accredited lab program

I want no changes in the current rule on accreditation of labs. i find far too often the recent changes that are taking place in usda harm and hurt the public. they only help the profiteers. this agency consistently is failing to protect the american public.

I dont care if it isn't the Fastest system going. sometimes going slowly and carefully is alot more protective of public health. I want truth and honesty and reliability and relevance in lab work, not have it done faster. I oppose all of these changes. I am sure no member of the public asked for them.

only profiteers keep seeking to change our laws that protect americans so they can help themselves.
