Precipitated at 40° C, washed with a 1-percent solution of KNO3 and titrated with alkali standardized by the use of acid potassium phthalate and the ratio 23NaOH:1P.
b 1-g sample burned in oxygen at 1,425° C and sulfur dioxide absorbed in starch-iodide solution. Iodine liberated from iodide by titration, during the combustion, with standard KIO3 solution. Titer based on 93 percent of the theoretical factor.
c Value obtained by standardizing the titrating solutions by means of sodium oxalate through KMnO4 and Na₂S₂O₃ and the use of the ratio 21:1S.
d Potentiometric titration.
Molybdenum-blue photometric method. See J. Research NBS 26, 405 (1941) RP1386.
f Double dehydration with intervening filtration.

z Diethyldithiocarbamate photometric method. See J. Research NBS 47, 380 (1951) RP2265.

h Chromium separated from the bulk of the iron in a 10-g sample by hydrolytic precipitation with NaHCO3, oxidized with persulfate, and titrated potentiometrically with ferrous ammonium sulfate.

i Vanadium separated as in (h), oxidized with HNO3, and titrated potentiometrically with ferrous ammonium sulfate.

i Sulfuric acid digestion for 3 hours of a 1-g sample. See J. Research NBS 43, 201 (1949) RP2021.

k Sulfuric acid dehydration.
l Diphenylcarbazide photometric method.

1 Diphenylcarbazide photometric method.

Titrating solution standardized with a standard steel.

o Diethyldithiocarbamate photometric method.
p FeSO₂-(NH₂)S₂O₃-KMnO₄ titration.
Solution in diluted HCl (1+2).
Absorbed in ammoniacal cadmium chloride.
Copper-ammonia complex photometric method.
Spectrographic determination.
u Finished by electrolysis.

v Dimethylglyoxime precipitate titrated with cyanide. w Ether separation on a 10-g sample. Vanadium pre-cipitated with cupferron and titrated with KMnO₄.

* Weighed as ammonium phosphomolybdate.

y Solution in diluted HCl (3+1).

Chromium separated as in (h), and oxidized with

List of Analysts

- 1. Ferrous Laboratory, National Bureau of Standards, J. I. Shultz, in charge. Analysis by R. E. McIntyre, E. June Maienthal, Lorna J. Tregoning.
- D. J. Hallisey, Jones and Laughlin Steel Corporation, Aliquippa Works, Aliquippa, Pa.
 E. T. Saxer, Jones and Laughlin Steel Corporation, Cleveland Works, Cleveland, Ohio.
- J. E. Spittle, Ford Motor Co., Dearborn, Mich.
 C. V. Rooney, Columbia-Geneva Steel Division. United States Steel Corporation, Geneva, Utah.
- 6. J. B. Armstrong, Bethlehem Steel Co., Sparrows Point Plant, Sparrows Point, Md.
- 7. W. R. Angell, United States Navy Metals Laboratory, Munhall, Pa.

The steel for the preparation of this standard was furnished by the Jones and Laughlin Steel Corporation.
