State	State Plan & last update	Management program	Test eligible animals	Testing done by	Herd Plan done by	Confirmation Testing	Allow fecal test to replace FLISA	Program entry	Fast track	Monitoring	Level 1	Level 2	Level 3	Level 4	Levels greater than 4	Herd Additions allowed (>=2 year old)	Herd Additions allowed (<2 year old)	Replacements raise off	Embryo Transfer/Artifical	Appeal ELISA	Appeal Fecal Culture	ID System
USDA Uniform Program Standards for the Voluntary Bovini Johne's Disease Control Programs	VBJDCP 2002	Management leve and Test positive level - A,B,C,D format optional	>=2 lactation (>=3 years old)	Accredited Veterinarian	Certified Voterinarian or State/Federal personnel	CFR regulations - organism detection test	Yes	ELISA test 30 plus risk assessment/ herd plan	Yes with declaration of 5 years free of clinical Johne's disease and ELISA test statistical subset of test eligible animals. Starts at level 2.	ELISA test 30 test eligible animals. Will maintain all levels.	ELISA test 30 test eligible animals and risk assessment/ herd plan	Must meet Level 10 F ast Track requirements plus ELISA test statistical subset within 10-14 month from Leve 1 testing.	Must meet Leve 2 requirements plus Fecal culture test statistical subset within 10-14 month from Leve 2 testing. Fast track may Fecal culture test only 30 animals.	Must meet Level 3 requirements plus ELISA test statistical subset within 10-14 month from Leve 3 testing.	No, but will allow	All animals from same or higher level; or (for levels ELSA test within 30 days of entering program herd and submission of fecal culture and tested at next round or herd testing; or (for level 4 level 2 or 3 status plus negative ELISA test within 30 days and submission of fecal culture and tested at next round of herd testing.	All animals of equal or greater herd status; or purchased animals tests at first herd test after 2 years of age	premises Must be raise with animals of equal status	Insemination Program herd may use semen and embryos provided Embryos are processed according to International Embryo Transfer Society protocios and semen is processed according to Certified Semen Services standards. Embryo transfer herd addition requirements.	By fecal culture provided that the new sample is submitted within 45 days of ELISA results. No change in status.	By necropsy of animal, full thickness biopsy with histopath and culture and fecal culture; or six separate fecal cultures from the animal. Status of the herd will be "suspended pending appeal"	USDA official eartags.
US Voluntary Johne's Disease Herd Status Program - USAHA model	USVJDHSP 1998		Matches Program Standards	Accredited Veterinarian	None required	Fecal Culture	Yes	ELISA test 30 test eligible animals	Yes with declaration of 5 years free of clinical Johne's disease and ELISA test statistical subset of test eligible animals. Starts at level 2.	Matches Program Standards	ELISA test 30 test eligible animals and biosecurity plan	Matches Program Standards	Matches Program Standards	Matches Program Standards	No, just continue monitoring	Matches Program Standards	All animals of equal or greater herd status; or from program herds one level below; non- program replacements are ineligible	Must be raise with animals of equal status	Program hard may use semen and embryos provided Embryos are processed according to International Embryo Transfer Society protocols and semen is processed according to Certified Society Protocols Embryo transfer recipients must med Embryo transfer recipients must med herd addition requirements.	By fecal culture provided that the new sample is submitted within 45 days of ELISA results. Status of the herd will be "suspended pending confirmation"	Matches Program Standards	permanent unique alphanumeric or producer ID with premises ID - USDA approved at level 4
