ATTENTION: Docket Clerk

Docket #02-015DF

To whom it may concern,

As an American Ostrich grower, I am very much opposed to your proposal to lift import restrictions for Australia and New Zealand in regard to any ratite products. American ratite (ostrich and emu) farmers will be drastically hurt by the passage of the agreement to lift import restrictions. We have worked long and hard to establish a ratite market in the United States. Imported ratite products only undermine our effort and destroy our market.

Please withdraw this proposal so that American ratite producers can continue to sell their products at reasonable prices in order to stay in business.

Sincerely,

Carol Garnett
