

Chapter V

CONSULTATION AND COORDINATION

Chapter V

CONSULTATION AND COORDINATION

- I. *Introduction*
- II. *Public Involvement Activities*
- III. *Consultation and Coordination Process*
- IV. *Distribution List*

I. Introduction

This chapter documents the Bureau of Reclamation's (Reclamation) consultation and coordination activities during the preparation of this Final Environmental Impact Statement (FEIS) for Navajo Reservoir Operations. The public involvement activities are described, including the public scoping process, along with information on the activities that were implemented to solicit input from those agencies with jurisdictional authority, interest, or expertise in the activities or issues addressed in this FEIS.

II. Public Involvement Activities

Reclamation used several methods to obtain public input in developing the FEIS, including scoping meetings and dissemination of public information through project newsletters, news releases, paid advertisements, and a project website. These public involvement activities are described in more detail in the following sections.

Public Scoping Process

One of the steps in preparing this and other environmental impact documents is called "scoping," which is designed to help determine the scope of issues and alternatives to be analyzed in the document from the interest and perspective of the public. Scoping occurs as early as possible after a lead agency decides to prepare a FEIS under a process governed by the Council on Environmental Quality (oversight agency for the National Environmental

Policy Act [NEPA] process). The scoping process provides the general public, local agencies, affected Federal and State agencies, and others the opportunity to provide input on key issues and concerns they believe should be evaluated in the environmental document.

Reclamation announced its intent to prepare an EIS in a Notice of Intent (NOI) published in the *Federal Register* on October 1, 1999. A news release announcing the NOI was sent to approximately 300 parties, including Federal, Tribal, State, and local officials; agency representatives; conservation organizations; news media, and others.

The NOI also announced that a series of scoping meetings would be conducted in November 1999 to receive public input on issues to be addressed in the draft environmental impact statement (DEIS). The scoping meetings were held in November 1999 at Farmington and Albuquerque, New Mexico and Durango and Pagosa Springs, Colorado. In addition to the announcement contained in the *Federal Register*, meetings were also advertised in local newspapers in advance of their scheduled dates.

In all, a total of approximately 100 people attended the Farmington, Durango, and Albuquerque meetings. No individuals (public or agency representatives) attended the Pagosa Springs meeting. Transcripts of the oral comments given at the meetings were made and are part of the public record for the Navajo Reservoir Operations environmental impact statement (EIS). Interested or affected individuals, organizations, and agencies were also encouraged to submit written comments to Reclamation to be most effectively considered. Reclamation received eight letters during the comment period. The principal issues and concerns that were identified during public and internal scoping centered on:

- Endangered species
 - Effects of flows on endangered fish food base
 - Factors for recovery of endangered fish other than river flows
 - A system to monitor effects of the flow changes
 - Effectiveness of the San Juan River Basin Recovery Implementation Program (SJRBRIP) 7-year research effort (1992-1998)
 - Native and non-native fish interactions
 - Effects on endangered species other than Colorado pikeminnow and razorback sucker

 - Land use – effects of higher river flows and changes in reservoir water levels

 - Wetland/riparian vegetation – effects on downstream and reservoir shoreline riparian areas
-

- Fish and wildlife resources – effects of flows on fish spawning sites, the trout fishery, and wildlife nesting areas
 - Hydrology and water rights
 - Impacts to downstream irrigation and industrial diversion structures
 - Impacts to domestic water users
 - Flood control issues
 - Erosion effects of higher flows in the San Juan River
 - Impacts of Flow Recommendations on water supply
 - Water quality impacts
 - Cultural resources
 - Impacts to cultural resources in Navajo Reservoir basin or along the San Juan River
 - Indian Trust Assets/Environmental Justice
 - Effect on known legal interests in assets held in trust by the United States for American Indian (Indian) Nations/Tribes. The possibility of disproportionately high and adverse human health and environmental effects of its programs, policies, and activities on minority populations and low-income populations within the area of potential effect.
 - Social and economic resources
 - Impacts to the City of Farmington’s hydroelectric plant at Navajo Dam
 - Impacts to reservoir concessionaires
 - Impacts to the area economy (i.e., trout fishery and flat water boating, recreational uses)
 - Future water development under interstate compact apportionments
 - Delivery of water from Upper Basin States to Lower Basin States
 - Recreation resources
 - Impacts to trout fishery
 - Impacts to flat water boating
 - Impacts to rafting/boating on San Juan River
-

- Other issues and concerns
 - Removal of Navajo Dam
 - Modifying the dam outlet works
 - Project purpose and need and project scope
 - Adaptive management
 - Mitigation of potential impacts of high and low flows

On June 12, 2000, Reclamation held a public meeting to discuss agency plans to conduct a 5-day Summer Low Flow Test of 250 cubic feet per second (cfs) in the San Juan River. The test, to have been conducted from Navajo Dam to the confluence of the Animas River, was to analyze potential low flow impacts to the river, recreation, and diversion structures. Approximately 80 people attended the meeting held in Farmington, New Mexico. Because of drought conditions, the low flows would not have left enough water in the system to meet Flow Recommendations for the endangered fishes' critical habitat, and the test was postponed until 2001.

The Summer Low Flow Test was conducted from July 9 through July 15, 2001. Reclamation representatives attended meetings of various organizations and held two public meetings to discuss the Summer Low Flow Test. Approximately 65 people attended the public meetings held on April 4, 2001, in Farmington, New Mexico, and April 5 in Bluff, Utah. Reclamation received 35 written comments. Concerns cited included:

- Water quality degradation
- Difficulty diverting water for irrigation and municipal and industrial purposes
- Harm to the trout fishery below Navajo Dam
- River rafting problems from lower river flows near Bluff, Utah
- Loss of revenues by area businesses
- Problems generating power

Cooperators in the Summer Low Flow Test included Federal, State, and local governmental agencies, Indian Tribes/Tribal Nations, nonprofit organizations, area businesses, water users, and recreationists. A report summarizing the findings was made available to the public in April 2002.

Project Newsletters

Reclamation's public involvement activities have also included preparation and distribution of a series of newsletters intended to provide up-to-date information on preparation of the EIS for the Navajo Reservoir operations. Four newsletters were sent to approximately 300 individuals, agencies, and organizations during preparation of the DEIS.

Project Web Site

In addition to the newsletters, Reclamation established a link to its Web page, www.uc.usbr.gov, Environmental Programs, Navajo Dam and Reservoir, to provide information on the project's environmental review process, news releases, an EIS time line, and a site map. Interested parties can also download an electronic version of volume I of this EIS.

III. Consultation and Coordination Process

Interagency/intergovernmental coordination and consultation constitute an essential part of the EIS process, providing a forum in which close working relationships are developed with agencies and organizations that are affected by, or concerned about, a proposed project. Similar to the public scoping process, a key objective of a consultation and coordination program is to provide an opportunity for agencies and organizations to participate in the investigation of project alternatives and to provide input about specific project-related issues.

Coordination Activities

As the lead agency responsible for preparation of this EIS and subsequent documents, Reclamation invited Federal agencies and local, State, and Tribal governments with appropriate expertise or jurisdiction in the project area to participate in the NEPA process as cooperating agencies. These agencies included:

Federal agencies

- Bureau of Indian Affairs
- Bureau of Land Management
- Corps of Engineers

Environmental Protection Agency
Federal Energy Regulatory Commission
U.S. Fish and Wildlife Service (Service)
National Park Service, Glen Canyon National Recreation Area

Indian Tribes/Nations

Jicarilla Apache Nation
Southern Ute Indian Tribe
The Navajo Nation
Ute Mountain Ute Tribe

State of Colorado agencies

Colorado Water Conservation Board

State of New Mexico agencies

New Mexico Department of Game and Fish
New Mexico Interstate Stream Commission
New Mexico Environment Department

Local agencies

City of Farmington, New Mexico
San Juan Water Commission
Southwestern Water Conservation District

Reclamation coordinated and consulted with these cooperating agencies concurrently with the development of alternatives and preparation of the EIS. Activities with the cooperating agencies included regularly meeting with them, providing status reports concerning progress, convening project planning meetings, arranging conference calls, and facilitating regular interaction among the parties.

Status as a cooperating agency does not necessarily imply concurrence with all the conclusions presented in this document.

Consultation Activities

Reclamation and the Service have conferenced/consulted, both formally and informally, regarding potential impacts to protected species which may occur as a result of implementation of the Preferred Alternative. A list of the major actions and

correspondence between the agencies, in accordance with the Endangered Species Act (ESA), is included in the biological assessment included in volume II of this EIS. A Fish and Wildlife Coordination Act report and a final biological opinion are also included in volume II of the FEIS.

Under the Native American Graves Protection and Repatriation Act (NAGPRA), Reclamation has consulted with interested and concerned Indian Tribes and Nations as part of normal Navajo Reservoir operations. Tribal representatives include elected officials, recognized traditional and religious leaders, Tribal representatives and historians, and cultural committees. In addition, as part of Reclamation's resource management planning, Reclamation will develop and implement a cultural resource management plan for the Navajo Reservoir area.

Public Hearings on the DEIS

In September 2002, the DEIS was available to interested parties, including the agencies, organizations, and individuals in the distribution list (below), and copies of the technical appendices referenced in the DEIS were available from Reclamation upon request.

Copies of the DEIS were also available for public review and inspection at the following locations:

Bureau of Reclamation, Main Interior Building, Room 7060-MIB, 1849 C Street, NW, Washington, DC 20240-0001

Bureau of Reclamation, Denver Office Library, Denver Federal Center, Building 67, Room 167, Denver, Colorado 80225-0007

Bureau of Reclamation, Upper Colorado Regional Office, 125 South State Street, Room 6107, Salt Lake City, Utah 84138-1102

Bureau of Reclamation, Western Colorado Area Office, 835 East Second Avenue, Suite 400, Durango, Colorado 81301

Bureau of Reclamation, Western Colorado Area Office, 2764 Compass Drive, Suite 106, Grand Junction, Colorado 81506

New Mexico State Local Government Division, Attention: Ken Hughes, Bataan Memorial Building, Room 201, Santa Fe, New Mexico 87503

Libraries:*Colorado*

Cortez Public Library, Cortez, Colorado
Denver Public Library, Denver, Colorado
Durango Public Library, Durango, Colorado
Fort Lewis College Library, Durango, Colorado

Bloomfield Library, Bloomfield, New Mexico
Dine' College Library, Shiprock, New Mexico
Farmington Public Library, Farmington, New Mexico
San Juan College Library, Farmington, New Mexico

Utah

Blanding Public Library, Blanding, Utah

The public comment period lasted 90 days following publication of the Notice of Availability in the *Federal Register*. Public hearings on the DEIS were held to provide an opportunity for interested parties and agencies to present oral and written comments on the document and the proposed Navajo Reservoir operations. Written responses and public hearing statements are published in volume III of this FEIS. Public hearings on the DEIS were held at the following locations:

October 1, 2002	Farmington, New Mexico, Civic Center
October 2, 2002	Durango, Colorado, Doubletree Hotel
October 3, 2002	Bluff, Utah, Community Center

Over 300 written comment letters were received on the DEIS. Responses to the comments are also included in volume III.

The majority of the comments received expressed concern with adverse impacts of the Preferred Alternative on resources such as the trout fishery, recreation, water quality, and hydropower. Requests to look at other alternatives were included. There were also concerns expressed with the effect of the proposed action on future water development. Other commentors indicated that the Preferred Alternative was the only reasonable way to meet ESA obligations and protect water development.

IV. Distribution List

Federal Agencies

Advisory Council on Historic Preservation, Denver, CO
U.S. Department of the Army
 Corps of Engineers, Albuquerque, NM and Sacramento, CA
U.S. Department of Energy
 Federal Energy Regulatory Commission, San Francisco, CA
U.S. Department of the Interior
 U.S. Fish and Wildlife Service, Albuquerque, NM; Denver and
 Grand Junction, CO; and Washington DC
 Bureau of Indian Affairs, Albuquerque, Farmington, and Shiprock, NM;
 Monticello and West Valley City, UT; Chinle, AZ; and Towaoc, CO
 Bureau of Land Management, Moab, Bluff, and Monticello, UT and
 Farmington, NM
 Bureau of Reclamation, Washington DC; Salt Lake City, UT; Farmington, NM
National Park Service, Page, AZ and Washington, DC
 Office and Policy Analysis, Washington, DC
 Office of the Solicitor, Washington, DC
U.S. Environmental Protection Agency, San Francisco, CA; Dallas TX; and
 Denver, CO
U.S. Geological Survey, Albuquerque, NM; Reston, VA

U.S. Congressional Delegations

Colorado

 Senator Wayne Allard, Grand Junction, CO
