Subject: FSIS/ 05-012P

Dear Sir,

As a Quality Manager, I read the <Addition of the People's Republic of China To the List of Countries Eligible To Export Processed Poultry and Poultry Products to the United States> , and I know that: USDA suggested China can only export fully cooked poultry products to USA and the products raw meat can not be sourced from China. This is totally technical barriers and trade discrimination.

How to eliminate the technical barriers of USA so as to improve the poultry producer effectiveness in China and USA through the impartial competition comply with the interest of bilateral poultry producers.

I agree the FSIS regulation that China can export poultry meat to USA.

Sincerely
Victor Luo
