

**National Interagency Coordination Center  
Incident Management Situation Report  
Friday, January 9, 2009 – 0800 MST  
National Preparedness Level 1**

**National Fire Activity (Weekly Total)**

Initial attack activity: Light (275 new fires)  
 New large fires: 3 (\*)  
 Large fires contained: 2  
 Uncontained large fires: 1  
 Area Command Teams committed: 0  
 NIMOs committed: 0  
 Type 1 IMTs committed: 0  
 Type 2 IMTs committed: 0  
 Fire Use Teams committed: 0

\*\* Uncontained large fires do not include WFU or confine/contain incidents. \*\*

**Predictive Services Discussion:** Eastern New Mexico, western/central Texas and western Oklahoma will see gusty winds and low humidity today with periodic dry/windy conditions into next week. Florida and the coastal sections of the Carolinas will be dry with low humidity today followed by scattered showers on the weekend. Low humidity will return on Tuesday and Wednesday. Santa Ana winds are expected over southern California today and should continue into early next week.

### **Escape Routes**

An escape route is a preplanned and understood route to reach a safety zone.

- What are the primary concerns in choosing an escape route?
  - - Select the closest, least obstructed route.
    - Plan for more than one escape route.
    - Avoid an uphill escape.
    - Scout and clearly mark the route for visibility (aids during smoky situations or night operational periods).
  - - Determine escape time--consider slowest person, fatigue, and temperature factors.
    - Continuously reassess the situation with regard to work progress and additional resource arrivals.
    - Assure all line personnel are familiar with escape routes.
