

**Table 6-1: Typical Content of Hazard-Specific Appendices to Core Functional Annexes**

<i>Functional Annex</i>	<i>Hazard-Specific Appendix Topics</i>
<b>Direction and Control</b>	<ul style="list-style-type: none"> <li>★ Response actions keyed to specific time periods and phases.</li> <li>★ Damage assessment.</li> <li>★ Debris removal.</li> <li>★ Urban Search and Rescue (US&amp;R).</li> <li>★ Utilities and lifeline repairs.</li> <li>★ Inspection, condemnation, and demolition of structures and buildings.</li> <li>★ Protective gear for responders.</li> <li>★ Issuance of radioprotective drugs.</li> <li>★ Detection equipment and techniques.</li> <li>★ Laboratory analysis services.</li> <li>★ Containment and cleanup teams.</li> <li>★ Actions to ensure that the area directly affected by the disaster is secure and safe enough for the return of evacuated populations or for the continued presence of those who did not evacuate.</li> </ul>
<b>Communications</b>	<ul style="list-style-type: none"> <li>★ Provisions that have been made to ensure that effects associated with a particular hazard do not prevent or impede the ability of response personnel to communicate with each other during response operations.</li> </ul>
<b>Warning</b>	<ul style="list-style-type: none"> <li>★ Hazard-unique public warning protocols (including warning of custodial populations).</li> <li>★ Required or recommended notifications of State and Federal officials.</li> </ul>
<b>Emergency Public Information</b>	<ul style="list-style-type: none"> <li>★ Information the public will need to know about the particular hazard (e.g., special evacuation routes and shelters, in-place protective actions).</li> <li>★ Means that will be used to convey that information to the public.</li> </ul>
<b>Evacuation</b>	<ul style="list-style-type: none"> <li>★ Evacuation options and their timing.</li> <li>★ Special exclusion zones for the particular hazard (e.g., down- and cross-wind areas for nuclear power and major chemical plants; high risk areas for nuclear weapon detonation; coastal areas subject to flooding caused by storms, hurricane, tidal surge).</li> <li>★ Evacuation routes.</li> <li>★ Transportation resources to support mass evacuation.</li> </ul>
<b>Mass Care</b>	<ul style="list-style-type: none"> <li>★ Shelter locations outside the area vulnerable to the hazard.</li> <li>★ Structural survivability requirements for shelters, and application of mitigation measures.</li> <li>★ Protection of shelter occupants from the effects of the hazard (e.g., radiological hazards).</li> <li>★ Special medicines/antidotes for shelter occupants.</li> <li>★ Food/water stocks to support extended stays (over 72 hours).</li> <li>★ Capability to decontaminate people exposed to hazardous materials.</li> </ul>
<b>Health and Medical</b>	<ul style="list-style-type: none"> <li>★ Unique health consequences and treatment options for people exposed to the hazard.</li> <li>★ Environmental monitoring and decontamination requirements.</li> </ul>
<b>Resource Management</b>	<ul style="list-style-type: none"> <li>★ Provisions for purchasing, stockpiling, or otherwise obtaining special protective gear, supplies, equipment, and medical supplies needed for response tasks and to meet the immediate needs of disaster victims.</li> </ul>
