		\$0	\$0	\$0	\$0	\$0	\$0	\$0	\$0	\$0	\$0	\$0	\$0

**NOTES:**

Unit costs have been updated using the most current projects and VA/PACES, to reflect the dynamics of the delivery of healthcare

Cost shown are averages to be used for establishing an order of magnitude. Actual costs will vary depending on complexity and unique conditions of each project.

Costs shown are for building construction only. Additional costs to be considered include: Pre-Design allowance; escalation to contract award date; construction contingencies; technical services; impact costs; utility agreements; site improvements; site utilities; CM fees; and current local market conditions.

Costs are as of the time of BOECKH Index period shown. Adjust to latest available BOECKH Index. Multiply unit costs by the current BOECKH Index and divide by the index shown in table.

Allow additional funds for known adverse sub-surface conditions, seismic, and hurricane loading.

Allow additional funds for special construction requirements such as: phasing; unusual site constraints; tie-in to existing structure; shoring; vertical expansion.

Allow additional funds for compliance with VA Physical Security Standards and Sustainability Guidelines for 5' outside of Building Envelope. Funds are included for Building Envelope.

Sitework and site utility costs will vary greatly for each project. Early identification of requirements is critical.

For conceptual estimates on projects up to \$25M, 15% added building cost is a reasonable rule of thumb for sitework and site utilities. Factor may decrease to 10% for larger projects.

Ambulatory Care is considered a "9 to 5" soft clinic - few heavy labs, diagnostic areas, or beds. Functions consist of those found in exam rooms, minor surgery, small radiology suites, clinics, etc.

Clinical Improvements include intensive clinical space - diagnostics, labs, surgical suites. These represent the most expensive departments.

**MARKET CONDITIONS:**

The construction market is subject to rapid changes brought on by natural disasters and global events.

Adjustments may be required, based on most current market surveys and industry reports.

For additional assistance, contact Bob Smoot (00CFM1B) at bob.smoot@va.gov or at 202-461-8220.

Wichita, KS	2,104.7	\$141	\$102	\$66	\$35	\$0	\$0	\$0	\$0	\$0	\$0	\$0	\$0
		\$0	\$0	\$0	\$0	\$0	\$0	\$0	\$0	\$0	\$0	\$0	\$0

**NOTES:**

Unit costs have been updated using the most current projects and VA/PACES, to reflect the dynamics of the delivery of healthcare

Cost shown are averages to be used for establishing an order of magnitude. Actual costs will vary depending on complexity and unique conditions of each project.

Costs shown are for building construction only. Additional costs to be considered include: Pre-Design allowance; escalation to contract award date; construction contingencies; technical services; impact costs; utility agreements; site improvements; site utilities; CM fees; and current local market conditions.

Costs are as of the time of BOECKH Index period shown. Adjust to latest available BOECKH Index. Multiply unit costs by the current BOECKH Index and divide by the index shown in table.

Allow additional funds for known adverse sub-surface conditions, seismic, and hurricane loading.

Allow additional funds for special construction requirements such as: phasing; unusual site constraints; tie-in to existing structure; shoring; vertical expansion.

Allow additional funds for compliance with VA Physical Security Standards and Sustainability Guidelines for 5' outside of Building Envelope. Funds are included for Building Envelope.

Sitework and site utility costs will vary greatly for each project. Early identification of requirements is critical.

For conceptual estimates on projects up to \$25M, 15% added building cost is a reasonable rule of thumb for sitework and site utilities . Factor may decrease to 10% for larger projects.

**MARKET CONDITIONS:**

The construction market is subject to rapid changes brought on by natural disasters and global events.

Adjustments may be required, based on most current market surveys and industry reports.

For additional assistance, contact Bob Smoot (00CFM1B) at bob.smoot@va.gov or at 202-461-8220.

**NOTES:**

Unit costs have been updated using the most current projects and VA/PACES, to reflect the dynamics of the delivery of healthcare

Cost shown are averages to be used for establishing an order of magnitude. Actual costs will vary depending on complexity and unique conditions of each project.

Costs shown are for building construction only. Additional costs to be considered include: Pre-Design allowance; escalation to contract award date; construction contingencies; technical services; impact costs; utility agreements; site improvements; site utilities; CM fees; and current local market conditions.

Costs are as of the time of BOECKH Index period shown. Adjust to latest available BOECKH Index. Multiply unit costs by the current BOECKH Index and divide by the index shown in table.

"Demolition Costs Only" is based on razing the entire structure and disposing of the waste material on-site. Haul & Dump is not included. Hazardous material abatement is not included.

"Haul & Dump" includes cost for a 20 mile haul and the appropriate dump fees for construction materials. Disposal of hazardous materials is not included. Additional funds should be included for known adverse conditions, length of haul, inflated dump fees, closed dump and refuge facilities

To calculate savings for mothballed structures, subtract which type of "Mothballing" is being utilized (Adjacent or Stand Alone) from the "Full" Operating Costs. The "Full" Operating Costs include: Electric, water, gas, sewage, major systems maintenance, building shell maintenance, janitorial, and security

Based on the type of "Mothballing" to be used, percentages have been utilized to account for maintaining the integrity of the building envelope, maintaining non-freezing conditions for sprinklers & utilities, maintenance, security, and ensuring JHCO compliance

Leasing yearly rates only includes: land, site improvements, building shell, taxes, utilities, insurance, shell and outside maintenance - Similar to a sole occupancy of a "Spec" building - HOUSEKEEPING COSTS ARE NOT INCLUDED - Assumes normal operating days and hours - NOT 24/7 Lease cost does not include initial build out (tenant improvement) of space for the specific function. To calculate build out cost, use "Total Renovation" cost for the specific building type.

**MARKET CONDITIONS:**

The construction market is subject to rapid changes brought on by natural disasters and global events. Adjustments may be required, based on most current market surveys and industry reports.

For additional assistance, contact Bob Smoot (00CFM1B) at bob.smoot@va.gov or at 202-461-8220.

# VISN COSTING GUIDE - BUILDING TYPE

## VISN 15: HEARTLAND Veterans Healthcare Network

### RELATIVE COST FACTOR COMPARISONS BETWEEN VAMCs

#### USE FOR STRATEGIC PLANNING PURPOSES ONLY - NOT FOR BUDGETING

PREPARED BY: Office of Construction & Facilities Management Cost Estimating & A/E Evaluation Service (00CFM1F)

Date Prepared: July 15, 2008

Index Basis: Boeckh Index = MAY-JUN 2008

Location	Boeckh Indexes	Cost Factor	EXPLANATION
Columbia, MO	2,949.0	1.23	Example: St. Louis, MO is 1.40 higher than Wichita, KS.
Kansas City, MO	2,751.3	1.14	To calculate, use St. Louis, MO's factor of 1.23
Leavenworth, KS	2,751.3	1.14	and divide Wichita, KS's factor of 0.88 into it.
Marion, IL	2,949.0	1.23	That is $1.23/0.88 = 1.40$ .
Popular Bluff, MO	2,949.0	1.23	If one dollar (\$1.00) was spent in Wichita, KS
St. Louis, MO	2,949.0	1.23	then to get the equivalent building in St. Louis, MO
Springfield, IL	2,797.1	1.16	one dollar and forty cents (\$1.40) would be required.
Topeka, KS	2,285.2	0.95	
Wichita, KS	2,104.7	0.88	Example: Topeka, KS is 0.82 of Kansas City, MO.
		0.00	This is calculated by dividing Topeka, KS's cost factor of 0.95
		0.00	by Kansas City, MO's cost factor of 1.14 or $0.95/1.14 = 0.83$ .
		0.00	That means that for every dollar (\$1.00) spent in Kansas City, MO
		0.00	it would cost eighty-three cents (\$0.83)
		0.00	for an equivalent building in Topeka, KS.
		0.00	
		0.00	These relative cost factors are based on
		0.00	the Boeckh Indexes for MAY-JUN 2008,
		0.00	and are useful to obtain quick rough ideas of
		0.00	probable costs relative from one city to another.
		0.00	
		0.00	REMINDER: Each project is unique.
		0.00	This document - for strategic planning only

In addition, local economic market conditions can significantly impact costs.

For additional assistance, contact Bob Smoot (00CFM1B) at bob.smoot@va.gov or at 202-461-8220.
