Please delete item 5.9 of agenda item No. 6 in the draft guidelines for vitamin and mineral supplements.

The proposed labeling is in violation of US law, Dietary Supplement Health & Education Act of 1994 DSHEA Public Law 103-417.

Consumer choice and access to dietary supplements that are safe and labeled in a truthful and not misleading manner override the requirement for labels mandating product use through advice by a nutritionist, dietitian or medical doctor.

USA's history is based on empowering people and this includes freedom in selecting natural health products for personal well-being and wellness.
