To Whom It May Concern:

I am writing in opposition to the proposed rule change regarding the definition and labeling of US cattle & beef products.

As a beef feeder calf producer I feel labeling any beef product as Beef, made in the U.S.A. should exclusively mean, born, raised slaughtered and processed in the U.S.A. Any thing less is an affront ~~to~~ to myself and the many like me that strive to produce a quality product and then have it legally 'stolen' by an imported product.

The bottom line is that any imported product that somewhere along the line acquires a 'Made in the USA' label is lie. It is consciously deceiving the consumer and ought not be allowed.

I hope FSIS will implement meaningful, useful and truthful labeling for cattle & beef product.
