Change Request 3882

SUBJECT: Update to the National Council for Prescription Drug Program (NCPDP) Batch Standard 1.1 Billing Request Companion Document

I. SUMMARY OF CHANGES: This One-Time Notification provides Durable Medical Equipment Regional Carriers (DMERCs) with a revised companion document. This revision refers to data elements 337-4C, 412-DC, 438-E3 and 451-EG. The revised companion document is to be provided to retail pharmacy drug claim submitters (provider, billing agent, or clearinghouse) that will submit retail pharmacy drug claims to Medicare electronically. The revisions in this companion document were based on recommendations/decisions made by DMERCs and ViPS.

NEW/REVISED MATERIAL :

EFFECTIVE DATE : July 11, 2005

IMPLEMENTATION DATE : September 12, 2005

Disclaimer for manual changes only: The revision date and transmittal number apply only to red italicized material. Any other material was previously published and remains unchanged. However, if this revision contains a table of contents, you will receive the new/revised information only, and not the entire table of contents.

Attachment – One-Time Notification

Pub. 100-04	Transmittal: 579	Date: June 10, 2005	Change Request 3882

SUBJECT: Update to the National Council for Prescription Drug Program (NCPDP) Batch Standard 1.1 Billing Request Companion Document

I. GENERAL INFORMATION

A. Background: This One-Time Notification provides Durable Medical Equipment Regional Carriers (DMERCs) with a revised companion document. This revision refers to data elements 337-4C, 412-DC, 438-E3 and 451-EG. The revised companion document is to be provided to retail pharmacy drug claim submitters (provider, billing agent, or clearinghouse) that will submit retail pharmacy drug claims to Medicare electronically. The revisions in this companion document were based on recommendations/decisions made by DMERCs and ViPS.

B. Policy: Summary of Changes

COB/Other Payments Segment

Data Element 337-4C – Coordination of Benefits/Other Payments Count (UPDATED). In the past, this field allowed up to 3 primary payers, but currently Medicare will only accept 1 primary payer. This field will now only accept a value of "1".

Pricing Segment

Data Element 412-DC – Dispensing Fee Submitted (UPDATED). Per Change Request (CR) 3620, new codes G0370, G0369, G0371 and G0374 have been added with pricing information. Medicare note regarding dispensing fees only being submitted for nebulizer drugs has been removed.

Data Element 438-E3 – Incentive Amount Submitted (ADDED). This is the data element suppliers include the $50.00 G0369 when sending it along with another dispensing fee for that drug.

Compound Segment

Data Element 451-EG – Compound Dispensing Unit Form Indicator (UPDATED). The following values have been added: 1=each, 2=gram, 3=milliliters.

Companion Document To Supplement The NCPDP VERSION 5.1 BATCH TRANSACTION STANDARD 1.1 BILLING REQUEST For Exchanges With Medicare Durable Medical Equipment Regional Carriers

NCPDP Implementation and Testing

Each retail pharmacy that transmits retail drug claims electronically must use the NCPDP Batch Standard version 1.1 by October 16, 2003. The NCPDP standard will be accepted for retail pharmacy drug claims only. Claims for supplies and services must be billed using version 4010A1 of the ANSI ASC X12N 837 and must be submitted in a separate transmission from the NCPDP retail drug claims.

A pharmacy that elects to use a clearinghouse for translation services is liable for those costs.

Retail pharmacies, agents, and clearinghouses planning to exchange electronic retail pharmacy drug claims with Medicare must schedule testing with their DMERC by August 1, 2003. There is no Medicare charge for this system testing.

The NCPDP Standards, Implementation Guides and Data Dictionary can be obtained at www.ncpdp.org for a fee of $650.00 or by becoming a member for $550.00.

> Note: Non-retail pharmacies are to bill using the X12 837 4010 A1.

National Drug Code (NDC)

Pharmacies are required to transmit the NDC in the NCPDP standard for identification of prescription drugs dispensed through a retail pharmacy. The NDC replaces the HCPCS codes for retail pharmacy drug transactions billed to DMERCs via the NCPDP standard.

> Note: DMERCs must accept NDC codes for oral anti-cancer drugs billed for electronic and paper. All other paper and ANSI claims are to be billed using HCPCS.

General Requirements:

1. This guide was created to provide DMERC specific requirements when creating an incoming NCPDP file. This document contains DMERC valid values for elements and lists only the segments and elements, which apply to a DMERC claim.

2. Suppliers will create the Billing Request transaction as required in the NCPDP standard and as clarified within this document.

3. Only Segments and Fields that are “Mandatory” (M) in the standard, or shown as “Required” (R) or “Situational” (S) in this document should be sent. If a Segment or Field is marked as “Situational”, it is only sent if the data condition stated applies. If a field is not shown in this document, or if a data condition is not met, it is not used for Medicare.

4. Medicare will only accept and process Batch Transactions using the NCPDP Batch Standard version 1.1 with the Telecommunication Standard version 5.1. The Batch Standard is a file transmission of one header, one or more detail records, and one trailer. The detail records are built using the Telecommunication Standard version 5.1, with one or more transactions (claims) per transmission (one detail record).
5. Medicare will only accept and process Billing Transactions (value B1 in the Transaction Header Segment, Transaction Code field 103-A3).

6. The following segments are required for Medicare processing:

    - Patient Segment
    - Insurance Segment
    - Prescriber Segment
    - Claim Segment
    - Pricing Segment
    - Clinical Segment

7. Suppliers may submit up to four detail record transactions per detail record transmission except for compound billings. Only one detail record transaction per detail record transmission is allowed when billing for a multi-ingredient prescription.

8. The Prior Authorization Segment, the Coordination of Benefits/Other Payments Segment and the Compound Segment are to be used for Medicare when certain conditions apply.

9. Data elements that are defined by a qualifier must contain valid and appropriate information for that qualifier.

10. Delimiters must be used to distinguish and separate data elements and segments as specified in the NCPDP standard.

11. The transaction must adhere to the data conventions as stated in section 2.5 of the NCPDP Telecommunication Standard Implementation Guide version 5.1.

12. Medicare will only process a format of 9(5)V99 for monetary fields rather than the maximum format of 9(7)V99 as specified in the NCPDP implementation guide. A monetary amount of 9(7)V99 would far exceed Medicare coverage parameters and could be assumed to be an error. Medicare would truncate monetary entries larger than 9(5)V99 as they are assumed to be data entry transcription or another manual error. Under HIPAA compliancy rules, plans are permitted to reject transactions that exceed coverage parameters, even if compliant with implementation guide requirements.

Compound Drugs

Compounded drugs will be billed using the Compound Segment in the NCPDP standard. Compounded Prescription guidance includes:

1. The Compound Route of Administration field (452-EH) will be used to distinguish the Nebulizer Drug Compounds from Other Drug Compounds. This field is the route of administration of the complete compound mixture. The valid values Medicare will use in this field are:

   3 - Nebulizer Compounds
   11 - Immunosuppressive Compounds

2. The sum of the Compound Ingredient Drug Cost field (449-EE) will equal the Gross Amount Due field (430-DU) minus the Dispensing Fee Submitted field (412-DC).

   Compounds for inhalation drugs should only be used for multiple active ingredients. For single active ingredients, use the Claim segment.

   Additionally, for Nebulizer drugs, suppliers must adhere to the following data requirements in the Compound Segment of the inbound NCPDP claim:

   A. The Compound Ingredient Basis of Cost Determination field (490-UE), should equal “09” (Other) to identify the ingredient that would normally be assigned a KP modifier.

   B. All other drugs in the Compound Segment will be assigned a KQ modifier by Medicare during processing to ensure proper completion of the claim.

Parenteral Nutrition Products

Parenteral nutrition claims must be billed on the X12N 837 using HCPCS codes.

Enteral Nutrition Products

Enteral nutrition claims must be billed on the X12N 837 using HCPCS codes.

End Stage Renal Disease (ESRD)

ESRD drug claims must be billed on the X12N 837 using HCPCS codes.

Epoetin (EPO)

All EPO associated with ESRD must be billed on the X12N 837.

Non-ESRD EPO must be billed either on the NCPDP by retail pharmacists or on the X12N 837 by professional pharmacists.

Home Infusion Products

Claims for home infusion products must be billed on the ASC X12N 837 using the HCPCS codes to identify the drug and related supply. Home infusion pharmacies are professional pharmacies and will not use the NCPDP format for submitting claims to Medicare.

Medigap

The following fields must be submitted in order to allow Medicare to determine that a beneficiary has Medigap coverage:

1. The Group Id (301-C1) on the insurance segment is not blank.
2. For Coordination of Benefits (COB) related to Medigap, the Patients Medigap Plan Id Number will be submitted in the Alternate Id (330-CW) in the Claim segment.
3. The Medigap Insurer Id (OCNA number) will be submitted in the Group Id (301- C1) in the Insurance segment.

> Note: Medigap takes priority when there is dual Medigap and Medicaid in a claim based situation.

Medicaid

The following field must be submitted in order to allow Medicare to determine that a beneficiary has claim based Medicaid coverage and to specify where the coverage is:

1. The Group Id (301-C1) on the Insurance segment is not blank.
2. The two position state alpha code followed by the word "MEDICAID" must be submitted in the Group Id (301- C1) in the Insurance segment.
   Example: "XXMEDICAID" such as NYMEDICAID or FLMEDICAID

MSP Claims

When Medicare is the secondary payer, (MSP) pharmacies must complete the following fields:

1. The Original Submitted Amount will be sent in the Gross Amount Due (430-DU) on the Pricing Segment;

2. All other amounts reported in 431-DV will be qualified as follows in the Other Payer Amount Paid Qualifier (342-HC):

   The Primary Amount Paid (08) - What the payer actually paid versus what was allowed;
   The Primary Allowed Amount (99) - What the payer actually allowed;
   The Obligated to Accept Amount (07) - The amount that the pharmacy has contracted with the original payer, as the amount the pharmacy will accept for payment.

Partial Fills

Medicare does not process the partial and completion billing for prescriptions as described in the NCPDP Telecommunication Standard Implementation Guide. Medicare should be billed the actual dispensed amount. When submitting partial fill claims to Medicare, pharmacies must submit the Actual Quantity Dispensed in element 442-E7.

Prior Authorization Segment

The NCPDP standard contains a 500-position field in the Prior Authorization Segment (498-PP Prior Authorization Supporting Documentation) that supports one occurrence of narrative information. Retail pharmacies must use this narrative field to submit the following information relating as required for Medicare claims processing:

A) Certificate of Medical Necessity (CMN) or DMERC Information Form (DIF)
B) Narrative Supporting Documentation
C) Facility Name and Address
D) Modifiers for compound drugs

The matrix starting on page 15 of this document provides detailed instruction for formatting these 500 positions when the narrative field is being used to submit any of the information.
