

Private Remote Sensing System License Public Summary

On December 14, 2000, the National Environmental Satellite, Data and Information Service of the National Oceanic and Atmospheric Administration, an agency of the U.S. Department of Commerce, issued or otherwise granted a License (the "License") to:

DigitalGlobe, Inc.
1601 Dry Creek Dr.
Suite 260
Longmont, CO 80503
Telephone # 303-684-4048
Website: www.digitalglobe.com

to operate a private, commercial, space-based, remote sensing system named M-5 Multi-Spectral.

5 Meter Multi-Spectral Systems, a low-earth orbit multi-spectral imaging satellite system, is designed to collect 5 meter resolution multi-spectral ground sample distance imagery at the proposed 460 kilometer altitude with sun synchronous inclination.
