milk and milk product regulations

it is clear that milk comes from a cow. cows which are kept perpetually pregnant so that their bodies never have a rest from being pregnant, cows that are fed ground up newspapers and blood from other animals, cows that are fed all kinds of drugs, cows that never get a chance to go outside and feel healthy ground under their feet will be stressed out and will produce milk with stress hormones in it. it is clear that all milk must start with contented cows. i suggest that this agency start agitating with agribusiness, which has completely ignored this factor so that we get contented cows which will then give healthful milk.

What is going on now with cows is absolutely outrageous and i very much protest taxpayers paying profiteers to journey from america all the way to new zealand if they forget to start with the cows.
