Mr. Ned Jerabek
Air Quality Bureau
New Mexico Environment Department
2048 Galisteo
Santa Fe, NM 87505

Dear Mr. Jerabek:

Los Alamos National Laboratory (LANL) has identified additional storage tanks that were originally omitted from the November 2002 Operating Permit application. Two of the tanks, located at TA-69, are new and were identified to NMED in an Air Quality Exemption Notice dated February 27, 2003. The additional tank was identified in LANL's ongoing tank survey. The following table describes the storage tanks.

Location	Date Installed	Capacity (gallons)	Diameter (ft)	Length (ft)	Roof Type	Liquid Stored
TA-69-53	2003	25,000	11	38.8	Fixed	Diesel
TA-69-54	2003	25,000	11	38.8	Fixed	Diesel
TA-35-301	1990	26,000	Cube with dimensions of: 10 ft x 21 ft x 21 ft (H x L x W)		Fixed	Mineral Oil

Other than the NSPS requirements in 40 CFR 60 Subpart Kb, to maintain documentation for the dimensions of the storage vessel and an analysis of the capacity of the storage tank (40 CFR §60.116b (a) and (b)), the tanks qualify as insignificant sources with air emissions less than 1 ton per year.

If and when EPA's proposed revision to the NSPS Subpart Kb becomes final, all of the tanks listed in this letter and in LANL's Operating Permit application will qualify as insignificant activities.

This information is also being submitted to EPA Region 6. In addition, a copy of this notice will be posted on our website (<http://www.airquality.lanl.gov/OpPermitGenInf.htm>). If you have any questions concerning this submittal, please contact me (505-665-0239) or Jackie Hurtle (505-665-4380) at LANL's Meteorology and Air Quality Group (RRES-MAQ), permitting team.

Sincerely,
