

About the Alternative Farming Systems Information Center

The Alternative Farming Systems Information Center (AFSIC) specializes in locating and accessing information related to many aspects of sustainable and alternative agriculture, crops and livestock – sustainable and organic crop and livestock farming systems; renewable farm energy options; alternative marketing practices; crop and livestock diversification including aquaculture, exotic and heritage farm animals, alternative and specialty crops, new uses for traditional crops, and crops grown for industrial production; and small farm issues.

AFSIC was founded in 1985 and is an integral part of the National Agricultural Library (NAL) in Beltsville, Maryland. The Center is supported, in part, by USDA's Sustainable Agriculture Research and Education (SARE) program, and a cooperative agreement with the University of Maryland, College Park, MD. NAL is part of the U.S. Department of Agriculture (USDA) and the USDA Agricultural Research Service (ARS).

A current list of AFSIC information products and full-text publications are available electronically on the AFSIC Web site. Recent publications are also available, on request, in hard copy.
