Notes:

- The "ratio" displays the number of units of QS that yield one pound of annual IFQ.
- QS Pools include small amounts of QS in "Reserve" (QS that is yet to be issued) and QS that is "Restricted" (QS that has been issued, but which does not yield IFQ to its holder).
- IFQ TACs do not include pounds that have been set aside for the CDQ program.
- Halibut weights are displayed in net pounds, sablefish weights in round pounds.
- Areas are shown in alphabetic order.
- The sablefish allocations and IFQ permits issued earlier in 2008 for the SE and WY Districts have been revised under a Federal Register (FR) correction notice filed and effective March 14, 2008. The change was required because the Annual Specifications of Groundfish TAC were incorrect as originally published in the FR, and the IFQ permits were based on those TACs.
