

Native Plants for Wildlife Habitat and Conservation Landscaping

Maryland: Piedmont Region

photo credit: Britt Slattery, USFWS

ABOUT THIS PLANT LIST

This list provides information about native plants that can be used for habitat restoration and natural or environmentally beneficial landscaping projects such as **BayScapes**. All of the plants listed occur naturally in Maryland. Plants are grouped by plant type, then listed alphabetically by Latin name. This is not intended as a complete list of plants native to Maryland. Rather, plants have been included because they have both ornamental and wildlife value, and are generally available for sale.

WHY USE NATIVE PLANTS?

Native or indigenous plants naturally occur in the region in which they evolved. They are adapted to local soil, rainfall and temperature conditions, and have developed natural defenses to many insects and diseases. Because of these traits, native plants will grow with minimal use of water, fertilizers, and pesticides. Wildlife species evolve with plants; therefore, they use native plant communities as their habitat. Using native plants helps preserve the balance and beauty of natural ecosystems.

TREASURED NATURAL RESOURCES

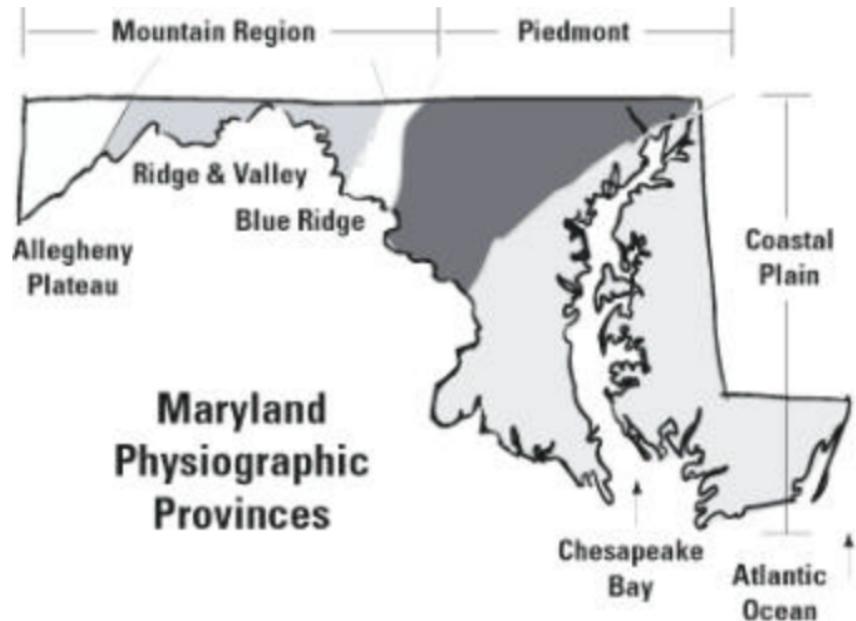

Maryland's landscape includes a wide range of natural communities, physiographic provinces, and natural features. Here, one can find both southern and northern ecosystems in close proximity. From the cypress swamps, barrier islands, and Delmarva bays of the Eastern Shore; to the rolling hills, stream valleys, and hardwood forests of the Piedmont plateau; to the mountain boreal bogs, caves, and limestone woods to the west, Maryland offers a diversity of habitats that support an impressive variety of species.

Rich in plants and animals, Maryland harbors some species with extremely limited ranges -- the nationally endangered dwarf wedge mussel and Delmarva fox squirrel find refuge within our borders, along with rare subterranean invertebrates, beach-loving beetles, and uncommon shale barren plants, like Kate's-mountain clover. When early colonists first explored this part of the New World, they found an abundance of wildlife, including elk, wolves, bison, and prairie-chickens. Today, these species are gone from Maryland and many more have declined. Much of our natural heritage is now confined to small fragments of the original wilderness.

As our population grows and land-use pressures intensify it is increasingly important that we protect our vanishing species and remaining natural areas, and restore or create habitat for the wildlife that remains. Maryland's wildlife, plants, habitats, and network of streams and rivers that lead to the Chesapeake Bay hold tremendous resource potential, as well as educational, recreational, aesthetic, and cultural values. By working together, these treasures can be conserved for future generations.

MARYLAND'S REGIONS AND HABITATS

From the sandy dunes of the coast to the rocky slopes of the mountains, Maryland's rich variety of habitats are strongly linked to its geology (see map). For this guide, the state has been divided into three regions: (1) the **coastal plain**, an area with a more southern climate in the eastern part of the state, which includes the Chesapeake Bay's eastern and western shores, up to the fall line roughly represented by U.S. Route 1; (2) the **Piedmont plateau**, which extends roughly from the fall line to Frederick, MD; and (3) the **mountain zone**, a more northern climate, which reaches from Frederick westward, above the 1500' elevation level. Some native plants are common throughout the state, while others are adapted to the unique conditions found only in one or two regions.

This publication is part of a set of three brochures that feature lists of species appropriate for planting in Maryland's coastal plain, Piedmont plateau, and mountain region. To help ensure successful landscaping and restoration, use plants' natural ranges to guide your plant selection. For more complete plant information, request a copy of U.S. Fish and Wildlife Service's new edition of *Native Plants for Wildlife Habitat*, a more comprehensive guide to native plants for the full Chesapeake Bay watershed (see references list in this brochure).

Wetland, forest, meadow, and thicket are just a few of Maryland's habitats, each of which is characterized by plants that have adapted to the available growing conditions. Plants usually do best when placed in sites with the same light, moisture, and soil conditions as their natural habitats.

GROWTH CONDITIONS

LIGHT The amount of sunlight a plant requires is defined as: (1) **Full sun (Su)**, the site is in direct sunlight for at least six hours a day during the growing season; (2) **Partial shade (PS)**, the site receives approximately three to six hours of direct sunlight; and (3) **Shade (Sh)**, the site receives less than three hours of direct sunlight or filtered light.

MOISTURE The amount of soil moisture a plant requires is defined as: (1) **Wet (W)**, areas where the soil is saturated for much of the growing season, except in droughts. Many of the plants designated for wet areas tolerate specific ranges of water depths. Consult a wetland plant specialist or reference book; (2) **Moist (M)**, areas where the soil is damp, and may be occasionally saturated ("average soil" has been included in this category); and (3) **Dry (D)**, areas where water does not remain after a rain. The latter areas may be in full sun or in a windy location, on a steep slope, or have sandy soil. Plants in this category are drought tolerant.

SOIL Many of the native plants listed will tolerate a range of soil types. For best results, select plants suited to existing site conditions rather than amending the soil. However, be aware that plant selection may be limited if your site has very sandy soil, heavy clay, compacted soil, or extreme soil pH (above 6.8 or below 5.5). In these cases, seek advice from a nurseryman, horticulturist, botanist, Maryland Cooperative Extension, or other expert.

DESIGNING A HABITAT

In addition to providing the growth conditions that native plants prefer in the wild, it is also a good idea to try to re-create a natural habitat. Consider using plants together as they grow in the wild (known as plant communities). Arrange plants in groups or groves, providing several layers of vegetation. Select plants that fruit or bloom during different times of the year to provide food for wildlife year round. For more information and assistance, particularly with large habitat projects, contact the U.S. Fish and Wildlife Service, Maryland Department of Natural Resources, U.S. Department of Agriculture Natural Resources Conservation Service, county Soil Conservation District, Maryland Cooperative Extension, or other natural resources agency or organization.

WHERE TO FIND NATIVE PLANTS

Most nurseries carry some native plants, and some nurseries specialize and carry a greater selection. Some plants will be more readily available than others will. If you have a favorite that you can't obtain, be sure to ask your local nursery to consider adding it to their stock. A list of native plant nurseries in the Chesapeake Bay region is available from the U.S. Fish and Wildlife Service Chesapeake Bay Field Office at www.fws.gov/r5cbfo/bayscapes.htm.

Native plants should not be removed from the wild unless an area is about to be developed. Even then, it is difficult to transplant wild-collected plants and to duplicate their soil and other growth requirements in a home garden. Plants that are grown from seed or cuttings by nurseries have a much greater tolerance for garden conditions. Help to preserve natural areas by purchasing plants that have been grown, not collected.

AVOID USING INVASIVE NON-NATIVE PLANTS

Non-native or exotic plants introduced from other parts of the world or other parts of the country have degraded many natural ecosystems. Although many non-native plants are considered beneficial and do not escape into the natural environment, it is difficult for most gardeners to know the risks of every ornamental plant. Some of these introduced plants are invasive, meaning that there are few or no naturally occurring measures such as insects or competitors to control them. Invasive plants can spread rapidly and smother or out-compete native vegetation. Ecosystems impacted by invasive, non-native plants have a reduced ability to clean our air and water, stabilize the soil, buffer floods, and provide wildlife food and shelter. Lists of non-native plants to avoid in your landscape are available from the Maryland Native Plant Society, Maryland DNR Heritage Program, or Plant Conservation Alliance (see contact information in this brochure).

FOR MORE INFORMATION

There are many resources available that provide information on native plants and natural landscaping. Walking in natural areas near your home is a good way to see the plants in their native habitats, and to get ideas on how to plant them in your landscape. Check libraries and bookstores for field guides to native plants and wildlife in the Chesapeake Bay region. You will also find books on how to create native plant landscapes. Organizations such as the Maryland Native Plant Society and the Plant Conservation Alliance publish newsletters and maintain Web sites. Landscaping with native plants has become very popular, and you will be joining many others in this effort to help preserve Maryland's natural resources.

PLANTS NATIVE TO MARYLAND'S PIEDMONT REGION

Soil Moisture:

W = wet

M = moist

D = Dry

Sunlight:

Su = full sun

PS = part shade

Sh = full shade

Flower Color (simplified, all shades):

B = brown

R = red

O = orange

W = white

P = pink

G = green

Y = yellow

Pu = purple

Bl = blue

* denotes evergreen or semi-evergreen foliage

Scientific Name	Common Name	W	M	D	Su	PS	Sh	Height	Color	Bloom
FERN / FERN ALLY										
<i>Adiantum pedatum</i>	maidenhair fern		●			●		1-2'		
<i>Asplenium platyneuron</i>	ebony spleenwort		●			●	●	1-1.5'	*	
<i>Athyrium asplenioides</i>	southern lady fern	●	●			●		1.5-3'		
<i>Botrychium virginianum</i>	rattlesnake fern	●	●			●	●	1.5'		
<i>Dennstaedtia punctilobula</i>	hay-scented fern	●	●	●	●	●		1-3'		
<i>Dryopteris marginalis</i>	marginal shield fern, evergreen wood fern	●				●	●	1.5'	*	
<i>Dryopteris spinulosa</i>	spinulose woodfern	●				●	●	1-2.5'		
<i>Onoclea sensibilis</i>	sensitive fern	●	●			●	●	1-2'		
<i>Osmunda cinnamomea</i>	cinnamon fern	●	●		●	●	●	2-3'		
<i>Osmunda regalis</i>	royal fern	●	●		●	●	●	2-3'		
<i>Polystichum acrostichoides</i>	Christmas fern	●				●	●	1.5-2'	*

<i>Houstonia caerulea</i>	bluet, innocence	●		●	●	●		<1'	Bl, W	Apr-Jun
<i>Liatris graminifolia</i>	grass-leaf blazingstar	●	●	●	●	●		1-3'	Pu	Sep-Oct
<i>Lilium canadense</i>	Canada lily	●	●		●	●		1.5-4.5'	O	Jun-Aug
<i>Lilium superbum</i>	Turk's cap lily	●	●		●	●		4-7'	Y, O, R	Jul-Aug
<i>Lobelia cardinalis</i>	cardinal flower	●	●		●	●		3'	R	Jul-Sep
<i>Lobelia siphilitica</i>	great blue lobelia	●	●		●	●	●	3'	Bl	Aug-Oct
<i>Mertensia virginica</i>	Virginia bluebells	●		●	●	●	●	1'	Bl	Mar-Apr
<i>Monarda fistulosa</i>	wild bergamot	●	●	●	●	●		1.5-5	P, Pu	Jul-Aug
<i>Monarda punctata</i>	horsemint		●	●	●			0.5-3'	Y-Pu	Jun-Oct
<i>Oenothera fruticosa</i>	narrow-leaved sundrops	●	●		●	●		2'	Y	Jun-Sep
<i>Oenothera perennis</i>	sundrops		●	●	●			1-3'	Y	May-Aug
<i>Penstemon digitalis</i>	beardtongue	●	●	●	●	●		2'	W	Jun-Jul
<i>Phlox divaricata</i>	woodland blue phlox	●			●	●	●	1.5'	Bl	Apr-May
<i>Phlox subulata</i>	moss phlox		●	●				<1'	P, W *	Apr-May
<i>Physostegia virginiana</i>	obedient plant, false dragonhead	●	●	●				3'	P, Pu	Aug-Sep
<i>Podophyllum peltatum</i>	Mayapple	●			●	●		1'	W	Apr-May
<i>Polemonium reptans</i>	Jacob's ladder	●			●	●	●	0.5-1.5'	Bl	Apr-Jun
<i>Polygonatum biflorum</i>	Solomon's seal	●	●		●	●	●	0.5-2'	W	May-Jun
<i>Rudbeckia fulgida</i>	early coneflower	●		●	●	●		1.5'	Y	Jul-Oct
<i>Rudbeckia hirta</i>	black-eyed Susan	●	●	●	●			2'	Y	Jun-Oct
<i>Rudbeckia laciniata</i>	tall or green-headed coneflower	●		●	●	●		1.5-9'	Y	Jul-Sep
<i>Rudbeckia triloba</i>	three-lobed coneflower	●		●	●	●		1.5-4.5'	Y	Jun-Oct
<i>Sanguinaria canadensis</i>	bloodroot	●				●	●	<1'	W	Mar-May
<i>Saxifraga virginiensis</i>	early saxifrage	●	●	●	●	●	●	1'	W	Mar-May
<i>Senecio aureus</i>	golden ragwort	●	●		●	●	●	0.5-2.5'	Y	Apr-Aug
<i>Senna marilandica</i> (<i>Cassia marilandica</i>)	Maryland wild senna		●	●		●		3-4'	Y	Jul-Aug
<i>Silene stellata</i>	starry campion	●	●	●	●	●		1-2'	W	Jul-Sep
<i>Sisyrinchium atlanticum</i>	coastal blue-eyed grass	●	●		●			0.5-2.5'	Bl	May-Jul
<i>Sisyrinchium graminoides</i>	blue-eyed grass	●	●	●	●	●		0.5-1.5'	Bl	Apr-Jun
<i>Smilacina racemosa</i>	false Solomon's seal	●			●	●	●	2.5'	W	May-Jul
<i>Solidago caesia</i>	blue-stemmed goldenrod	●	●	●	●	●		1-3'	Y	Aug-Oct
<i>Solidago nemoralis</i>	gray goldenrod		●	●	●	●		0.5-3'	Y	Jul-Nov
<i>Solidago rigida</i>	rigid goldenrod	●	●	●	●	●		3-5'	Y	Aug-Oct
<i>Solidago rugosa</i>	wrinkle leaf goldenrod	●	●		●			1-6'	Y	Aug-Oct
<i>Solidago speciosa</i>	showy goldenrod	●	●	●	●	●		2-6'	Y	Jul-Oct
<i>Symplocarpus foetidus</i>	skunk cabbage	●				●	●	1-3'		Mar-Apr
<i>Thalictrum dioicum</i>	early meadow rue	●			●	●	●	2'	G, Pu	Apr-May
<i>Thalictrum polygamum</i>	tall meadow rue	●		●	●	●	●	3-6'	W	Jun-Jul
<i>Tiarella cordifolia</i>	foamflower	●		●	●	●	●	1'	W	Apr-Jul
<i>Tradescantia virginiana</i>	Virginia spiderwort	●		●	●	●	●	2-3'	Bl, Pu	Apr-Jun
<i>Trillium grandiflorum</i>	white trillium	●			●	●	●	1'	W	Apr-Jun
<i>Verbena hastata</i>	blue vervain	●	●		●	●		4'	Bl, Pu	Jun-Oct
<i>Vernonia noveboracensis</i>	New York ironweed	●		●	●			4-8'	Pu	Aug-Oct
<i>Viola pedata</i>	bird's foot violet		●	●	●	●		<1'	Pu	Mar-Jun

<i>Rubus allegheniensis</i>	Allegheny blackberry	●	●	●	●	●		1-3'	W	May-Jun
<i>Vaccinium vacillans</i> (<i>V. pallidum</i>)	early lowbush blueberry		●		●	●		1.5'	W, P	Apr-May
<i>Viburnum acerifolium</i>	maple-leaved arrowwood		●	●	●	●		3-6.5'	W, P	Apr-May
SHRUB, medium										
<i>Aronia arbutifolia</i>	red chokeberry	●	●	●	●			1.5-13'	W	Mar-May
<i>Cephalanthus occidentalis</i>	buttonbush	●	●		●			to 10'	W	Jul-Aug
<i>Cornus amomum</i>	silky dogwood	●			●	●		3-10'	W	May-Jun
<i>Hamamelis virginiana</i>	witch hazel	●	●	●	●			3-15'	Y	Sep-Dec
<i>Hydrangea arborescens</i>	wild hydrangea	●			●	●	●	3-9'	W	Jun-Jul
<i>Leucothoe racemosa</i>	fetterbush	●			●	●	●	13'	W, P	May-Jun
<i>Lindera benzoin</i>	spicebush	●	●		●	●		6.5-16'	Y	Mar-May
<i>Lyonia ligustrina</i>	male-berry	●			●	●	●	1.5-10'	W	May-Jul
<i>Rhododendron maximum</i>	great rhododendron, rose bay	●	●		●	●	●	15' +	W, P *	May-Aug
<i>Rhododendron periclymenoides</i>	pink azalea, Pinx terbloom	●	●			●		3-10'	P, W	Apr-May
<i>Rhododendron viscosum</i>	swamp azalea	●	●		●			6.5-10'	W, P	May-Aug
<i>Rhus aromatica</i>	fragrant sumac		●	●	●			6'	G	Mar-May
<i>Rhus glabra</i>	sweet or smooth sumac	●	●	●				1.5-10'	G	Jun-Jul
<i>Rosa palustris</i>	swamp rose	●			●	●	●	8'	P	Jul-Aug
<i>Sambucus canadensis</i>	common elderberry	●	●		●	●	●	6-12'	W	Jun-Jul
<i>Vaccinium corymbosum</i>	highbush blueberry	●	●	●	●	●		6-12'	W, P	Apr-May
<i>Vaccinium stamineum</i>	deerberry	●			●	●		5-10'	W, Pu	Apr-Jun
<i>Viburnum dentatum</i> (<i>V. recognitum</i>)	southern arrowwood	●	●	●	●			10'	W	May-Jun
<i>Viburnum nudum</i>	naked witherod	●			●	●		6.5-13'	W	Apr-May
SHRUB, tall										
<i>Alnus serrulata</i>	smooth alder	●	●		●			12-20'		Mar-Apr
<i>Aralia spinosa</i>	Devil's walking stick	●			●	●		39'	W	Jun-Aug
<i>Corylus americana</i>	American hazelnut or filbert	●				●		10-15'		Mar-Apr
<i>Ilex decidua</i>	possum haw	●	●	●	●			33'	W	Apr-May
<i>Kalmia latifolia</i>	mountain laurel	●	●	●	●	●	●	10'	W, P *	May-Jul
<i>Rhus copallina</i>	shining or winged sumac		●	●	●	●		20-30'	G-Y	Jul-Aug
<i>Rhus typhina</i>	staghorn sumac		●	●				33'	Y, G	Jun-Jul
<i>Viburnum prunifolium</i>	black haw	●	●		●	●		26'	W	Apr-May
TREE, small/ medium (understory)										
<i>Amelanchier canadensis</i>	serviceberry, shadblush	●	●			●	●	35-50'	W	Apr-May
<i>Carpinus caroliniana</i>	American hornbeam, blue beech	●				●	●	35-50'		Apr-May

Milkweeds such as this butterflyweed (*Asclepias tuberosa*) are important host plants for Monarch butterflies.

sample plant lists for Maryland's Piedmont region

Plants for Wet Sites, Wetlands, Ponds, and Wet Edges (partial to full sun)

Ferns:

Osmunda cinnamomea cinnamon fern
Osmunda regalis royal fern
Thelypteris palustris marsh fern

Grasses and Grasslike Plants:

Carex stricula tufted sedge
Panicum virgatum Virginia switchgrass
Tripsacum dactyloides gama grass

Herbaceous Plants:

Eupatorium dubium Joe-Pye weed
Eupatorium perfoliatum common boneset
Liatris spicata blazingstar
Lilium canadense Canada lily
Lilium superbum Turk's cap lily
Lobelia cardinalis cardinal flower
Lobelia siphilitica great blue lobelia
Oenothera fruticosa sundrops
Senecio aureus golden ragwort
Sisyrinchium atlanticum coastal blue-eyed grass
Solidago rugosa wrinkle leaf goldenrod
Verbena hastata blue vervain

Herbaceous Emergents

(growing up out of water):

Acorus calamus sweet flag
Iris versicolor blue flag iris
Juncus canadensis Canada rush
Juncus effusus soft rush
Nuphar luteum (advena) yellow water lily
Nymphaea odorata fragrant water lily
Osmunda regalis royal fern
Peltandra virginica arrow arum
Pontederia cordata pickerelweed
Sagittaria latifolia duck potato
Scirpus cyperinus woolgrass
Scirpus pungens three-square
Typha latifolia broadleaved cattail

Shrubs:

low:

Hypericum densiflorum dense St. John's wort
Rubus allegheniensis Allegheny blackberry

medium:

Aronia arbutifolia red chokeberry
Cephalanthus occidentalis buttonbush
Rhododendron viscosum swamp azalea
Rosa palustris swamp rose
Sambucus canadensis common elderberry

tall:

Alnus serrulata smooth alder
Magnolia virginiana sweetbay (see Trees)
Viburnum prunifolium black haw viburnum

Trees, tall:

Acer negundo box elder
Acer rubrum red maple
Acer saccharinum silver maple
Betula nigra river birch
Carya cordiformis bitternut hickory
Carya glabra pignut hickory
Cellis occidentalis hackberry
Fraxinus pennsylvanica green ash
Liquidambar styraciflua sweet gum
Nyssa sylvatica black gum, sourgum
Platanus occidentalis American sycamore
Populus deltoides eastern cottonwood
Populus heterophylla swamp cottonwood
Quercus bicolor swamp white oak
Quercus michauxii swamp chestnut oak
Quercus phellos willow oak
Salix nigra black willow
Salix sericea silky willow
Taxodium distichum bald cypress

Vine:

Parthenocissus quinquefolia Virginia creeper

Plants for Dry Sun, Sunny Slopes, Meadows, Hedgerows, or Edges

Ferns:

Dennstaedtia punctilobula hay-scented fern

Grasses or Grasslike Plants:

Andropogon virginicus broomsedge
Elymus canadensis Canada wild rye
Elymus hystrix bottlebrush grass
Panicum amarum coastal panic grass
Schizachyrium scoparium little bluestem
Sorghastrum nutans Indiangrass

Herbaceous Plants and Groundcovers:

Asclepias syriaca common milkweed
Asclepias tuberosa butterflyweed
Aster laevis smooth blue aster
Aster novae-angliae New England aster
Aster pilosus white heath aster
Baptisia tinctoria wild indigo
Chrysopsis mariana Maryland golden aster
Coreopsis tinctoria tickseed sunflower
Coreopsis verticillata threadleaf coreopsis
Desmodium paniculatum panicle tick-trefoil
Eupatorium fistulosum Joe-Pye weed
Helianthus helianthoides ox-eye sunflower
Liatris graminifolia grass-leaf blazingstar
Monarda fistulosa wild bergamot
Monarda punctata horsemint
Rudbeckia hirta black-eyed Susan
Saxifraga virginiana early saxifrage
Silene stellata starry campion
Sisyrinchium graminoides blue-eyed grass
Solidago caesia blue-stem goldenrod
Solidago nemoralis gray goldenrod
Solidago rigida rigid goldenrod
Solidago speciosa showy goldenrod
Viola pedata bird's foot violet

Shrubs:

low:

Hypericum densiflorum dense St. John's wort
Rosa carolina pasture rose
Rubus allegheniensis Allegheny blackberry
Viburnum acerifolium maple-leaved arrowwood

medium:

Aronia arbutifolia red chokeberry
Hamamelis virginiana witch hazel
Rhus aromatica fragrant sumac
Rhus glabra smooth sumac
Vaccinium corymbosum highbush blueberry
Viburnum dentatum southern arrowwood

tall:

Ilex decidua possum haw
Kalmia latifolia mountain laurel (evgr)
Rhus copallina shining sumac
Rhus typhina staghorn sumac

Trees:

small/ medium:

Chionanthus virginicus white fringe tree
Crataegus crus-galli cockspur hawthorn
Juniperus virginiana eastern redcedar (evgr)
Prunus americana American wild plum

tall:

Carya glabra pignut hickory
Diospyros virginiana common persimmon
Nyssa sylvatica black gum, sourgum
Pinus echinata shortleaf pine (evgr)
Pinus rigida pitch pine (evergr)
Pinus strobus white pine (evergr)
Pinus virginiana Virginia pine (evergr)
Quercus prinus (montana) chestnut oak
Quercus rubra northern red oak
Quercus velutina black oak
Robinia pseudoacacia black locust

Vines:

Campsis radicans trumpet creeper
Clematis virginiana virgin's bower
Lonicera sempervirens coral honeysuckle

Plants for Shade, Woodlands, or Woods Edges (dry to moist soil)

* designates plants for part shade (not for full shade)

Ferns:

<i>Adiantum pedatum</i>	maidenhair fern	*
<i>Asplenium platyneuron</i>	ebony spleenwort	
<i>Botrychium virginianum</i>	rattlesnake fern	
<i>Dennstaedtia punctilobula</i>	hay-scented fern	*
<i>Dryopteris marginalis</i>	evergreen wood fern	
<i>Dryopteris spinulosa</i>	spinulose wood fern	
<i>Polystichum acrostichoides</i>	Christmas fern (evgr)	
<i>Woodwardia areolata</i>	netted chain fern	

Grasses and Grasslike Plants:

<i>Carex glaucoidea</i>	blue wood sedge	
<i>Carex pensylvanica</i>	sedge	
<i>Chasmanthium latifolium</i>	wild (river) oats	*
<i>Elymus hystrix</i>	bottlebrush grass	
<i>Elymus virginicus</i>	Virginia wild rye	

Groundcovers:

<i>Asarum canadense</i>	wild ginger	
<i>Carex glaucoidea</i>	blue wood sedge	
<i>Chimaphila maculata</i>	striped wintergreen	
<i>Chrysogonum virginianum</i>	green-and-gold	*
<i>Gaultheria procumbens</i>	wintergreen	
<i>Hepatica americana</i>	round-lobed hepatica	
<i>Maianthemum canadense</i>	Canada mayflower	
<i>Mitchella repens</i>	partridgeberry (evgr)	
<i>Sedum ternatum</i>	mountain stonecrop	
<i>Uvularia sessilifolia</i>	straw lily	

Herbaceous Plants:

<i>Aquilegia canadensis</i>	eastern columbine	
<i>Aralia racemosa</i>	spikenard	
<i>Arisaema triphyllum</i>	Jack-in-the-pulpit	
<i>Chelone glabra</i>	white turtlehead	*
<i>Claytonia virginica</i>	spring beauty	
<i>Dentaria laciniata</i>	toothwort	
<i>Dicentra cucullaria</i>	Dutchman's breeches	
<i>Dicentra eximia</i>	wild bleeding heart	
<i>Erythronium americanum</i>	trout lily	
<i>Eupatorium rugosum</i>	white snakeroot	*
<i>Geranium maculatum</i>	wild geranium	
<i>Helenium autumnale</i>	yellow sneezeweed	
<i>Heuchera americana</i>	alumroot (semi-evgr)	*
<i>Houstonia caerulea</i>	bluet, innocence	
<i>Lobelia siphilitica</i>	great blue lobelia	
<i>Mertensia virginica</i>	Virginia bluebells	
<i>Phlox divaricata</i>	woodland blue phlox	
<i>Podophyllum peltatum</i>	Mayapple	
<i>Polemonium reptans</i>	Jacob's ladder	
<i>Polygonatum biflorum</i>	Solomon's seal	
<i>Sanguinaria canadensis</i>	bloodroot	
<i>Saxifraga virginiana</i>	early saxifrage	
<i>Senecio aureus</i>	golden ragwort	
<i>Smilacina racemosa</i>	false Solomon's seal	
<i>Thalictrum polygamum</i>	tall meadow rue	
<i>Tiarella cordifolia</i>	foamflower	
<i>Tradescantia virginiana</i>	Virginia spiderwort	
<i>Trillium grandiflorum</i>	white trillium	

Shrubs:

low:

<i>Gaylussacia baccata</i>	black huckleberry
<i>Viburnum acerifolium</i>	maple-leaved arrowwood

medium:

<i>Cornus amomum</i>	silky dogwood
<i>Hamamelis virginiana</i>	witch hazel
<i>Hydrangea arborescens</i>	wild hydrangea
<i>Leucothoe racemosa</i>	fetterbush
<i>Lindera benzoin</i>	spicebush
<i>Lyonia ligustrina</i>	male-berry
<i>Vaccinium stamineum</i>	deerberry
<i>Viburnum nudum</i>	naked witherod

tall:

<i>Corylus americana</i>	American hazelnut
<i>Ilex decidua</i>	possum haw
<i>Kalmia latifolia</i>	mountain laurel (evgr)
<i>Viburnum prunifolium</i>	black haw

Trees:

small/medium:

<i>Amelanchier canadensis</i>	serviceberry
<i>Carpinus caroliniana</i>	American hornbeam
<i>Cercis canadensis</i>	eastern redbud
<i>Chionanthus virginicus</i>	white fringetree
<i>Cornus florida</i>	flowering dogwood
<i>Ilex opaca</i>	American holly
<i>Magnolia virginiana</i>	sweetbay magnolia
<i>Ostrya virginiana</i>	hop-hornbeam
<i>Pyrus angustifolia</i>	southern crabapple
<i>Sassafras albidum</i>	sassafras

tall:

<i>Carya alba (tomentosa)</i>	mockernut hickory
<i>Diospyros virginiana</i>	common persimmon
<i>Nyssa sylvatica</i>	black gum, sourgum
<i>Quercus rubra</i>	northern red oak
<i>Tilia americana</i>	American basswood
<i>Tsuga canadensis</i>	eastern hemlock (evgr)
<i>Ulmus rubra</i>	slippery elm

Vines:

<i>Celastrus scandens</i>	American bittersweet
<i>Clematis viorna</i>	leather flower
<i>Parthenocissus quinquefolia</i>	Virginia creeper

Evergreens for various sites

ferns, herbaceous plants and other groundcovers

<i>Asarum canadense</i>	wild ginger (semi-evgr)
<i>Asplenium platyneuron</i>	ebony spleenwort
<i>Dryopteris marginalis</i>	marginal shield fern
<i>Gaultheria procumbens</i>	wintergreen
<i>Heuchera americana</i>	alumroot (semi-evgr)
<i>Mitchella repens</i>	partridgeberry
<i>Phlox subulata</i>	moss phlox
<i>Polygonatum biflorum</i>	Christmas fern
<i>Sanguinaria canadensis</i>	mountain stonecrop

short shrubs (under 6')

<i>Gaultheria procumbens</i>	wintergreen
------------------------------	-------------

medium shrubs (to 15' or more)

<i>Magnolia virginiana</i>	sweetbay magnolia
<i>Rhododendron maximum</i>	rosebay, great laurel

tall shrubs and trees

<i>Ilex opaca</i>	American holly
<i>Juniperus virginiana</i>	eastern redcedar
<i>Kalmia latifolia</i>	mountain laurel
<i>Pinus rigida</i>	pitch pine
<i>Pinus strobus</i>	white pine
<i>Pinus virginiana</i>	Virginia pine
<i>Tsuga canadensis</i>	eastern hemlock

vines

<i>Lonicera sempervirens</i>	coral honeysuckle
------------------------------	-------------------

A box turtle enjoys a woodland garden featuring native plants (here, fern fiddleheads as they emerge in spring).
