FEDERAL PROCUREMENT DATA SYSTEM – NEXT GENERATION

FOREWARD

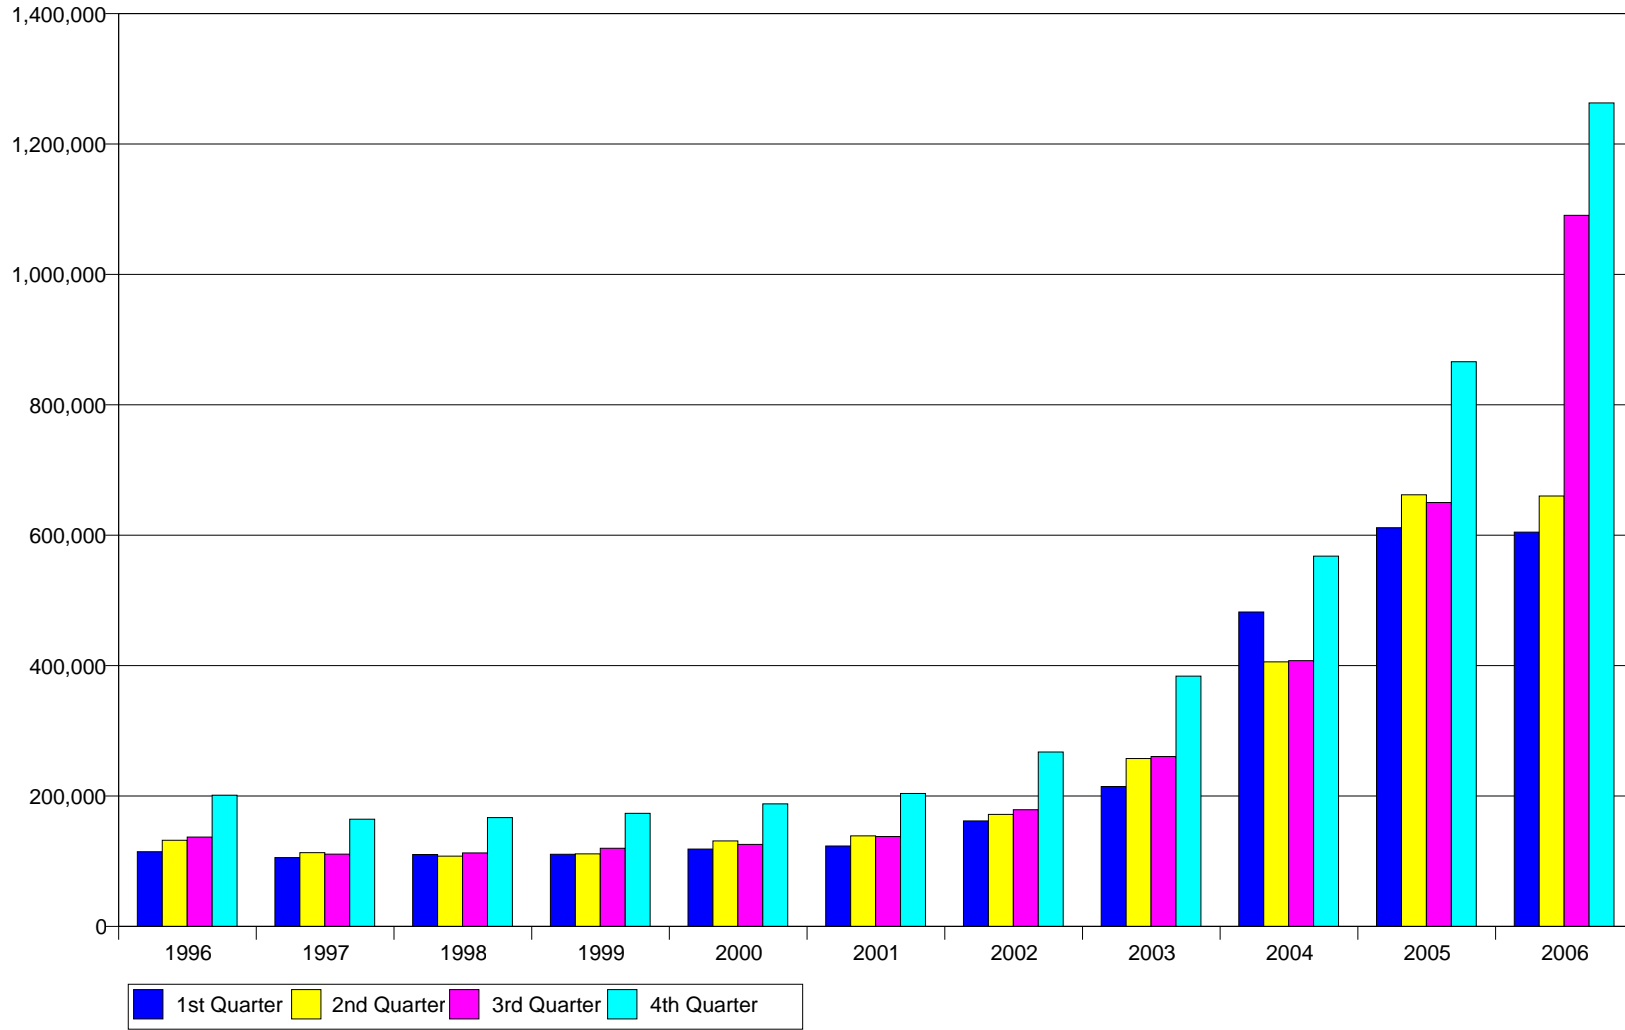

Public Law 93-400 requires that the Office of Management and Budget (OMB), Office of Federal Procurement Policy (OFPP), "...establish a system for collecting, developing, and disseminating the procurement data which takes into account the needs of the Congress, the executive branch, and the public sector." Under the guidance of OFPP, design of the Federal Procurement Data System (FPDS) was completed in early 1978 and data collection began October 1, 1978. The Federal Procurement Data Center provides a central point to respond to the requirements of the legislative, executive, and judicial branches of the Government as well as the private sector.

Beginning October 1, 2003 Global Computer Enterprises, Inc. became the owner and operator of the Federal Procurement Data System – Next Generation (FPDS-NG) for FY 2004 data and subsequent fiscal years. Historically the Federal Procurement Data Center produced reports that examined the various aspects and impacts of the Federal acquisition process. Now this information is available through the enhanced reporting capabilities of the FPDS-NG. This data can be used for geographical analysis, market analysis, and analysis of the impact of congressional and presidential initiatives in socio-economic areas such as small business. The data is also a reliable basis for measuring and assessing the impact of the Federal acquisition policy and management improvement.

Special reports to meet specific data requirements are available through GCE's reporting system. Basic acquisition data will be published electronically each fiscal year providing the same types of data available in past years through the Federal Procurement Report. Reports are available on GCE's Web Site <https://www.fpds.gov>.
