Bob Rabel

hello,

I'm writing because I fear my right to buy harmless supplements may be threatened. My wife has ovarian cancer. She's been through two kinds of chemo. As of today, modern medicine offers her no cure. They offer no treatment that is not highly toxic to the body. It's been a year since her last chemo. I can honestly say the supplements she takes have kept her of chemo this long. And they're not toxic. It's heartbreaking to see her go through any chemo because of what it does to her. Please hear my voice when I say "we deserve the right to buy harmless supplements when they obviously help a lot of people without the harmful effects of chemo".

Humanity deserves it.

Thank you,  
Bob Rabel
