RECEIVED 2004
FSIS DOCKET ROOM

04 APR 29 PM 3:27

Dear Sirs,

W03

Please do all you can to assure the quality of our meat supply.

I support having the same standards as the EU + Japan - let's test all cows for BSE.

And Please - no more mystery meat allowed - I don't want anus, small intestine and spiral cord in our ~~our~~ food supply for humans nor any other feed supply.

I'd love to feel free to eat hamburgers and sausage again but my fear of mad cow has stopped me for years now -

Occasionally I'll pay ~~for~~ extra for ground steak but it's expensive and often hard to get.

Let's put "The Jungle" years behind us and get back to regulating meat in the interests of the people not the corporate packers.

Thank you John Speier
