

## Appendix I

### SOCIOECONOMIC DATA – CHANGE IN EXPENDITURE IMPACTS (IMPLAN MODEL RUNS)

The following tables represent the results of IMPLAN input-output modeling used to determine the socioeconomic impacts of the Federal action alternatives for Chapter III, Affected Environment/Environmental Consequences, of this Navajo Reservoir Operations EIS. Impacts measured represent estimated changes in San Juan County, New Mexico expenditures resulting from projected reductions in out-of-state angler use on the San Juan River in the designated quality waters. Additional IMPLAN model runs also display the impacts of increased Navajo Indian Irrigation Project (NIIP) agricultural production and, conversely, the future impacts of reduced NIIP agricultural development in San Juan County, New Mexico.

Tables labeled "Output Impact" represent direct, indirect, induced, and total output impacts (measured in dollars) to industries affected by changes in out-of-state angler and agricultural production expenditures in the county. Additionally, tables labeled "Employment Impact" display the direct, indirect, induced, and total employment impacts in the county resulting from these changes in direct expenditures as related to the action alternatives.

**Output and employment impacts in San Juan County, New Mexico,  
resulting from an estimated 10-percent reduction in out-of-State anglers  
on the "quality waters" section of the San Juan River.**
