aZ5071.N3 no.95-19

The United States Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, and marital or familial status. (Not all prohibited bases apply to all programs). Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotape, etc.) should contact the USDA Office of Communications at (202) 720-5881 (voice) or (202) 720-7808 (TDD).

To file a complaint, write the Secretary of Agriculture, U.S. Department of Agriculture, Washington, D.C. 20250, or call (202) 720-7327 (voice) or (202) 720-1127 (TDD). USDA is an equal employment opportunity employer.

Rural Information Center

National Agricultural Library
U.S. Department of Agriculture
Beltsville, Maryland 20705

The Rural Information Center (RIC) is a joint project of the Extension Service and the National Agricultural Library (NAL). RIC provides information and referral services to local government officials, community organizations, health professionals and organizations, cooperatives, libraries, businesses, and rural citizens working to maintain the vitality of America's rural areas. The Center combines the technical, subject-matter expertise of Extension's nationwide educational network with the information specialists and resources of the world's foremost agricultural library.

The Office of Rural Health Policy in the Department of Health and Human Services (DHHS) and the NAL jointly created a Rural Information Center Health Service (RICHS) as part of the RIC. RICHS collects and disseminates information on rural health issues, research findings related to rural health, and innovative approaches to the delivery of rural health care services.

SERVICES:

Provide customized information products to specific inquiries including assistance in economic revitalization issues; local government planning projects; rural health issues; funding sources; and other related issues for the purpose of monitoring the quality of rural life.

Process a broad array of general and funding information requests on such topics as:

- Successful strategies, models, and case studies of community development projects
- Small business attraction, retention, and expansion
- Tourism promotion and development
- Recycling programs
- Community water quality
- Technology transfer to rural areas
- Closures, restructuring and diversification of rural hospital and clinics
- Agricultural health and safety
- Health programs, services, personnel issues
- State initiatives concerning rural health delivery issues

Refer users to organizations or experts in the field who can provide additional information.

Perform brief database searches of requested topics on a complimentary basis.

Furnish bibliographies and Rural Information Center Publication Series titles.

Identify current USDA and DHHS research and Cooperative Extension Systems programs.

Quick Bibliography Series

Document Delivery Services to Individuals

The National Agricultural Library (NAL) supplies agricultural materials not found elsewhere to other libraries.

Filling requests for materials readily available from other sources diverts NAL's resources and diminishes its ability to serve as a national source for agricultural and agriculturally related materials. Therefore, NAL is viewed as a library of last resort. Submit requests first to local or state library sources prior to sending to NAL. In the United States, possible sources are public libraries, land-grant university or other large research libraries within a state. In other countries submit requests through major university, national, or provincial institutions.

If the needed publications are not available from these sources, submit requests to NAL with a statement indicating their non-availability. Submit one request per page following the instructions for libraries below.

NAL's Document Delivery Service Information for the Library

The following information is provided to assist your librarian in obtaining the required materials.

Loan Service — Materials in NAL's collection are loaned only to other U.S. libraries. Requests for loans are made through local public, academic, or special libraries.

The following materials are not available for loan: serials (except USDA serials); rare, reference, and reserve books; microforms; and proceedings of conferences or symposia. Photocopy or microform of non-circulating publications may be purchased as described below.

Document Delivery Service — Photocopies of articles are available for a fee. Make requests through local public, academic, or special libraries. The library will submit a separate interlibrary loan form for each article or item requested. If the citation is from an NAL database (CAIN/AGRICOLA, *Bibliography of Agriculture*, or the NAL Catalog) and the call number is given, put that call number in the proper block on the request form. Willingness to pay charges must be indicated on the form. Include compliance with copyright law or a statement that the article is for "research purposes only" on the interlibrary loan form or letter. Requests cannot be processed without these statements.

Charges:

- Photocopy, hard copy of microfilm and microfiche – \$5.00 for the first 10 pages or fraction copied from a single article or publication. \$3.00 for each additional 10 pages or fraction.
- Duplication of NAL-owned microfilm – \$10.00 per reel.
- Duplication of NAL-owned microfiche – \$ 5.00 for the first fiche and \$.50 for each additional fiche per title.

Billing – Charges include postage and handling, and are subject to change. Invoices are issued quarterly by the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161. Establishing a deposit account with NTIS is encouraged. **DO NOT SEND PREPAYMENT.**

Send Requests to:

USDA, National Agricultural Library
Document Delivery Services Branch, PhotoLab
10301 Baltimore Blvd., NAL Bldg.
Beltsville, Maryland 20705-2351

Contact the Head, Document Delivery Services Branch in writing or by calling (301) 504-5755 with questions or comments about this policy.

ELECTRONIC MAIL ACCESS FOR INTERLIBRARY LOAN (ILL) REQUESTS

The National Agricultural Library (NAL), Document Delivery Services Branch accepts ILL requests from libraries via several electronic services. All requests must comply with established routing and referral policies and procedures. The transmitting library will pay all fees incurred during the creation of requests and communication with NAL. A sample format for ILL requests is printed below along with a list of the required data/format elements.

ELECTRONIC MAIL - (Sample form below)

<u>SYSTEM</u>	<u>ADDRESS CODE</u>
INTERNET.....	LENDING@NALUSDA.GOV
EASYLINK.....	62031265

Abstract: This paper describes the benefits to local economies from the conservation and management of designated wildlife sites in Scotland, from other conservation-related policy measures and from the expenditures of visitors attracted by the wildlife resource. Three case-study areas are selected for the measurement of visitor-induced benefits (Orkney, Wester Ross and Highland Perthshire) and the direct, indirect and induced income and employment effects of visitor spending are quantified. Although the mean expenditure per visitor is highest in Orkney, due to a longer mean length of stay and a higher proportion of the expenditure that could be attributed to the wildlife attraction, the largest wildlife impact is in Highland Perthshire due to the higher number of visitors to the area. The indirect employment impacts from site visitor expenditure are significant and substantially greater than either those associated directly with site management or those derived from ex-

Quick Bibliography Series

chequer transfers under other conservation-related policy measures. The implications for the agencies that manage wildlife sites are assessed and it is concluded that greater emphasis on enhancing the user and local area benefits may also have important indirect benefits for the activities of the conservation bodies themselves.

Language: English

Descriptors: North Carolina; South Carolina; Georgia; Tennessee; Outdoor recreation; State parks; Economic impact; Economic development; Amenity and recreation areas; Data collection; Tourist expenditure; Multipliers; Input output analysis; Computer software

Abstract: The economic impacts of recreational visits to state parks on the economies of North Carolina, South Carolina, Georgia, and Tennessee were estimated using the U.S. Forest Service IMPLAN input-output modeling system. Recreational expenditure data associated with state parks were obtained from the Public Area Recreation Visitors Study (PARVS). Results suggest that recreational spending may stimulate a considerable amount of economic activity in the state economies studied.

Hence, future research into the economic development potential of outdoor recreation seems warranted.

Abstract: Elements of popular culture, as exemplified in television, radio, books, and magazines, present images of rurality as wholesome and desirable. The extent to which these positive images are subscribed to by the general population was assessed using data from a statewide Pennsylvania sample. There was widespread acceptance of the mystique of rurality, with rural residents, older citizens and those with lower incomes and education somewhat more likely to endorse these images than their opposites. Moreover, belief in the rural mystique was related to various behavioral and consumer choices. The possible implications of these ideas for rural development strategies, especially rural tourism, are discussed.

The Cornell hotel and restaurant administration quarterly v. 33 (5): p. 41-49; 1993 Oct. Includes references.

Language: English

Descriptors: Customer relations; Quality standards; Tourist industry

Abstract: The hospitality industry's services taken as a whole can be thought of as a "value chain" that encompasses every step and service required from the time a customer decides to go on a vacation or business trip to the time she or he returns home. Each link in the chain represents an experience point for the customer, and every experience has high, moderate, or low value. Decision makers can better evaluate service oriented technology if they understand how that technology affects the value chain and, consequently, the quality of customers' experiences. Customers experience every link on the value chain, but their final evaluation is based on the quality of the overall experience. To maximize the total value the customer gets from the value chain, service-oriented technology should minimize exposure to or enhance low-value links, somewhat increase exposure to moderate-value links, and maximize exposure to high-value links. New technology should also serve to reduce the number of low-value experiences, replacing those with moderate- or high-value ones. Using the value-chain framework is a way to identify key relationships among service providers, increase revenues, reduce costs, foster value-added partnerships, and create a value-measurement system.
