

# FDI FUNDING BENEFIT PER USER CALCULATIONS

## Site funding per user

- 1 – FY 2007 funds for each site are reported by Area Offices. Funds for some sites include step-down benefits from other Area programs and sites.
- 2 – A standard % is discounted by budget category to match services in the FEHP benefits package
- 3 – Balance of funds are divided by the site user count
- 4 – Site level funds are collapsed and applied at an average rate for a higher level group if small area quality control flags are raised. See posting “FDI Quality Control Practices”

## Area-wide step down funding per user

- 1 – Area Offices report FY 2007 funds managed at an Area level for programs that provide services within the Area and support to constituent sites.
- 2 – A standard % is discounted by budget category to match services in the FEHP benefits package
- 3 – Balance of Area-wide funds are divided by Area user count
- 4 – The resulting \$ per user is the benefit value per user for shared Area-wide programs, services, and support. Alaska Area calculated the Area-wide step down and included it in site funding. The negative Area-wide step downs values represent exclusions related to CHAP and regional travel costs (do not match FEHP).

## Facility amortized use value per user

- 1—Because government built health care facilities are “prepaid” an intangible use value is calculated (e.g. a cost avoidance that is otherwise paid from annual funding sources.)
- 2—The OEHE provided a recent list of federally supported facilities and replacement cost (see “Federally Supported Bldgs v3.pdf”
- 3—A use value is calculated for government owned buildings for a 40 year life expectancy amortized at 4%. This value is zero for tribal sites that own facilities, even if originally constructed by the government.

## IHS-wide step down funding per user

- 1 – FY 2007 funds managed at the HQ level for programs that provide services IHS-wide and support to Areas and sites is reported by HQ
- 2 – A standard % is discounted by budget category to match services in the FEHP benefits package
- 3 – Balance of IHS-wide funds are divided by the IHS user count. Sites that have not yet taken HQ shares have a higher value than those that have taken shares.
- 4 – The result is the estimated benefit value per user of IHS-wide programs, services, and support.
