....	.84

**Macadamia nuts:**

E-12. Macadamia nuts: Acreage, yield per acre, production (in-shell), season-average grower price, and value, Hawaii, 1980 to date .....	.84
--	-----

**Pecans:**

E-13. Pecans: Production (in-shell), season-average grower price, and value, United States, 1980 to date .....	.85
---	-----

E-14. Pecans: Supply and utilization (shelled basis), 1980/81 to date .....	.85
---	-----

**Pistachios:**

E-15. Pistachios: Production (in-shell), season-average grower price, and value, California, 1980 to date .....	.86
--	-----

E-16. Pistachios: Supply and utilization (shelled basis), 1980/81 to date .....	.86
--	-----

**Walnuts:**

E-17. Walnuts (English): Production (in-shell), season-average grower price, and value, California, 1980 to date .....	.87
---	-----

E-18. Walnuts: Supply and utilization (shelled basis), 1980/81 to date .....	.87
--	-----

### **PER CAPITA CONSUMPTION**

F-1. Fresh apples: Supply and utilization, 1980/81 to date .....	.88
--	-----

F-2. Fresh bananas: Supply and utilization, 1980 to date .....	.88
--	-----

F-3. Fresh blueberries: Supply and utilization, 1980 to date .....	.89
--	-----

F-4. Fresh grapes: Supply and utilization, 1980/81 to date .....	.89
--	-----

F-5. Fresh kiwifruit: Supply and utilization, 1985 to date .....	.90
--	-----

F-6. Fresh mangos: Supply and utilization, 1980 to date .....	.90
---	-----

F-7. Fresh papayas: Supply and utilization, 1980 to date .....	.91
--	-----

F-8. Fresh peaches and nectarines: Supply and utilization, 1980 to date .....	.91
--	-----

F-9. Fresh pears: Supply and utilization, 1980/81 to date .....	.92
---	-----

F-10. Fresh strawberries: Supply and utilization, 1980 to date .....	.92
--	-----

F-11. Fresh grapefruit: Supply and utilization, 1980/81 to date .....	.93
---	-----

F-12. Fresh lemons: Supply and utilization, 1980/81 to date .....	.93
---	-----

F-13. Fresh oranges: Supply and utilization, 1980/81 to date .....	.94
--	-----

F-14. Fresh tangerines and tangelos: Supply and utilization, 1980/81 to date .....	.94
---	-----

F-15. Canned apples: Supply and utilization, 1980/81 to date .....	.95
--	-----

F-16. Canned apricots: Supply and utilization, 1980/81 to date .....	.95
--	-----

F-17. Canned cherries, sweet: Supply and utilization, 1980/81 to date . . . . .	96
F-18. Canned cherries, tart: Supply and utilization, 1980/81 to date . . . . .	86
F-19. Canned olives: Supply and utilization, 1980/81 to date . . . . .	97
F-20. Canned peaches: Supply and utilization, 1980/81 to date . . . . .	97
F-21. Canned pears: Supply and utilization, 1980/81 to date . . . . .	98
F-22. Canned pineapples: Supply and utilization, processed-weight basis, 1980 to date . . . . .	98
F-23. Canned plums: Supply and utilization, 1980/81 to date . . . . .	99
F-24. Apple juice and cider: Supply and utilization, 1980/81 to date . . . . .	99
F-25. Grapefruit juice: Supply and utilization, 1980/81 to date . . . . .	100
F-26. Orange juice: Supply and utilization, 1985/86 to date . . . . .	100
F-27. Pineapple juice: Supply and utilization, 1980 to date . . . . .	101
F-28. Dried prunes: Supply and utilization, 1980/81 to date . . . . .	101
F-29. Dried raisins: Supply and utilization, 1980/81 to date . . . . .	102
F-30. Fresh fruit: Per capita consumption, 1980 to date . . . . .	103
F-31. Canned fruit: Per capita consumption, product-weight basis, 1980/81 to date . . . . .	104
F-32. Frozen fruit: Per capita consumption, product-weight basis, 1980 to date . . . . .	104
F-33. Dried fruit: Per capita consumption, product-weight basis, 1980/81 to date . . . . .	105
F-34. Selected fruit juices: Per capita consumption, 1980/81 to date . . . . .	105
F-35. Apples: Per capita utilization adjusted for imports and exports, fresh-weight equivalent, by product, 1980/81 to date . . . . .	106
F-36. Grapes: Per capita utilization adjusted for imports and exports, fresh-weight equivalent, by product, 1980/81 to date . . . . .	106
F-37. Total U.S. population . . . . .	107
F-38. Fresh and processed fruit: Per capita utilization adjusted for imports and exports, fresh-weight equivalent, 1980 to date . . . . .	107
F-39. Per capita consumption of selected noncitrus fruit, fresh-weight equivalent, 1980/81 to date . . . . .	108
F-40. Per capita consumption of citrus fruit, fresh-weight equivalent, 1980/81 to date . . . . .	109
F-41. Selected fruit: Per capita consumption, fresh-weight equivalent, 1980 to date . . . . .	110
F-42. Tree nuts (shelled basis): Per capita consumption, 1980/81 to date . . . . .	110

## TRADE

### **General:**

G-1. Volume of U.S. imports of selected commodities from top countries, 1993-2003 . . . . .	111
G-2. Volume of U.S. exports of selected commodities to top countries, 1993-2003 . . . . .	116

**Fruit:**

- G-3. U.S. fresh-market fruit imports, monthly, 2003 ..... 120  
G-4. U.S. fresh-market fruit imports, monthly, 2002 ..... 121  
G-5. U.S. fresh-market fruit imports, monthly, 2001 ..... 122  
G-6. U.S. fresh-market fruit exports, monthly, 2003 ..... 123  
G-7. U.S. fresh-market fruit exports, monthly, 2002 ..... 124  
G-8. U.S. fresh-market fruit exports, monthly, 2001 ..... 125

**Fruit juice:**

- G-9. U.S. fruit juice trade, monthly, 2003 ..... 126  
G-10. U.S. fruit juice trade, monthly, 2002 ..... 127  
G-11. U.S. fruit juice trade, monthly, 2001 ..... 128

Table A-1--U.S. per capita use of selected, commercially produced, fresh and processed fruit and tree nuts, 1976-2003 1/

Crop	1976	1977	1978	1979	1980	1981	1982	1983	1984	1985

1/ Data may not match other tables due to rounding. Year reflects end of harvest for citrus and beginning year of harvest for noncitrus. 2/ Includes tangerines, tangelos, other mandarins, and limes. 3/ Includes nectarines. 4/ Includes small quantities of dried and other processed products. 5/ Includes apricots, blueberries, cranberries, kiwifruit, mangoes, papayas, and plums and prunes. 6/ Includes apricots and plums and prunes. 7/ Includes blackberries, blueberries, raspberries, boysenberries, loganberries, and apricots. 8/ Includes prunes and cranberries. Estimates for cranberries begin in 1989. 9/ Includes apricots, dates, figs, peaches, and plums and prunes. 10/ Shelled basis. 11/ Includes hazelnuts, macadamias, pistachios, Brazil nuts, cashews, and mixed nuts.

1/ National Agricultural Statistics Service (NASS) began reporting "limited" and "undersized" as separate categories in 1990 and made estimates for 1988 and 1989. All data since 1988 are as reported by NASS. 2/ Mostly canned, except for 1980 when use of limited-size fruit in canned ripe olives was not permitted. Reported by California Olive Committee for 1976 to 1987. 3/ "Limited and undersized" reported by NASS, minus "limited size" reported by California Olive Committee for 1976 to 1987. Includes undersized and culls.

N.A.= Not available. 1/ Small quantities of processed blueberries are included in fresh to avoid disclosure of individual operations. 2/ Maine produces wild blueberries, other States cultivated. NASS publishes data for cultivated blueberries only. Beginning in 1988, data are from the New England Agricultural Statistics Service. Data prior to 1988 are from the North American Blueberry Council. 3/ Includes small amounts from Indiana prior to 1992.

Sources: New England Agricultural Statistics Service, Oregon Agricultural Statistics Service, Oregon Dept. of Agriculture; Washington Agricultural Statistics Service, State of Washington Dept. of Agriculture; North American Blueberry Council; National Agricultural Statistics Service, USDA.

1/ Conversion factors from in-shell to shelled basis varies year to year for production, stocks, and exports, and were 0.41 in 1996/97, 1997/98, and 1998/99, 0.42 in 1999/2000, 0.43 in 2000/01, 0.42 in 2001/02, and 0.43 in 2002/03 and 2003/04. For imports, the conversion factor was a constant 0.35. 2/ Season beginning August 1. 3/ Inedibles and noncommercial usage. 4/ Utilized production minus loss and exempt. 5/ Bureau of Census, U.S. Department of Commerce. 6/ Walnut Marketing Board. 7/ Marketable production plus imports and beginning stocks. 8/ Preliminary estimates.
