

### Estimated Number of Infants Identified with Hearing Loss that are Enrolled in Early Intervention (2003)

Number of States and Territories Reporting: 38

State / Territory	# Live Births	# Screened	% Screened	# Identified with Hearing Loss	# Intervention	% Intervention	Notes
Alaska	9,959	8,081	81.14	12	8	66.67	Incomplete data because the database was still under development.
Arkansas	37,132	34,185	92.06	37	36	97.30	
California	541,834	304,469	56.19	473	256	54.12	Only hospitals with certified Newborn Hearing Screening Programs are required to report data to the State. This means data is not available for all of the infants that may have received a hearing screening. It is possible that more infants are enrolled and receiving early intervention than are reflected in these numbers.
