1/ Estimated total unmeasured return 240,783 acre-feet (af) reduces States use. Estimated unmeasured return by State is 153,216 af in Arizona, 86,075 af in California, and 1,492 af in Nevada.

2/ Sum of Total Use, Lower Basin States, deliveries to Mexico in satisfaction of Treaty, and water bypassed Pursuant to Minute 242.

3/ Includes water delivered in satisfaction of the Treaty with Mexico and water bypassed pursuant to Minute 242.

Note to Reader: Each section of this report, and each State within each section has its own footnotes. The numbers are repeated for each section.

ARTICLE V OF THE DECREE OF THE SUPREME COURT

OF THE UNITED STATES

IN ARIZONA v. CALIFORNIA ET AL. DATED MARCH 9, 1964

Article V

V. The United States shall prepare and maintain, or provide for the preparation and maintenance of, and shall make available, annually and at such shorter intervals as the Secretary of the Interior shall deem necessary or advisable, for inspection by interested persons at all reasonable times and at a reasonable place or places, complete, detailed and accurate records of:

(A) Releases of water through regulatory structures controlled by the United States;

(B) Diversions of water from the mainstream, return flow of such water to the stream as is available for consumptive use in the United States or in satisfaction of the Mexican treaty obligation, and consumptive use of such water. These quantities shall be stated separately as to each diverter from the mainstream, each point of diversion, and each of the States of Arizona, California and Nevada;

(C) Releases of mainstream water pursuant to orders therefor but not diverted by the party ordering the same, and the quantity of such water delivered to Mexico in satisfaction of the Mexican Treaty or diverted by others in satisfaction of rights decreed herein. These quantities shall be stated separately as to each diverter from the mainstream, each point of diversion, and each of the States of Arizona, California and Nevada;

(D) Deliveries to Mexico of water in satisfaction of the obligations of Part III of the Treaty of February 3, 1944, and separately stated, water passing to Mexico in excess of treaty requirements;

(E) Diversions of water from the mainstream of the Gila and San Francisco Rivers and the consumptive use of such water, for the benefit of the Gila National Forest.

RECORDS OF RELEASES OF WATER THROUGH
REGULATORY STRUCTURES IN ACCORDANCE WITH

ARTICLE V(A) OF THE DECREE OF

THE SUPREME COURT OF THE UNITED STATES

IN ARIZONA v. CALIFORNIA ET AL. DATED MARCH 9, 1964

CALENDAR YEAR 2001

The following tabulations for calendar year 2001 show final records of releases of water through regulatory structures controlled by the United States. At Hoover, Davis, Parker, Palo Verde, Imperial, and Laguna Dams, the records are furnished by the U.S. Geological Survey based on measurements at or below the structures.

The record of river flow through Headgate Rock Dam was computed using the record of flow at the gaging station "Colorado River below Parker Dam, Arizona-California," and deducting from it the record of flow at the gaging station "Diversion for Colorado River Indian Reservation Main Canal near Parker, Arizona." The diversions for the Colorado River Indian Reservation are made at Headgate Rock Dam.

DIVERSION TO MITTRY LAKE FROM GILA GRAVITY MAIN CANAL	1	1	1	1	1	1	1	1	1	1	1	1	10.4
TOTAL IMPERIAL DAM + DIVERSION TO MITTRY LAKE	21	38	34	35	42	29	49	52	59	32	28	19	437.7
LAGUNA DAM	25	43	46	35	38	27	39	49	55	36	31	22	445.9

1/ Glen Canyon Dam lies within the Upper Basin, hence is not covered by the Decree. We report releases for comparison purposes only.

2/ Computed as Parker Dam release less diversion at Headgate Rock Dam.

3/ Flow below Imperial Dam does not include diversions through the All American and Gila Gravity Main canals

RECORDS OF DIVERSIONS, RETURN FLOWS, AND CONSUMPTIVE USE
IN ACCORDANCE WITH ARTICLE V(B) OF THE DECREE OF
THE SUPREME COURT OF THE UNITED STATES IN

ARIZONA v. CALIFORNIA ET AL.

DATED MARCH 9, 1964

CALENDAR YEAR 2001

The following tabulations for calendar year 2001 show final records of diversions of water from the mainstream of the Colorado River, return flow of such water to the mainstream, and the consumptive use of such water. The records were furnished by the U.S. Geological Survey, International Boundary and Water Commission, Bureau of Indian Affairs, Bureau of Reclamation (Reclamation), National Park Service, U.S. Fish and Wildlife Service, and water user agencies. Diversions from the All-American Canal and Gila Gravity Main Canal at Imperial Dam were assigned to each user by adding each user's proportional share of the total canal losses to the delivery taken by each user at its turnout from the canal.

The tabulations show quantities of water drawn by surface diversion from the mainstream of the Colorado River, pumped from the mainstream through pumps in the mainstream, and wells in the Colorado River flood plain and the accounting surface. Diversions are listed in two separate tabulations for each State. The first tabulation lists water users whose diversions are measured and generally reported monthly. Return flows to the mainstream and consumptive use are also listed for points of diversion and return when that information is available.

The second tabulation for each State, titled "Supplemental Use Tabulation" shows quantities of water pumped from pumps in the mainstream and wells in the flood plain of the accounting surface where the amount of water use is generally determined from records of power use. Amounts diverted by pumping were determined as follows: (1) for most electric pumps, diversions were computed on an annual basis from power records and a "kilowatt-hour per acre-foot pumped factor" that was determined by discharge measurement; (2) for pumps without flow meters or where power records are not available, a consumptive use factor of 6 acre-feet per irrigated acre of land per year was used.

Consumptive use estimated for individual diverters may be over or under estimated. Reclamation is continuing to develop the Lower Colorado River Accounting System (LCRAS) to refine estimates of consumptive use.

Tabulations for calendar year 2001 include determinations of the unmeasured return flows of Colorado River water to Lake Mead from Las Vegas Wash which accrue to the State of Nevada and a portion of the unmeasured return flows from the Yuma Mesa which are credited to the State of Arizona.

No person or entity is entitled to divert or use Colorado River water without an entitlement. An entitlement is an authorization to beneficially use Colorado River water pursuant to: (1) a right decreed by the Supreme Court, (2) a contract with the United States through the Secretary of the Interior (Secretary), or (3) a Secretarial reservation of water. The diversions, return flows, or consumptive uses tabulated in this report constitute the records referenced in Article V of the Decree of the Supreme Court in Arizona v. California et al. and should not be interpreted as an entitlement or indication that the use is authorized. If you notice any error or omission, please report it to the contact person listed on the cover page.

NOTE: The term 'CONSUMPTIVE USE' in this tabulation means diversions including underground pumping, less measured return flow and less current estimated unmeasured return flow to the river.

- 1/ No surface returns unless shown.
- 2/ Reported annual total only, distributed monthly according to nearby users.
- 3/ Calculated by assuming an annual diversion of 6 af per irrigated acre.
- 4/ Calculated using monthly power records.
- 5/ Pumped from wells and credited as return flow to Yuma Mesa Division but unassigned to districts as returns. Includes quantities of drainage from Yuma Mesa, Unit B, as well as from South Gila Valley.
- 6/ Details on Arizona Supplemental Sheets.

DIVERSIONS FROM MAINSTREAM, RETURN FLOW
AND CONSUMPTIVE USE OF SUCH WATER
CALENDAR YEAR 2001

05/13/2002

(ACRE-FEET)

WATER USER	JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC	TOTAL 1/
------------	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	----------

7/ Summation for the Yuma Mesa Division, consisting of the North Gila Valley Irrigation District, the Yuma Irrigation District, and the Yuma Mesa Irrigation & Drainage District is as follows:

Annual Totals (Acre-Feet)

Item	

Diversion at Imperial Dam A/	321172
Pumped from wells	1244
Surface returns from South Gila Valley (S.Gila Canal Wasteway)	2195 *
Return flow North Gila Valley (6 drains & wasteways)	8265 *
Return flow South Gila Valley wells (Drainage Pumping Outlet Canals)	60814
Return flow Yuma Mesa Outlet Drain B/	49700 *
Return flow protective and regulatory pumping unit C/	1922 *
Estimated unmeasured groundwater return flow D/	26224
Return flow share of Gila Main Canal loss E/	15028 *
Subtotal return flow F/	164148
Consumptive Use (see note above)	164148
(A) Total for the North Gila Valley, the Yuma Irrigation District, the Yuma Mesa Irrigation and Drainage District, and Unit "B".	164148
(B) Estimated at 85 percent of the Yuma Mesa Outlet Drain with balance credited to Unit "B".	158268
(C) Estimated at 85 percent of Protective and Regulatory Pumping Unit with balance credited to Unit "B".	158269
(D) Estimated at 38 percent of the North Gila Valley Diversion at Imperial Dam plus 14 percent of Yuma Irrigation District diversion at Imperial Dam. (Based on analysis of the USGS Report 83-4220 entitled "A Method for Estimating Ground-Water Return Flow to the Lower Colorado River in the Yuma Area").	check from above
(E) Diversion* mileage weighted share of Gila Main Canal loss less canal surface evaporation (1397 af/yr) and phreatophytes (2154 af/yr).	check from above
(F) Additional unmeasured amounts of return flows from the Yuma Mesa Irrigation and Drainage District, Unit "B", the Cocopah Indian Reservation, and the Yuma County Water Users' Association (YCWUA) are utilized to meet consumptive uses in the United States and in partial satisfaction of the Mexican Treaty obligation. Some of these ground water flows are recovered by pumping from wells on the Cocopah Indian Reservation and in the YCWUA area, and by some of the surface drains in the YCWUA area. Efforts will be made to at least quantify these return flows within broad limits by respective water user entities in future years.	

8/ Diversion adjusted for delivery to Mohave Valley Irrigation and Drainage District (Chesney).
9/ Main Outlet Drain return flow credit is measured flow at Station 0+00 and includes both Colorado River and Gila River water. Reclamation is developing a method to separate the different sources of return flow and will apply that methodology when available.
10/ Includes 1 river pump. CRIT tribal usage delivered by the Town of Parker has been deducted.
11/ Annual Totals are rounded to the nearest 10 AF.

1/ Calculated from monthly power records and power-discharge measurements where available, else from power-discharge rate.

2/ Calculated by assuming an annual diversion rate of 6 af per acre.

3/ Reported annual total only, distributed monthly according to nearby users.

4/ Values rounded to the nearest 1 af.

NOTE: The term 'CONSUMPTIVE USE' in this tabulation means diversions including underground pumping, less measured return flow and less current estimated unmeasured return flow to the river.

- 1/ No surface returns unless shown.
- 2/ Estimate based on measured seepage returning from regulatory reservoirs less an estimated amount of phreatophyte use.
- 3/ Returns unassigned include drainage from the Indian Unit and the Bard Unit in the Reservation Division but excludes seepage from the All-American Canal.
- 4/ Calculated using monthly power records.
- 5/ Details on California Supplemental Sheets.
- 6/ Reported annual total only, distributed monthly according to nearby users.
- 7/ Calculated by assuming an annual diversion of 6 af per irrigated acre.
- 8/ IID/MWD Water Conservation Program Phase 1 conserved water made available by IID for diversion in current year by MWD.
- 9/ Needles total return estimated as 40% of diversion plus measured returns (unpublished report, Colorado River Board of California).
- 10/ Annual Totals are rounded to the nearest 10 af.

RECORDS OF RELEASES OF MAINSTREAM WATER PURSUANT TO
ORDERS BUT NOT DIVERTED BY PARTY ORDERING SAME
AND QUANTITY OF SUCH WATER DELIVERED TO MEXICO IN
SATISFACTION OF MEXICAN TREATY OR DIVERTED BY OTHERS

IN ACCORDANCE WITH ARTICLE V(C) OF THE
DECREE OF THE SUPREME COURT OF

THE UNITED STATES IN

ARIZONA v. CALIFORNIA ET AL. DATED MARCH 9, 1964

CALENDAR YEAR 2001

The following tabulations for calendar year 2001 show records of releases of mainstream water pursuant to orders thereto, but not diverted by the party ordering the same (rejected water), and the quantity of such water delivered to Mexico in satisfaction of the Mexican Treaty or diverted by others in satisfaction of decreed rights. In addition to the requirements of the Decree we have tabulated quantities of such rejected water delivered to Mexico in excess of Treaty requirements and quantities delivered to storage. Due to concerns regarding the accuracy of the program used to pro-rate individual contributions of rejected water which were delivered to Mexico in excess of Treaty requirements, this line has been zeroed out, resulting in all rejected water reported as having been delivered to storage or other users.

Water ordered but not diverted was analyzed daily for each diverter as the absolute value of the difference between the approved daily order and the mean daily delivery requested on the day the diversion was made. The monthly quantities shown on the tabulations are the sum of the daily quantities. Final approval of daily orders was given in advance of the delivery date by the amount of time required for water to travel between the storage location and the users point of diversion from the mainstream. To the extent possible, "water ordered but not diverted" was delivered to others in satisfaction of their rights. The quantities of such deliveries are shown on the tabulation.

Deliveries of water to Mexico in satisfaction of the Mexican Treaty are scheduled based on Mexico's daily orders. Releases from storage are scheduled in sufficient quantities, which when added to return flows, meet Mexico's daily orders. Deliveries of water to Mexico in satisfaction of the treaty, therefore, were considered to have been made entirely from releases from storage and from return flows scheduled for that purpose and not from water ordered but not diverted by other Colorado River water users. Therefore, the tabulations show no "water ordered but not diverted" as being delivered to Mexico in satisfaction of the treaty.

Currently, no daily orders are received for diversion from the Colorado River in Nevada so no sheet is included for Nevada. The storage capacity of Lake Mead is so large in relation to the present daily diversions from the reservoir by Nevada that any "water ordered but not diverted" would be retained for future use and would have no significant effect on scheduling of daily operations of the reservoir.

RECORDS OF DIVERSIONS, RETURN FLOWS, AND CONSUMPTIVE USE
IN ACCORDANCE WITH ARTICLE V(B) OF THE DECREE OF
THE SUPREME COURT OF THE UNITED STATES IN

ARIZONA v. CALIFORNIA ET AL.

DATED MARCH 9, 1964

REVISIONS TO THE CALENDAR YEAR 2000 DECREE REPORT

The following pages contain corrections which have been made to the 2000 record since the printing of the 2000 Decree Accounting Report. The paragraphs below discuss each of the corrections.

In the 2000 report, the consumptive use by Lower Colorado River Dams Project, Davis Dam, Arizona was incorrectly reported as 26 acre-feet, which is the amount diverted. The measured return flows were not reported; the correct consumptive use is 0.3 acre-feet, with a 25.7 acre-foot return flow.

In the 2000 report the diversion "Pumped from 11 pumps and wells" for the Colorado River Indian Reservation, in California was incorrectly reported as 25,089 acre-feet. The correct diversion from these wells was 1838 acre-feet, this results in a total diversion of 3557 acre-feet.

An error was made in the calculation of diversions from the All-American Canal and the Gila Gravity Main Canal which resulted in an approximately 240,000 acre-feet under reporting of diversions from the Colorado River to the States of Arizona and California.

All corrected values are shown on the following revised Summary, and Arizona and California Diversions, Return Flow and Consumptive Use tables from the 2000 Decree Accounting report. Corrected values are highlighted with gray background.

We hope that these errors have not caused an inconvenience. We strive to report the most accurate data possible and will continue to make every effort to avoid errors in the future.

CONSUMPTIVE USE													

NOTE: The term 'CONSUMPTIVE USE' in this tabulation means diversions including underground pumping, less measured return flow and less current estimated unmeasured return flow to the river.

NOTE: Negative values exist in the RETURNS of some users. The calculations used to derive these values are correct, the negative values may be attributed to lag between irrigation application and measurement of return flow and/or gaging error.

DIVERIONS FROM MAINSTREAM-AVAILABLE RETURN FLOW
AND CONSUMPTIVE USE OF SUCH WATER
CALENDAR YEAR 2000
STATE OF ARIZONA

Revised from 2001 Report

05/13/2002

(ACRE-FEET)

WATER USER	JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC	TOTAL 1/
------------	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	----------

Footnotes:

- 1/ No surface returns unless shown.
- 2/ Reported annual total only, distributed monthly according to nearby users.
- 3/ Calculated by assuming an annual diversion of 6 ac-ft per irrigated acre.
- 4/ Calculated using monthly power records.
- 5/ Pumped from underground and credited as return flow to Yuma Mesa Division but unassigned to districts as returns. Includes quantities of drainage from Yuma Mesa, Unit B, as well as from South Gila Valley.
- 6/ Details on Arizona Supplemental Sheets.
- 7/ Summation for the Yuma Mesa Division, consisting of the North Gila Valley Irrigation District, the Yuma Irrigation District, and the Yuma Mesa Irrigation & Drainage District is as follows:

Annual Totals (Acre-Feet)

Diversion at Imperial Dam (A)	351004
Pumped from wells	2305
Surface returns from South Gila Valley (S.Gila Canal Wasteway)	2413 *
Return flow North Gila Valley (6 drains & wasteways)	7497 *
Return flow South Gila Valley wells (DPOC's)	69525
Return flow Yuma Mesa Outlet Drain (B)	31994 *
Return flow protective and regulatory pumping unit (C)	3500 *
Estimated unmeasured groundwater return flow (D)	28151
Return flow share of Gila Main Canal loss (E)	29621 *
Subtotal return flow (F)	172702
Consumptive Use (see note above)	169906
(A) Total for the North Gila Valley, The Yuma Irrigation and the Yuma Mesa Irrigation and Drainage Districts, and 'Unit B'.	check from above
(B) Estimated at 85 percent of the Yuma Mesa Outlet Drain with balance credited to 'Unit B'.	180607
(C) Estimated at 85 percent of Protective and Regulatory Pumping Unit with balance credited to 'Unit B'.	check from above
(D) Estimated at 38 percent of the North Gila Valley Diversion at Imperial Dam plus 14 percent of Yuma Irrigation District diversion at Imperial Dam. (Based on analysis of the USGS Report 83-4220 entitled 'A Method for Estimating Ground-Water Return Flow to the Lower Colorado River in the Yuma Area')	
(E) Diversion* mileage weighted share of Gila Main Canal loss less canal surface evaporation (1397 af/yr) and riparian vegetation (2154 af/yr).	
(F) Additional unmeasured amounts of return flows from the Yuma Mesa Irrigation and Drainage District, 'Unit B', the Cocopah Indian Reservation, and the Yuma County Water Users Association (YCWUA) are utilized to meet consumptive uses in the United States and in partial satisfaction of the Mexican Treaty obligation. Some of these underground flows are recovered by pumping from wells on the Cocopah Indian Reservation and in the YCWUA area, and by some of the surface drains in the YCWUA area. Efforts will be made to at least quantify these return flows within broad limits by respective water user entities in future years.	

- 8/ Diversion adjusted for delivery to Mohave Valley I. D. D. (Chesney).
- 9/ Main Outlet Drain return flow credit is measured flow at Station 0+00 and includes both Colorado River and Gila River water. Reclamation is working to develop a method to separate the different sources of return flow and will apply that methodology when available.
- 10/ Includes 1 river pump, CRIT tribal usage delivered by the Town of Parker has been deducted.
- 11/ Totals are rounded to the nearest 1 AF.

NOTE: The term 'CONSUMPTIVE USE' in this tabulation means diversions including underground pumping, less measured return flow and less current estimated unmeasured return flow to the river.

NOTE: Negative values exist in the RETURNS of some users. The calculations used to derive these values are correct, the negative values may be attributed to lag between irrigation application and measurement of return flow and/or gaging error.

Footnotes:

- 1/ No surface returns unless shown.
- 2/ Estimate based on measured seepage returning from regulatory reservoirs less an estimated amount of phreatophyte use.
- 3/ Unassigned returns include drainage from the Indian Unit and the Bard Unit in the Reservation Division but excludes seepage from the All-American Canal.
- 4/ Calculated using monthly power records.
- 5/ Details on California Supplemental Sheets.
- 6/ Reported annual total only, distributed monthly according to nearby users.
- 7/ Calculated by assuming an annual diversion of 6 ac-ft per irrigated acre.
- 8/ IID/MWD Water Conservation Program Phase 1 conserved water made available by it for diversion in current year by MWD.
- 9/ Needles total return estimated as 40% of diversion plus measured returns (unpublished report, Colorado River Board of California).
- 10/ Totals are rounded to the nearest 1 AF.
