To FSIS Docket Clerk:

Thank you for implementing
an emergency ban to prevent
downed animals from entering
the food supply.

The lack of information to
date on Bovine Spongiform Encephalopathy
is quite disturbing, and I
ask you to not only ban downed
cattle from entering the food supply,
but include all types of livestock.

Please also consider adding a provision
requiring downed animals to be
humanely euthanized.

Thank you for your support,

Karen Harksa
