November 2000

Special Report 199

ACKNOWLEDGMENTS

We acknowledge the assistance provided by Steven Smith, Jennifer Attak and Evey Fisher for their work on this project. Appreciation is also expressed to several individuals with the National Resources Conservation Service in Little Rock, AR, especially to Rick Fielder, Larry Ward, Marcella Callahan, Johnny Duke and Charles Fultz. Drs. S. Chapman and R. Norman reviewed the manuscript. The Soil and Water Conservation Commission and the Arkansas Agricultural Experiment Station provided the funding for this work.

Disclaimer: the soils in these GRASS mansets were digitized by the Soil Physics Laboratory in the Crop, Soil, and Environmental Sciences Department, University of Arkansas. These data have not been certified by the Natural Resources Conservation Service (NRCS) for SSURGO standards. As a result, the NRCS and the Soil Physics Laboratory are not responsible for any loss or damage directly or indirectly related to these data.

Edited by Robin Bodishbaugh
