Sali Randel

Dear Nancy,

I am a college educated 56th year old woman who is a professional marketing consultant and has a sincere interest in alternative health. I was in a burn accident with 3rd degree damage to my legs. I avoided skin grafts by taking homeopathic medicine and herbal wraps to my legs. I do not believe the FDA acts in the best interest of our health.

I feel that "Big Business" and the drug companies who profit from expensive drug have too much influence on the FDA. I know MSM worked for my legs and I know vitamins and herbs work. Please do not regulate against our best interest. 3 plastic surgeons wanted to operate on me. I saved the money and my legs.... PLEASE act in our best interest to choose alterative health.

Thank you,

Sali Randel
