

Comment Info: =====

General Comment: Please do not consider allowing the slaughterhouses killing America's horses to continue operating. Such an action is a clear violation of Congressional intent and federal law. The 2006 Agriculture Appropriations bill, signed by President Bush, prohibits this slaughtering; it is not simply a way to alter how inspections are funded. Please allow these horses to be cared for by the many people who are dedicating their lives to saving them. They are one of the beautiful heritages of our country.

Thank you for your consideration and I trust you will do the right thing.
