

# Setting up your GIP (Generic Inventory Package)

# Setting up your GIP (Cont'd)

## **4. Return Procurement Request cards to A&MMS**

A&MMS service will add items to the item master file. Upon completion, the item master file # will be recorded at the top and the cards will be returned to you

## **5. Next step is to set up your GIP using the Primary Inventory Menu.**

Begin to populate your GIP with information on the Procurement Request card. You also need to establish your Secondary Distribution Points - locations you will issue supplies to from your Primary Inventory Point. (I.e., SICU is a distribution point for an SPD Primary.)

## **6. Once your GIP has been populated, run the comprehensive report and review levels with users in your department.**

Users will tell you how much to keep on hand, and what your reorder point should be and emergency levels.

## **7. After your levels, locations, etc. have been established/reviewed, you are ready to print your barcode labels.**

After the barcode labels have been put up you are ready to conduct a barcode inventory of all stock on hand.

## **8. It is important to plan for when your inventory should be conducted.**

Ensure all your deliveries have been Put up in the proper storage locations. Schedule your inventory During off-tour if available or when there will be the least Interruptions from person pulling items.

## Setting up your GIP (cont'd)

**9. Upload your barcode inventory into your GIP.**

Run the Availability Report and review your on hand quantities and values. Remove all excess stock and submit on a turn-in to A&MMS for disposal.

**10. Run Stock Status Report last day of each month.**

**11. Establish replenishment schedule to conduct barcode inventories to replenish.**

**12. Use the Autogeneration option to replenish items needed.  
(\*\*Post all receipts/distribution orders first\*\*)**

**13. Cardholder/ Supply Technician orders items needed.**

**14. Upon receipt of items ordered, Inventory Manager posts the receipts into the GIP. This should always be done daily or on date items are received.**

**15. Run these reports monthly to maintain your GIP inventories.**

**Stock Status Report**

**Package Discrepancy Report**

**Availability Listing**

**Inactive Stock Report**

**Conversion Factor Report**
