Dear FSIS Docket Clerk,

Please take emergency measures to stop the use of downed cattle, sheep, pigs and other "food animals". Limit the spread of mad cow disease and the other diseases forced on livestock by their cannibalism (the result of re-cycling dead animals and discarded parts, to save the meat producer's money).

We need permanent legislation to provide all downed animals with humane euthanization and sanitary disposal unrelated to feed production. Every one of us will die eventually, but hopefully with a minimum of prolonged pain and terror. Animals are not machine pieces, as meat producers would have us believe, and their sensitivities are no less acute than those of
