Title: Routine Validation of Volatile Organic Compound (VOC)	No.: SOP-5161	Page 2 of 13
Analytical Data	Revision: 0	

#### 1.0 PURPOSE AND SCOPE

This procedure represents the minimum standards for evaluating routine volatile organic compounds range organics analytical data. This procedure is a mandatory document and shall be implemented by all Los Alamos National Laboratory (LANL or Laboratory) personnel and contractors who evaluate routine volatile organic compounds range organics analytical data for the specific LANL projects.

#### 2.0 BACKGROUND AND PRECAUTIONS

#### 2.1 Background

This procedure conforms to the requirements of Environmental Protection Agency (EPA) Methodologies and the EPA document, "U.S. EPA Contract Laboratory Program National Functional Guidelines for Organic Data Review." LANL data validation is performed according to procedures based upon the NNSA Model Data Validation Procedure. Data qualifiers and reason codes are assigned according to the specifications in this method specific procedure.

#### 2.2 Precautions

Nothing in this procedure precludes the data validator from going beyond the minimum requirements specified within this procedure. If additional directions are required, the data validator shall reference NNSA Model Data Validation Procedure, EPA method specific guidelines and/or National Functional Guidelines for Organic Data Review. Implementation of this procedure may be followed by a more focused and data use-specific evaluation of the data by the project chemist, especially if the implementation of this procedure indicates the data may contain technical deficiencies.

#### 3.0 EQUIPMENT AND TOOLS

None.
