

Oilseeds: World Markets and Trade

Regional Vegetable Oil Situation: Cut in Sun Oil Production, Imports Leaves North Africa & the Middle East Looking for Soy & Palm Oil to Fill Demand

North Africa & Middle East Vegetable Oil Consumption Continues to Expand While Sun Oil Consumption Falls

Palm Oil Exportable Supplies Rebound in 2007/08, Soy Oil Supplies Stagnant

Lower sun oil consumption in North Africa & the Middle East due to a large drop in world trade and record high prices leaves importing countries looking for alternative and cheaper vegetable oils.

Over the past few years the demand for sun oil fueled strong overall growth in vegetable oil demand. However, this year, there is limited sun oil availability due to (1) poor production from the two major producers, Russia and Ukraine and (2) continued strong import demand, despite high prices, from the European Union.

Palm and soy oil are both viable and cheaper alternatives. However, palm oil is more likely to fill the void due to larger exportable supplies. US soy oil exportable supplies will also increase modestly and could help meet demand.
