

Small Business Profile: NEVADA

Small businesses make a significant contribution to the U.S. economy, and in 2003, they were the engine of Nevada's economic performance. Nationally, half of U.S. non-farm private output and employment is generated by small firms with 500 or fewer employees; in Nevada, small business owners—including women, minorities, and home based individuals—were leaders in the state's economy in 2003. The Office of Advocacy's *Small Business Profile* reports on small businesses in the state using the most currently available data.

Number of Businesses. The estimated total number of small businesses in Nevada in 2003 was 166,000.¹ Of the 48,929 employer firms in 2003, 95.6 percent or an estimated 46,800 were small firms. The estimated number of employer businesses increased by 3.4 percent in 2003. The most recent data available show that non-employer businesses numbered 119,228 in 2001. Self-employment increased by 3.3 percent, from 53,898 in 2002 to 55,681 in 2003. (Source: U.S. Dept. of Labor, Employment and Training Administration; U.S. Dept. of Commerce, Census Bureau; U.S. Dept. of Labor, Bureau of Labor Statistics.)

Women-Owned Businesses. Self-employment by women decreased by 9.5 percent, from 21,971 in 2002 to 19,884 in 2003 and represented 36 percent of self-employed persons in the state. Women-owned businesses generated \$6 billion in revenues, employed 49,477 workers, and constituted 33,300 firms or 25.7 percent of all firms in 1997. (Sources: U.S. Dept. of Labor, Bureau of Labor Statistics; U.S. Dept. of Commerce, Census Bureau.)

Minority-Owned Businesses. In 1997, 23 percent or 3,500 of the minority-owned businesses in the state were employer firms, and they generated 88.2 percent of the total minority-owned business revenue of \$3.5 billion. There were 6,600 Hispanic-owned businesses; 2,800 Black-owned businesses; 5,000 Asian and Pacific Islander-owned businesses; and 1,200 American Indian and Alaskan Native-owned businesses in 1997. (Source: U.S. Dept. of Commerce, Census Bureau.)

Business Turnover. The estimated number of new employer businesses was 9,749 in 2003, which is 10.5 percent more than

the previous year. Business bankruptcies decreased by 30.5 percent, and totaled 321 in 2003. Business terminations increased by 3.1 percent and numbered 8,939 in 2003. (Source: U.S. Dept. of Labor, Employment and Training Administration; Administrative Office of the U.S. Courts; U.S. Dept. of Commerce, Census Bureau.)

Employment. Small businesses with fewer than 500 employees numbered 38,951 in 2001 and employed 399,130 people or 43.5 percent of the state's non-farm private workforce (Table 1).² Total net employment gain in the state amounted to 11,426 between 2000 and 2001, and 12,095 jobs were gained in MSAs (metropolitan statistical areas). During the same time period, firms with fewer than 20 employees gained 14,244 jobs. (Source: U.S. Dept. of Commerce, Census Bureau, Statistics of U.S. Businesses. Note: Urban (MSA) and rural (non-MSA) employment data is available at: www.sba.gov/advo/stats/data.html.)

Small Business Income. Small business proprietors' income in 2003 increased by 6.7 percent, from \$4.7 billion in 2002 to \$5 billion in 2003. (Source: U.S. Dept. of Commerce.)

Finance. Small firms typically use commercial bank lenders and rely on local bank services. Over the last five years there has been a gradual decline in the number of banks in Nevada (Table 3). The Office of Advocacy has identified banks in each state that make the most loans to small businesses. This information is available in its banking studies available at www.sba.gov/advo/stats.

¹ The Office of Advocacy's estimate of the total number of state small businesses is based on the percent of small businesses (2001 Census Bureau firm size data) multiplied by the total number of employer businesses in 2003 (Dept. of Labor). To this total, we add the 2001 number of non-employer firms (Census Bureau).

² The number of employers listed in Table 1 is not directly comparable to the figures listed in the *Number of Businesses* section due to different data sources.

Table 1. Firms and Employment in Nevada by Industry and Firm Size, 2001 (Thousands)

Industry	Non-employer Firms	Employer Firms			Employment
