

## Technical Standards

The National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

## Environment

We have analyzed this rule under Commandant Instruction M16475.ID which guides the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have concluded that there are no factors in this case that would limit the use of a categorical exclusion under section 2.B.2 of the Instruction. Therefore, this rule is categorically excluded, under figure 2–1, paragraph (34)(g), of the Instruction, from further environmental documentation. This rule fits category (34)(g) as it establishes a safety zone.

A final “Environmental Analysis Check List” and a final “Categorical Exclusion Determination” will be available in the docket where indicated under **ADDRESSES**.

## DEPARTMENT OF VETERANS AFFAIRS

### 38 CFR Part 3

**RIN 2900–AG15**

### Disease Subject to Presumptive Service Connection; Correction

**AGENCY:** Department of Veterans Affairs.

**ACTION:** Correcting amendment.

**SUMMARY:** This document contains a correction to the regulations of the Department of Veterans Affairs (VA) that governs presumptive service connection for certain diseases from exposure to ionizing radiation during military service. This correction is required in order to amend a cross-reference in the regulation. No substantive change to the content of the regulations is being made by this correcting amendment.

**DATES:** *Effective Date:* May 28, 2008.

**FOR FURTHER INFORMATION CONTACT:** Tracy Wang, Office of Regulation Policy

and Management (00REG), Department of Veterans Affairs, 910 Vermont Ave., NW., Washington, DC 20420, (202) 461–4902.

**SUPPLEMENTARY INFORMATION:** VA published a final rule in the **Federal Register** on April 27, 1993 (See 58 FR 25563), to implement Section 2 of the Veterans’ Radiation Exposure Amendments of 1992, Public Law 102–578, which amended 38 U.S.C. 1112(c) to repeal the requirement that, to be presumed service connected, specified diseases of veterans who participated in a radiation-risk activity to become at least 10 percent disabling within 40 years after the veterans’ last exposure to radiation. Accordingly, VA removed 38 CFR 3.309(d)(3) and redesignated § 3.309(d)(4) as the new § 3.309(d)(3). However, VA neglected to amend the reference to the redesignated § 3.309(d)(3) that appears at § 3.309(d)(3)(vii)(B). This document corrects that omission by removing “(d)(4)(vii)(A)” and adding, in its place, “(d)(3)(vii)(A)”.

## List of Subjects in 38 CFR Part 3
