Secretary of Agriculture

We the people of this petition would like to have our voice heard this is just a few names, that would like the ban on tripas lifted of course this is only 20 names I can get you 20,000 names if you like. Some of these people don't even know that there is a ban on tripas they think this ban is not right. Tripas is our heritage at the festivals and get together. It use to be tripas were sold at 36¢ lb now 1.19 lb. We all would like to encourage more inspectors to assure safety on these kind of meats, I have been selling tripas for 15 yrs at festivals. Many white people eat tripas at this time, also would like the ban lifted. I have talked to safety meat inspectors at Austin they have requested I send a letter to Secretary of Agriculture to express how much tripas are wanted on the market. We need our tripas back.

I hope you will bring back our heritage back.
