Subject: Chinese Chickens

NO!

I do not want our country to import Poultry in any form from China. Our government has robbed the American farmer of his land, his future and his dignity enough. Allow them to eek out some sort of living raising chickens. Do not reduce our American farm families to the level of the "Landless Slaves" of China. I don't want to eat chickens raised in China.

No meat protein on the shelf is as cheap as chicken meat today, **we do not need** to source this from anywhere else. There is no shortage and it's not expensive as it is.
